Special Representative for Trade Negotiations depending upon the quantity of color television receivers actually exported from Taiwan and entered into the United States during the period July 1, 1978, through January 31, 1979, inclusive, as determined from U.S. Customs data. If the quantity actually exported from Taiwan and entered into the United States exceeds 368,000 units, the amount of the excess shall be deducted from the quota quantity of 127,000 units. If the quantity actually exported from Taiwan and entered into the United States is less than 368,000 units, the amount of the deficiency shall be added to the quota quantity of 127,000 units. The quota quantity applicable to item 923.81 shall be adjusted by the Special Representative for Trade Negotiations depending upon the quantity of color television receivers actually exported from the Republic of Korea and entered into the United States during the period December 1, 1978, through January 31, 1979, inclusive, as determined from U.S. Customs data. If the quantity actually exported from the Republic of Korea and entered into the United States exceeds 122,000 units, the amount of the excess shall be deducted from the quota quantity of 153,000 units. The above adjustments are to be effective on and after the date of their publication in the FEDERAL REGISTER.

(b) by inserting in numerical sequence the following new provisions:

"Item	Articles	Quota Quantity (in units)
	Whenever the respective aggregate quantity of color television receivers and subassemblies thereof specified below for items 923.74 through 923.83, inclusive, the product of a specified foreign country, has been exported in any restraint period from that country and has been entered, no article in such item the product of such country exported during such restraint period may be entered, except as provided in headnote 5:	
	Taiwan:	
	Color television receivers, having a picture tube, provided for in item 685.20:	
923.74	If exported during the period from February 1, 1979, through June 30, 1979, inclusive	127,000
923.76	If exported during the period from July 1, 1979, through June 30, 1980, inclusive	373,000
	Printed circuit boards and ceramic substrates with components assembled thereon, for color television receivers; subassemblies containing one or more of such boards or substrates, except tuners or convergence assemblies; all the foregoing not having a picture tube, and entered with components enumerated in headnote 5(a)(i) and with all or part of a chassis frame, provided for in item 658.20:	
923.78	If exported during the period from February 1, 1979, through June 30, 1979, inclusive	270,000
923.79	If exported during the period from July 1, 1979, through June 30, 1980, inclusive	648,000
	Republic of Korea:	
	Color television receivers, having a picture tube, provided for in item 685.20; printed circuit boards and ceramic substrates with components assembled thereon for color television receivers and subassemblies containing one or more of such boards or substrates (except tuners or convergence assemblies), all the foregoing not having a picture tube, and entered with components enumerated in headnote 5(a)(i) and with all or part of a chassis frame, provided for in item 685.20:	
923.81	If exported during the period from February 1, 1979, through October 31, 1979, inclusive	153,000
923.83	If exported during the period from November 1, 1979, through June 30, 1980, inclusive	136,000."

Order of January 26, 1979

Designating Director of the White House Military Office To Classify National Security Information as "Top Secret"

Pursuant to the provisions of Section 1–201 of Executive Order 12065 of June 28, 1978, entitled "National Security Information," I hereby designate the Director of the White House Military Office to classify information originally as "Top Secret."

This Order shall be published in the FEDERAL REGISTER.

Jimmy Carter

THE WHITE HOUSE,
January 26, 1979.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER XV—NATIONAL STUDY COMMISSION ON RECORDS AND DOCUMENTS OF FEDERAL OFFICIALS

Removal of CFR Chapter

EDITORIAL NOTE: The National Study Commission on Records and Documents of Federal Officials was established by authority of Pub. L. 93-526 (89 Stat. 1695). Regulations establishing Chapter XV were published at 41 FR 47910, Nov. 1, 1976.

The National Study Commission on Records and Documents of Federal Officials was terminated on May 30, 1977, as provided by Pub. L. 93-526 (89 Stat. 1695), as amended by Pub. L. 94-261 (90 Stat. 326).

Since the National Study Commission on Records and Documents of Federal Officials has been terminated, the Director of the Office of the Federal Register, pursuant to 1 CFR 18.2 and in order to keep the CFR current, hereby removes from the *Code of Federal Regulations*, Title 5, Chapter XV, National Study Commission on Records and Documents of Federal Officials.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Regulation 183]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period January-28-February 3, 1979. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: January 28, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, (202) 447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, and upon other information, it is found that the limitation of handling of lemons, as hereafter provided, will tend to effectuate the declared policy of the act. This regulation has not been determined significant under the USDA criteria for implementing Executive Order 12044.

The committee met on January 23, 1979, to consider supply and market conditions and other factors affecting the need for regulation and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is somewhat slower.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until February 28, 1979 (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 910.483 Lemon Regulation 183.

Order. (a) The quantity of lemons grown in California and Arizona which may be handled during the period January 28, 1979, through February 3, 1979, is established at 205,000 cartons.

(b) As used in this section, "handled" and "carton(s)" mean the same as defined in the marketing order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: January 25, 1979.

D. S. KURYLOSKI,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[Specifications for Bale Packaging Materials, Amdt. 2]

PART 1427—COTTON

Subpart—Specifications for Bale Packaging Materials; Official Tare Weights; Acceptance Materials

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final Rule.

SUMMARY: The purpose of this rule is to provide that (1) conventional hot rolled steel ties and buckles may be used only on flat bales, modified flat bales and bales compressed at a warehouse, (2) all ties which are underneath the wrapping material shall be wire or high tensile steel strapping only, (3) T-2 jute bagging is no longer an eligible wrapping, (4) bales wrapped with 4 pound cotton bagging must be tied with wire or high tensile steel strapping only and (5) to provide a table of official tare weights. This rule is needed in order that producers and others will know which materials are acceptable to CCC and the official tare weights of such material.

EFFECTIVE DATE: January 29, 1979.

V 4 4 / 2 0

ADDRESS: Price Support and Loan Division, ASCS, USDA, 3741 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Dalton J. Ustynik, ASCS, 202-447-6611.

SUPPLEMENTARY INFORMATION: On September 1, 1978, Commodity Credit Corporation (CCC) published in the FEDERAL REGISTER 43 FR 39118, a notice that the Department proposed to make certain determinations concerning the 1979 crops of upland and extra long staple cotton. Such determinations included a determination of the specifications for bale packaging materials applicable to 1979 crop cotton pledged to CCC for price support loans.

Four responses were received concerning the specifications. Three recommended adopting the specifications as proposed by the Cotton Industry Bale Packaging Committee and one recommended that all wrapping material contain at least 85 percent cotton. After consideration of all responses to the notice and recommendations made by the Cotton Industry Bale Packaging Committee, it has been determined that the specifications will be amended to provide that all ties which are underneath the wrapping material shall be wire or high tensile steel strapping, that conventional hot rolled steel ties and buckles may be used only on flat bales and bales compressed at a warehouse, that T-2 type jute bagging shall be eliminated as an approved wrapping material, and 4 pound cotton bagging must be tied with wire or high tensile steel strapping and to provide a list of official tare weights.

FINAL RULE

7 CFR Part 1427 is amended as follows, effective as to the 1979 and subsequent crops. The material previously appearing in these sections remains in full force and effect as to the crop years to which it was applicable.

1. In order to provide that any bale packaging material carried over from the 1978 crop year may be used to wrap 1979 crop cotton, § 1427.1901 is amended to read as follows:

§ 1427.1901 Purpose.

This subpart is for the purpose of announcing the specifications applicable to bale packaging materials for packaging the 1978 and subsequent crops of cotton tendered to CCC for loans, unless otherwise approved by the Executive Vice President, CCC, or his designee: *Provided, however,* that all bales of cotton packaged and identified with the testing programs of the Cotton Industry Bale Packaging Committee sponsored by the National Cotton Council of America will be exempt from the provisions of this subpart, and any bale packaging materials carried over from the 1977 crop which were eligible for packaging 1977 crop loan cotton also may be used to package 1978 crop cotton pledged for loans, and any bale packaging materials carried over from the 1978 crop which were eligible for packaging 1978 crop loan cotton may also be used to wrap 1979 crop cotton pledged for loans.

2. In order to provide that all ties which are underneath the wrapping material shall be wire or high tensile steel strapping, the introductory paragraph of § 1427.1902 is amended to read as follows:

§ 1427.1902 Specifications for bale ties and buckles.

Any fixed length bale ties used on flat bales shall not exceed 10 feet 3 inches in length, excluding overlap. All ties and buckles or fasteners must be coated or finished with a rust inhibitor. All ties which are underneath the wrapping materials shall be wire or cold rolled high tensile steel strapping.

* * * * *

3. In order to provide that conventional hot rolled steel ties and buckles may be used only on flat bales, modified flat bales and bales compressed at a warehouse, paragraph 1427.1902(b) is amended to read as follows:

(b) Conventional hot rolled steel ties and buckles. The total weight of bale ties and buckles to tie each bale of cotton shall not be less than 8½ pounds. Such ties may be used only on flat, modified flat, and bales compressed at a warehouse.

4. In order to eliminate T-2 type jute bagging as an approved bale wrapping material, § 1427.1903(d) is deleted.

§ 1427.1903 Specifications for bagging [Amended]

* * * * *

(d) [Deleted]

* * * * *

5. In order to provide that bales wrapped with 4 pound cotton bagging must be tied with wire or high tensile steel strapping, § 1427.1903(g)(1) is amended to read as follows:

* * * * *

(g) *Cotton bagging*—(1) *General requirements.* Bagging made from 100 percent cotton may be used to wrap flat bales stored only in the States of Alabama, Florida, Georgia, North Carolina, South Carolina, and Virginia, and on gin standard density and gin universal density bales stored in all States. The bagging must weigh not less than 7.7 ounces per square yard with a minimum weight of 4 pounds per pattern for flat bales, 3.1 pounds for gin standard density bales, and 3 pounds for gin yniversal density bales, at 8.5 percent moisture content (not moisture regain). Each panel of bagging must not be less than 112 inches in length and 48 inches in width for flat bales, 100 inches in length and 42 inches in width for gin standard density bales, and 96 inches in length and 42 inches in width for gin universal density bales. Each panel must be constructed with true selvages on each side. Bales wrapped with such bagging must be tied with wire or high tensile strapping.

* * * * *

§ 1427.1904 [Amended]

6. In order to eliminate additional test procedures for T-2 type new jute bagging, § 1427.1904(1) is deleted.

7. In order to provide a table of official tare weights for CCC loan purposes, § 1427.1905 is amended to read as follows:

§ 1427.1905 Official tare weights.

The following table shows official CCC tare weights for various combinations of approved wrapping material. CCC will not accept any bales for loans which carry a tare weight different than the one shown below:

Wrapping material	Bale ties	
	Wire or high tensile steel strapping [2]	Hot rolled steel ties with buckles [6]
Woven Polypropylene [1]	5	11
Polyethelene bags,[3] burlap spiral bags, cotton	7	
Nine-pound compact jute [4] for use on all bales and salvage jute on gin universal density and gin standard density bales only	12	18
New twelve-pound jute [4] and salvage jute on flat and modified flat bales only	15	21

[1] *Woven polypropylene* can be identified by its pale yellow color. This category includes all patterns of polypropylene including two sheets, half bag/sheet combinations and spirial sewn bags. Such material must meet all other requirements in § 1427.1903(1).

[2] *Polyethelene bags* can be identified by the clear color. The total tare weight is printed on the bag. *Burlap spiral* bags can be identified by the lightweight burlap fabric sewn to form a bag which completely encloses a bale. *Cotton bagging* is any packaging material made from all cotton fiber. Bagging must meet all other requirements for that type of bagging set forth in § 1427.1903 (h), (f), and (g).

[3] *Nine-pound compact jute* can be identified by the dark blue or black center marking yarns on each panel of bagging. *Salvage jute* is commonly referred to as sugar bagging and can be identified by seams and markings indicating that the material was previously used for other commodities. Such bagging must meet all other requirements as set forth in § 1427.1903 (b), (c), and (e)(3).

[4] *Twelve-pound new jute* can be distinguished from other approved new jute panels by the absence of center marking yarns. Salvage jute can be identified by seams and markings indicating that the material was previously used for other commodities. Such bagging must meet all other requirements as set forth in § 1427.1903(a), (e)(1), and (e)(2).

[5] Wire or strapping includes all wire or high tensile steel strapping other than conventional hot rolled steel ties with buckles and must meet all applicable requirements in § 1427.1902 (c) and (d).

[6] Bands with buckles consist of conventional hot rolled steel ties with buckles which meet requirements set forth in § 1427.1902(b).

(Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 101, 103, 401, 63 Stat. 1051, as amended (7 U.S.C. 1441, 1444, 1421).)

NOTE.—An approved Impact Analysis Statement has been prepared and is available from Charles Cunningham (ASCS), (202) 447-7873.

Signed at Washington, D.C., on January 18, 1979.

S. N. SMITH,
Acting Executive Vice President, Commodity Credit Corporation.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 15070, Amdt. 39-3405]

PART 39—AIRWORTHINESS DIRECTIVES

Hawker Siddeley Aviation, Ltd. (British Aerospace) Model DH-114 Heron Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) applicable to Hawker Siddeley Aviation, Limited, DH-114 Heron Series airplanes by clarifying the repetitive inspection schedule for in-service booms and for replacements and elaborating on the types of cracking which necessitate additional inspections of the boom or its replacement. The amendment was prompted by a request from the field for clarifications.

DATES: Effective February 8, 1979. Compliance schedule—As prescribed in body of AD.

ADDRESSES: The applicable technical news sheet may be obtained from: Hawker Siddeley Aviation, Limited, Hatfield, Hertfordshire, England, Product Support Department, Telephone: Hatfield 62345.

A copy of the technical news sheet is contained in the Rules Docket, for this amendment in Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, Telephone: 513.38.30, or Chris Christie, Federal Aviation Administration AFS-110, 800 Independence Avenue, SW., Washington, D.C. 202-426-8374.

SUPPLEMENTARY INFORMATION: This amendment amends Amendment 39-2689 (41 FR 32734), AD 76-16-03, which currently requires inspections of the upper lugs of the upper carry through boom for cracks and replacement of the boom as necessary on Hawker Siddeley Aviation, Limited, Model DH-114 Heron Series airplanes. After issuing Amendment 39-2689 and receiving a request for clarifications from an FAA field office, the FAA has determined that certain revisions to the existing AD are needed to clarify the repetitive inspection schedule for in-service booms and for replacements in paragraphs (b) and (e). Paragraph (d) has been revised to make clear that that paragraph applies to cracking which is other than literally horizontal. In addition, paragraph (e) has been revised to state that replacement of the boom is required when cracking is found which runs from the bolt hole in an inboard direction only. This change is intended to provide more consistency with the description contained in the manufacturer's technical news sheet. Other minor clarifying changes have also been made.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by amending Amendment 39-2689 (41 FR 32734), AD 76-16-03 as follows:

1. By revising paragraph (b) to read as follows:

(b) If no cracks are found during the inspection required by paragraph (a) of this AD, repeat the inspection at intervals not to exceed 1200 flight hours or 2 calendar years, whichever occurs sooner, until the wings are removed for compliance with AD 72-15-01 at which time the area must be further inspected using the ultrasonic and dye penetrant methods in accordance with Appendix 2 of Hawker Siddeley Aviation, Limited, Technical News Sheet TNS F.19, Issue 1, dated July 26, 1976, (hereinafter referred to as the Technical News Sheet) or an FAA-approved equivalent. Thereafter, if no cracking is found, continue to inspect the area as follows:

(1) In accordance with the method specified in paragraph (a) of this AD at an interval not to exceed 3 calendar years from each time the area is inspected in conjunction with the wing removal required by AD 72-15-01; and

(2) In accordance with the ultrasonic and dye penetrant methods specified in Appendix 2 of the Technical News Sheet or an FAA-approved equivalent at each time the wings are removed for compliance with AD 72-15-01.

2. By revising paragraph (c) to read as follows:

(c) If any cracks are found during any inspection required by this AD to be performed in accordance with the method specified in paragraph (a) of this AD, further inspect by ultrasonic and dye penetrant methods in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent with the wing removed.

3. By revising paragraph (d) to read as follows:

(d) If, during any inspection required by this AD, cracking of the lugs is found which is confined to only one of the lugs per side of the aircraft and exists only from the bolt hole towards the outboard end of the lug, the center section carry through boom may remain on the aircraft and continued flight is permitted provided the wing is removed at intervals not to exceed 300 flight hours or 3 months, whichever is sooner, and the cracked lug is inspected for crack propagation and the remaining two lugs are inspected for cracking, all in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent, until the boom is replaced with a new boom of the same part number or a used boom of the same part number determined after inspection in accordance with Appendix 2 of the Technical News Sheet to be crack-free.

4. By revising paragraph (e) to read as follows:

(e) If, during any inspection required by this AD, cracking is found in more than one lug per side of the aircraft or the cracking of any one lug extends to both sides (inboard and outboard) of the bolt hole or runs from the bolt hole in an inboard direction only, before further flight, replace the carry through boom with a new boom of the same part number or a used boom of the same part number determined after inspection in accordance with Appendix 2 of the Technical News Sheet to be crack-free. Replacement booms must continue to be inspected in accordance with the following schedule:

(1) For used replacement booms, within 3 years from replacement, inspect the lug

JAN 29 1979 UMI

V 4 4 / 2 0

area in accordance with Appendix 1 of the Technical News Sheet or an FAA-approved equivalent except if any wing removal is required by AD-72-15-01 during that period, inspect in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent concurrently with that wing removal. Thereafter inspect in accordance with the schedule and inspection methods specified in paragraphs (b)(1) and (b)(2) of this AD.

(2) For new replacement booms, inspect the lug area in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent with the wing removed prior to accumulating 6 years in service and thereafter in accordance with the schedule and inspection methods specified in paragraphs (b)(1) and (b)(2) of this AD. However, if the first inspection required after replacement is not performed in conjunction with a wing removal required by AD 72-15-01, within the next 3 years after that inspection, inspect in accordance with Appendix 1 of the Technical New Sheet or an FAA-approved equivalent except if any wing removal is required by AD 72-15-01 during that period, inspect in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent concurrently with that wing removal and thereafter inspect in accordance with the schedule and inspection methods specified in paragraphs (b)(1) and (b)(2) of this AD.

This amendment becomes effective February 8, 1979.

(Secs. 313(a), 601, 603 Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

Issued in Washington, D.C., on January 22, 1979.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[FR Doc. 79-2944 Filed 1-26-79; 8:45 am]

[4910-13-M]

[Docket No. 72-WE-22-AD, Amdt. 39-3401]

PART 39—AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model DC-9 -10 Series Airplanes

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing Airworthiness Directive (AD) applicable to McDonnel Douglas DC-9-10 Series airplanes by increasing the repetitive inspection interval specified in the AD. The amendment is needed because the FAA has determined that the compliance time for repetitive inspection of the fuselage frames covered by the subject AD may be safely extended, thus relieving a burden.

DATES: Effective January 31, 1979. Compliance schedule—As prescribed in the body of the AD.

FOR FURTHER INFORMATION CONTACT:

Jerry Presba, Executive Secretary, Airworthiness Directive Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009. Telephone: (213) 536-6351.

SUPPLEMENTARY INFORMATION: This notice further amends Amendment 39-1628 (38 FR 10253) AD 73-9-2, as amended by Amendments 39-1926 (39 FR 30108), 39-2004 (39 FR 39433) and 39-2850 (42 FR 13818). After issuing the AD as amended, and after evaluating the results of the operator's inspections and past service experience, the Federal Aviation Administration has determined that the repetitive inspection intervals specified in Paragraph (a)(1) of the AD can be increased to 2,000 hours time in service without adversely affecting safety. Therefore, the AD is being further amended to provide for an increase in repetitive inspection intervals.

Since this amendment provides relief and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by further amending Amendment 39-1628 (38 FR 12053), AD 73-9-2, as amended by Amendment 39-1926 (39 FR 30108), Amendment 39-2004 (39 FR 39433) and Amendment 39-2850 (42 FR 13818), is further amended by amending paragraph (a)(1) to read in pertinent part as follows:

• • • within the next 1,000 hours time in service and thereafter at intervals not to exceed 2,000 hours time in service from the last inspection, inspect the left and right hand lower sections of the fuselage frames • • •

Amendment 39-1628 became effective May 30, 1973.

Amendment 39-1926 became effective August 26, 1974.

Amendment 39-2004 became effective November 13, 1974.

Amendment 39-2850 became effective March 20, 1977.

This amendment becomes effective January 31, 1979.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

Issued in Los Angeles, Calif., on January 16, 1979.

LEON C. DAUGHERTY,
Director,
FAA Western Region.

[FR Doc. 79-2917 Filed 1-26-79; 8:45 am]

[4910-13-M]

[Docket No. 77-WE-29-AD, Amdt. 39-3403]

PART 39—AIRWORTHINESS DIRECTIVES

McDonnell Douglas DC-9, -10, -20, -30, -40, -50 Series (Including Military C-9A, C-9B, and VC-9C) Airplanes

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires repetitive inspections and replacement of the wing flap idler hinge support fitting attachment studs at wing station X_w=333.148 on certain McDonnell Douglas DC-9 airplanes. These inspections and rework are necessary to prevent the hinge fitting from becoming loose and causing partial loss of flap and aileron control and damage to the spoiler and wing structure.

DATES: Effective March 2, 1979. Compliance schedule—as precribed in the body of the AD.

ADDRESSES: The applicable service information may be obtained from: McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846. Attn: Director, Publications and Training, C1-750, (54-60).

Also, a copy of the service information may be reviewed at, or a copy obtained from:

Rules Docket in Room 916, FAA, 800 Independence Avenue, SW., Washington, D.C. 20591, or

Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, California 90261.

FOR FURTHER INFORMATION CONTACT:

Jerry Presba, Executive Secretary, Airworthiness Directive Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009. Telephone: (213) 536-6351.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring repetitive inspections and replacement of the wing flap outboard idler hinge attach studs on McDonnell Douglas Model DC-9 Series airplanes was published in the FEDERAL REGISTER at 43 FR 45380. The proposal was prompted by several reported instances of failures of the studs which attach the wing flap outboard idler hinge to the wing rear spar at wing station X_w=333.148. When the lower studs fail, the support fitting is allowed to rotate upwards under flap loading. Because the aileron control cables pass through a hole in the support fitting, rotation of the fitting could cause the control cables to be broken or jammed. This could cause loss of lateral control.

Interested persons have been afforded an opportunity to participate in the making of the amendment and several comments were received. Three of the comments received requested an increase in the initial inspection time to allow large fleet operators to establish an inspection schedule that would not require special handling of the aircraft. However, no justification was provided by any of the commenters to show that such an increase could be made without jeopardizing safety of the aircraft.

One comment concerned the difference in threshold inspection time between the proposed AD and the Douglas Aircraft Company Service Bulletin 57-118. The Service Bulletin suggests inspecting within 3,400 landings for airplanes which have accumulated 10,000 landings, whereas the proposed AD would require inspection within 850 landings or before accumulating 10,000 landings, whichever occurs later. The commenter suggested that service experience to date does not support lowering the inspection threshold since there have been no stud failures on aircraft with less than 14,000 landings. The 10,000 landing inspection threshold is considered reasonable and prudent by the FAA since failure has been encountered at 14,000 landings and the objective of the AD is to minimize failures. The 10,000 landing inspection threshold is therefore maintained.

Another commenter requested that the 3,400 landing inspection interval be changed to 3,400 hours to agree with the fleet schedule they have already established. The FAA does not believe such a change is justified. Flap attach stud loads are applied each time the flaps are lowered for landing. Operators of DC-9 airplanes accumulate from less than one landing per hour of time in service to almost 1.5 landings per hour of time in service. Concurrence with the commenter's request in the latter case would produce an unsafe situation. To provide relief for operators who do not maintain records of landings, paragraph (f) has been added.

After careful review of all available data, including the comments above, the FAA believes that sufficient evidence exists in the public interest of aviation safety to adopt the proposed rule with the relieving change noted, as a final rule.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to be by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

McDONNELL DOUGLAS: Applies to Model DC-9-10, -20, -30, -40, -50 Series Airplanes, including (Military C-9A, C-9B, and VC-9C) airplanes certificated in all categories, fuselage numbers F/N 1 thru F/N 880, which correspond to the factory serial numbers listed in Douglas DC-9 Service Bulletin 57-118 dated November 4, 1977.

Compliance required as indicated. To detect fatigue cracks and/or failure of the wing flap outboard idler hinge support fitting attachment studs, accomplish the following:

(a) Within the next 850 landings after the effective date of this AD, or before accumulating 10,000 total landings, whichever occurs later, unless already accomplished within the last 2,550 landings, and thereafter at intervals of 3,400 landings from the last inspection, accomplish the ultrasonic inspection in accordance with the instructions in Douglas DC-9 Service Bulletin 57-118 dated November 4, 1977.

NOTE.—Service Bulletin 57-118 dated November 4, 1977 is the only version of this Service Bulletin suitable for compliance with paragraphs (a) and (b) of this AD.

(b) If any one or more studs is found cracked or failed, or has accumulated 50,000 or more landings, before further flight:

1. Replace all four studs, two PLI washers and applicable attaching parts with new original design studs and PLI washers, and applicable attaching parts; or,

2. Replace all four studs, two PLI washers and applicable attaching parts with new studs, (upper two of original design and lower two of new design and higher heat treat), and two new design PLI washers, and applicable attaching parts, per Option 1, paragraph 2.D.1, Accomplishment Instructions, as prescribed in Douglas DC-9 Service Bulletin 57-118 dated November 4, 1977.

3. If new parts are installed per (b)1 above, the requirements of this AD may be discontinued for that idler hinge(s) group of four attachment studs only, until the newly replaced parts have accumulated 10,000 landings, at which time reinstate the program of repetitive inspections and/or corrective actions per this AD.

4. The requirements per this AD may be terminated for that idler hinge(s) group of four attachment studs only, upon compliance with paragraph (b)2 above, or upon installation of two lower studs of new design and two new design PLI washers, and applicable attaching parts, per Option 1, paragraph 2.D.2, Accomplishment Instructions, as prescribed in Douglas DC-9 Service Bulletin 57-118 dated November 4, 1977.

5. Compliance with this AD notwithstanding, attachment studs must be replaced in accordance with the schedule specified in Douglas Report MDC-J0005, "DC-9 Safe Life Limits" (Reference DC-9 TC Data Sheet A6WE).

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections required by this AD.

(d) Equivalent inspection procedures and repairs may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(e) Upon request of operator, an FAA maintenance inspector, subject to prior approval of the Chief, Aircraft Engineering Division, FAA Western Region may adjust the initial and repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

(f) For the purpose of complying with this AD, when records of landings are not available, subject to acceptance by the assigned FAA maintenance inspector, the number of landings may be determined by dividing each airplane's hours' time in service by the operator's fleet average time from takeoff to landing for the airplane type.

This amendment becomes effective March 2, 1979.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Issued in Los Angeles, Calif., on January 17, 1979.

LEON C. DAUGHERTY,
Director, FAA Western Region.

[Airspace Docket No. 78-SO-35]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Controlled Airspace; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: In a rule published in the FEDERAL REGISTER of January 2, 1979, (44 FR 39), under the amendment to § 71.163, the coordinates "Lat. 24°00'00"N., Long. 80°56'30"W.; to Lat. 24°45'40"N., Long. 80°48'20"W.;" were incorrectly published as "Lat. 24°00'00"N., Long. 80°56'20"W.; to Lat. 24°45'40"N., Long. 80°48'00"W." This correction reflects the correct coordinates for a portion of the description

J A 2 9 7 9

UMI

V 4 4 / 2 0 JA 29 79 UMI

of the South Atlantic Additional Control Area.

EFFECTIVE DATE: January 29, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

SUPPLEMENTARY INFORMATION: Since this action is corrective in nature, public procedure thereon is unnecessary and good cause exists for making it effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, FR Doc. 78-36240 as published in the FEDERAL REGISTER on January 2, 1979, (44 FR 39) is amended under § 71.163 by amending the description of the South Atlantic Control Area as follows:

In line three "Lat. 24°00'00"N., Long. 80°56'20"W.;" is deleted and "Lat. 24°00'00"N., Long. 80°56'30"W.;" is substituted therefor. In line four "Lat. 24°45'40"N., Long. 80°48'00"W.," is deleted and "Lat. 24°45'40"N., Long. 80°48'20"W.;" is substituted therefor.

(Secs. 307(a), 313(a) and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510; Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document involves a regulation which is not significant under the procedures and criteria prescribed by Executive Order 12044 and implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Washington, D.C., on January 23, 1979.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[4910-13-M]

[Airspace Docket No. 78-EA-71]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area: Pittstown, N.J.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This Amendment alters the Pittstown, N.J., transition area, over Sky Manor Airport, Pittstown, N.J. This alteration will change the approach course by one degree and provide protection to aircraft executing the revised instrument approach by increasing the controlled airspace. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

EFFECTIVE DATE: February 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Pittstown, N.J., transition area. On page 49311 of the FEDERAL REGISTER for October 23, 1978, the FAA published a proposed amendment to the subject transition area. Interested parties were given an opportunity to comment, but no objections were received.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective January 29, 1979, as published.

(Sec. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69).

Issued in Jamaica, New York, on January 15, 1979.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations, by deleting the description of the Pittstown, N.J., 700-foot floor transition area and by inserting the following in lieu thereof:

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the center, 40°33'59" N., 74°58 43 W., of Sky Manor Airport, Pittstown, N.J., and within 4.5 miles each side of the Solberg, N.J., VORTAC 264° radial, extending from the 7-mile radius area to 23 miles west of the VORTAC.

[Airspace Docket No. 78-EA-79]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area: Albion, N.Y.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This amendment designates an Albion, N.Y., transition area, over Pine Hill Airport, Albion, N.Y. This designation will provide protection to aircraft executing the new VOR RWY 28 standard instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

EFFECTIVE DATE: 0901 G.m.t. March 22, 1979.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to designate an Albion, N.Y., transition area. On page 51029 of the FEDERAL REGISTER for November 2, 1978, the FAA published a proposed designation to the subject transition area. Interested parties were given time in which to submit comments. No objections were received.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t. March 22, 1979, as published.

(Sec. 307(a), and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Issued in Jamaica, New York, on January 15, 1979.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating an Albion, N.Y., 700-foot floor transition area as follows:

ALBION, N.Y.

That airspace extending upward from 700 feet above the surface with a 5-mile radius of the center, 43°10'24" N., 78°16'29" W., of Pine Hill Airport, Albion, N.Y., and within 2.5 miles each side of the Rochester, N.Y., VORTAC 277° radial, extending from the 5-mile radius area to 20 miles west of the VORTAC.

[FR Doc. 79-2952 Filed 1-26-79; 8:45 am]

[4910-13-M]

[Airspace Docket NO. 78-ASW-51]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE,. AND REPORTING POINTS

Alteration of Transition Area: Ponca City, Okla.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: The nature of the action being taken is an alteration of the transition area at Ponca City, Okla. The intended effect of the action is the provision of additional controlled airspace for aircraft executing instrument procedures at the Blackwell/Tonkawa Municipal Airport. The circumstances which created the need for this action were the proposed approaches using the Pioneer VORTAC for flight under instrument weather conditions to the airport. Coincident with this action the airport is changed from Visual Flight Rules (VFR) to Instrument Flight Rules (IFR).

EFFECTIVE DATE: April 19, 1979.

FOR FURTHER INFORMATION CONTACT:

Ken Stephenson, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101; telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION:

HISTORY

On November 16, 1978, a notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 53448) stating that the Federal Aviation Administration proposed to alter the Ponca City, Okla., transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. No objections were received on the proposal. Except for editorial changes, this amendment is that proposed in the notice.

THE RULE

This amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) alters the Ponca City, Okla., transition area. This action provides additional controlled airspace from 700 feet above the ground for the protection of aircraft executing instrument procedures at the Blackwell/Tonkawa Municipal Airport.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) is amended, effective 0901 G.m.t., April 19, 1979 as follows.

In Subpart G, § 71.181 (43 FR 440), the Ponca City, Okla., transition area is amended by adding the following:

• • • within a 5-mile radius of the Blackwell/Tonkawa Airport (latitude 36°44'40" N., longitude 97°20'58" W.), and 2 miles each side of the Pioneer VORTAC 269° radial, extending from the 5-mile radius to the VORTAC, and 2.5 miles each side of the 180° bearing from the Blackwell/Tonkawa Municipal Airport, extending from the 5-mile radius to 6 miles south of the Airport, and 2.5 miles each side of the 360° bearing from the Blackwell/Tonkawa Municipal Airport, extending from the 5-mile radius to 6 miles north of the Airport.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); and sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 3, 1978).

Issued in Fort Worth, Tex., on January 16, 1979.

PAUL J. BAKER,
Acting Director, Southwest Region.

[FR Doc. 79-2946 Filed 1-26-79; 8:45 am]

[4910-13-M]

[Airspace Docket No. 78-EA-76]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration and Revocation of Transition Areas: Harrisburg and Annville, Pa.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This amendment alters the Harrisburg, Pa., and revokes the Annville, Pa., transition areas. The revocation of the Annville, Pa., area results from the cancellation of the VOR RWY 11 instrument approach to Millard Airport. However, a portion of this transition area is needed for radar vectoring service furnished by Harrisburg Approach Control. Therefore, the needed airspace will be transferred to the Harrisburg, Pa., transition area.

EFFECTIVE DATE: February 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Harrisburg, Pa., and revoke the Annville, Pa., transition areas. Since the net effect is to lessen the amount of controlled airspace, no additional burden is placed on any person, and thus notice and public procedure hereon are unnecessary and the rule may be made effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective January 29, 1979, as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to revoke the Annville, Pa. 700-foot floor transition area.

2. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by adding the following to the description of the Harrisburg, Pa. 700-foot floor transition area, "; within a 26-mile radius of a point 40°13'24"N., 76°52'39"W., extending clockwise from a 072° bearing to a 094° bearing from said point."

(Sec. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(c)); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Issued in Jamaica, New York, on January 15, 1979.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc. 79-2951 Filed 1-26-79 8:45 am]

V 4 4 / 2 0

[4910-13-M]

[Airspace Docket No. 78-EA-102]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area: N. Philadelphia, Pa.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This amendment alters the North Philadelphia, Pa., transition area. This alteration will provide protection to aircraft executing the new NDB RWY 6 instrument approach which has been developed for Wings Field, Philadelphia, Pa. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

EFFECTIVE DATE: February 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the North Philadelphia, Pa., transition area. The alteration requires the incorporation of additional airspace of approximately one mile in width and a change in the transition area extensions of one and two degrees. Since the additional airspace is a nominal amount, the effect does not impose an additional burden on any person and thus notice and public procedure hereon are unnecessary and the rule may be made effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective January 29, 1979, as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by amending the description of the North Philadelphia, Pa. 700-foot floor transition area as follows:

Delete, "within 4.5 miles northwest 6.5 miles southeast of a 052° bearing and a 232° bearing from a point 40°05'06"N., 75°21'24"W., extending from 5.5 miles northeast to 11.5 miles southwest of said point; within 5 miles each side of a 254° bearing from a point 40°05'06"N., 75°21'24"W., extending from said point to 6.5 miles west of said point; within 5 miles each side of a 231° bearing from the Ambler, Pa., RBN 40°07'33"N., 75°17'08"W., extending from the RBN to 6.5 miles southwest of the RBN" and insert the following in lieu thereof; "within 4.5 miles northwest and 6.5 miles southeast of a 053° bearing and a 233° bearing from a point 40°05'06"N., 75°21'24"W., extending from 5.5 miles northeast to 11.5 miles southwest of said point; within 5 miles each side of a 255° bearing from a point 40°05'06"N., 75°21'24"W., extending from said point to 6.5 miles west of said point; within 8.5 miles northwest and 3.5 miles southeast of a 233° bearing from the Ambler, Pa. RBN 40°07'33"N., 75°17'08"W., extending from the RBN to 11.5 miles southwest of the RBN".

(Sec. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

Issued in Jamaica, New York, on January 15, 1979.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc. 79-2953 Filed 1-26-79; 8:45 a.m.]

[4910-13-M]

[Airspace Docket No. 78-ASW-58]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area: Levelland, Tex., Revision of Federal Register Document

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Revision to final rule.

SUMMARY: This action revises a rule issued on October 18, 1978, which appeared in FR Doc. 78-30571 on page 50420 in the FEDERAL REGISTER of Monday, October 30, 1978. The rule described an amendment to Subpart G of Part 71 of the Federal Aviation Regulation (14 CFR) designating the Levelland, Tex., transition area. The transition area provided controlled airspace from 700 feet above the ground for the protection of aircraft executing an instrument approach procedure to runway 35 at the Levelland Municipal Airport.

EFFECTIVE DATE: April 19, 1979.

FOR FURTHER INFORMATION CONTACT:

Ken Stephenson, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101; telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: FR Doc. 78-30571 was published on October 30, 1978, with an effective date of December 28, 1978, (43 FR 37708) stating that the Federal Aviation Administration proposed to designate a transition area at Levelland, Tex. Since the final rule was published, the United States Air Force has filed a petition to modify the rule and has recommended that the instrument approach procedure be established to runway 17. The basis for this petition was the high volume of air traffic operating from the Terry County Auxiliary Airfield and possible conflicts with aircraft executing approaches at the Levelland Municipal Airport. The Federal Aviation Administration agrees that the high volume of high performance aircraft operating to and from the Terry County Auxiliary Airfield could, under certain conditions, create possible conflicts with aircraft executing instrument approaches to the Levelland Municipal Airport and that the instrument approach procedure should be established to runway 17.

THE RULE

This amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR 71) revises the Levelland, Tex., transition area. This action provides controlled airspace from 700 feet above the ground for the protection of aircraft executing an instrument procedure at the Levelland Municipal Airport.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, FR Doc. 78-30571, appearing on page 50420 in the FEDERAL REGISTER of October 30, 1978, the Levelland, Tex., transition area is amended by deleting the description and substituting the following:

LEVELLAND, TEX.

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the Levelland Municipal Airport (33°33'32" N. latitude, 102°22'20" W. longitude), and within 3 miles each side of the 360° bearing from the Levelland NDB (33°33'20" N. latitude, 102°22'29" W. longitude), extending from the 7-mile radius to 8.5 miles north of the RBN.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 3, 1978).

Issued in Fort Worth, Tex., on January 16, 1979.

PAUL J. BAKER,
Acting Director, Southwest Region.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 79-31]

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

Container With Cargo Covered by Multiple Bills of Lading; Reporting Requirements

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by establishing a simplified alternative for reporting bill of lading numbers covering containerized cargo. Presently, (1) all bills of lading for inward foreign cargo in a particular container must be listed in numerical sequence, (2) the number of the container which contains the cargo covered by that bill of lading and the container seal number must be listed opposite the bill of lading number, and (3) the number of any other bill of lading for cargo in that container also must be listed immediately under the container number. As a result, bill of lading numbers for containers covered by multiple bills of lading must be listed more than once. The amendment provides a simplified alternative for listing bill of lading numbers only once on a separate container list and thereby eliminates multiple listings of the same number which are burdensome to carriers and of no benefit to Customs.

EFFECTIVE DATE: January 29, 1979.

FOR FURTHER INFORMATION CONTACT:

John A. Mathis, Carriers, Drawback, and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue, N.W., Washington, D.C. 20229 (202-566-5706).

SUPPLEMENTARY INFORMATION:

BACKGROUND

New cargo declaration forms for use as part of the manifest required in connection with the arrival and departure of vessels, and procedures for the use of those forms, were established by Treasury Decision 77-255, published in the FEDERAL REGISTER on October 25, 1977 (42 FR 56317), which amended Part 4, Customs Regulations (19 CFR Part 4). The forms involved, the Cargo Declaration, Customs Form 1302, and the Cargo Declaration Outward With Commercial Forms, Customs Form 1305, replaced the former Inward Foreign Manifest, Customs Form 7527-A, and the Outward Foreign Manifest, Customs Form 1374.

T.D. 77-255 provided for the use of the new forms any time after October 25, 1977, and for their mandatory use as of September 1, 1978. However, a number of U.S. ocean carriers advised Customs that mandatory use as of September 1, 1978, would impose a hardship. Accordingly, by a notice published in the FEDERAL REGISTER on August 18, 1978 (43 FR 36621), the effective date for mandatory use was delayed until January 1, 1979.

Section 4.7a(c)(2), Customs Regulations (19 CFR 4.7a(c)(2)), as amended by T.D. 77-255, provides (1) that all bills of lading for inward foreign cargo shipped in containers shall be listed in numerical sequence in the column headed "B/L Nr." on Customs Form 1302, (2) that the number of the container which contains the cargo covered by that bill of lading and the container seal number shall be listed in column No. 6, opposite the bill of lading number, and (3) that the number of any other bill of lading for cargo in that container also shall be listed in column No. 6 immediately under the container and seal numbers. Therefore, for containers with merchandise covered by more than one bill of lading number, the same bill of lading numbers must be listed more than once on Customs Form 1302.

Because multiple listings of the same bill of lading number impose a burden on carriers and are of no benefit to Customs, it has been decided to provide a simplified alternative that will eliminate the need for reporting bill of lading numbers more than once.

ALTERNATIVE PROCEDURE

As an alternative to the procedure provided in § 4.7a(c)(2), Customs Regulations, a separate container list made on a Cargo Declaration form or on a separate sheet attached to the Cargo Declaration, may be submitted.

If this procedure is used, container numbers shall be listed in alphanumeric sequence by port of discharge in Column No. 6 of Customs Form 1302, or on the separate sheet. Each bill of lading number covering cargo in that container, identifying the port of lading, shall be listed in the column headed "B/L Nr." on Customs Form 1302 opposite the container number, or either opposite or under the container number, if a separate sheet is used. The container list will not be required as part of the vessel's traveling manifest, but need be submitted only at each port of discharge.

The procedures set out in § 4.7(a)(c)(2) (i) and (ii), requiring the listing of bill of lading numbers opposite or under the numbers of the containers, are for the benefit of the importing public and Customs and are designed to enable Customs officers to expedite the clearance of containerized merchandise. Customs will not consider clerical errors in the listing of the bill of lading or container numbers under these provisions as manifest irregularities requiring penalty action.

EDITORIAL CHANGES

This document also makes several editorial changes in section 4.7a, Customs Regulations.

INAPPLICABILITY OF PUBLIC NOTICE AND DELAYED EFFECTIVE DATE REQUIREMENTS

Because this amendment imposes no duty or burden on the public but merely relaxes a present requirement by providing an alternative reporting procedure, notice and public procedure are unnecessary and good cause exists for dispensing with a delayed effective date under 5 U.S.C. 553.

DRAFTING INFORMATION

The principal author of this document was Mark Jenkins, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

AMENDMENTS TO THE REGULATIONS

Sections 4.7a(c) (1) and (2), Customs Regulations (19 CFR 4.7a(c) (1) and (2)), are amended to read as follows:

§ 4.7a Inward manifest; information required; alternative forms.

* * * * * *

(c) *Cargo Declaration.* (1) The Cargo Declaration, Customs Form 1302, shall list all the inward foreign cargo on board regardless of the port of discharge. The block designated "Arrival" at the top of the form shall be checked. The cargo described in

JAN 29 79
UMI

V 44 20 JA 29 79 UMI

column Nos. 6 and 7, and either column No. 8 or 9, shall refer to the respective bills of lading. Either column No. 8 or column No. 9 shall be used, as appropriate. The gross weight in column No. 8 shall be expressed in either pounds or kilograms. The measurement in column No. 9 shall be expressed according to the unit of measure specified in the Tariff Schedules of the United States (19 U.S.C. 1202).

(2)(i) When inward foreign cargo is being shipped by container, each bill of lading shall be listed in the column headed "B/L Nr." in numerical sequence according to the bill of lading number. The number of the container which contains the cargo covered by that bill of lading and the number of the container seal shall be listed in column No. 6 opposite the bill of lading number. The number of any other bill of lading for cargo in that container also shall be listed in column No. 6 immediately under the container and seal numbers. A description of the cargo shall be set forth in column No. 7 only if the covering bill of lading is listed in the column headed "B/L Nr."

(ii) As an alternative to the procedure described in subparagraph (i), a separate list of the bills of lading covering each container on the vessel may be submitted on Customs Form 1302 or on a separate sheet. If this procedure is used—

(A) Each container number shall be listed in alphanumeric sequence by port of discharge in column No. 6 of Customs Form 1302, or on the separate sheet; and

(B) The number of each bill of lading covering cargo in a particular container, identifying the port of lading, shall be listed opposite the number of the container with that cargo in the column headed "B/L Nr." if Customs Form 1302 is used, or either opposite or under the number of the container if a separate sheet is used.

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

PART 6—AIR COMMERCE REGULATIONS

Vessels in Foreign and Domestic Trades; Air Commerce Regulations—Customs Regulations Amended

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final Rule.

SUMMARY: This document amends the Customs Regulations to require that an aircraft commander or other authorized person furnish Customs with an export inspection certificate issued by the Veterinary Services, Animal and Plant Health Inspection Service, Department of Agriculture, at the time of departure from the United States of any aircraft carrying specified livestock for export. The purpose of this requirement is to prevent diseased livestock from being exported from the United States by air. The document also makes minor conforming changes to a similar provision of the Customs Regulations relating to the exportation of specified livestock by vessels.

EFFECTIVE DATE: February 28, 1979.

FOR FURTHER INFORMATION CONTACT:

Leonard Rosenberg, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue, N.W., Washington, D.C., 20229 (202-566-5706).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 4.71, Customs Regulations (19 CFR 4.71), requires the master of a vessel which is exporting horses, mules, asses, cattle, sheep, swine, or goats to furnish Customs with a notice of inspection by the Animal and Plant Health Inspection Service, Department of Agriculture, to ensure that no diseased animals are exported.

However, there is no similar provision in Part 6, Customs Regulations, requiring an aircraft commander or other authorized person to furnish Customs an export inspection certificate before departure of an aircraft carrying these animals. The Department of Agriculture informed Customs of several instances when livestock subject to export health inspection and certification were exported by aircraft without proper documentation.

Therefore, a notice was published in the FEDERAL REGISTER on June 1, 1978 (43 FR 23731), proposing that section 6.8(a), Customs Regulations, be amended to require that an aircraft commander or other authorized person furnish Customs with an export inspection certificate issued by the Veterinary Services, Animal and Plant Health Inspection Service, Department of Agriculture, before departure of an aircraft carrying horses, mules, asses, cattle, sheep, swine, or goats. The notice also proposed to amend § 4.71 to conform to an organizational change within the Department of Agriculture and to a change of title in its required documentation.

DISCUSSION OF COMMENTS

Three comments were received in response to the notice, all of which strongly supported the proposal.

One commenter, the representative of a large dairy cattle breed registry organization, agreed that air transportation as well as surface transportation should be covered by health provisions applicable to exported animals.

The other commenters, representatives of the Department of Agriculture, pointed out that the proposed rule is an essential control measure which would avoid damage to the U.S. export market by preventing the exportation of uninspected livestock by aircraft. Such damage would seriously impair the United States balance of payments, which agriculture marketing abroad is now reducing.

AMENDMENT TO THE REGULATIONS

After consideration of the comments received, Customs has decided that the proposed amendments should be adopted without change, as set forth below.

DRAFTING INFORMATION

The principal author of this document was Mark Jenkins, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

G. R. DICKERSON,
Acting Commissioner of Customs.

Approved: January 8, 1979.

RICHARD J. DAVIS,
Assistant Secretary of the Treasury.

Section 4.71, Customs Regulations (19 CFR 4.71), is amended to read as follows:

§ 4.71 Inspection of livestock.

A proper export inspection certificate issued by the Veterinary Services, Animal and Plant Health Inspection Service, Department of Agriculture, shall be filed before the clearance of a vessel carrying horses, mules, asses, cattle, sheep, swine, or goats (9 CFR Part 91).

Section 6.8(a), Customs Regulations (19 CFR 6.8(a)), is amended by inserting a new sentence between the first and second sentences to read as follows:

§ 6.8 Documents for clearance, or for certain departures.

(a) * * * The aircraft commander or authorized person also shall deliver a proper export inspection certificate issued by the Veterinary Services, Animal and Plant Health Inspection Service, Department of Agriculture (9 CFR Part 91), to the Customs officer in charge at the time of departure of any aircraft carrying horses, mules, asses, cattle, sheep, swine, or goats. * * *

Title 32—National Defense

CHAPTER V—DEPARTMENT OF THE ARMY

[Army Reg. 340-21]

PART 505—PERSONAL PRIVACY AND RIGHTS OF INDIVIDUALS REGARDING THEIR PERSONAL RECORDS

Exemptions

AGENCY: Department of the Army.

ACTION: Final rule.

SUMMARY: The Department of the Army is adopting an exemption rule pertaining to a system of records subject to the Privacy Act of 1974 identified as A0402.01aDAJA, entitled General Legal Files.

EFFECTIVE DATE: Januray 29, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. Cyrus H. Fraker, Department of the Army, The Adjutant General Center, Washington, DC 20314; telephone 202/693-0973.

SUPPLEMENTARY INFORMATION: In 43 FR 59852, December 22, 1978, the Army published a proposed exemption rule to system notice A0402.01aDAJA General Legal Files. No comments were received. Accordingly, the exemption rule as set forth below, is adopted.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

JANUARY 23, 1979.

32 CFR Part 505 is amended as follows:

1. Section 505.9 is amended by adding the following exempted systems of records:

§ 505.9 Exemption rules for Army systems of records.

* * * * * *

EXEMPTED RECORD SYSTEMS

(Specific Exemptions)

ID-A0402.01aDAJA

SYSNAME—General Legal Files.

EXEMPTION—Those portions of this system of records falling within 5 U.S.C. 552a(k)(1), (2), (5), (6), and (7) may be exempt from the following provisions of Title 5 U.S.C. Section 552a: (c)(3), (d), (e)(1), and (f).

AUTHORITY—U.S.C. 552a(k)(1), (2), (5), (6), and (7).

REASONS—Various records from other exempted systems of records are sometimes submitted for legal review or other action. A copy of such records may be permanently incorporated into the General Legal Files system of records as evidence of the facts upon which a legal opinion or review was based. Exemption of the General Legal Files system of records is necessary in order to ensure that such records continue to receive the same protection afforded them by exemptions granted to the systems of records in which they were originally filed.

[AR 725-1]

PART 621—LOAN AND SALE OF PROPERTY

Procedures and Responsibilities

AGENCY: Department of the Army.

ACTION: Correction of Final Rule.

SUMMARY: This amendment corrects editorial errors and omissions to 32 CFR Part 621 published in FR Doc. 77-25317 appearing at page 43799 in the FEDERAL REGISTER issue of August 31, 1977. These errors have been corrected for clarity Part 621 is republished to read as set forth below.

EFFECTIVE DATE: August 1, 1977.

ADDRESS: Write to: Commander, U.S. Army Materiel Development and Readiness Command, ATTN: DRCMM-SP, 5001 Eisenhower Avenue, Alexandria, VA 22333.

FOR FURTHER INFORMATION CONTACT:

Mrs. Caryl L. Veth, (703) 274-9617.

By authority of the Secretary of the Army.

Dated: January 16, 1979.

ROME D. SMYTH,
Colonel, U.S. Army, Director, Administrative Management, TAGCEN.

Accordingly, 32 CFR Part 621 is hereby corrected to read as follows:

Sec.
621.1 Loan of Army/Defense Logistics Agency (DLA) owned property for use at national and State conventions.
621.2 Sales of ordnance property to individuals, non-Federal government agencies, institutions, and organizations.
621.3 Accounting for arms and accouterments loaned to other government agencies.
621.4 Issues, loans, and donations for scouting.

(Pub. L. 81-193; 10 U.S.C. secs. 2574, 4308, 4506, 4507, 4627, and 4655, and Pub. L. 92-249.)

1. Present § 621.1 is revised as follows:

§ 621.1 Loan of Army/Defense Logistics Agency (DLA) owned property for use at national and State conventions.

(a) *General.* This section—

(1) Prescribes procedures for loan of Army-owned property to recognized National Veterans' Organizations for National or State conventions as authorized by Pub. L. 81-193.

(2) Request for loans for National Youth Athletic or recreation tournaments sponsored by veterans' organizations listed in the "Veterans Administration Bulletin 23 (ALPHA)," will be processed by parent veterans' organizations.

(3) Loans are not authorized for other types of conventions or tournaments.

(b) *Items authorized for loan.* If available, the following items may be loaned for authorized veterans' organizations requirements.

(1) Unoccupied barracks.
(2) Cots.
(3) Mattresses.
(4) Mattress covers.
(5) Blankets.
(6) Pillows.
(7) Chairs, folding.
(8) Tentage, only when unoccupied barracks are not available.

V 4 4 / 2 0

(c) *Requests for loan.* (1) Requests by authorized veterans' organizations for loan of authorized Government property will be submitted to the appropriate CONUS Army Commander of the area in which the convention will be held or the Commander, Military District of Washington (MDW) if within his area.

(2) The tenure of loan is limited to 15 days from the date of delivery, except under unusual circumstances. A narrative explanation will be provided to support loan requests for more than 15 days duration.

(3) Loan requests should be submitted by letter at least 45 days prior to required date, if practicable.

(4) Requests for loans will contain the following information:

(i) Name of veterans' organization requesting the loan.

(ii) Location where the convention will be held.

(iii) Dates of duration of loan.

(iv) Number of individuals to be accommodated.

(v) Type and quantity of equipment required.

(vi) Type of convention, (State or National).

(vii) Complete instructions for delivery of equipment and address of requesting organizations.

(viii) Other pertinent information necessary to insure prompt delivery.

(d) *Responsibilities.* The Army or MDW Commander will:

(1) When the availability of personal and real property is determined, notify the requesting veterans' organization of the following:

(i) The items and quantities available for loan and the source of supply.

(ii) No compensation will be required by the Government for the use of real property.

(iii) No expense will be incurred by the United States Government in providing equipment and facilities on loan.

(iv) Costs of packaging, packing, transportation and handling from source of supply to destination and return will be borne by the requesting organization.

(v) All charges for utilities (gas, water, heat, and electricity) based on meter readings or such other methods determined will be paid by the veterans' organization.

(vi) Charges which may accrue from loan of DLA/GSA material in accordance with paragraph III, AR 700-49/DSAR 4140.27, and GSA Order 4848.7 and Federal Property Management Regulations, subparagraph 101-27.5.

(vii) The Army will be reimbursed for any material not returned.

(viii) Costs of renovation and repair of items loaned will be borne by the requesting organization. Renovation and repair will be accomplished in accordance with agreement between the Army Commander and the loanee to assure expeditious return of items.

(ix) Transportation costs in connection with the repair and renovation of property will also be at the expense of the using organization.

(x) Assure that sufficient guards and such other personnel necessary to protect, maintain, and operate the equipment will be provided by the loanee.

(xi) The period of loan is limited to 15 days from date of delivery, except as provided for in paragraph (c) of this section.

(xii) Any building or barracks loaned will be utilized in place and will not be moved.

(xiii) Upon termination of use, the veterans' organization will vacate the premises, remove its own property therefrom, and turn over all Government property.

(2) Specify a bond in an amount to insure safe return of real and personal property in the same condition as when borrowed. (In the case of personal property, this amount will be equal to the total value of the items based on current acquisition costs.)

(i) An agreement will be executed between the Army Commander and the Veterans' Organization if the terms of the loan are acceptable. A sample loan agreement is shown at Figure 7-5 of this subchapter.

(ii) When the agreement has been executed and the bond furnished, requisitions will be submitted to the appropriate source of supply. Requisitions will indicate shipping destination furnished by the veterans' organization. Transportation will be by commercial bills of lading on a collect basis.

(iii) Appoint a Property Book Officer to maintain accountability for the Government property furnished under this regulation.

(3) Property Book Officer will:

(i) Assume accountability from the document used in transferring property to the custody of the veterans' organization.

(ii) Perform a joint inventory with the veterans' organization representative. Survey any shortage or damages disclosed by the joint inventory in accordance with AR 735-11.

(iii) Maintain liaison with the veterans' organization during the period of the loan.

(iv) Prepare, in cooperation with the veterans' organization representative, an inventory of property being returned. Certify all copies of the receipt document with the veterans' organization representative.

(v) Insure the return of all property at the expense of loanee to the supply source or to repair facilities.

(vi) Obtain a copy of receipted shipping document from the installation receiving the property.

(vii) Determine cost and make demand on the loanee for:

(A) Items lost, destroyed, or damaged.

(B) Costs of repair or renovation. Estimated costs will be obtained from the accountable activity.

(C) Comply with instructions contained in AR 700-49/DSAR 4140.27 in the application of condition A and/or B, C, and T items utilized.

(D) Ascertain that items lost in transit are reconciled prior to assessing charges. Where the loss is attributable to other than the loanee, charges should not be borne by the borrower.

(viii) Request payment from the loanee. Checks are to be made payable to the Treasurer of the United States. Upon receipt of payment, appropriate fiscal accounts will be credited. The Property Transaction Record will be closed and the Stock Record Accounts audited.

(ix) Deposit collections in accordance with instructions contained in AR 37-103. In the event payment is not received within a reasonable period, Report of Survey Action will be initiated in accordance with AR 735-11.

(x) Reimburse DLA/GSA for the cost of any repair, reconditioning and/or materiel not returned.

§ 621.2 Sales of ordnance property to individuals, non-Federal government agencies, institutions, and organizations.

(a) *General.* This Section—

(1) Cites the statutory authority for, and prescribes the methods and conditions of sale of certain weapons, ammunition, and related items as specified herein.

(2) Applies to all sales of weapons and related material to individuals, organizations, and institutions, when authorized by the US Army Armament Materiel Readiness Command (ARRCOM), and overseas commanders.

(3) Provides that sales under this section will be limited to quantities of an item which authorized purchasers can put to their own use. It is not intended that property be sold under the provisions of this section for the purpose or resale or other disposition.

(4) Does not apply to sales of property determined to be surplus. (See AR 755 series.)

(b) *Price.* Except as noted below, when sales of the Army property are made and the title thereto passes from the US Government, the prices charged will be the standard list price contained in the SC 1305/30 Management Data List series, plus cost of packing, crating, and handling and administrative charges.

JAN 29 1979 UMI

(c) *Condition of sale.* Provisions apply to sales under this section, as follows:

(1) Sales will be made without expense to the Government.

(i) All costs incident to sales (including packing, crating, handling, etc.) will be paid in advance by the purchaser.

(ii) All costs incident to shipment (transportation, parcel post charges, etc.) will also be paid by the customer.

(iii) Payment for items and charges incident to sale will be made only by cashier's check, certified check, bank money order, or postal money order made payable to the Treasurer of the United States.

(iv) For other than items of ammunition and ammunition components, cash will be acceptable when consignee pickup is authorized or purchase is made in person.

(2) All financial transactions will be accomplished in accordance with applicable Department of the Army directives and regulations. Moneys collected for cost of items, as well as packing, crating, and handling, will be deposited as an appropriate reimbursement as prescribed in applicable regulations.

(3) Generally, all sales are final and, normally, the US Government assumes no obligation or responsibility for repair, replacement, or exchange, except as provided in AR 920-20. Purchasers will be so advised prior to making the sale. All weapons sold, however, will be safe for firing.

(4) Weapons sold at standard price will be supplied with equipment. Weapons sold at less than standard price will be supplied less equipment.

(5) Sales of specific items may be suspended at any time by the direction of CDR, ARRCOM.

(d) *Purchasing procedure.* (1) Except as provided in paragraph (e) of this section, all requests originating within CONUS for the purchase of small arms weapons, repair parts, cleaning, preserving, and target material will be submitted to the Commander, ARRCOM, Rock Island, IL 61201.

(i) Upon approval, these items will be shipped from Army depots stocking such material, based upon availability of material. Customers will be furnished instructions for submission of remittance.

(ii) Upon receipt of proper remittance from eligible customers ARRCOM will issue the necessary documents directing shipment from an Army depot where the items are available.

(2) In implementing the subchapter, oversea commands should designate installations within the oversea command to which requests for purchase of ammunition and related material will be directed.

(3) Depots shipping weapons to individuals, Director of Civilian Marksmanship (DCM) affiliated rifle and pistol "clubs", museums, veterans organizations, and other US Government agencies will annotate shipping documents with the serial number of all the weapons they ship. Firearms shipped will be reported to Commander, ARRCOM, ATTN: DR SAR-MMD-D, Rock Island, IL 61202, using DA Form 3535 (Weapons Sales Record). DA Form 3535 may be obtained from Commander, Letterkenny Army Depot, ATTN: DRXLE-ATD, Chambersburg, PA 17201.

(i) The transportation officer will ascertain estimated transportation costs, to include DA transportation security measures (costs) for shipment to destination. Such information will be transmitted by letter to consignee with request for acknowledgement that shipment will be accepted based on costs submitted.

(ii) Shipment will not be made unless consignee agrees to accept shipments. Refusal to accept shipment shall be reported to ARRCOM.

(4) CDR, ARRCOM is responsible for maintaining a record by serial number of all weapons reported by depot in accordance with paragraph (d)(3) of this section. He will establish procedures to screen purchase requests to insure compliance with any limitations established by this section.

(e) *Sales to individuals, organizations, and institutions.* (1) Sales of small arms weapons and ammunition are limited by statute (10 U.S.C. 4308) to members of the National Rifle Association (NRA). Such sales will be made in accordance with the provisions of this paragraph and with other rules and regulations approved by the Secretary of the Army.

(2) Sales will be limited to M1 service rifles, either national match grade or service grade. Only one such rifle and spare parts for it will be sold to an individual. No ammunition will be sold to individuals.

(3) Junior marksmanship clubs and junior marksmanship division affiliated within the Director of Civilian Marksmanship (DCM) pursuant to AR 920-20 may purchase limited quantities of .22 caliber ammunition.

(4) The DCM will determine the maximum quantity of such ammunition that clubs will be permitted to purchase in each fiscal year.

(5) Approved, non-profit summer camp organizations which are of a civic nature and are chartered or recognized by the NRA are allowed to purchase from the DCM at cost plus shipping and handling charges, 300 rounds of .22 caliber ammunition for each junior who is participating in a summer camp marksmanship program.

(6) Requests for purchase of ammunition by marksmanship clubs and summer camp organizations will be submitted to the DCM for approval. If he approves, the application will be forwarded to ARRCOM for processing. If it is disapproved, it is returned to applicant with reason(s) stated for disapproval.

(f) *Eligibility of purchasers.* In order to purchase a rifle under this program, an individual must:

(1) Be a member of the NRA as required by statute.

(2) Be a member of a marksmanship club affiliated with the DCM (AR 920-20).

(3) Based upon regular competitive shooting, have an established status as a marksman as determined by the DCM.

(g) *Purchase procedure.* (1) Individual members of the NRA desiring to purchase National Match grade M1 service rifles will submit requests to the Director of Civilian Marksmanship, Department of the Army, Washington, DC, 20315.

(i) The request should contain the name and address of the shooting club with which the purchaser is affiliated and appropriate evidence of status as a competitive marksman.

(ii) The individual's current NRA membership card (or exact facsimile thereto) will be forwarded with the request, accompanied by a self-addressed stamped envelope for return of the membership card.

(2) Upon receipt of a request, the Director of Civilian Marksmanship will forward to the individual a Certificate for Purchase of Firearms in the suggested format at figure 5-1 to be completed, notarized and returned. When returned with check or arrangements for payment, the Certificate will be referred for appropriate verification in the records of US Government agencies and for other investigation as required. This is done to insure that the sale of a weapon to the applicant is not likely to result in a violation of law. The Privacy Act Statement for Certificate of Purchase of Firearms (figure 5-2) will be made available to the individual supplying data on the Certificate for Purchase of Firearms (suggested format, figure 5-1). Prior to requesting the individual to supply data on the Certificate for Purchase of Firearms (suggested format, figure 5-1) the Privacy Act Statement for Certificate will be made available to the individual concerned. (The Privacy Act Statement will be reproduced locally on 8 x 10½ inch paper.)

(i) A purchase application will be denied if the applicant fails to meet all the conditions required in the Certificate.

(ii) If an application is denied, the applicant will be informed of the

V 4 4 / 2 0 J A 2 9 7 9 UMI

action and will be given an opportunity to submit additional information justifying approval of the application.

(iii) If the results of the investigation are favorable, the application will be forwarded to ARRCOM for processing.

(h) *Targets and spare parts.* Marksmanship clubs affiliated with the DCM and individuals who are members of National Rifle Association are authorized to purchase from the Army targets of types not otherwise available from commercial sources. Request for such purchases will be submitted to the Director of Civilian Marksmanship for approval and processing. Individuals who are members of the National Rifle Association and who have in the past purchased rifles from the Army under the authority of 10 U.S.C. 4308(a)(5), may purchase spare parts for those rifles if the parts are available. Requests for purchase of spare parts will be submitted to the Director of Civilian Marksmanship for approval. If he approves the application, he will forward it to ARRCOM for processing. If he disapproves the application, he will return it to the applicant stating the reasons for disapproval. Current DA transportation security measures for weapons will be applied under procedures contained in paragraph (d)(1) (i) and (ii) of this section.

(i) *Cadets, US Military Academy.* (1) When approved by the CDR DARCOM, the Superintendent, US Military Academy may sell to cadets upon graduation from the Academy those sabers which no longer meet prescribed standards of appearance and/or serviceability.

(2) Application to purchase sabers under these provisions will be made in accordance with procedures established by the Superintendent.

(j) *Reserve Officer's Training Corps (ROTC) and National Defense Cadet Corps (NDCC).* Supplies required by educational institution for the training of units and individuals of the Reserve Officer's Training Corps and National Defense Cadet Corps, in addition to authorized items normally furnished to ROTC and NDCC schools, may be sold when available by the activities listed in paragraph (g) of this section (10 U.S.C. 4627). Such purchases will be in accordance with AR 145-2.

(k) *Manufacturers and designers.* (1) Under the provisions of title 10 U.S.C. Section 4506, the Secretary of the Army is authorized to sell to contractors or potential contractors such samples, drawings, and manufacturing and other information as he considers best for national defense. Procedures for such sale are contained in APP 13-1502.

(2) Under the provisions of title 10, U.S.C. Section 4507, the Secretary of the Army may sell to designers who are nationals of the United States, serviceable ordnance and ordnance stores necessary in the development of designs for the Armed Forces. Designers will submit application to purchase to the appropriate Commodity Command.

(3) If any item normally requiring demilitarization pursuant to the Defense Disposal Manual (DoD 4160.21-M) and the AR 755-series is sold, a special condition of sale will prohibit further disposition by the purchaser without prior approval of the Deputy Chief of Staff for Logistics, Department of the Army.

(l) *Sales of individual pieces of U.S. armament for sentimental reasons.* Under the provisions of title 10, U.S.C., Section 2574, individual pieces of U.S. armament, which are not needed for their historical value and can be advantageously replaced, may be sold at a price not less than cost when there exists for such sale sentimental reasons adequate in the judgment of the Secretary of the Army.

(m) *Method of sale.* (1) Applications to purchase under the provisions of this act will be submitted to Deputy Chief of Staff for Logistics, ATTN: DALO-SMS, Department of the Army, with a complete identification including serial number, and location of desired item, if known.

(2) Approved applications for major items will be forwarded through Commander, U.S. Army Materiel Development and Readiness Command, ATTN: DRCMM-SP, to the Commander, U.S. Army Armament Materiel Readiness Command.

§ 612.3 Accounting for arms and accouterments loaned to other government agencies.

(a) *General.* This section—

(1) Prescribes procedures governing the accounting for arms and accouterments loaned to another agency of the U.S. Government by DARCOM for the protection of public money and property under the provisions of Title 10, U.S.C. 4655.

(2) Applies to DARCOM and those activities and installations thereof responsible for shipment of materiel and processing of supply documents for loans of arms and accouterments to other U.S. Government agencies.

(3) Issue of arms and accouterments to other U.S. Government agencies should be pursuant to section 601, Economy Act of 1932, (47 Stat. 417; 31 U.S.C. 686) as amended by the act of 26 June 1943 (57 Stat. 219).

(4) The Secretary or Under Secretary of the Army is the approving authority for loans covered by this section. Loans will be approved or disapproved after consideration of the purpose and proposed duration of the loan, and such factors as stock position, programmed Army requirements, and type classification with pending changes thereto.

(5) Unless otherwise approved by the Secretary or Under Secretary of the Army, loan agreements will be for a maximum of one year.

(b) *Requests.* (1) Requests for an initial loan of materiel or for the extension of an existing loan will be forwarded by the head of the agency involved to the Secretary or Under Secretary of the Army. Only those items which are available in on-hand stocks will be considered for approval. Procurement of materiel required to satisfy a loan requirement is not authorized.

(2) Normally, request for loan of weapons/items which are type classified standard (Logistics Control Code A or B), will not be approved when a similar item or lower type classification is available.

(c) *Issue, cost and care.* (1) Loaned materiel will be returned to the Army in the same condition in which it was received.

(2) Cost of packing, handling, and transportation will be borne by the borrowing agency.

(3) Borrowing agencies are fully responsible for the care, custody, and proper use of materiel loaned, and for payment for materiel lost, damaged or destroyed.

(d) *Responsibilities.* (1) Under the provisions of statute cited in paragraph (a)(1) of this section, CDR DARCOM will require the maintenance of a stock record account, as specified in AR 735-5, for the purpose of reflecting accountability for property loaned pursuant to this regulation.

(2) Commander, ARRCOM, ATTN: DRSAR-MMD, has been designated by Commander, DARCOM as the activity to maintain accountable property records for these loans.

(e) *Processing loan requests.* (1) Requests for loan of arms and accouterments received in DARCOM or other Army activity supply channels will be returned to the originating agency for referral in accordance with paragraph (b)(1) of this section. Those approved by the Secretary or Under Secretary will be sent to ARRCOM for execution of a formal loan agreement.

(2) Requests for loans will specify the responsible official, consignee, specific need for materiel, proposed duration of the loan, a citation of funds to cover the cost of packing, handling, and transportation, and that facilities are available to keep firearms in locked security when not in use.

(f) *Shipment procedure.* (1) Inventory control points will initiate materiel release orders in accordance with AR 725-50. Concurrently with initiation of the materiel release order, the consignee will be furnished notice that shipment has been directed, a list of the DOD Single Line Item Release/Receipt Documents (DD Form 1348-1), and instructions as follows:

(i) *Special note to consignee.* Upon receipt of the articles listed herein, the following certificate will be signed on three copies and forwarded with receiving document (DD Form 1348-1) to (insert name and address of responsible official).

"I certify that the articles listed on (insert number) copies of attached DD Form 1348-1, numbered as follows: (list number of each Release/Receipt Document) were received in apparent good condition, except as noted. Serial numbers have been verified. (Omit second sentence if not applicable).

(Signed) _____
(Typed) _____
(Date)." _____

(ii) Special note to responsible official.

(A) Upon receipt of signed copies from the consignee, another certificate as given in (B) below will be prepared and signed, with one copy to (insert name and address of accountable property officer) and one copy retained for file.

(B) When the requirement for these articles no longer exists, disposition instructions will be requested from (insert inventory control point). (The next sentence will be varied to fit cases where items are furnished on a nonreimbursable basis and can be disposed of in accordance with regulations of the borrowing agency; and cases where weapons, though furnished on a nonreimbursable basis, must be returned to Army control for demilitarization prior to disposal.)

"I certify that responsibility for articles listed on (insert number) copies of attached DD Form 1348-1, numbered as follows: (list number of each Release Receipt Document) is acknowledged, except as noted.

(Signed) _____
(Typed) _____
(Date)." _____

(2) All shipments will be documented on DoD Single Line Item Release/Receipt Document (DD Form 1348-1). Transportation, packing, and handling costs will be shown on all copies as will serial numbers in the case of weapons shipments.

(3) In addition to the normal distribution of DD Form 1348-1 to the consignee, one copy will be mailed to the designated responsible official of the agency concerned, and one to the pertinent inventory control point.

(g) *Accounting.* (1) *Stock record account.* Copies of the DD Form 1348-1 transmitted by the supplying installations as prescribed in paragraph (f)(1) of this section will be used as a basis for establishing accountability for the items on loan.

(2) *Hand receipt accounts.* The signature of the responsible official of the agency on DD Form 1348-1 will constitute a valid hand receipt in the accounts of the Army accountable property officer.

(3) *Annual settlements.* If a loan has been approved for a period longer than one year, property officers will reconcile loan accounts with responsible officials each 12 months. An Inventory Adjustment Report, DA Form 444, will be prepared in quadruplicate by the accountable property officer, listing items and quantities on loan to each agency. (Three copies will be forwarded to the responsible official concerned requesting verification of the listing and return of two signed copies.)

(h) *Returns.* (1) The responsible property officer normally will request disposition instructions from the accountable property officers when materiel is no longer needed or upon expiration of the established loan period. However, property may be drawn from the borrowing agency at any time to satisfy military requirements.

(2) The accountable property officer will issue shipping instructions for the return of property to a designated installation. The letter of instruction will contain a MILSTRIP document number (AR 725-50) for each line item to be returned, to be used for the shipment. The shipper will be directed to cite this document number on the shipping document.

(3) The accountable property officer will prepare and submit to the receiving installation a prepositioned materiel receipt card (DoD Materiel Receipt Document (DD Form 1486)) (document identifier DWC) as advance notice of the shipment.

(i) Exception data will be annotated as follows: "Return of Loan from other Government Agency-Report Receipt of Arms and Accouterments Accountable Property Officer, ATTN: DRSAR-MMD".

(ii) A copy of the letter of shipping instructions (paragraph (h)(2) of this section) will be inclosed with the prepositioned materiel receipt card for information.

(4) Upon receipt at the receiving installation, property will be inspected immediately. Cost of repairing unserviceable items and cost of replacement, if irreparable, will be determined at time of inspection. The MILSTRIP receipt card will be mailed to the accountable property officer with estimated damage cost and detail materiel conditions as exception data.

(5) Upon notification of materiel receipt, the accountable property officer will clear the loan record with a credit entry and process the receipt to the inventory records as an increase on-hand to asset balance.

(6) The accountable property officer will furnish receipted copies of the receiving document to the consignor and the responsible property officer closing the transaction. Billing action, when required, will be initiated as prescribed below by paragraph (i) of this section.

(i) *Fiscal procedure.* Inventory control points will be responsible for initiating billing and collection upon receipt of documents specified in paragraphs (g) and (h) of this section.

(1) Collection of amounts due the Department of the Army under this section will be in accordance with the procedures set forth in Chapter 5, AR 37-27. The same procedure will be followed whether collections are to cover the cost of packing, handling, and transportation; the value of property lost or irreparably damaged; or the cost of repair.

(2) Collections will be credited to the appropriation out of which similar materiel will be procured, or similar services rendered.

(3) Standard Form 1080 (Voucher for Transfer between Appropriations and/or Funds) will be annotated to indicate that collections are to reimburse Department of the Army appropriations in accordance with 10 U.S.C. 4655.

§ 621.4 Issues, loans, and donations for scouting.

(a) *General.* This section provides information relative to issue, loan or donation of Government property to the Boy Scouts of America and the Girl Scouts of America.

(b) *Guidance.* (1) Issues are made under the provisions of the loan agreement and reimbursement is made for adjusted shortages and damages.

(2) Provisions for donations of surplus property to Scout organizations, including lists of classes of donable property, are contained in Chapter III, Part 3, Defense Disposal Manual (DOD 4160.21M).

(3) The loan of certain Army, Navy, Air Force and DLA equipment and the provision of transportation and other services for Jamborees is initially provided for by Pub. L. 92-249. Implementation on a current basis is made in DOD Directive 7420.1. Army implementation is provided as follows:

(i) Army stock fund in paragraph 2-6b(4), AR 37-111, Working Capital Fund-Army Stock Fund Uniform Policies, Principles and Procedures Governing Army Stock Fund Operations.

(ii) Non-stock fund in paragraph 2-18, AR 310-34, Equipment Authorization Policies and Criteria, and Common Table of Allowances.

(c) *Procedure.* Loan agreements are mutually developed preceding the actual lending of the equipment. Paragraph 1-16, AR 735-5, General Principles, Policies and Basic Procedures, is used as the guide for preparation of loan agreements. Authority for commanders to participate in World and National Jamborees is included in paragraph (d) of this section; Procedures

V 44/20

dure for Loan of Equipment and Providing of Transportation and Other Services to the Boy Scouts of America for World and National Jamborees is included in paragraph (j); and sample loan agreement to be executed by area commanders is included as figure 7-5.

(d) *World and National Boy Scout Jamborees.* The Act of 10 March 1972 (Pub. L. 92-249; 86 Stat. 62.) and (86 Stat. 63.) authorized the Secretary of Defense to lend equipment and provide transportation and other services to the Boy Scouts of America in support of World and National Jamborees. The Secretary of Defense has delegated his authority and responsibility for the support of Jamborees to the Secretary of the Army. The Commander DARCOM ATTN: DRCMM-SP has been assigned to monitor the program for the Secretary of the Army.

(e) *Group travel and visits.* Many Scouts and Leaders will travel in groups and their itinerary will provide for visits to places of interest in CONUS en route to and from Jamborees. Such group travel may begin in June and extend into September and October of the Jamboree year. In keeping with Department of the Army policies, commanders of Army installations may extend an invitation to and honor requests from Scout groups enroute to and from the Jamboree to visit and encamp at their installation.

(f) *Commissary and post privileges.* Installation commanders are authorized to provide commissary and post exchange privileges to Scout groups en route to and from the Jamboree for food items such as bread, meat, and dairy products. These privileges will be extended only to Scout groups which are en route to or from the Jamboree and who are encamped or quartered at the installation or the Jamboree site. Commissary and post exchange privileges extended to Scout groups while encamped at the Jamboree site for supply and food items will only be honored upon-application by officials of the Boy Scouts of America to supplement supplies and rations not considered adequate for American Scouts or Scouters.

(g) *Arrangements.* Regional Scout Executives have been informed by the National Headquarters of the contents of this subchapter and that arrangements pursuant to this subchapter must be made in advance directly with the installation commanders. However, commanders will consider factors of extenuation or emergency which may preclude advance arrangements.

(h) *Hospitalization.* Boy Scouts and Scout Leaders attending Jamborees are considered designees of the Secretary of the Army for the purpose of receiving medical care at US Army Medical facilities. The reciprocal rate will not be charged. Subsistence charges will be at the rate of $1.80 per day for hospitalized patients, but will not be collected locally. Each Boy Scout and Leader participating in Jamborees and hospitalized in Army medical treatment facilities will be reported to The Surgeon General, ATTN: DASG-SGRE-SSC, Department of the Army, Washington, DC 20314, on DD Form 7 (Report of Treatment Furnished Pay Patients; Hospitalization Furnished (Part A)). No local collections are authorized.

(i) *Service coordination.* (1) The Departments of the Navy and the Air Force and the Defense Logistics Agency will assist the Department of the Army in providing necessary equipment, transportation, and services in support of the Boy Scouts of America attending Jamborees. The Secretary of the Army or his designee will maintain liaison, as appropriate, with such agencies to avoid duplication of effort.

(2) Other departments (agencies) of the Federal Government are authorized under such regulations as may be prescribed by the Secretary (Administrator) thereof, to provide to the Boy Scouts of America (BSA), equipment and other services, under the same conditions and restrictions prescribed for the Secretary of Defense.

(j) *Procedure for loan of equipment and providing of transportation and other services to the Boy Scouts of America for world and national jamborees. Preliminary actions.* (1) In accordance with the provisions of Pub. L. 92-249, H.R. 11738, 10 March 1972, and Secretary of Defense Memo of 17 May 1972, Subject: Loan of Equipment and Providing of Transportation and Other Services to the Boy Scouts of America for Boy Scout Jamborees; Memo of 23 January 1973, Subject: Military Transportation Support for Boy Scout Jamborees; and Memo of 19 August 1974, Subject: Military Transportation Support for Boy Scout Jamborees, the DOD is authorized to lend certain items and provide transportation and certain other services to such Jamborees. Prior to the loan of property and providing transportation and other services, an appropriate agreement will be executed between the United States of America and the activity to be supported. A bond (fig. 7-6), in an amount specified by the Commander, DARCOM, based on statute taken by the Commander-in-Chief/Commander, Major Army Command (MACOM), and held until termination of the encampment and final settelment is made for each Jamboree.

(2) The Commander-in-Chief/Commander, MACOM designated, on behalf of the Commander, DARCOM, representing the Secretary of Defense will enter into legal arrangements with the Boy Scouts of America for the loan of equipment and the providing of transportation and certain other services for Boy Scouts World and National Jamborees. National Jamborees include Jamborees conducted by and within the United States and also those conducted by and within foreign nations.

(3) The Commander-in-Chief/Commander, MACOM, will appoint a Property Book Officer who will maintain separate stock records in order to provide for a single final billing to the supported activity (Boy Scouts of America) for items consumed, lost, damaged or destroyed. The Department of the Army will not be billed for items obtained from other than Army sources, except medical supply losses. Bills for medical supply losses will be submitted to the US Army Area Surgeon for payment. He will establish liaison with the activity to be supported. The property book account will be established in accordance with section II, chapter 2, AR 710-2.

(4) The Commander-in-Chief, MACOM, will task the Army Area Surgeon for Medical Supply Support to the Jamborees. Each Surgeon designated should appoint an accountable officer and furnish the name, location, and routing identifier of a project office wherein medical supply problems can be resolved.

(5) The Property Book Officer is authorized direct communication with the source of supply, other military department liaison personnel and DARCOM ICP's to resolve routine supply problems.

(k) *Preparing bills of material.* (1) The activity (BSA) will submit a list of equipment and supplies desired to the Commander-in-Chief/Commander, MACOM. This list will be edited during and subsequent to preliminary conferences with representatives of the activity and furnished to Commander, DARCOM, ATTN: DRCMM-SP.

(2) HQ, DARCOM will convert the informal list to a tentative Bill of Material and will furnish the respective Commodity Command that part of the Bill of Material for their items of logistical responsibility. A suggested format for the Bill of Material is included as figure 7-1. Local reproduction is authorized. Copies of the entire tentative Bill of Material will also be furnished to each of the military departments authorized to participate in the support of the encampments. The Bill of Material forwarded to the Commander-in-Chief/Commander, MACOM will be screened to determine inhouse availability prior to placing requisitions on CONUS supply points.

(3) At such time as item availability information is on hand and the sources to be used are determined

(paragraph (m) of this section, a Bill of Material (figure 7-1) will be prepared by HQ, DARCOM, and forwarded to the Commander-in-Chief/Commander, MACOM.

(4) The Bill of Material will list, by commodity command (military department), all items desired, identified by National Stock Number (NSN) description, quantity desired and required delivery date. The NSN will provide identification of the items required. Items will be identified by the Property Book Officer to the responsible commodity command or military department as indicated below:

(i) CERCOM	1 US Army Communications and Electronics Materiel Readiness Command.
(ii) TSARCOM	2 US Army Troop and Aviation Materiel Readiness Command.
(iii) ARRCOM	3 US Army Armament Materiel Readiness Command.
(iv) TARCOM	4 U.S. Army Tank-Automotive Materiel Readiness Command.
(v) DLA	5 Defense Logistics Agency.
(vi) Navy	N Department of the Navy.
(vii) Air Force	F Department of the Air Force.
(viii) Other Installations	A

The Bill of Material will be screened to insure that radioactive items restricted for military use are not included.

(l) *Establish property transaction records.* (1) A Property Transaction Record reflecting complete information about each item loaned to the activity will be established and maintained by the Property Book Officer (figure 7-2) and the respective commodity command military department (figure 7-3). Suggested formats for the Property Transaction Records are found in figures 7-2, 7-3, and 7-4. Local reproduction is authorized.

(2) The Property Book Officer will also establish and maintain separate Property Transaction Records for items obtained from supply sources other than Army commodity commands, i.e., other Army installations, Department of the Navy, Department of the Air Force (figure 7-4).

(3) Each entry on the Property Transaction Record will be supported by appropriate documentation (commodity command: copies of shipping documents, copies of return documents and copies of surveillance inspection report—Property Book Officer: Requisition voucher files and hand receipt cards). This is particularly important for reconciliation purposes in order that all property received from each source will be returned to that source upon termination of each encampment.

(m) *Locating and obtaining equipment and supplies.* (1) The respective commodity commands (military departments) will screen the tentative Bill of Material (paragraph (k)(2)) and determine availability and source of supply identified by Routing Identifier Code. They will advise HQ, DARCOM, ATTN: DRCMM—SP of availability, appropriate substitute items when the requested items are not available in sufficient quantity, and the source of supply for requisitioning purposes.

(2) Concurrently, the Bill of Material will be screened within the MACOM to determine those items that can be obtained from assets available in the command.

(3) The Property Book Officer will requisition equipment and supplies from the source of supply as indicated by Commander, DARCOM in accordance with AR 725-50 or other separately furnished instructions. The requisition number, quantity requisitioned, stock number and source of supply will be entered in the Property Transaction Record. Requisitions will cite the appropriate project code assigned and appropriate activity address code on all requisitions submitted. Project codes will be assigned by Commander, Logistic Systems Support Activity, ATTN: DRXLS-LCC, Chambersburg, PA, 17201 and distributed by message to all interested addressees.

(4) Loan of General Services Administration (GSA) General Supply Fund Material—The Federal Property and Administrative Services Act of 1949, as amended, authorizes the Administrator, GSA to loan GSA General Supply Fund Material to the Department of Defense and other federal agencies. Loan shall be made to the extent that items are readily available and that such loans will not jeopardize the GSA stock inventory. The loan of GSA General Supply Fund Material shall normally be limited to 90 Calendar days. Requisitions for GSA material should be submitted to the nearest GSA Regional Office by the CINC/CDR MACOM.

(5) Formal accountability for all items shipped to the site of the activity will be retained by the appropriate accountable activity. Property and financial accounting will be in accordance with respective military department regulations governing loans.

(6) The shipping depot or other source will furnish a copy of the shipping document to the respective commodity command (military department) where the quantity charged, date shipped, condition of the property and total value will be posted to the Property Transaction Record.

(7) Upon receipt of the advance copy of the shipping document, the commodity command (military department) will post information to his Transaction Record, by source as in paragraph (l)(1) of this section.

(8) When the shipment is received, the Property Book Officer will inspect the property. A narrative statement of condition will be prepared if condition of the property is other than that indicated on the shipping document and referenced to the condition entry on the Property Transaction Record. The source of supply, as appropriate, will be immediately notified of overages or shortages and verified in condition, as provided in Chapter 8, AR 735-11. The Property Book Officer will enter on the shipping document the quantity actually received when it differs from quantity shown as shipped and will post the quantities received to the property book record.

(9) Discrepancies between the quantity shipped by the depot and that received by the Property Book Officer and variance in condition will be reconciled as rapidly as possible and appropriate records will be brought into agreement. When shortage or damage is not attributable to the carrier, the Property Book Officer will immediately contact the responsible source of supply, furnishing the stock number and document number involved, together with an explanation of the discrepancy. Reconciliation is particularly important in order to ensure a common point of departure in determining charges to be assessed upon termination of the activity. Replacement shipments, when required, will be covered by appropriate shipping documents.

(10) Special Instructions for Defense Logistics Agency, Clothing and Textile Items. (See DSAR 4140.27/AR 700-49).

(n) *Transportation.* (1) Transportation of equipment and supplies—The responsibility of coordinating movement of equipment and supplies placed on loan to the Boy Scouts of America during National and World Jamborees is delegated to the Commander, US Army Materiel Development and Readiness Command, ATTN: DRCMM-ST.

(2) All requisitions for items in question, will cite the appropriate project code and will be shipped by commercial bill of lading on a collect basis to all National Jamborees and World Jamborees held in the United States.

(3) Shipments to Boy Scout contingents at World Jamborees in foreign countries will be by Government bills of lading, unless otherwise specified by the Boy Scouts of America.

(4) All shipments directed to Boy Scout Jamborees will be routed by the most feasible means as determined by the shipper. Shipments will be consolidated to the maximum extent possible to assure the lowest charges available to the Boy Scouts of America.

(5) Separate shipping instructions will be provided for each Jamboree to

JAN 29 1979 UMI

V 4 4 / 2 0 J A 2 9 7 9 UMI

assure that correct consignee and railhead addresses are furnished.

(6) Movement of Boy Scouts, Scouters, and officials living in the United States of America to a Jamboree within the United States of America or to a Jamboree in an oversea area shall be the responsibility of the Boy Scouts of America or the individuals concerned.

(7) No authority exists under Public Law 92-249 for the movement of Boy Scouts, Scouters, and officials via military capabilities other than those of the Military Airlift Command or the Military Sealift Command.

(o) *Transportation by vessels of the Military Sealift Command (MSC).* (1) The MSC does not operate any ships suitable for carriage of passengers on transoceanic routes. Although pertinent directives and Public Law 92-249 authorize the movement of Boy Scouts on Military Vessels, the MSC has no capability to provide such transportation.

(2) The MSC is an industrial-funded organization and charges the military service for sealift services provided in accordance with established rates. The host command will be responsible to compensate the MSC for any equipment or material moved on MSC ships. The limitations inherent in Public Law 92-249 stipulate that transportation support provided will be at no cost to the Government. Under these directions, Boy Scout equipment or materiel is not authorized movement on a space available basis without prior approval of the Secretary of Defense. Such approval is not anticipated.

(3) All billings for transportation provided by MSC will be forwarded to the appropriate Commander-in-Chief/Commander of the support major Army command (MACOM). Reimbursement will be requested by the MACOM Commander from the Boy Scouts of America.

(p) *Transportation of oversea based scouts, scouters, and other authorized personnel by military airlift to national or international jamborees.* (1) Space required reimbursable transportation by Military Airlift Command (MAC) airlift over established MAC channels is authorized from points outside the Continental United States (OCONUS) to aerial ports within CONUS, or to other oversea locations and return. Such transportation will be provided only to the extent that it does not interfere with the requirements of military operations, and only to those Boy Scouts, Scouters, and officials residing overseas and certified by the Boy Scouts of America (BSA) as representing the BSA at the Jamboree. Certification by the BSA will be in the form of a letter identifying each such individual as their authorized representative at the Jamboree. This letter of authorization must be presented to the sponsoring overseas command.

(2) Boy Scouts, Scouters, officials and their equipment will be moved after all space-required traffic, but before any space-available traffic.

(3) Each passenger is authorized the normal accompanying free baggage allowance of 66 pounds while traveling on MAC aircraft. It is not contemplated that any excess baggage allowance will be authorized.

(4) Transportation of Boy Scouts, Scouters, officials, and their equipment provided by MAC controlled aircraft will be reimbursed at the common user tariff rates assessed U.S. Government Traffic, as contained in AFR 76-11.

(5) On the basis of letters of authorization issued by the BSA, the BSA will monitor services provided by the Department of Defense. One copy of each BSA letter of authorization will be forwarded to the Commander, US Army Materiel Development and Readiness Command, ATTN: DRCMM-SP, 5001 Eisenhower Avenue, Alexandria, VA 22333, for planning purposes. This letter of authorization should specify whether one way or round trip transportation is requested.

(6) DACROM responsibilities include the following:

(i) Compiling a passenger forecast to be submitted to MAC in accordance with AR 59-8/OPNAVINST 4630.18C/AFR 76-38/MCO 4630.6B.

(ii) Providing Military Traffic Management Command (MTMC) an information copy of the passenger forecast.

(iii) Submitting all passenger requirements for one way and round trip transportation originating overseas to the appropriate overseas command.

(7) The responsibilities of the sponsoring overseas command include:

(i) Verifying that Scout passengers are officially authorized representatives of BSA in accordance with paragraph (p)(1) of this section.

(ii) Making all necessary passenger reservations with MAC, for transportation originating overseas, in accordance with AR 55-6/AFR 76-5/OPNAVINST 4630.23/MCO P4630.11. The oversea command will submit CONUS outbound return passenger requirements to Commander, Military Traffic Management Command, ATTN: MTMC-PTO-P, Washington, D.C. 20315.

(iii) Issuing each passenger a MAC Transportation Authorization (DD Form 1482) for transportation from the overseas location and return, when round trip transportation has been requested. The customer identification code, item (7) of the DD Form 1482, should be designated—JBWJ—which was approved by MAC as the permanent CIC for direct billing purposes to HQ, Boy Scouts of America, North Brunswick, New Jersey, 08902.

(iv) Ensuring that each Scout passenger has a completed DD Form 1381, signed by a parent, guardian or other legally responsible individual.

(v) Evaluating the use and necessity of military airlift within or between overseas locations. This evaluation will include such factors as reasonable travel time, number of connections required, and assurance of Scout group integrity. Surface transportation will normally be used for travel within an overseas area.

(8) The responsibilities of the MTMC include:

(i) Evaluating the return outbound passenger requirements and making the necessary transportation arrangements so as to maintain Scout group integrity at all times.

(ii) Assisting the BSA in completing required documentation and insuring that passengers are ready prior to the return flight.

(iii) Pub. L. 92-249 does not provide authorization for the use of the Department of Defense transportation by Scouts, Scouters, and Officials of foreign nations. All requests to transport such persons should be forwarded through the unified command channels to the Office of the Assistant Secretary of Defense (Public Affairs). However, DOD does not contemplate authorization for the use of MAC aircraft for other than U.S. Scouts, Scouters, and Officials.

(iv) Use of military helicopters in support of medical evacuation, VIP, press and photo-services—The Director of Army Aviation, the Department of the Army Staff Judge Advocate, and the Comptroller of the Army have furnished the general opinion that Public Law 92-249 authorizes the use of Military helicopters in support of the above described services to the extent they are reasonably available and permits the use of appropriated funds.

(q) *Determination of charges and settlement.* (1) All property on which repair cost is claimed will be held at the depot or post, camp or station until final charges are determined and a release is given by CDR, DARCOM, Department of the Army.

(2) The commodity command (military department) will prepare the following information and statement, and forward them, to CDR, DARCOM, Department of the Army, for final review:

(i) Complete Property Transaction Record and supporting documents.

(ii) Proper accounts for which reimbursement received for shortages and repairs are to be deposited.

(iii) The following statement: "The losses and/or damages indicated on the Property Transaction Report in the amount of $—— represent the total claim by (appropriate commodity command or military department) relative to commodity command or military deparment property loaned to (Boy Scouts of America). Upon settlement and deposit to the proper account, the CDR of the commodity command or military department releases the (Boy Scouts of America) from further obligations."

(iv) Statements as to the general type of repair (e.g., tentage, repair tears, insert new panels, replace grommets) will be reported on separate addendum to the Property Transaction Record for items requiring repair.

(3) The CINC/CDR, MACOM, will prepare the following information and statement for property furnished for assets in the command and will forward this to CDR, DARCOM:

(i) Same as (q)(2)(i) of this section.

(ii) Same as (q)(2)(ii) of this section.

(iii) The following statement: The losses and/or damages indicated on the Property Transaction Record in the amount of $—— represent the total claim by (appropriate Army) relative to (appropriate Army) property loaned to (Boy Scouts of America). Upon settlement and deposit to the proper account, the CINC/CDR, MACOM releases the (Boy Scouts of America) from further obligations.

(iv) Same as (q)(2)(iv) of this section.

(4) CDR, DARCOM, will review the charges, inspect property to be repaired, if necessary, reconcile any discrepancies and determine final charges to be levied against the supported activity. Approved list of charges will be forwarded to the CINC/CDR, MACOM, for collection, and property being held for repair will be released.

(5) The CINC/CDR, MACOM, will prepare and dispatch a letter to the supporting activity and request payment made payable to the Treasurer of the United States. Upon receipt of payment, collection documents will be prepared and appropriate fiscal accounts, as furnished by the commodity command (military departments) ((q)(2) and (3) of this section) credited. The MACOM Surgeon will take action to reimburse the DLA stock fund for expendable medical supply losses reported. The CINC/CDR, MACOM, will close the Property Transaction Record Account.

(6) The CINC/CDR, MACOM, will advise the CDR, commodity command (military departments and CDR, DARCOM, DA) that settlement has been accomplished. Commodity command (military department) Property Transaction Records will be closed upon receipt of the foregoing advice.

(7) The CDR, DARCOM will advise the CINC/CDR, MACOM, to return the bond to Boy Scouts of America.

(8) In the event of unsatisfactory settlement, the proceeds of the bond will be used to satisy the claim. The Power of Attorney executed in connection with the agreement will be invoked and proceeds collected from the bond (fig. 7-7).

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 78-89]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Miami River, Florida

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the Dade County Department of Transportation, the Coast Guard is changing the regulations governing the drawbridges across the Miami River to exclude the present restricted period on Saturday (i.e., the draws will open on signal). This change reflects decreased vehicular congestion on Saturday. This action results in less restriction on Saturdays for vessel traffic through the bridges.

EFFECTIVE DATE: This amendment is effective on March 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G-WBR/73), Room 7300, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (202-426-0942).

SUPPLEMENTARY INFORMATION: On August 28, 1978, the Coast Guard published a proposed rule (43 FR 38434) concerning this amendment. The Commander, Seventh Coast Guard District, also published these proposals as a Public Notice dated August 29, 1979. Interested persons were given until September 29, 1978 to submit comments.

DRAFTING INFORMATION

The principal persons involved in drafting this rule are: Frank L. Teuton, Jr. Project Manager, Office of Marine Environment and Systems, and Mary Ann McCabe, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF COMMENTS

Twelve letters and one petition with ten signatures were received, all of which supported the proposal.

In consideration of the foregoing, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising paragraph (a) of § 117.448 to read as follows:

§ 117.448 Miami River, Fla.; highway bridges from mouth to and including city of Miami bridge at Northwest 27th Avenue, Miami.

(a) Except as otherwise provided in paragraphs (b), (c), and (d) of this section, the owners of or agencies controlling these bridges shall not be required to open the drawspans for the passage of vessels from 7:30 to 9 a.m. and from 4:30 to 6 p.m., on all days other than Saturdays, Sundays, and the following legal holidays: New Year's Day, Independence Day, Labor Day, Veterans Day, Thanksgiving Day, and Christmas Day.

• • • • •

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5).)

Dated: January 20, 1979.

J. B. HAYES,
Admiral, U.S. Coast Guard Commandant.

[FR Doc. 79-2965 Filed 1-26-79; 8:45 am]

[4910-14-M]

[CGD2-79-1-R]

PART 165—SAFETY ZONES

Safety Zone—Upper Mississippi River, Mile 0 to Mile 126

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This amendment to the Coast Guard's Safety Zone Regulations establishes the Upper Mississippi River, Mile 0 to Mile 126, as a safety zone. This safety zone is established to prevent the destruction or loss of any vessel in this area. This area has been made especially hazardous by the presence of extremely heavy ice conditions, and this hazard will be amplified as efforts are undertaken to break the ice and clear the channel.

DATES: This amendment is effective at 6 P.M., CST, 18 January 1979 and will remain effective until further notice.

FOR FURTHER INFORMATION CONTACT:

CAPT. GLENN F. YOUNG, USCG, c/o Commander, Second Coast Guard District, 1430 Olive St., St.

V 4 4 / 2 0 JA 29 79 UMI

Louis, MO 63013, TEL: 314 425-4614.

SUPPLEMENTARY INFORMATION: This amendment is issued without publication of a notice of proposed rulemaking and is effective in less than 30 days from the date of publication, because public procedures on this amendment are impractical due to the emergency nature of the ice conditions, and due to the additional hazard that will be created by icebreaking efforts scheduled to begin on 22 January 1979.

DRAFTING INFORMATION: The principal persons involved in the drafting of this rule are CAPT. R. W. H. BARTELS, USCG, Project Officer, and LCDR K. J. BARRY, USCG, Project Attorney, c/o Commander, Second Coast Guard District, 1430 Olive St., St. Louis, MO 63103 TEL: 314 425-4614. In consideration of the above, Part 165 of Title 33 of the Code of Federal Regulations is amended by adding § 165.203, to read as follows:

§ 165.203 Upper Mississippi River, Mile 0 to Mile 126.

(a) *Safety Zone:* All the waters of the Upper Mississippi River from Mile 0 to Mile 126 are a safety zone.

(b) *Special regulations.* No vessel may enter into or proceed within the safety zone described in subsection (a) without the express permission of the Commander, Second Coast Guard District, 1430 Olive St., St. Louis, MO 63103, TEL: 314 425-4614.

(92 STAT. 1475 (33 U.S.C. 1225); 49 CFR 1-46 (n)(4).)

Dated: January 18, 1979.

W. E. CALDWELL,
Rear Admiral, U.S. Coast Guard Commander, Second Coast Guard District.

[3640-01-M]

Title 35—Panama Canal

CHAPTER I—CANAL ZONE REGULATIONS

PART 10—ACCESS TO INFORMATION CONCERNING INDIVIDUALS

General Routine Use

AGENCY: Canal Zone Government and Panama Canal Company.

ACTION: Final rule.

SUMMARY: On December 14, 1978, the Canal Zone Government and the Panama Canal Company published a proposed rule to establish a new general routine use in the FEDERAL REGISTER (43 FR 58394). No comments requiring amendment of the proposed rule were received, and the rule is now adopted without change. The rule establishes a new general routine use applicable to all systems of records maintained by the Canal Zone Government and the Panama Canal Company. The routine use permits the Canal agencies to release information from their systems of records to other agencies of the United States, and to officials of the Government of the Republic of Panama, for the purpose of planning the implementation of the Panama Canal Treaty of 1977 and related agreements.

EFFECTIVE DATE: January 30, 1979.

ADDRESS: Panama Canal Company (Administrative Services Division), Box M, Balboa Heights, Canal Zone.

FOR FURTHER INFORMATION CONTACT:

Mrs. Hazel M. Murdock, Assistant to the Secretary, Panama Canal Company, Room 312, Pennsylvania Building, 425 13th Street N.W., Washington, D.C. 20004 (telephone 202-724-0104).

Accordingly, Appendix A to Part 10 of Title 35, Code of Federal Regulations, is amended by the addition of a new paragraph 7. The introductory paragraph to Appendix A and the new paragraph 7 read as follows:

APPENDIX A—GENERAL ROUTINE USES

Information pertaining to individuals which is maintained in any system of records under the control of the Panama Canal Company or Canal Zone Government is subject to disclosure, as a routine use of such information, to any of the following persons or agencies under the circumstances described:

• • • • •

7. To the extent necessary for planning the implementation of the Panama Canal Treaty of 1977 and related agreements, information may, upon approval by the Chief, Administrative Services Division (Agency Records Officer) or that offical's designee, be disclosed to officials of the Government of the Republic of Panama and to U.S. Government agencies which will, under the Treaty, assume functions now performed by the Panama Canal Company or the Canal Zone Government.

Dated: January 17, 1979.

H. R. PARFITT,
Governor of the Canal Zone, President, Panama Canal Company.

[3410-11-M]

Title 36—Parks, Forests, and Public Property

CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 200—ORGANIZATION, FUNCTIONS, AND PROCEDURES

Subpart A—Organization

ORGANIZATIONAL CHANGES AND CORRECTIONS

AGENCY: Forest Service, USDA.

ACTION: Final rule (Organization statement).

SUMMARY: The organizational description of the Forest Service is updated to reflect a current listing of land management units and research facilities and a name change for Region 5, from "California Region" to "Pacific Southwest Region." This organizational description is required to be published in the FEDERAL REGISTER by the Administrative Procedure Act.

EFFECTIVE DATE: January 29, 1979.

FOR FURTHER INFORMATION CONTACT:

Thomas R. Jones, Administrative Management Staff, Forest Service, USDA, P.O. Box 2417, Washington, D.C. 20013, 202-447-3093.

Part 200 of Title 36 of the Code of the Federal Regulations is amended as follows:

§ 200.1 [Amended]

1. In paragraph (c)(2) of § 200.1, revise the listing of National Forest System land units to read as follows:

154 Proclaimed or designated National Forests
19 National Grasslands
26 Purchase Units
17 Land Utilization Projects
24 Research and Experimental Areas
45 Other Areas

§ 200.2 [Amended]

2. In § 200.2, revise paragraph (a)(1) to read as follows:

(a) • • •

(1) *National Forests.* Each Forest has a headquarters office and is supervised by a Forest Supervisor who is responsible to the Regional Forester. Two or more proclaimed or designated National Forests, or all of the Forests in a State, may be combined into one Forest Service Administrative Unit headed by one Forest Supervisor. Each Forest is divided into Ranger Districts. The Alaska Region is composed of two National Forests without Ranger Districts; with one Forest divided into three areas, each administered by a Forest Supervisor.

• • • • •

3. In paragraph (d) of § 200.2, in the listing of National Forest by Regions, change the name of Region 5 from "California Region" to "Pacific Southwest Region."

(81 Stat. 54 (5 U.S.C. 552).)

Dated: January 22, 1979.

JOHN R. MCGUIRE,
Chief, Forest Service.

[6560-01-M]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 1036-1]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Louisiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final Rule.

SUMMARY: This rulemaking approves an administrative revision to the Louisiana State Implementation Plan (SIP) showing the change in location of an ozone and sulfur dioxide sampling site in New Orleans and the deletion of the list of equipment needed to complete the SIP network. The sampling site was moved because the original location was no longer available. Since the location of the new sampling site is in close proximity to the location of the original site, no significant differences in monitoring results will occur. The list of equipment, as compiled is obsolete.

EFFECTIVE DATE: January 30, 1979.

FOR FURTHER INFORMATION CONTACT:

Jerry Stubberfield, Chief, Implementation Plan Section, Air and Hazardous Materials Division, Environmental Protection Agency, Region 6, 1201 Elm Street, Dallas, Texas 75270, (214/767-2742).

SUPPLEMENTARY INFORMATION: On April 3, 1978, after adequate notice and public hearing, the Louisiana Air Control Commission (LACC) submitted a SIP revision to the Environmental Protection Agency which was approved and adopted by the Commission on March 28, 1978. The revision proposed that (1) sampling site number 2 of Table II in the Louisiana SIP be changed from "Campsite", corner of Orleans and Lafitte Avenue 29°58', 90°4', to State Office Building, 325 Loyola Avenue, New Orleans, 29°57', 90°4', (2) site "S-2" be deleted from the Remarks column of the sulfur dioxide continuous sampling section of the Table I and added to the Remarks column of sulfur dioxide 24-hour sampling section of Table I, and (3) the list of equipment needed to complete the SIP network be deleted as it is obsolete and no longer of any value in the plan. That page which carried the equipment list will read "Intentionally Left Blank". The Louisiana SIP, as amended, specifies a monitoring site for ozone and sulfur dioxide to be operated in New Orleans at the intersection of Orleans Avenue and Lafitte Street. This site was located on city owned property. In late 1974 the City of New Orleans removed the building, requiring the LACC to move the monitoring equipment. It was moved approximately ¾ mile southwest of the original site, to the State Office Building at 325 Loyola Avenue, which maintains surroundings similar to the original site. Both sites are in a commercial district with well traveled streets and approximately ¼ mile from a limited access highway. Analysis of the ozone data from the original and the new site locations show no significant differences. The lack of personnel coupled with mechanical and maintenance difficulties precluded the operation of a continuous SO_2 monitor at the new site. Instead, the Commission is using the non-continuous EPA reference method to monitor SO_2 concentrations.

CURRENT ACTION: The EPA is promulgating an administrative revision to the Louisiana State Implementation Plan (SIP) which will involve changes to the Air Quality Surveillance Network.

This notice of final rulemaking is issued under the authority of Section 110(a) of the Clean Air Act, as amended, 42 U.S.C. 7410-(a).

Dated: January 23, 1979.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Chapter 1, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart T—Louisiana

1. In § 52.970, paragraph (c) is amended by adding paragraph (10) as follows:

§ 52.970 Identification of plan.

• • • • •

(c) • • •

(10) An administrative revision of the Air Quality Surveillance Network was submitted by the Louisiana Air Control Commission on April 3, 1978. (Non regulatory)

[FR Doc. 79-2987 Filed 1-26-79; 8:45 am]

[6560-01-M]

[FRL 1016-7]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Texas Regulation V

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final Rule.

SUMMARY: This rule approves, in part, Texas Regulation V, Control of Air Pollution from Volatile Carbon Compounds, submitted by the Governor on July 20, 1977. The revision was submitted to replace regulations promulgated by EPA on July 21, 1977. The approved parts of Regulation V will improve the State's capability to control volatile carbon compounds and attain the national standards for photochemical oxidants.

EFFECTIVE DATE: January 30, 1979.

FOR FURTHER INFORMATION CONTACT:

Jerry Stubberfield, Chief, Implementation Plan Section, Air and Hazardous Materials Division, Environmental Protection Agency, Region 6, 1201 Elm Street, Dallas, Texas 75270 (214-767-2742).

SUPPLEMENTARY INFORMATION: On July 20, 1977, the Governor of Texas, after adequate notice and public hearing, submitted a revision to Regulation V, Control of Air Pollution from Volatile Carbon Compounds. EPA reviewed the regulation and with the exception of Rules 507 and 510.3, determined it to be approvable. Accordingly, a proposed approval of Rules 510.1 and 510.2 were published in the FEDERAL REGISTER on July 27, 1978 (43 FR 32440), and EPA proposed to revoke §§ 52.2283 and 52.2289. In addition, EPA proposed disapproval of Sections 507 and 510.3. Interested persons were given 30 days in which to comment on these proposed actions. Comments were received from the Texas Chemical Council and from Monsanto. These comments centered on EPA's proposed disapproval of Section 507 of Texas Regulation V.

PUBLIC HEARING REQUIREMENTS

Both comments suggested that EPA is required to hold a public hearing prior to disapproval of Section 507

V 4 4 / 2 0

since it is currently an approved part of the State Implementation Plan (SIP), and was not revised in the Governor's submittal on July 20, 1977. The section of the Clean Air Act cited as requiring such hearing was Section 110(c). This section of the Act addresses public hearing requirements for regulations proposed by the Administrator. In EPA's action concerning Section 507, no regulation has been proposed. EPA has simply proposed to exclude a State rule from the SIP on the basis that application of the rule by the State violates Section 110(i) of the Act which specifies the methods for modifying the SIP. Therefore, there is no requirement for EPA to hold a public hearing prior to final action on Section 507.

EFFECTS OF SECTION 507 DISAPPROVAL

In EPA's proposed action on Section 507, the effects of disapproval on facilities previously granted exemptions were not clearly stated. It is not the intent of EPA to require immediate compliance with Regulation V by exempted facilities upon disapproval of Section 507. Section 113(d) of the Clean Air Act allows issuing a delayed compliance order for non-complying facilities until July 1, 1979, if facilities are unable to comply immediately.

CURRENT ACTION

This action approves revised Sections 510.1 and 510.2 of Texas' Regulation V, and disapproves Sections 507 and 510.3. These actions are being promulgated as proposed by EPA on July 27, 1978. The rationale for these actions was provided in the proposed rulemaking, and therefore, will not be repeated in this notice. Sections 52.2283 and 52.2289 of 40 CFR Part 52 are being revoked.

This rulemaking is issued under the authority of Section 110(a) of the Clean Air Act, as amended, 42 U.S.C. 7410-(a).

Dated: January 23, 1979.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Chapter 1, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart SS—Texas

1. Section 52.2270 is amended by revising paragraph (c) to read as follows:

§ 52.2270 Identification of plan.

* * * * * *

(c) The plan revisions listed below were submitted on the dates specified.

(1) Certification that statewide public hearings had been held on the plan was submitted by the Texas Air Control Board (TACB) on February 8, 1972. (Nonregulatory.)

(2) A discussion of its policy concerning the confidentiality of certain hydrocarbon emission data was submitted by the TACB on May 2, 1972. (Nonregulatory.)

(3) A discussion of the source surveillance and extension sections of the plan was submitted by the TACB on May 3, 1972. (Nonregulatory.)

(4) A discussion of minor revisions to the plan was submitted by the Governor on July 31, 1972. (Nonregulatory.)

(5) Revisions of section XI, paragraph C.3: rule 9: regulation V and control strategy for photochemical oxidants/hydrocarbons in Texas designated regions 7 and 10; regulation VII; and control strategy for nitrogen oxides in regions 5, 7, and 8 were submitted by the TACB on August 8, 1972.

(6) A request that inconsistencies in the plan concerning the attainment dates of primary air standards be corrected was submitted by the Governor on November 10, 1972. (Nonregulatory.)

(7) Revisions to regulation IV, regulation V, the general rules and control strategy for photochemical oxidants/hydrocarbons, and a request for a two year extension to meet Federal standards for photochemical oxidants was submitted by the Governor on April 13, 1973.

(8) Revisions to regulation IV (Control of Air Pollution from Motor Vehicles) were adopted on October 30, 1973, and were submitted by the Governor on December 11, 1973.

(9) A revision of priority classifications for particulate matter, sulfur oxides, and carbon monoxide was submitted by the Governor on March 21, 1975. (Nonregulatory.)

(10) Revisions to rule 23, concerning compliance with new source performance standards, and rule 24, concerning compliance with national emission standards for hazardous air pollutants were submitted by the Governor on May 9, 1975.

(11) Administrative revisions were submitted by the TACB with the semi-annual report in 1974 for sections I, II, III, IV, XI and XIII, and with the semi-annual report in 1975 for sections I, II, XI, and XII. (Nonregulatory.)

(12) A revision of section IX, Air Quality Surveillance, was submitted by the Governor on August 2, 1976. (Nonregulatory.)

(13) Revisions to section IX, Air Quality Surveillance Plan, which include changes of several air quality monitoring sites, were submitted by the TACB on August 12, 1977. (Nonregulatory.)

(14) Administrative revisions to section X, the Permit System, were submitted by the TACB in 1973, 1974, 1975, and 1977. (Nonregulatory.)

(15) Revisions to regulation V for control of volatile carbon compound emissions, as amended on December 10, 1976, were submitted by the Governor on July 20, 1977.

2. Section 52.2275 is amended by adding paragraphs (b) and (c) as follows:

§ 52.2275 Control strategy: Photochemical oxidants (hydrocarbons).

* * * * * *

(b) Section 507 of Texas Regulation V is disapproved since its application by the State violates the requirements of Section 110(i) of the Clean Air Act, as amended.

(c) Section 510.3 of revised Regulation V, which was submitted by the Governor on July 20, 1977, is disapproved.

§ 52.2283 [Revoked and Reserved]

3. Section 52.2283 is revoked and reserved.

§ 52.2289 [Revoked and Reserved]

4. Section 52.2289 is revoked and reserved.

[FR Doc. 79-2986 Filed 1-26-79; 8:45 am]

[6560-01-M]

[FRL 1032-6]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Yolo-Solano Air Pollution Control District

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, take no action on changes to the Yolo-Solano Air Pollution Control District (APCD) portion of the California State Implementation Plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: February 28, 1979.

FOR FURTHER INFORMATION CONTACT:

Allyn M. Davis, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 215 Fremont Street, San Francisco, California 94105, Attn: Douglas Grano, (415) 556-2938.

SUPPLEMENTARY INFORMATION: On August 9, 1978, in FR 35347, EPA published a Notice of Proposed Rulemaking for revisions to the Yolo-Solano APCD's rules and regulations submitted on June 22, 1978 by the California Air Resources Board for inclusion in the California SIP.

The changes contained in this submittal and being acted upon by this notice include the following: language changes to incorporate the recodification of the California Health and Safety Code; deletion of an exemption for solid waste burning; changes to rules regarding organic solvents; changes in the rule governing fuel burning equipment; and an administrative change in the rule providing for the place of hearings.

Under Section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as SIP revisions.

Rules concerning new source review have been revised; however, no action is being taken at this time and these rules will be acted upon in a separate FEDERAL REGISTER notice.

The State also submitted regulations concerning New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS) on June 22, 1978. These NSPS and NESHAPS regulations implement Sections 111 and 112 of the Clean Air Act, and are not appropriate for inclusion in a SIP under Section 110 of the Act. Therefore, these regulations will be neither approved nor disapproved by EPA as part of an applicable implementation plan. They will, however, be reviewed in determining whether to delegate authority to implement and enforce the NSPS and NESHAPS regulations in the APCD under the appropriate provisions of Sections 111 and 112. Announcement of such delegation would appear in a separate FEDERAL REGISTER notice.

A list of the rules being considered by this action was published as part of the Notice of Proposed Rulemaking and can be found in 43 FR 35347 (August 9, 1978). Comments were received from the Yolo-Solano APCD during the 30-day public comment period. No other comments were received.

The APCD commented on actions EPA has taken with regard to Rule 2.16. The APCD noted the differences between the July 19, 1974 submittal of Rule 2.16, *Fuel Burning Heat and Power Generators*, which was disapproved by EPA (43 FR 25676), and the earlier approved and currently applicable rule, *Fuel Burning Equipment*, submitted on February 21, 1972. Although the APCD agrees that allowable emissions for post-1972 fuel burning units are increased under the disapproved rule, the District argued that the rule also provides for a strengthening of control, including an emission limitation on NO_x for pre-1972 sources where there are presently no limitations in the SIP.

Nevertheless, the July 19, 1974 submittal of Rule 2.16 was disapproved because it included a relaxation in particulate matter limits without an adequate control strategy demonstration that this relaxation would not interfere with the attainment and maintenance of the National Ambient Air Quality Standards (NAAQS). EPA cannot approve subparagraph c.2 to Rule 2.16, submitted June 22, 1978 and being considered in this notice, because that subparagraph is intended to revise a rule which was never approved by EPA and is not presently a part of the applicable SIP. Therefore, EPA will take no action on this rule. The February 21, 1972 submittal of Rule 2.16, *Fuel Burning Equipment*, remains Federally enforceable as part of the applicable SIP. The APCD is encouraged to resubmit Rule 2.16 with an adequate control strategy demonstration, which should be in accordance with the specific requirements of 40 CFR 51.13(e).

The APCD also commented on Rule 6.5(a), *Standards for Granting Applications*, which allows the granting of a special permit for agricultural burning based on economic factors. Although economic factors often are considered in the development of limitation rules, the overriding requirement of Section 110 of the Clean Air Act is that the SIP provides for the attainment and maintenance of the NAAQS. Since Rule 6.5(a) does not include provisions to consider the permit's impact on the NAAQS, it could allow emissions that might cause or contribute to a violation of the air quality standards. That is, the Clean Air Act does not allow economic factors to be used as the sole basis in granting exceptions to emission limits. Economic exceptions are acceptable only if the rule includes adequate safeguards to protect the NAAQS. Action will be taken on rule 6.5(a) in a separate FEDERAL REGISTER notice.

It is the purpose of this Final Rulemaking notice to approve all changes contained in the June 22, 1978 submittal and incorporate them into the California SIP with the exception of those rules not being acted upon.

EPA is taking no action on the amendments to subparagraph (c)(2) of Rule 2.16, *Fuel Burning Heat or Power Generators*. These amendments place limitations on the emission rates of sulfur compounds and particulate matter when burning an alternate fuel. However, these provisions apply to the July 19, 1974 submittal of Rule 2.16 [43 FR 25676], which was disapproved by EPA because it allowed for increased emission rates, particularly during the use of alternate fuels, without including an adequate control strategy demonstration as required by 40 CFR 51.13. Since there are no provisions for alternate fuel use in the previously approved and currently applicable February 21, 1972 submittal of Rule 2.16, *Fuel Burning Equipment* [37 FR 10842], the June 22, 1978 submitted amendments are not appropriate for inclusion in the California SIP at this time, and thus no action will be taken. The February 21, 1972 submittal shall remain in effect.

Additionally, the EPA is taking no action in this notice on Rule 6.5, *Standards for Granting Applications*. Action will be taken on this rule in a separate FEDERAL REGISTER notice.

It is also the purpose of this notice to correct a clerical error in 40 CFR 52.280 paragraph (a)(2)(i)(A). The FEDERAL REGISTER notice dated June 14, 1978 (43 FR 25677) mistakenly stated that the submittal date for the previously approved and currently applicable Rule 2.16, *Fuel Burning Equipment*, was June 30, 1972. The submittal date for this rule was actually February 21, 1972.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

AUTHORITY: Sections 110 and 301(a) of the Clean Air Act as amended (42 U.S.C. 7410 and 7601(a)).

DOUGLAS M. COSTLE,
Administrator.

Dated: January 23, 1979.

Incorporation by reference provisions approved by the Director of the FEDERAL REGISTER.

Subpart F of Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c)(44)(iv) is added as follows:

§ 52.220 Identification of plan.

* * * * * *

(c) * * *

[FRL 1032-2]

PART 65—DELAYED COMPLIANCE ORDERS

Delayed Compliance Order for the City of Orrville, Municipal Power Plant, Orrville, Ohio[1]

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final Rule.

SUMMARY: By this rule, the Administrator of U.S. EPA issues a Delayed Compliance Order to the City of Orrville. The Order requires the City of Orrville to bring air emissions from its Boilers Nos. 9, 10, 11, 12 and 13 at Orrville, Ohio, into compliance with certain regulations contained in the federally approved Ohio State Implementation Plan (SIP). The City of Orrville's compliance with the Order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act (the Act) for violations of the SIP regulations covered in the Order.

DATES: This rule takes effect January 29, 1979.

FOR FURTHER INFORMATION CONTACT:

Peter Kelly, Attorney, United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, Telephone (312) 353-2082.

SUPPLEMENTARY INFORMATION: On May 31, 1978, the Acting Regional Administrator of U.S. EPA's Region V Office published in the FEDERAL REGISTER (43 FR 23612) a notice setting out the provisions of a proposed Federal Delayed Compliance Order for the City of Orrville. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed Order. No public comments and no request for a public hearing were received in response to the notice.

Therefore, a Delayed Compliance Order effective this date is issued to the City of Orrville by the Administrator of U.S. EPA pursuant to the authority of Section 113(d)(2) of the Clean Air Act, 42 U.S.C. 7413(d)(2). The Order places the company on a schedule to bring its Boilers Nos. 9, 10, 11, 12 and 13 at Orrville, Ohio, into compliance as expeditiously as practicable with Regulation OAC 3745-17-10, a part of the federally approved Ohio State Implementation Plan. The City of Orrville is unable to immediately comply with this regulation. The Order also imposes interim requirements which meet Sections 113(d)(1)(C) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If the conditions of the Order are met, it will permit the City of Orrville to delay compliance with the SIP regulations covered by the Order until July 1, 1979.

Compliance with the Order by the City of Orrville will preclude Federal enforcement action under Section 113 of the Act for violations of the SIP regulations covered by the Order. Citizen suits under Section 304 of the Act to enforce against the source are similarly precluded. Enforcement may be initiated, however, for violations of the terms of the Order, and for violations of the regulation covered by the Order which occurred before the Order was issued by U.S. EPA or after the Order is terminated. If the Administrator determines that the City of Orrville is in violation of a requirement contained in the Order, one or more of the actions required by Section 113(d)(9) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under Section 307(b) of the Act. U.S. EPA has determined that the Order shall be effective upon publication of this notice because of the need to immediately place the City of Orrville on schedule for compliance with the Ohio State Implementation Plan.

(42 U.S.C. 7413(d), 7601.)

Dated: January 23, 1979.

DOUGLAS M. COSTLE,
Administrator.

In consideration of the foregoing, Chapter I of Title 40 of the Code of Federal Regulations is amended as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By amending the table in § 65.400 to reflect the approval of the following order as follows:

§ 65.400 Federal Delayed Compliance Orders Issued Under Section 113(d) (1), (3), and (4) of the Act.

Source	Location	Order No.	Date of FR proposal	SIP regulation involved	Final compliance date
City of Orrville Municipal Power Plant.	Orrville, Ohio.....	EPA-5-79-A-2.....	May 31, 1978.	OAC 3745-17-10.	July 1, 1979

[FR Doc. 79-2984 Filed 1-26-79; 8:45 am]

[6560-01-M]

SUBCHAPTER E—PESTICIDE PROGRAMS

[OPP-260032; FRL 1046-7]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Editorial Amendment

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: On August 11, 1978, EPA published a rule in the FEDERAL REGISTER which established a new tolerance for residues of the herbicide terbacil on mint hay (peppermint and spearmint). The new tolerance level was established at 2 ppm. At that time, the old tolerance of 0.1 ppm should have been deleted from the regulations. This rule deletes the old tolerance of 0.1 ppm from the regulations in § 180.209.

EFFECTIVE DATE: Effective on January 29, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. Edward Gross, Program Support Division (TS-757), Office of Pesticide Programs, EPA, 401 M Street, SW, Washington, DC 20460 (202/755-4854).

SUPPLEMENTARY INFORMATION: On August 11, 1978 (43 FR 35697), a tolerance was established for residues of the herbicide terbacil (3-*tert*-butyl-5-chloro-6-methyluracil) and its metabolites 3-*tert*-butyl-5-chloro-6-hydroxymethyluracil, 6-chloro-2,3-dihydro-7-hydroxymethyl-3,3-dimethyl-5*H*-oxazolo (3,2-a)pyrimidin-5-one, and 6-chloro-2,3-dihydro-3,3,7-trimethyl-5*H*-oxazolo (3,2-a)pyrimidin-5-one (calculated as terbacil) in or on the raw agricultural commodity mint hay (peppermint and spearmint) at 2 parts per million (ppm). Existing tolerances for residues of terbacil in or on peppermint hay and spearmint hay at 0.1 ppm should have been deleted at the time the 2 ppm tolerance was established. This rulemaking document editorially amends 40 CFR 180.209 by deleting peppermint and spearmint hay at 0.1 ppm from the regulation.

Since this change is nonsubstantive in nature and merely clarifies and editorially amends an existing regulation, notice and public rulemaking procedures pursuant to the Administrative Procedure Act, 5 U.S.C. 553(b)(B) are not prerequisite to the promulgation of this regulation. This order is effective on January 29, 1979.

Dated: January 24, 1979.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Part 180, Subpart C, § 180.209 is amended by deleting peppermint hay and spearmint hay at 0.1 ppm from the table in paragraph (a) as follows:

§ 180.209 [Amended]

In § 180.209 *Terbacil; tolerances for residues*, "Peppermint hay" and "Spearmint hay" at 0.1 part per million are deleted from the list of commodities in the table in paragraph (a).

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 50—POLICIES OF GENERAL APPLICABILITY

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 441—SERVICES: REQUIREMENTS AND LIMITS APPLICABLE TO SPECIFIC SERVICES

Federally Funded Sterilizations

AGENCY: Public Health Service; Health Care Financing Administration, HEW.

ACTION: Final Rule: Change of Effective Date.

SUMMARY: On November 8, 1978, the Public Health Service, the Health Care Financing Administration, and the Office of Human Development Services, published three parallel sets of regulations governing expenditures for sterilizations under various HEW programs. (43 FR 52146, 52171, 52173.) These regulations provide that Federal funding is available for sterilizations only if the individual to be sterilized has given informed, written consent in accordance with the specific requirements detailed in the regulations. Except for two specified situations, the consent must be obtained on an approved consent form at least 30 days before the date of sterilization.

The effective date of these rules was set at February 6, 1979 (90 days after the date of publication). This meant that they would apply to all sterilizations performed on or after February 6. However, because of the requirement that consent be obtained, in most cases, 30 days before the procedure, the February 6 effective date called for the consent forms to be distributed by January 7. We have learned that this was not feasible, particularly with respect to distribution by State agencies for the Medicaid program.

In order to allow the States adequate time to meet the requirements of these rules, we are delaying their effective date until March 8, 1979. This means that the regulations published on November 8, 1978 apply to all sterilizations performed on or after March 8, 1979.

To ensure uniformity, we are also delaying the effective date of the Public Health Service regulation.

In a separate notice published elsewhere in this issue, we have delayed the effective date of the Office of Human Development Services (OHDS) sterilization regulation.

EFFECTIVE DATE: The rules published on November 8, 1978 are effective on March 8, 1979.

PART 228—SOCIAL SERVICE PROGRAMS FOR INDIVIDUALS AND FAMILIES: TITLE XX OF THE SOCIAL SECURITY ACT

Federal Financial Participation in State Claims for Sterilization

AGENCY: Office of Human Development Services (OHDS), HEW.

ACTION: Final Rule: Change of Effective Date.

SUMMARY: The effective date for the rules governing expenditures for sterilizations funded by OHDS (published on November 8, 1978, at 43 FR 52173) is delayed from February 6, 1979 until March 8, 1979. The reasons for this delay are explained in the notice delaying the effective date of the sterilization regulations of the Public Health Service and the Health Care Financing Administration, published elsewhere in this issue.

EFFECTIVE DATE: The regulations published on November 8, 1978 are effective on March 8, 1979.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 78-822]

PART 19—EMPLOYEE RESPONSIBILITIES AND CONDUCT

Amendment of Rule Concerning Misuse of Information

AGENCY: Federal Communications Commission.

ACTION: Final Rule.

SUMMARY: Because the Government in the Sunshine Act requires advance notice of the subject and date of Commission meetings, FCC amends standards of employee conduct to permit disclosure of such information and extends *ex parte* rules to prohibit *ex parte* communications from any interested person who knows that the question of designating a case for hearing will be considered at a Commission meeting.

EFFECTIVE DATE: February 2, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTRACT:

Upton Guthery, Office of General Counsel, 202-632-6444.

ORDER

Adopted: November 30, 1978.
Released: January 23, 1979.

1. Section 19.735-206 of the rules and regulations currently prohibits staff "disclosure of information about the content or scheduling of agenda items." Because the Government in the Sunshine Act requires seven days notice of the subject and the date for consideration of such items, and because disclosure as to scheduling is sometimes necessary for other reasons, it is appropriate to note Sunshine disclosure as an exception to this general prohibition and to eliminate that part of the prohibition relating to scheduling.

2. This section also prohibits "disclosure of actions or decisions by the Commission prior to the public release of such information." Insofar as this provision relates to actions or decisions at a Commission meeting opened to the public under the Sunshine Act, it is no longer appropriate. Members of the public who are unable to attend a Commission meeting should be afforded, upon request, the same access to information concerning actions at an open meeting as those who did in fact attend. We are therefore amending this provision to apply only to actions taken at Commission meetings which are closed to the public or by circulation.

3. *Accordingly, it is ordered,* Effective February 2, 1979, That § 19.735-206 is amended as set out in the Appendix hereto. Authority for this amendment is contained in Sections 4 (i) and (j) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154 (i) and (j) and 303(r). Because the amendments involve matters of procedure and internal standards of conduct, the prior notice and effective date provisions of 5 U.S.C. 553 are inapplicable.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; (47 U.S.C. 154, 303).)

WILLIAM J. TRICARICO,
Secretary.

APPENDIX

Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

In Part 19, § 19.735-206 is revised to read as follows:

§ 19.735-206 Misuse of information

Except as provided in § 19.735-203(c), or as authorized by the Commission, an employee shall not, directly or indirectly, disclose to any person outside the Commission any information, or any portion of the contents of any document, which is part of the Commission's records or which is obtained through or in connection with his Government employment, and which is not routinely available to the public and, with the same exceptions, shall not use any such documents or information except in the conduct of his official duties. Conduct intended to be prohibited by this section includes, but is not limited to, the disclosure of information about the content of agenda items (except as provided in the Government in the Sunshine Act, Pub. L. 94-409) or other staff papers to persons outside the Commission, and disclosure of actions or decisions made by the Commission at closed meetings or by circulation, unless otherwise directed by the Commission, prior to the public release of such information.

Title 49—Transportation

CHAPTER I—RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

PART 178—SHIPPING CONTAINER SPECIFICATIONS

[Docket No. HM-156; Amdt. No. 178-63]

Flattening Test Requirement for Seamless Cylinders

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: This rule amends the regulations in Part 178 of Title 49, Code of Federal Regulations, pertaining to flattening tests by deleting the requirement that certain seamless cylinders be hydrostatically tested prior to the flattening test and by requiring that the longitudinal axis of the cylinder be perpendicular to the knife edges during flattening testing. This amendment allows flexibility as to when the sample cylinder may be selected, and assures uniformity in the procedures used in performing the flattening tests.

EFFECTIVE DATE: On January 29, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. Douglas A. Crockett, Standards Division, Office of Hazardous Materials Regulation, Materials Transportation Bureau, Research and Special Programs Administration, 2100 Second Street S.W., Washington, D.C. 20590 (202-426-2075).

SUPPLEMENTARY INFORMATION: On January 19, 1978, the Materials Transportation Bureau published a Notice of Proposed Rulemaking, Docket HM-156, Notice 78-2 (43 FR 2741), which proposed these amendments. The background and basis for these amendments were discussed in that notice. Interested persons were invited to give their views prior to the closing date of March 20, 1978. The only comment received was in favor of the rule change as proposed. The commenter also suggested that the word "longitudinal" be included to clarify the orientation of the cylinder to the knife edges during testing, and the suggestion has been adopted.

Analysis of the proposed amendments and comment thereon indicate that cost of regulatory enforcement will not be significantly affected, nor would additional costs be imposed on the private sector, consumers, or Federal, State or local governments.

Primary drafters of this document are Jose Pena, Technical Services Branch, Office of Hazardous Materials Regulation and Evan Braude, Office of Chief Counsel, Research and Special Programs Administration.

Since these amendments are relaxation of existing rules, and place no additional burden on any person, they are being made effective before February 28, 1979.

In consideration of the foregoing, Part 178 of Title 49 of the Code of Federal Regulations is amended as follows:

1. In § 178.36, § 178.36-15 is revised to read as follows:

§ 178.36 Specification 3A; seamless steel cylinders or 3AX; seamless steel cylinders of capacity over 1,000 pounds water volume.

. . . . . .

§ 178.36-15 Flattening test.

Between knife edges, wedge shaped, 60-degree angle, rounded to ½-inch radius; test 1 cylinder[1] taken at random out or each lot of 200 or less cylinders. Longitudinal axis of the cylinder must be at approximately a 90-degree angle to knife edges.

. . . . . .

2. In § 178.37, § 178.37-15 is revised to read as follows:

§ 178.37 Specification 3AA; seamless steel cylinders made of definitely prescribed steels or 3AAX; seamless steel cylinders made of definitely prescribed steels of capacity over 1,000 pounds water volume.

. . . . . .

§ 178.37-15 Flattening test.

Between knife edges, wedge shaped, 60-degree angle, rounded to ½-inch radius; test 1 cylinder[1] taken at random out of each lot of 200 or less cylinders. Longitudinal axis of the cylinder must be at approximately a 90-degree angle to knife edges.

. . . . . .

3. In § 178.44, § 178.44-17 is revised to read as follows:

§ 178.44 Specification 3HT; inside containers, seamless steel cylinders for aircraft use made of definitely prescribed steel.

. . . . . .

§ 178.44-17 Flattening test.

Between knife edges, wedge shaped, 60-degree angle, rounded to ½-inch radius; test 1 cylinder[1] taken at random out of each lot of 200 or less cylinders. Longitudinal axis of the cylinder must be at approximately a 90-degree angle to knife edges.

. . . . . .

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e).)

NOTE.—The Materials Transportation Bureau has determined that this final amendment will not have a major economic impact under the terms of Executive Order 12044 and DOT implementing procedures (43 FR 9582). A regulatory evaluation is available for review in the docket.

Issued in Washington, D.C. on January 17, 1979.

L. D. SANTMAN,
Director, Materials Transportation Bureau.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-34-M]

DEPARTMENT OF AGRICULTURE

Office of the Secretary

[7 CFR Part 2900]

ESSENTIAL AGRICULTURAL USES OF NATURAL GAS

Availability of Draft Environmental Impact Statement

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of availability of draft environmental impact statement and request for comments.

SUMMARY: Notice is hereby given that the Office of Energy (OE) has prepared a Draft Environmental Impact Statement (DEIS) in accordance with Section 102(2)(c) of the National Environmental Policy Act of 1969 (NEPA) in connection with the proposed rule by the Secretary of Agriculture to certify the essential agricultural uses of natural gas to the Secretary of Energy under Section 401 of the Natural Gas Policy Act (Pub. L. 95-621). (43 FR 54938, November 24, 1978).

This statement examines the impacts of certification of essential agricultural uses of interstate natural gas that will protect such users from curtailment of gas from interstate pipelines.

DATE: Comments must be received on or before February 16, 1979.

ADDRESS: Send comments to: Director, Office of Energy, U.S. Department of Agriculture, Rm. 226-E, Administration Building, 12th and Independence Ave. S.W., Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Weldon Barton, (202) 447-2455.

SUPPLEMENTARY INFORMATION: It has been necessary to reduce the usual period for draft comment to February 16, 1979 in order to comply with the provisions of Section 401 of the Natural Gas Policy Act (Pub. L. 95-621) which require the Secretary of Agriculture's certification of essential agricultural uses to be made to the Secretary of Energy in time to enable the necessary implementing rules to be issued by March 9, 1979 (120 days after enactment of the NGPA).

Additional information may be secured on request, submitted to Weldon V. Barton, Director, Office of Energy, Room 226-E, U.S. Department of Agriculture, Washington, D.C. 20250 (202) 447-2455.

Comments are particularly invited from State and local agencies which are authorized to develop and enforce environmental standards and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved from which comments have not been requested specifically.

Copies of the OE Draft Environmental Impact Statement have been sent to various Federal, State and local agencies, as outlined in the Council of Environmental Quality guidelines. The Draft Environmental Impact Statement may be examined during regular business hours at the Office of Energy in the South Agriculture Building, 12th Street and Independence Avenue, SW., Washington, D.C., Room 5173. Copies of the OE DEIS may be obtained upon request to the OE at the above address.

Comments concerning the DEIS should be addressed to the Director, Office of Energy at the address given above. Comments must be received on or before February 16, 1979 to be considered in connection with the proposed action.

Final OE Action with respect to this matter will be taken only after OE has reached satisfactory conclusions with respect to its environmental effects and after procedural requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C. this 25th day of January 1979.

WELDON V. BARTON,
Director, Office of Energy.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[8 CFR Part 212]

VOIDANCE OF NONRESIDENT ALIEN BORDER CROSSING CARDS ON GROUNDS OF ABANDONMENT OF RESIDENCE IN CANADA OR MEXICO

Proposed Rules

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Notice of Proposed Rule Making.

SUMMARY: This is an amendment to the regulations of the Immigration and Naturalization Service concerning grounds for voidance of Mexican and Canadian nonresident alien border crossing cards. The amendment is necessitated by the need to clarify Service policy respecting the validity of border crossing cards held by aliens who have abandoned their residence in the country in which they resided when the card was issued. The intent of the proposed regulation is to provide for voidance of Mexican or Canadian border crossing cards held by aliens who have abandoned residence in Mexico or Canada.

DATES: Written representations should be submitted on or before: March 30, 1979.

ADDRESSES: Please submit representations in duplicate to the Commissioner of Immigration and Naturalization, 425 Eye Street, N.W., Room 7100, Washington, D.C. 20536.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 Eye Street, N.W., Washington, D.C. 20536. Telephone: (202) 633-3048.

SUPPLEMENTARY INFORMATION: This notice of proposed rule making is issued under the provisions of section 553 of Title 5 of the United states Code (80 Stat. 383).

The proposal adds a new paragraph (d-1) to 8 CFR 212.6 which will provide that a border crossing card shall be voided where it is found that the holder has abandoned his residence in the country in which he resided at the time the card was issued.

This amendment is necessary because it has always been Service policy to restrict the use of Mexican and Canadian Border Crossing Cards to citizens and residents of those two countries respectively. This amendment will clarify that policy and further provide that should the holder abandon his Mexican or Canadian residence the card will be voided.

The Form I-586 referred to in the proposed rule is the new ADIT card which will be machine-readable and will be used as a border crossing card by both Mexican and Canadian residents when the system becomes operational.

Interested persons are invited to submit written data, views and arguments concerning this proposed rule to the Commissioner of Immigration and Naturalization at the address shown above. Oral representations may not be presented in any manner. All relevant material received on or before the closing date indicated above will be considered.

In the light of the foregoing, it is proposed to amend Title 8 of Chapter I of the Code of Federal Regulations as set forth below:

PART 212—DOCUMENTARY REQUIREMENTS: NONIMMIGRANTS; WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

In Part 212, it is proposed to amend § 212.6 by adding a new subparagraph (d-1) to be entitled *"Voidance on grounds of abandonment of residence in Canada or Mexico"*, to read as follows:

§ 212.6 Nonresident alien border crossing cards

. . . . . .

(d-1) *Voidance on grounds of abandonment of residence in Canada or Mexico.* When it is found that the holder of an I-185, I-186, or I-586 has abandoned residence in the country upon which the benefit was granted, the card shall be voided.

. . . . . .

(Sec. 103, 66 Stat. 173; 8 U.S.C. 1103)

Dated: January 23, 1979.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

[8 CFR Part 214]

APPLICATION TO ACCEPT OR CONTINUE EMPLOYMENT BY A-1 AND A-2 NONIMMIGRANTS

Proposed Formal Procedure

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed Rule.

SUMMARY: This proposed amendment of the regulations of the Immigration and Naturalization Service establishes a formal procedure under which the spouses and unmarried dependent sons and unmarried dependent daughters of aliens classified as A-1 and A-2 nonimmigrants and serving as officers or employees of diplomatic or consular establishments may apply for permission to accept or continue employment.

Currently, spouses and dependents of these nonimmigrants apply under an informal procedure to the Office of Protocol of the Department of State for permission to accept or continue employment.

It is necessary to publish formal regulations pertaining to the employment of these nonimmigrants at this time because section 401(a) of the Foreign Relations Authorization Act of 1979 provides that the President shall seek to conclude bilateral and multilateral agreements with foreign countries to facilitate the expansion of employment opportunities for family members of U.S. Government personnel stationed abroad.

This statutory provision requires permission to work granted on the basis of this proposed regulation to be reciprocal. Its benefits will extend to family members of foreign diplomatic and consular officials whose governments extend similar employment opportunities to members of families of United States diplomatic and consular officials.

The proposal is intended to incorporate existing formal procedures in the regulations, and to ensure compliance with the employment reciprocity requirement set forth in section 401(a) of the Foreign Relations Authorization Act of 1979.

DATES: Representations must be received on or before March 30, 1979.

ADDRESSES: Please submit written representations, in duplicate, to the COMMISSIONER OF IMMIGRATION AND NATURALIZATION, Room 7100, 425 Eye Street, NW., Washington, DC 20536.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service. Telephone: (202) 633-3048.

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

This notice of proposed rulemaking would amend 8 CFR 214.2(a) to add a new paragraph (2) which will establish formal regulations governing the employment of spouses and unmarried dependent sons and unmarried dependent daughters of aliens classified as A-1 and A-2 nonimmigrants and serving as officers or employees of diplomatic or consular establishments.

At the present time, requests for employment by spouses and unmarried dependent sons and unmarried dependent daughters of aliens classified as A-1 and A-2 nonimmigrants and serving as officers or employees of diplomatic consular establishments are submitted to and approved by the Office of Protocol of the Department of State because it is the responsibility of that Department to determine whether an alien is entitled to A-1 or A-2 status.

The Immigration and Naturalization Service and the Department of State feel that the procedures for determining eligibility for employment by A-1 and A-2 nonimmigrants should be published in the regulations. In addition, section 401(a) of the Foreign Relations Authorization Act of 1979 provides that the President shall seek to conclude bilateral and multilateral agreements with foreign countries to expand employment opportunities in those countries for family members of United States Government personnel stationed abroad.

Therefore, the employment privileges extended by this proposed rule are to be reciprocal. Under this regulation, spouses and unmarried dependent children of diplomatic and consular officials from foreign countries may obtain permission to work in this county if the host-country governments provide for acceptance of similar employment opportunities by spouses and unmarried dependent children of United States diplomatic and consular officials and employees of similar rank stationed in those countries.

The effect of this proposal on the U.S. labor market has been examined and it has been determined that any adverse effects would be minimal or nonexistent for several reasons. There are about 6,000 family members of working age in the Washington, DC area who potentially could be affected by the proposed regulation, and about 4,000 additional family members in the rest of the country. Of those,

V 4 4 / 2 0 J A 2 9 7 9 J UMI

about 500 at any one time have been working with permission granted by the department of State's Office of Protocol, about 200 of these being sons and daughters who are full-time students. It is estimated that there are about 1,200 spouses in the DC area and 900 spouses in the rest of the country who are not working but who would be interested in doing so. Of these, only about half, or 600 and 450 respectively, are likely to find employment in positions which will qualify for approval under the regulation. This is because the regulation prohibits approval for a spouse whose employment will be in an occupation on the Department of Labor's Schedule B, or whose occupation is otherwise determined by the Department of Labor to be one for which there are available sufficient resident workers. (Schedule B is an extensive list of positions, mostly unskilled, for which the Department of Labor has determined there is an ample supply of workers across the country.) Of the estimated 1,050 spouses finding approvable employment, many will not qualify because their countries prohibit acceptance of similar employment opportunities by spouses of U.S. officials. As a result, it is expected that only about 550 more A-1 and A-2 spouses will be employed than are employed now. Under the present informal procedures, there are no restrictions on the part-time and summer employment of unmarried dependent sons and daughters of A-1 and A-2 principals as long as they are full-time students. Likewise, the proposed regulation does not prohibit such dependents from accepting employment in jobs listed on Schedule B. The proposed regulation will, however, introduce reciprocity as a factor, thereby reducing the total number of A-1 and A-2 dependents who are also full-time students working at any one time from 200 to about 100. Considering spouses and dependent student sons and daughters together, the proposed regulation is likely to add approximately 450 persons to the United States labor force. Slightly more than half of these will be in the washington, DC area and the rest will be scattered about the country. As the reciprocity provision will reduce the number of approvals for unmarried dependents who are students, there will be a net reduction of aliens employed in Schedule B jobs, the area in which most unemployment is found.

It is believed that the reciprocity clause of this regulation will expand employment opportunities for the family members, particularly spouses, of officers and employees of United states diplomatic and consular offices abroad. This will particularly be so in industrialized economies such as our own.

B. Outline of the Proposed Rule

New subparagraph (2) will provide that the A-1 or A-2 spouse, unmarried dependent son or unmarried dependent daugheter of an alien who is an employee or officer of a diplomatic or consular office in the United States admitted to the United States as a nonimmigrant under section 101(a)(15)(A) (i) or (ii) of the Act, may apply for permission to accept or continue employment of Form I-566. The application is first submitted to the Visa Office of the Department of State through the Office of Protocol, which will verify the official standing of the principal alien and family. The application may be approved if the Visa Office determines that similar employment opportunities for family members of United States diplomatic and consular officials are not prohibited by the government employing the principal alien, and if the Visa Office and the Service are satisfied that both the applicant and the principal alien are maintaining A-1 or A-2 status, that, except for the part-time work of A-1 or A-2 dependents who are students, the proposed employment is not in an occupation listed in the department of Labor Schedule B or otherwise in an occupation for which there is an oversupply of U.S. workers in the employment area, and that the employment is not contrary to the interests of the United states. Permission to accept or continue employment granted under this section will be for incremental periods of 2 years each. There shall be no appeal from a denial of an application under this section. In the unlikely event that an A-1 or A-2 alien is currently working with permission in a Schedule B occupation, he or she may continue in that employment for a period of two years following the effective date of this regulation. An A-1 or A-2 nonimmigrant who is working without authorization as of the effective date of this regulation must apply for permission to continue that employment within 90 days of the effective date of this regulation. However, previous unauthorized employment will not be held against such an applicant.

The Service shall inform the applicant by letter whether the application is approved or denied, and if denied, the reasons therefor. The Service shall also inform the Internal Revenue Service and Department of Labor whenever and I-566 application authorizing employment for an A-1 or A-2 spouse or unmarried dependent is approved.

C. Proposed Rule

It is propoed to amend Chapter I of Title 8 of the Code of Federal Regulations as set forth below.

PART 214—NONIMMIGRANT CLASSES

In Part 214, it is proposed to amend 8 CFR 214.2(a) by designating the existing paragraph as subparagraph (1) *General*, and by adding a new subparagraph (2) *Employment*. As amended, 8 CFR 214.2(a) is proposed to read as follows:

§ 214.2 Special requirements for admission, extension and maintenance of status.

(a) Foreign government officials—(1) *General.* • • •

(2) *Employment.* The spouse, unmarried dependent son or unmarried dependent daughter habitually residing with a foreign government official classified as a nonimmigrant under section 101(a)(15)(A)(i) or (ii) of the Act as an officer or employee assigned to a diplomatic or consular office in the United States may be granted permission to accept or continue employment in the United States if an application to do so has first been favorably recommended by an authoritized representative of the Department of State and approved by the District Director of the Service as indicated below. To apply, the spouse or unmarried dependent son or unmarried dependent daughter shall first submit Form I-566 to the Visa Office of the Department of State through the Office of Protocol. The form shall be accompanied by a certification by the diplomatic mission of the Government employing the prinicpal alien that the applicant is the spouse or unmarried dependent son or unmarried dependent daughter of an official of that Government whose assignment is expected to last more than six months. The applicant shall also submit with the application a statement from the propective employer describing the positon and salary offered, the duties of the position and verification that the applicant possesses the necessary qualifications for the position. The applicant shall also submit his or her own sworn statement, or, in the case of a minor, the statement of the principal alien, acknowledging that all income earned from such employment is taxable. The application may be approved if both the authorized representative of the Department of State and the District Director of this Service at Washington, DC are satisfied that: (i) Both the principal alien and the applicant desiring employment are maintaining A-1 or A-2 status; (ii) the proposed employment is not in an occupation listed in the Department of Labor Schedule B (20 CFR 656) or otherwise determined by the Department of Labor to be one for which there is an oversupply of qualified U.S. workers in the area of proposed employment, except in the case of the employment of an unmarried dependent son or unmarried dependent daughter in A-1 or A-2 status who is a full-time student, if the employment is part-time, consisting of not more than 20 hours per week and/or if it is temporary employment of not more than 12 weeks at a time during school holiday periods: *Provided*, that if an A-1 or A-2 alien was authorized to accept full-time employment in a Schedule B occupation prior to the effective date of this regulaton he/she may continue in that employment for a period of 2 years following the effective date of this regulation; (iii) employment of a similar nature for family members of United States Government officials assigned to a diplomatic or consular office in the country employing the principal alien is not prohibited by the host country government; and (iv) the proposed employment would not be contrary to the interests of the United States. Employment of A-1 or A-2 aliens who have criminal records, or who have violated the immigration and nationality laws or regulations or who worked illegally or who cannot establish that they paid taxes on income from previous U.S. employment may be considered contrary to the interests of the United States. However, an A-1 or A-2 alien who is working without authorization on the effective date of this regulation must apply for authority to continue that work within 90 days of the effective date of this regulation. He/she must comply with the terms of this regulation in all respects except for the provision relating to illegal employment, and the fact of such illegal employment will not be construed against him/her in considering that application for employment. Permission to accept employment may not be granted to A-1 or A-2 spouses, unmarried dependent sons or unmarried dependent daughters if the principal alien will be stationed in this county for a definite period of six months or less. Permission to accept or continue employment under this section shall be granted in increments of not more than two years each. There shall be no appeal from a denial of permission to accept or continue employment under this section. The Service will inform the A-1 or A-2 applicant by letter whether the application has been granted or denied and if denied, of the reasons therefor. When an application is approved, the Service shall inform the Internal Revenue Service and Department of Labor. A family member of a principal alien classified A-3 may not be employed in the United States under these regulations.

• • • • • • •

(Sec. 103 and 214; 8 U.S.C. 1103 and 1184; Interpret or apply sec. 401(a) of the Foreign Relations Authorization Act of 1979)

D. Comments Invited

In accordance with the provisions of section 553 of Title 5 of the United States Code, interested persons are invited to submit relevant data, views and arguments concerning this proposed rule to the COMMISSIONER OF IMMIGRATION AND NATURALIZATION, Room 7100, 425 Eye Street, N.W., Washington, DC 20536 on or before March 30, 1979. Please submit all comments in writing, in duplicate.

Dated: January 19, 1979.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

Dated: January 23, 1979.

BARBARA M. WATSON,
Assistant Secretary of State for Consular Affairs.

[8 CFR Part 274]

ILLEGAL TRANSPORTATION OF ALIENS INTO THE UNITED STATES

Seizure of Vessels, Vehicles, and Aircraft

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed Rule.

SUMMARY: This notice of proposed rulemaking sets forth proposed amendments to the regulations of the Immigration and Naturalization Service under which vehicles, vessels, and aircraft used to transport aliens into the United States in violation of law may be seized by authorized and designated immigration officers and forfeited to the United States. The proposed regulations also provide that if a seized conveyance was stolen, or the owner had no knowledge of the illegal activity, it shall be returned to the owner expeditiously. These proposed regulations are necessary and intended to comply with the directive of the Congress that the agency promulgate implementing regulations which provide for the prompt return to the owner of conveyances which are not in fact subject to seizure and forfeiture under this statute.

DATES: Representations must be received on or before March 30, 1979.

ADDRESSES: Please submit written representations, in duplicate to the COMMISSIONER OF IMMIGRATION AND NATURALIZATION, Room 7100, 425 Eye Street, N.W., Washington, DC 20536.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service. Telephone: (202) 633-3048.

SUPPLEMENTARY INFORMATION: On November 2, 1978, the President signed Pub. L. 95-582 into law. Section 2 of that statute amends section 274 of the Immigration and Nationality Act to provide that any vehicle, vessel, or aircraft which is used in the commission of a violation of subsection (a) of section 274 of the Act shall be subject to seizure and forfeiture except when the owner, master, or other person in charge of the vehicle, vessel, or aircraft was not, at the time of the alleged illegal act, a consenting party or privy thereto or where the illegal act occurred while the vessel, vehicle, or aircraft was in the illegal possession of any person other than the owner, as established by the criminal laws of the United States, or of any States. This statute further provides that should the conveyance be improperly seized, it shall be expeditiously returned to the owner, master, or other person in charge thereof, and the Government shall not charge any expense incidental to the seizure to that individual. This statute also provides that all provisions of law relating to the seizure, forfeiture, and disposition of vessels, vehicles, and aircraft for violations of customs law shall apply to violations of the provisions of this statute subject to the exceptions noted.

These proposed regulations are intended to implement this statute. They consist of 16 sections including definitions; regulations relating to officers who will make seizures; conveyances subject to seizure and duties of the regional commissioners relating to their custody; regulations respecting the expeditious return to the owner of improperly seized conveyances; procedures to be followed when a vehicle is to be seized and forfeited to the Government and procedures for the filing of petitions for remission or mitigation of forfeiture.

In the light of the foregoing, the following amendments are proposed to be made to Chapter I of Title 8 of the Code of Federal Regulations.

In Part 274 it is proposed to revise the title of the Part, revise § 274.1, and add new §§ 274.2-.16 as set forth below:

V 4 4 / 2 0

PART 274—SEIZURE AND FORFEITURE OF VEHICLES, VESSELS AND AIRCRAFT

Sec.
274.1 Definitions.
274.2 Officers who will make seizures.
274.3 Custody and other duties of the regional commissioner.
274.4 Conveyances subject to seizure.
274.5 Return to owner of improperly seized conveyances; opportunity for personal interview.
274.6 Appraisal.
274.7 Notice to registered owner and lien holder of seizure.
274.8 Advertisement.
274.9 Requirements as to claim and bond.
274.10 Summary forfeiture.
274.11 Judicial forfeiture.
274.12 Petitions for remission or mitigation of forfeiture.
274.13 Provisions applicable to particular situations.
274.14 Time for filing petitions.
274.15 Handling of petitions.
274.16 Holder of a valid lien or other third party interest in a vehicle.

AUTHORITY: The provisions of §§ 274.1-.16 are issued under section 274(b) of the Immigration and Nationality Act (8 U.S.C. 1324(b)), as amended by Pub. L. 95-582 (92 Stat. 2479), and Sec. 103 of the Act (8 U.S.C. 1103).

§ 274.1 Definitions.

As used in this part, the following terms shall have the meanings specified:

(a) The term "consenting party or privy to the illegal act" means that the person knew of the illegal activity. A person shall be presumed to have knowledge of an illegal activity if the facts and circumstances are such that a person of reasonable diligence would be expected to know of the illegal activity.

(b) The term "conveyance" means a vessel, vehicle, or aircraft as used in section 274(b) of the Act. A trailer shall be considered a vehicle if it is being towed or readily capable of being towed. However, an immobilized house trailer which has been placed on permanent foundations, which is not readily mobile, is not a vehicle subject to seizure.

(c) The term "custodian" means the regional commissioner who under section 274.3 has been designated to receive and maintain in storage all conveyances seized pursuant to the Act.

(d) The term "lienholder" means a person who holds a security interest in a conveyance.

(e) The term "owner" means the person who holds primary and direct title to the conveyance, as opposed to a person who holds a security interest in the conveyance.

(f) The term "person" means an individual, partnership, corporation, joint business enterprise, or other entity capable of owning a conveyance.

(g) The term "record" means an arrest followed by a conviction, except that a single arrest and conviction and the expiration of any sentence imposed as a result of such conviction, all of which occurred more than ten years prior to the date the petitioner acquired his interest in the seized property, shall not be considered a record: *Provided, however,* That two convictions shall always be considered a record regardless of when the convictions occurred: *And provided further,* That the regional commissioner may, in his discretion, consider as constituting a record, an arrest or series of arrests in which the charge or charges were subsequently dismissed for reasons other than acquittal or lack of evidence.

(h) The term "related crime" means any crime related to the illegal bringing in, harboring, transportation, entry, reentry, or importation of aliens.

(i) The term "reputation" means repute with a law enforcement agency or among law enforcement officers or in the community generally, including any pertinent neighborhood or other area.

(j) The term "regional commissioner" means the regional commissioner of the Immigration and Naturalization Service.

(k) The term "seizure" means the act of taking the vehicle into the custody of the Service for the express purpose of forfeiting it in accordance with the provisions of section 274(b) of the Act. Nothing contained in this part shall be construed as prohibiting an immigration officer from holding the conveyance temporarily, not to exceed 72 hours, for the purpose of investigating the ownership of the conveyance in order to determine whether such conveyance is subject to seizure under section 274(b)(1) of the Act. Such temporary holding shall not constitute a seizure within the meaning of section 274(b)(1) of the Act, and no cost shall be incurred by the Government under section 274(b)(2) of the Act by reason of such temporary holding. Such temporary holding shall be without prejudice to the right of the owner to regain possession of the vehicle from the Service up until the time when a seizure under this part occurs.

(l) The term "valid lien or other third party of interest" as used in section 274(b)(2) of the Act and this part means a security interest in a vehicle which is held by a person who establishes that he meets the minimum requirements for remission set forth in § 274.12(f), and whose petition for remission submitted under this part has been granted.

(m) The term "attorney fees associated with such seizure and forfeiture" as used in § 274(b)(2) of the Act and this part means Government attorney fees which would otherwise be chargeable as an item of cost to a person seeking to reclaim the conveyance.

(n) The term "costs of transportation" as used in § 274(b)(2) of the Act and this part refers solely to costs of transportation of the conveyance which was done at the request of the U.S. Government as was directly related to the seizure. It shall not include any costs incurred by an owner in transporting the conveyance from the place where the Government makes it available for return to him in accordance with § 274.5 of this part.

(o) Any term not defined in this section shall have the definition set forth in section 101 of the Act and in § 1.1 of this chapter.

§ 274.2 Officers who will make seizures.

For the purpose of carrying out the provisions of section 274(b) of the Act, all immigration officers are authorized and designated to seize such conveyances as may be subject to seizure thereunder.

§ 274.3 Custody and other duties of the regional commissioner.

An officer seizing a conveyance under the Act shall store the conveyance in a location designated by the custodian, generally in the judicial district of the seizure. The regional commissioners are designated as custodians to receive and maintain in storage all conveyances seized pursuant to the Act. The regional commissioners are also authorized to dispose of any conveyances pursuant to the Act and any other applicable statutes or regulations relative to disposal, and to perform such other duties (not inconsistent with the provisions of the Act) regarding such seized conveyances as are imposed on the district directors of the U.S. Customs Service with respect to seizures under the Customs law, including the maintenance of appropriate records concerning the temporary detention, seizure and disposition of seized vehicles.

§ 274.4 Conveyances subject to seizure.

Generally, any conveyance which an immigration officer has probable cause to believe has been used in the commission of a violation of section 274(a) of the Act may be subject to seizure. However, a conveyance which has been used in a violation of section 274(a) of the Act is *not* subject to seizure if:

(a) The owner, master, or other person in charge of the conveyance was not a consenting party or privy to the illegal act; or

(b) The alleged illegal act occurred while the conveyance was in the illegal possession of someone other than the owner as established by the criminal laws of the United States or of any state (as defined in section 101(a)(36) of the Act).

J A 2 9 7 9 UMI

§ 274.5 Return to owner of improperly seized conveyances; opportunity for personal interview.

(a) The Service shall attempt with due diligence to ascertain the ownership of any conveyance held temporarily, in accordance with § 274.1(k) of this part, in order to determine whether such conveyance is subject to seizure under section 274(b)(1) of the Act.

(b) The owner of a conveyance seized hereunder shall be informed that he may, within 72 hours after receipt of notice of seizure, request a personal interview with an immigration officer (other than the officer who initially encountered the conveyance) at which time the owner may present any evidence and arguments that he might have that the conveyance was not properly seized. If such officer determines that the conveyance was not subject to seizure, the conveyance shall be returned to the owner without any expense (including the types of expenses set forth in paragraph (c)).

(c) If at any time after a seizure has taken place, the regional commissioner finds that the conveyance was not in fact subject to seizure, the regional commissioner shall immediately notify the owner of the conveyance by letter, return receipt requested, that the conveyance is available for return to him in accordance with the provisions of section 274(b)(2) of the Act. The conveyance shall be made available to the owner at the place of storage or place of seizure whichever, the owner may request. In such cases, the owner shall not incur any expenses, including costs of transportation, storage, damage, and attorney's fees associated with the seizure and forfeiture. In the event that the conveyance involved is the subject of judicial forfeiture proceedings instituted in accordance with section 274(b) of the Act and § 274.11 of this part, the regional commissioner shall immediately notify the U.S. Attorney that the conveyance is required to be returned to the owner in accordance with section 274(b)(2) of the Act, and that judicial forfeiture proceedings must be terminated. The notice to the owner shall also state that if the conveyance remains unclaimed for 60 days following the receipt of the notice provided in this paragraph, it shall be considered to be voluntarily abandoned to the government, and the regional commissioner shall dispose of such conveyance in accordance with the provisions of 40 U.S.C. 304g.

§ 274.6 Appraisal.

The custodian shall appraise the conveyance to determine the domestic value at the time and place of seizure. The domestic value shall be considered the retail price at which such or similar conveyance is freely offered for sale. If there is no market for the conveyance at the place of seizure, the domestic value shall be considered the value in the principal market nearest the place of seizure.

§ 274.7 Notice to registered owner and lienholder of seizure.

Whenever a seizure takes place, notice shall be given to the registered owner(s) and any known lienholder(s) notifying them of the seizure of their conveyance and the contemplated forfeiture. Such notice shall be accompanied by copies of the applicable regulations, section 274 of the Act, and the proposed advertisement if such advertisement is required under section 274.8 of this part. The owner shall be informed of the provisions of section 274.5(b).

§ 274.8 Advertisement.

(a) If the appraised value does not exceed $10,000, the custodian shall cause a notice of the seizure and of the intention to forfeit and sell or otherwise dispose of the conveyance to be published once a week for at least three successive weeks in a newspaper of general circulation in the judicial district in which the seizure occurred. A copy of this notice shall be sent to the registered owner(s) of the conveyance and to any known lienholder(s) in accordance with § 274.7 of this part.

(b) The notice shall: (1) describe the conveyance seized and show the motor and serial numbers, if any; (2) state the time, cause, and place of seizure; and (3) state that any person desiring to claim the property may, within 20 days of the date of first publication of the notice, file with the custodian a claim to the conveyance and a bond with satisfactory sureties in the sum of $250; and (4) state that a petition for remission or mitigation may be filed with the regional commissioner in accordance with § 274.12 of this part.

§ 274.9 Requirements as to claim and bond.

(a) The bond shall be rendered to the United States, with sureties to be approved by the custodian, conditioned that in case of condemnation of the conveyance the obligor shall pay all costs and expenses of the proceedings to obtain such condemnation. If a person certifies under oath that he is unable to pay the $250 bond to obtain a judicial determination of forfeiture, the regional commissioner may waive the bond requirement. When the claim and bond are received by the custodian, he shall, after finding the documents in proper form and the surety satisfactory, immediately transmit the documents, together with a description of the conveyance and a complete statement of the facts and circumstances surrounding the seizure, to the United States Attorney for the judicial district in which the seizure was made for the purpose of proceeding to a condemnation of the conveyance in the manner prescribed by law. If the documents are not in satisfactory condition when first received, the person claiming the conveyance and furnishing the bond shall be advised by letter as to the inadequacy of the documents and advised that he has 20 days from the date of the letter to correct the documents. If correction is not made within the time allowed, the documents may be treated as of no effect and the case shall proceed as though they had not been tendered.

(b) The filing of the claim and the posting of the bond does not entitle the claimant to possession of the conveyance. However, it does stop the summary forfeiture proceedings. The bond posted to cover costs may be in cash, certified check, or on Treasury Department Form 171 with satisfactory sureties. The costs and expenses secured by the bond are such as are incurred after the filing of the bond including storage costs, safeguarding, court fees, marshal's costs, etc.

§ 274.10 Summary forfeiture.

If the appraised value does not exceed $10,000, and a claim and bond are not filed within the 20 days previously mentioned, the custodian may declare the conveyance forfeited. The custodian shall prepare the declaration of forfeiture and forward it to the Commissioner as notification of the action he has taken. Thereafter, the conveyance shall be retained in the custodian's region or delivered elsewhere for official use, or otherwise disposed of, in accordance with the official instructions received by the custodian.

§ 274.11 Judicial forfeiture.

If the appraised value is greater than $10,000, or a claim and satisfactory bond have been received for a conveyance appraised at $10,000 or less, the custodian shall immediately transmit a description of the conveyance and a complete statement of the facts and circumstances surrounding the seizure to the U.S. Attorney for the judicial district in which the seizure was made for the purpose of instituting condemnation proceedings. The U.S. Attorney shall also be furnished the newspaper adveristement if such advertisement was required by § 274.8.

§ 274.12 Petitions for remission or mitigation of forfeiture.

(a) Any person having a legal or equitable interest in any conveyance

V 4 4 / 2 0 J A 2 9 7 9 UMI

which has been seized, or forfeited either summarily or by court proceedings, may file a petition for remission or mitigation of the forfeiture. Such petition shall be filed in triplicate with the regional commissioner having jurisdiction over the judicial district in which the seizure occurred. The petition shall be addressed to the regional commissioner if the conveyance is subject to summary forfeiture pursuant to section 274.10, and addressed to the Attorney General if the conveyance is subject to judicial forfeiture pursuant to § 274.11. The petition must be executed and sworn to by the person alleging interest in the conveyance.

(b) The petition shall include the following: (1) a complete description of the conveyance, including motor and serial numbers, if any, and the date and place of seizure; (2) the petitioner's interest in the conveyance, which shall be supported by bills of sale, contracts, or other satisfactory evidence; and (3) the facts and circumstances, to be established by satisfactory proof, relied upon by the petitioner to justify remission or mitigation.

(c) When the petition is for the restoration of the proceeds of sale, or for value of the conveyance placed in official use, it must be supported by satisfactory proof that the petitioner did not know of the seizure prior to the declaration of condemnation of forfeiture and was in such circumstances as prevented him from knowing of the same.

(d) If the petitioner is the owner of the vehicle, and establishes that he was not a consenting party or privy to the illegal act, or that the alleged illegal act occurred while the conveyance was in the illegal possession of someone other than the owner as established by the criminal laws of the United States or of any state, the procedures relating to petitions for remission or mitigation shall be inapplicable, and the mandatory return provisions of § 274.5(c) shall apply instead.

(e) The regional commissioner shall not remit a forfeiture unless the petitioner:

(1) establishes a valid, good faith interest in the seized conveyance;

(2) establishes that he at no time had any knowledge or reason to believe that the conveyance in which he claims an interest was being or would be used in a violation of the law; and

(3) establishes that he at no time had any knowledge or reason to believe that the owner had any record or reputation for violating laws of the United States or of any state for related crime; and

(4) establishes that he has taken all reasonable steps to prevent the illegal use of the conveyance.

§ 274.13 Provisions applicable to particular situations.

(a) Mitigation: In addition to his discretionary authority to grant relief by way of complete remission of forfeiture, the regional commissioner may, in the exercise of his discretion, mitigate forfeitures of seized conveyances. This authority may be exercised in those cases where the petitioner has not met the minimum conditions for remission but where there are present other extenuating circumstances indicating that some relief should be granted to avoid extreme hardship. Mitigation may also be granted where the minimum standards for remission have been satisfied, but the overall circumstances are such that, in the opinion of the regional commissioner, complete relief is not warranted. Mitigation shall take the form of a money penalty imposed upon the petitioner in addition to any other sums chargeable as a condition to remission. This penalty is considered as an item of cost payable by the petitioner.

(b) Straw purchase transactions: If a person purchases in his own name a conveyance for another who has a record or reputation for related crimes, and if a lienholder knows or has reason to believe that the purchaser of record is not the real purchaser, a petition filed by such a lienholder shall be denied unless the petitioner establishes compliance with the requirements of section 274.12(e) as to both the purchaser of record and the real purchaser. This rule shall also apply where money is borrowed on the security of property held in the name of the purchaser of record for the real purchaser.

(c) Notwithstanding the fact that a petitioner has satisfactorily established compliance with the administrative conditions applicable to his particular situation, the regional commissioner may deny relief if there are unusual circumstances present which, in his judgement, provide reasonable grounds for concluding that remission or mitigation of the forfeiture would be contrary to the interests of justice.

§ 274.14 Time for filing petitions.

(a) In order to be considered as timely filed, a petition for remission or mitigation of forfeiture should be filed within 30 days of the receipt of the notice of seizure. If a petition for remission or mitigation forfeiture has not been received within 30 days of the notice of seizure, the property will either be placed in official government service or sold as soon as it is forfeited. Once the property is placed in official use, or is sold, a petition for remission or mitigation of forfeiture can no longer be accepted.

(b) A petition for restoration of proceeds of sale, or for the value of property placed in official use, must be filed within 90 days of the sale of the property, or within 90 days of the date the property is placed in official use.

§ 274.15 Handling of petitions.

Upon receipt of a petition, the regional commissioner shall request an appropriate investigation. If the petition involves a case which has been referred to the U.S. Attorney for institution of court proceedings, the regional commissioner shall transmit the petition to the U.S. Attorney for the judicial district in which the seizure occurred. He shall notify the petitioner of this action.

§ 274.16 Holder of a valid lien or other third party interest in a vehicle.

In the event that a vehicle is forfeited and sold, the holder of a valid lien or other third party interest (as defined in § 274.1(l)) in the vehicle shall have such interest satisfied without expense. However, the money paid to such interest-holder shall not exceed the proceeds of the sale, or in the case of a vehicle placed in official use, the appraised value of the vehicle.

PUBLIC COMMENTS INVITED

In accordance with 5 U.S.C. 553 the Service invites representations of interested parties on these proposed rules. All relevant data, views, or arguments submitted on or before March 30, 1979, will be considered. Representations should be submitted in writing, in duplicate, to the Commissioner if Immigration and Naturalization at the address shown at the beginning of this notice.

Dated: January 25, 1979.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Docket No. 77-WE-26-AD]

AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model DC-9 Series Airplanes Including Military Type C-9A, C-9B, and VC-9C

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This Notice proposes to amend an existing Airworthiness Directive (AD) applicable to McDonnell Douglas DC-9 series airplanes to require a continuing inspection if repair of the DC-9 elevator is accomplished in accordance with a certain procedure. This amendment is considered necessary to provide for assurance of continued structural integrity of the DC-9 elevator after repair.

DATES: Comments must be received on or before April 2, 1979.

ADDRESSES: Send comments on the proposal to: Department of Transportation, Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rule Docket, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009. The applicable service information may be obtained from: McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, ATTN: L. A. Eisenberg, C1-750, 54-60.

Also, a copy of the service information may be reviewed at, or a copy obtained from: Rules Docket in Room 916, FAA, 800 Independence Avenue, S.W., Washington, D.C. 20591, or Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, California 90261.

FOR FURTHER INFORMATION CONTACT:

Jerry Presba, Executive Secretary, Airworthiness Directive Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009, Telephone: 213-536-6351.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Interested persons are also invited to comment on the economic, environmental and energy impact that might result because of adoption of the proposed rule. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

This Notice proposes to amend Amendment 39-3119, AD-78-01-12, which currently requires inspection for cracks and repair or replacement of the elevator spar on McDonnell Douglas Model DC-9 series airplanes. After the issuance of Amendment 39-3119, the manufacturer, at the request of several operators, revised DC-9 Service Bulletin 55-28 to permit the use of an alternate repair method for cracked spars. This alternate repair involves the use of an external leading edge cuff/doubler, whereas the standard repair in the DC-9 Structural Repair Manual provides a repair which splices in a new spar section or replaces the spar. The alternate repair described above is considered acceptable under the terms of Paragraph (c) of the AD; however, use of the alternate repair requires that the repetitive inspection interval of 3600 flight hours presently prescribed for the structural repair manual methods be reduced to 1800 flight hours for this specific repair. Therefore, the FAA is considering amending Amendment 39-3119 by changing Paragraph (c) to require a repetitive inspection interval of 1800 flight hours time in service if repairs are accomplished per DAC Service Sketch 2737A on McDonnell Douglas Model DC-9 series airplanes.

PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by amending Amendment 39-3119, AD-78-01-12, by adding the following sentence to the end of Paragraph (c):

• • • "If the cracked spar is repaired per McDonnell Douglas Service Sketch 2737A, the repetitive inspection procedures of Paragraph (a) of this AD must be accomplished on the repaired area at intervals of 1800 hours." • • •

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

The Federal Aviation Administration has determined that this document is not significant in accordance with the criteria required by Executive Order 12044 and set forth in interim Department of Transportation Guidelines.

Issued in Los Angeles, California on January 16, 1979.

LEON C. DAUGHERTY,
Director, FAA Western Region.

[Airspace Docket No. 78-SO-62]

FEDERAL AIRWAY

Proposed Revocation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to revoke Victor Airway V-35W between Macon, Ga., and Albany, Ga., since this airway segment is not being used. This action would support FAA's continuing review of airway utilization and eliminate routes, where possible, to reduce chart clutter.

DATES: Comments must be received on or before February 28, 1979.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Southern Region, Attention: Chief, Air Traffic Division, Docket No. 78-SO-62, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320.

The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone (202) 426-8525.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P. O. Box 20636, Atlanta, Ga. 30320. All communications received on or before February 28, 1979, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the

V 4 4 / 2 0 JA 29 79 UMI

closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would revoke alternate Airway V-35W between Albany, Ga., and Macon, Ga. This airway segment is not being used and is no longer required for the expeditious and efficient movement of traffic. Subpart C of Part 71 was republished in the FEDERAL REGISTER on January 2, 1979, (44 FR 307).

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 307) as follows:

Under V-35

"Albany, Ga.; Macon, Ga.; including a west alternate via INT Albany 013° and Macon 240° radials;" would be deleted and

"Albany, Ga.; Macon, Ga.;" would be substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not significant under the procedures and criteria prescribed by Executive Order 12044 and implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Washington, D. C. on January 23, 1979.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[4910-13-M]

[14 CFR Part 71]

[Airspace Docket No. 79-ASW-1]

TRANSITION AREA

Proposed Alteration: Patterson, Louisiana

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making.

SUMMARY: The nature of the action being taken is to propose alteration of a transition area at Patterson, La. The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing the instrument approach procedures to the Harry P. Williams Memorial Airport. The circumstance which created the need for the action is that higher performance aircraft are utilizing the airport requiring additional controlled airspace for their protection.

DATES: Comments must be received by February 28, 1979.

ADDRESSES: Send comments on the proposal to: Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas.

An informal docket may be examined at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

David Gonzalez, Airspace and Procedures Branch (ASW-536), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101; telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: In Subpart G § 71.181 (44 FR 442) of FAR Part 71, the description of the Patterson, La., transition area reflects the controlled airspace designed for aircraft executing instrument approach procedures within a 5-mile radius of the Harry P. Williams Memorial Airport. Criteria III (turbojets) aircraft are utilizing the airport and require expansion of the transition area to an 8.5-mile radius to provide the necessary additional controlled airspace for their protection.

COMMENTS INVITED

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received on or before February 28, 1979, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, or by calling 817-624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should contact the office listed above.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Patterson, La., transition area. The FAA believes this action will enhance IFR operations at the Harry P. Williams Memorial Airport by providing additional controlled airspace for aircraft executing instrument approach procedures established for the airport. Subpart G of Part 71 was republished in the FEDERAL REGISTER on January 2, 1979 (44 FR 442).

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (44 FR 442) by altering the Patterson, La., transition area as follows:

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Harry P. Williams Memorial Airport (latitude 29°42'40" N., longitude 91°20'18" W.), and within 3.5 miles each side of the 228° bearing from the Patterson RBN (latitude 29°42'32" N., longitude 91°20'14" W.) extending from the 8.5-mile radius area to 11.5 miles southwest of the RBN.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); and sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 3, 1978).

Issued in Fort Worth, Tex., on January 16, 1979.

PAUL J. BAKER,
Acting Director, Southwest Region.

[14 CFR Part 71]

[Airspace Docket No. 78-EA-114]

TRANSITION AREA

Proposed Alteration; Ogdensburg, N.Y.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making.

SUMMARY: This notices proposes to alter the Ogdensburg, N.Y., Transition Area, over Ogdensburg International Airport, Ogdensburg, N.Y. This alteration is required due to development of a new LOC RWY 27 instrument approach procedure. The instrument approach procedure requires a widening of the transition area extension to protect aircraft utilizing the instrument approach.

DATES: Comments must be received on or before March 12, 1979.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430. The docket may be examined at the following location: FAA, Office of Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace & Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

COMMENTS INVITED

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430. All communications received on or before March 12, 1979, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling (212) 995-3391.

Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by amending the description of the Ogdensburg, N.Y., 700-foot floor transition area as follows:

a. Delete, "within 3.5 miles each side of a 075° bearing from the Ogdensburg RBN, (44°41'30" N., 75°24'25" W.), extending from the 5-mile radius area to 11.5 miles east of the RBN."

b. Following, "Ogdensburg International Airport, Ogdensburg, N.Y.," insert, "; within 4.5 miles each side of a 075° bearing from the Ogdensburg RBN (44°41'30" N., 75°24'25" W.) extending from the RBN to 11.5 miles east of the RBN,"

(Sec. 307(a), Federal Aviation Act of 1958 (72 Stat. 749 (49 U.S.C. 1348(a))); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Jamaica, New York, on January 15, 1979.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

WOODLAND MOBILE HOMES, INC., ET AL.

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

In the matter of Woodland Mobile Homes, Inc., a corporation, and Woodland Mobile Homes, Inc. of Nevada, a corporation, and Allan Borgia, individually and as an officer of said corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Woodland Mobile Homes, Inc., and Woodland Mobile Homes, Inc. of Nevada, corporations, and Allan Borgia, individually and as an officer of said corporations, and it now appearing that Woodland Mobile Homes, Inc., and Woodland Mobile Homes, Inc. of Nevada, corporations, and Allan Borgia, individually and as an officer of said corporations, hereinafter sometimes referred to as proposed respondents, are willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Woodland Mobile Homes, Inc., by its duly authorized officer; Woodland Mobile Homes, Inc. of Nevada, by its duly authorized officer; Allan Borgia, individually and as an officer of said corporations; and counsel for the Federal Trade Commission that;

1. Proposed respondent Woodland Mobile Homes, Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of California. Its principal office and place of business is located at 333 South E Street, Santa Rosa, California 95404.

Proposed respondent Woodland Mobile Homes, Inc., of Nevada, an affiliate of Woodland Mobile Homes, Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of Nevada. Its principal office and place of business is located at 440 Gentry Way, Reno, Nevada 89502.

Proposed respondent Allan Borgia is an officer of said corporations. He formulates, directs and controls the policies, acts and practices of said corporations and his address is the same as that of said Woodland Mobile Homes, Inc.

2. Proposed respondents admit all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby and related material pursuant to Rule 2.34, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form an the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondents that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplated that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondents' address as stated in this agreement shall constitute service. Proposed respondents waive any right they may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondents have read the proposed complaint and order contemplated hereby. They understand that once the order has been issued, they will be required to file one or more complaints reports showing that they have fully complied with the order. Proposed respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

ORDER

I. DEFINITIONS

For the purposes of this order the definitions of the terms "consumer product," "warrantor," and "written warranty" as defined in Section 101 of the Warranty Act shall apply. The definition of the term "binder" as defined in § 702.1(g) of the Pre-Sale Rule shall apply.

II.

It is ordered, That respondents Woodland Mobile Homes, Inc., and Woodland Mobile Homes, Inc. of Nevada, corporations, their successors and assigns, and their officers, and Allan Borgia, individually and as an officer of said corporations, and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or any other device, in connection with the advertising, offering for sale, and sale of mobile homes or other consumer products, do forthwith cease and desist from:

1. Failing to make available in respondents' display area for prospective buyers' review prior to sale, the text of any written warranties offered or granted by the manufacturers of mobile homes and consumer products sold by respondents.

With respect to mobile homes, "display area" means a prominent location inside each mobile home.

2. Maintaining a binder or series of binders to satisfy the requirements of Paragraph 1, above, unless such binder or binders are located in each mobile home being displayed for sale by respondents, and such binder or binders include at least one copy of each written warranty applicable to the mobile home and the consumer products contained in the mobile home.

In utilizing any such binder or binders respondents shall:

(a) Provide prospective buyers with ready access thereto; and

(b) (1) Display such binder(s) in a manner reasonably calculated to elicit the prospective buyers' attention; or

(2) (i) Make such binder(s) available to prospective buyers on request; and

(ii) Place signs reasonably calculated to elicit the prospective buyers' attention in prominent locations within each mobile home, advising such prospective buyers of the availability of the binder(s), including instructions for obtaining access; and

(c) Index such binder(s) according to product or warrantor; and

(d) Clearly entitle such binder(s) as "Warranties" or other similar title.

III.

It is further ordered, That respondents post, in a prominent location in each mobile home being displayed for sale, a sign two feet (length) by two feet (width), reasonably calculated to elicit prospective buyers' attention, which contains a verbatim reproduction of the following language:

IMPORTANT!

NOT ALL WARRANTIES ARE THE SAME

We provide warranties for you to compare before you buy

Please ask to see them

Check: Full or limited?

What costs are covered?
What do you have to do?
Are all parts covered?
How long does the warranty last?

Such sign shall be posted for a period of not less than three years from the effective date of this order. The language in such sign shall be unencumbered by other written or visual matter, shall be indented and punctuated as indicated in this paragraph, above, and shall be printed in black against a solid white background, as follows:

a. The word "Important" shall serve as the title of the notice and shall be printed in capital letters in 42 point boldface type followed by an exclamation mark.

b. The next phrase shall be printed on a separate line in capital letters and in 42 point boldface type.

c. The next two phrases shall be printed on separate lines and in 36 point medium face type.

d. Each succeeding phrase shall be printed on a separate line and in 24 point medium face type.

IV.

1. *It is further ordered*, That respondents deliver a copy of this order to cease and desist to all present and future employees, salespersons, agents, independent contractors, and other representatives of respondents engaged in the sale of mobile homes or consumer products on behalf of respondents, and secure a signed statement acknowledging receipt of the order from each such person.

2. *It is further ordered*, That respondents instruct all present and future employees, salespersons, agents, independent contractors, and other representatives of respondents, engaged in the sale of mobile homes or other conumer products on behalf of respondents, as to their specific obligations and duties under the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act (Pub. L. 93-637, 15 U.S.C. Section 2301 *et seq.*), all present and future implementing Rules promulgated under the Act, and this order.

3. *It is further ordered*, That respondents institute a program of continuing surveillance to reveal whether respondents' employees, salespersons, agents, independent contractors, or other representatives are engaged in practices which violate this order.

4. *It is further ordered*, That respondents maintain complete records for a period of not less than three (3) years from the date of the incident, of any written or oral information received which indicates the possibility of a violation of this order by any of respondents' employees, salespersons, agents, independent contractors, or other representatives. Any oral information received indicating the possibility of a violation of this order shall be reduced to writing, and shall include the name, address and telephone number of the informant, the name and address of the individual involved, the date of the communication and a brief summary of the information received. Such records shall be available upon request to representatives of the Federal Trade Commission during normal business hours upon reasonable advance notice.

5. *It is further ordered*, That respondents maintain, for a period of not less than three (3) years from the effective date of this order, complete business records to be furnished upon request to the staff of the Federal Trade Commission, relating to the manner and form of their continuing compliance with all the terms and provisions of this order.

6. *It is further ordered*, That the corporate respondents notify the Commission at least thirty (30) days prior to any proposed change such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporate respondents which may affect compliance obligations arising out of this order.

7. *It is further ordered*, That the individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. In addition, for a period of 10 years from the date of service of this order, the respondent shall promptly notify the Commission of each affiliation with a new business or employment. Each such notice shall include the respondent's new business address and a statement of the nature of the business or employment in which the respondent is newly engaged as well as a description of respondent's duties and responsibilities in connection with the business or employment. The expiration of the notice provision of this paragraph shall not affect any other obligation arising under this order

8. *It is further ordered*, That respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

WOODLAND MOBILE HOMES, INC., ET AL.

[File No. 792 3014]

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement to a proposed consent order from Woodland Mobile Homes, Inc.; Woodland Mobile Homes, Inc. of Nevada; and Allan Borgia, their president.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

Woodland Mobile Homes, Inc. is engaged in the sale of mobile homes which are equipped with refrigerators, dishwashers, water heaters, furnaces, and other appliances. The mobile homes and appliances are covered by warranties.

The complaint alleges that respondents violated the Federal Trade Commission Act and the Magnuson-Moss Warranty Act by failing to disclose warranty terms to buyers prior to sale, as required by the Rule Concerning the Pre-Sale Availability of Written Warranty Terms, the implementing rule of the Warranty Act. The Rule requires that warranties be disclosed through one or more of the following methods:

1. Displaying the warranty text in close conjunction with the product;

2. Maintaining a binder containing the warranties;

3. Displaying a package on which the warranty text appears; or

4. Displaying a sign containing the warranty text.

The order requires specifically that respondents disclose warranty terms as required by the Warranty Act and the Rule. The order requires respondents to post, in each mobile home displayed, a sign which tells buyers that warranties are available and alerts them to check for certain important warranty terms.

The order will benefit consumers by requiring that they be given full information regarding warranty terms in order to enable them to more effectively compare warranties.

The purpose of this analysis is to facilitate public comment on the proposed order and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

CAROL M. THOMAS,
Secretary.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

[30 CFR Chapter VII]

SURFACE COAL MINING AND RECLAMATION OPERATIONS

Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), U. S. Department of the Interior, Washington, D.C., 20240.

ACTION: Notice of addition of document to administrative record for the national permanent program regulations.

SUMMARY: A memorandum summarizing three conversations relating to the proposed rules, between a Program Analysis Officer in the Office of Policy Analysis of the Department of the Interior, and employees of the U.S. Environmental Protection Agency and the U.S. Mine Safety and Health Administration, and a faculty member at the Carnegie Mellon University, has been placed in the administrative record.

ADDRESS: The memorandum is available for review in Room 120, U. S. Department of the Interior, South Building, 1951 Constitution Avenue, Washington, D.C., 20240.

FOR FURTHER INFORMATION CONTACT:

Ron Drake, Special Assistant to the Director, Office of Surface Mining, U. S. Department of the Interior, Washington, D.C., 20240, (202) 343-5371.

SUPPLEMENTARY INFORMATION: On September 18, 1978, OSM proposed rules to implement a nationwide permanent program for the regulation of surface and underground coal mining by the states and the Federal Government as required by the Surface Mining Control and Reclamation Act of 1977, 43 FR 41661-41940. After receiving extensive comments the administrative record was closed on November 27, 1978.

On January 4, 1979, OSM reopened the administrative record in order to place in it a catalogue of oral and written contacts between the Council of Economic Advisors and parties outside the Executive Office of the President with regard to OSM's proposed rules and to receive comments on those contacts. The administrative record was again closed on January 22, 1979.

In the context of preparing a response to a request for documents under the Freedom of Information Act, the Department has discovered that three telephone contacts between

V 4 4 / 2 0 J A 2 9 7 9 UMI

a Program Analysis Officer in the Office of Policy Analysis of the Department of the Interior, and persons outside the Department and the Executive Office of the President, which occurred after the rules were proposed, were not recorded in the administrative records. Accordingly, a memorandum summarizing those three contacts has been placed in the administrative record and is available for public inspection between 8:00 A.M. and 4:30 P.M. on all weekdays except Federal holidays.

Dated: January 24, 1979.

HOPE M. BABCOCK,
Deputy Assistant Secretary for Energy and Minerals.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 162]

[CGD 78-050]

TOWS NAVIGATING PASS MANCHAC

AGENCY: Coast Guard, DOT.

ACTION: Supplementary Notice of Proposed Rule Making and Public Hearing Rescheduling.

SUMMARY: The Coast Guard is taking this action because certain important information was obtained after the original notice was published. This information, namely the bridgetender's logs, reflects the regularity of barge traffic and has enabled the Coast Guard to more accurately assess the economic impact of the proposed rule.

DATES: 1. Comments must be received on or before March 28, 1979. 2. Rescheduling of Public Hearing: The Coast Guard will hold a public hearing at 9:30 a.m. on March 13, 1979 at the New Orleans Hilton, Poydras at the Mississippi River, New Orleans, Louisiana 70140, (504) 561-0500 in the Prince of Wales Room.

ADDRESSES: Comments should be submitted to Commandant (G-CMC/81) (CGD 78-050), U.S. Coast Guard, Washington, D.C. 20590. Comments will be available for examination at the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Lieutenant (jg) George W. Molessa, Jr. (G-WLE-4/73), Room 7315, Department of Transportation, Nassif Building, Washington, D.C. 20590, (202) 426-4958.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Persons submitting a comment should include name and address, identify this notice (CGD 78-050) and the specific section of the proposal to which the comment applies, and give reasons for each comment. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. Interested persons are invited to attend the hearing and present oral or written statements on this proposal. It is requested that anyone desiring to make comments notify the Executive Secretary of the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590, (202) 426-1477 at least 10 days before the scheduled date of the public hearing and specify the approximate length of time needed for the presentation. Comments at the public hearing will normally be heard in the order the requests to comment are received. It is urged that a written summary or copy of the oral presentation be included with the request.

DRAFTING INFORMATION

The principal persons involved in the drafting of this proposal are: Lieutenant (jg) George W. Molessa, Jr., Project Manager, Office of Marine Environment and Systems, and Mr. Michael N. Mervin, Project Counsel, Office of the Chief Counsel.

DISCUSSION OF SUPPLEMENTARY NOTICE

In the December 21, 1978 edition of the FEDERAL REGISTER, the Coast Guard published a Notice of Proposed Rule Making limiting the length of tows navigating Pass Manchac. Since that time, it has been brought to our attention that because the Illinois Central Gulf Railroad bridge is a drawbridge, the statistical data necessary in determining the regularity of barge traffic, the bridgetender's logs, are available for examination.

This information has enabled the Coast Guard to more accurately assess the economic impact of the proposed regulation. The logs from October 1976 to September 1977 indicate that about 14 tows per month would have had to comply with the regulation, had it already been in effect. If the industry complied by making extra roundtrips, the estimated cost is over $250,000 annually. If the industry complied by conducting the "tripping procedure" mentioned in the preamble of the original notice, the estimated cost is $50,000 annually. A Supplementary Draft Evaluation has been prepared and is included in the public docket.

The public hearing that was originally scheduled for February 7, 1979 has been cancelled.

The purpose of this supplementary notice is to give interested persons sufficient time to study the new information and prepare comments as well as oral presentation for the hearing.

Dated: January 20, 1979.

J. B. HAYES,
Admiral,
U.S. Coast Guard Commandant.

[4310-70-M]

DEPARTMENT OF THE INTERIOR

National Park Service

[36 CFR Part 7]

BIG CYPRESS NATIONAL PRESERVE, FLA.

Establishment of Special Regulations

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: The proposed regulations set forth below are necessary to implement the provisions of the Act of October 11, 1974, (16 U.S.C. 698f et seq., 88 Stat. 1258), establishing Big Cypress National Preserve. The Act requires the Secretary of the Interior to publish such rules and regulations as he deems necessary and appropriate to limit or control the use of Federal lands and waters with respect to:

(1) Motorized vehicles.
(2) Exploration for and extraction of oil, gas, and other minerals.
(3) Grazing.
(4) Draining or constructing of works or structures which alter the natural water courses.
(5) Agriculture.
(6) Hunting, fishing, and trapping.
(7) New construction of any kind.
(8) Such other uses as the Secretary determines must be limited or controlled in order to carry out the purposes of the Act.

Since Congress intended that the above uses, nontraditional in many units of the National Park System, may be permitted when they do not interfere with the natural and historic significance of the area, it is necessary to exempt Big Cypress National Preserve from the restrictions now imposed by many of the general regulations governing the operation of the National Park System. The publication of these special regulations will modify the application of the general regulations and eliminate any conflict between the administrative regulations found in Parts 1 through 6 of Title 36 of the Code of Federal Regulations and the Big Cypress National Preserve establishment Act (16 U.S.C. 698f et seq., 88 Stat. 1258). The regulations, in addition, do not address the benefits provided to the Miccosukee and Seminole Indian Tribes "to continue their usual and customary use and occupancy of Federal or federally acquired lands and waters within the preserve." These Tribal prerogatives, preserved by legislation, are currently under study and will be the subject of a separate Notice of Rulemaking.

DATES: Written comments, suggestions or objections will be accepted until March 30, 1979.

ADDRESSES: Written comments should be directed to: Superintendent, Everglades National Park, P.O. Box 279, Homestead, Florida 33030.

FOR FURTHER INFORMATION CONTACT:

Mr. Ralph Miele, Management Assistant, Everglades National Park, telephone: (305) 247-6211, Ext. 50, or

Mr. Irvin L. Mortenson, Park Manager, Big Cypress National Preserve, telephone: (813) 262-1066.

BACKGROUND

The Act of October 11, 1974 (16 U.S.C. 698f) establishing the Big Cypress National Preserve provides in part, that "Such lands shall be administered . . . in a manner which will assure their natural and ecological integrity in perpetuity in accordance with the provisions of this Act, and with the provisions of the Act of August 25, 1916 * * *.". Section 4 (b) of the Act, requires, in pertinent part, that the Secretary shall publish such other rules and regulations as he deems necessary and appropriate to limit or control the use of Federal lands and waters with respect to:

(1) Motorized vehicles.
(2) Exploration for an extraction of oil, gas, and other minerals.
(3) Grazing.
(4) Draining or constructing of works or structures which alter the natural water courses.
(5) Agriculture.
(6) Hunting, fishing, and trapping.
(7) New construction of any kind.
(8) Such other uses as the Secretary determines must be limited or controlled in order to carry out the purposes of the Act.

General regulations issued pursuant to the Act of August 25, 1916 (16 U.S.C. 3), are found in Title 36 of the Code of Federal Regulations, Parts 1 through 6 and are applicable to Big Cypress National Preserve by virtue of its being part of the National Park System. There are some inconsistencies between these general regulations and the Act of October 11, 1974, relating to hunting, off-road vehicle use and certain special resource uses such as the exploration and extraction of oil, gas and other minerals, grazing and agriculture. The special regulations proposed herein will provide relief from or otherwise modify the restrictions now imposed by Parts 1 through 6 of Title 36 of the Code of Federal Regulations.

The proposed regulations will limit and control certain activities which heretofore have been unrestricted and, since they will phase out some adverse uses of the Preserve lands, the National Park Service has determined that the proposal has little potential for causing a significant environmental impact. Therefore, an Environmental Impact Statement is not needed.

An Environmental Assessment and Review of the Assessment are on file and available for inspection upon request at the Southeast Regional Office, National Park Service, 1895 Phoenix Boulevard, Atlanta, Georgia 30349, and at the Superintendent's office, Headquarters building, Everglades National Park 33030, for 60 days from the date of this notice.

The assessment considers the nature of the resources, available alternatives, their impacts, mitigating values, adverse effects, a description of the alternative selected as the proposed action, and additional considerations that provide a basis for the conclusion that an Environmental Statement is not needed.

Several workshops were held which were attended by persons from the local communities, members of conservation organizations, oil company personnel, residents and users of the Preserve, and other interested parties. Numerous oral and written comments and suggestions were received and have been considered in the development of the proposed regulations.

MOTORIZED VEHICLES

It is recognized that public access into the Preserve is generally by the use of motorized vehicles. Congress has authorized regulation of the use of all-terrain vehicles in order to assure the preservation of the natural and ecological integrity of the Preserve (House Report No. 93-502).

The resource planning process will provide for the designation of specific areas or trails within the Preserve open for the use of off-road vehicles. Within other areas of the Preserve, off-road vehicles use will be prohibited or otherwise restricted in some manner. This process will incorporate public participation by providing an opportunity to comment on any such proposed action. This process will also include coordination with appropriate Federal, State and local agencies. The goal is to analyze and evaluate alternatives and produce decisions which best provide for the protection of the natural and historic resources, promotion of safety for all users, minimize use conflicts, and accomplish all other resource objectives of the Preserve. Analysis and evaluation of off-road vehicle use will take into consideration the criteria contained in Sections 3 and 4 of E.O. 11644 (37 FR 2877) as amended by E.O. 11989 (42 FR 26959) and shall consider factors such as noise, safety, quality of the various recreational experiences provided, potential impacts on soil, watershed, vegetation, fish, wildlife, habitat, and conflicts between existing or proposed uses of the same or neighboring lands.

The public will be provided an opportunity to participate in the designation of areas and trails relating to off-road vehicle use. Except in emergencies, or when the Superintendent determines that off-road vehicle use will cause or is causing considerable adverse effects on the soil, vegetation, wildlife habitat or cultural resources, advance notice will be given to the public of any intention to designate an area or trail, or to close or restrict such areas or trails. A public notice of the proposed action shall be published in the "FEDERAL REGISTER" and the public shall be provided a period of 30 days to comment on the proposed designations or revisions.

Since factors listed in E.O. 11644, as amended, may change over a period of time, broad language is used to allow for establishing limits to protect the integrity of the Preserve. Due to the great diversity of design and types of vehicles used, language has been incorporated which will include all present day and future types of transportation, to minimize future changes in the regulations.

A total of 63 comments were received during workshops relative to restrictions on motorized vehicles (off-road vehicles). Three (3) wanted no restrictions for camp owners, fourteen (14) wanted no restrictions, and forty-six (46) said restrictions were necessary, ranging in degree from limiting vehicle size and weight to no vehicles in parts of the Preserve.

Owners of improved property wanted assurance of access to their property at all times. Some property owners wanted to restrict the general public. Many commented on the vegetative damage and deep ruts caused by very large vehicles. Hikers wanted their trails restricted to foot travel only. Vehicle operators wanted to run the hiking trails and/or be allowed to cross them.

Several commented on vehicle equipment and operating standards, e.g., spark arrestors, lights, safety flags and those regulations pertaining to passenger safety. Certain portions have been rephrased and additions made to achieve greater clarity, the desired safety aspects, and to conform with

V 4 4 / 2 0 J A 2 9 7 9 UMI

the terms of Executive Order 11644 (37 FR 2877).

Numerous comments were received relative to vehicle size and weight. Most condemned the large vehicles used by oil companies. Many claimed their own vehicles did no damage. One suggested a weight limit of 4000 pounds on 4 tires of at least a 12.00 size as being non-damaging. Some expressed the thought that ruts caused by vehicles would disappear in a year. Many wanted to stop the damage being done, and called attention to the numerous scars now present. A majority of comments suggested a weight or size limit is needed. Specific regulations addressing these issues are not proposed at this time, pending the completion of a study period to determine the effects of motorized vehicle use on Preserve lands.

The majority of the public response indicated a desire to protect the Preserve and still use motorized vehicles for transportation. Since it is the express intent of the Congress to limit and control the use of motorized vehicles to assure the natural and ecological integrity of the Preserve, it is proposed that a new Part 7.86(a) is needed to allow a limited use of motorized vehicles within the Big Cypress National Preserve.

Camp Structures

For many years the area of the Big Cypress was an uncharted, unsurveyed wilderness. Several hundred structures ranging from single room, one-story shacks to well-built, multi-story houses have been built on lands the builders or occupants did not own. The builders and occupants have no legal status to retain rights to occupy or maintain the structures on Federal lands.

Title 16 of the United States Code, Section 698h(a) provides for the owner of "improved property," where construction began before November 23, 1971, to retain for himself, and his heirs and assigns a right of use and occupancy for a definite term of not more than twenty-five years following acquisition by the Secretary, or in lieu thereof, for a term ending at the death of the owner or the death of his spouse, whichever is later. No such provisions were made for the above described cabin owners who did not "own" the lands under the cabin. There is no legal right for these individuals to continue the occupancy of the land on which the cabins are constructed. Extended use of such property is not in the best interest of the Preserve. However, the long, customary use of such property by the individuals, and the sizeable investment that many have made require consideration of an alternative means of orderly termination of this use. The legislation in establishing the Preserve did not specifically address this problem. Accordingly, it is proposed, for structures in existence prior to the effective date of the regulations, that a nonrenewable, . nontransferrable permit be issued to the occupant, provided the occupant acknowledges in the permit that he does not have legal title to the land. The permit would have a term of five (5) years from the effective date of the regulations or upon acquisition for Preserve purposes by the Federal government of that land upon which the structures are located, whichever occurs first. Occupants of the structures may continue to use the structures under this permit provided that the structures are in a safe and sound condition and meet applicable sanitary requirements. Occupants must also agree to vacate at the end of the 5-year period. There will be no extensions of these permits beyond the initial 5-year period. Other provisions of the permit would include reasonable use fees and the option of salvaging or removing the structure from Preserve lands at any time prior to the expiration of the 5-year period. The burden of proof of ownership of a structure shall be that of the claimant. No responsibility, liability, or burden would be placed upon the Federal government, except as a result of its own actions, for the protection, suitability, safety, or compliance with State or local laws for the structures.

Public comments and suggestions received ranged from that of immediate eviction, to phasing out, leasing, and allowing occupants to remain with numerous restrictions. Since unauthorized residence on Federal lands is prohibited by 36 CFR 5.15 and the legislation establishing the Preserve did not provide for the non-owners of lands who built structures, the phase-out procedure provides the most equitable solution.

Aircraft Use

The use of light aircraft for the transportation of persons and supplies to and from prepared airstrips within the Preserve may be permitted when they are operated in a manner which will assure the natural and ecological integrity of the Preserve. It is estimated that approximately 35 such airstrips are now being used within the area. Since 36 CFR 2.2 restricts the operation or use of aircraft to sites designated by special regulations, it is proposed that some of the airstrips presently in use within the Preserve may continue to be used in accordance with an annual special use permit which may be obtained by the former owners or users of the land upon which the airstrips are located. Applicants will be required to supply a sketch showing location, size, type of landing surface and camps served by the airstrip. Permittees will be responsible for the proper operation and maintenance of airstrips in accordance with appropriate Federal and State regulations. The government shall not be responsible or held liable or incur any liability for damages in connection with the operation of permitted airstrips. A map showing the location of all airstrips under special use permit shall be available for public inspection at the office of the Superintendent.

Numerous comments and suggestions were received relative to the operation of airstrips. Many suggested that Federal Aviation Administration (FAA) regulations and licensing should prevail. The FAA, however, does not license private airstrips. It may recommend and approve, but leaves the licensing to the State and/or County. Aircraft operations are covered by 36 CFR 2.2(d), which requires that all aircraft be operated in accordance with current applicable regulations of the Federal Aviation Administration.

Several suggestions were received that advocated complete, unrestricted use of the existing airstrips. Since the quality of improvements such as type of landing surface, markings, lights, length, etc., are not uniform, some constraints are necessary to limit and control this activity in the interest of public safety and to protect the ecological integrity of the Preserve.

Provisions are made for the controlled use of helicopters in authorized gas and oil exploration and extraction activities.

Watershed Protection

Since the major purpose for establishing the Preserve was to protect the watershed, priority consideration must be given to insure that no significant alteration of the natural water courses nor changes in the quality or quantity of the water will occur. Section 5.7 of Title 36 of the Code of Federal Regulations prohibits the unauthorized construction of structures, roads, trails, paths, or other ways, and 36 CFR 2.24 imposes certain sanitation requirements upon users of the Preserve. Florida Statutes 373, 387, and 403 provide miscellaneous laws related to controlling pollution of surface and underground waters.

The Federal Water Pollution Control Act, Pub. L. 92-500, 33 USCA 1251 et seq., provides for regulation of pollutants from point source discharges but does not regulate non-point sources. Dade, Monroe, and Collier County water and sanitation laws are not uniform. The above citations of the various water laws leaves largely untouched non-point sources of pollution such as runoff of pesticides and fertilizers from farm lands, although

these are significant sources of pollution. Therefore, paragraph (d), Watershed Protection, is necessary to provide that the waters of the Preserve receive interim protection. Specific regulations to control the introduction of any pollutant, contaminant, agricultural chemical or other deleterious material into the surface or subterranean waters of the Preserve are currently under study and will be the subject of proposed rulemaking under paragraph (d)(1) which is currently reserved.

Comments from the public indicated that drainage structures already built adjacent to or within the Preserve are detrimental to the purposes for which the Preserve was established and suggested that these be blocked or filled to restore natural water levels.

Several suggested that agricultural chemical use be banned.

A summary of comments indicates that almost all persons wanted assurance that the watershed would be adequately protected and restored to former natural conditions, if possible.

Hunting, Fishing and Trapping

Many comments and suggestions were directed toward greater protection of wildlife. Some went so far as to suggest that there wouldn't be any game left unless enforcement was begun soon.

Several commented that year round hunting should be stopped.

Several wanted dogs banned, or restricted to the first week of hunting, and no dog training within the Preserve.

Some stated that firearms were needed for protection, while others thought they should be allowed only during open hunting season.

One recommendation was to not allow trapping.

The Act establishing the Big Cypress National Preserve provides, that the Secretary *shall* permit hunting, fishing and trapping in accordance with Federal and State laws. However, he may, after consultation with the appropriate State agency having jurisdiction over these activities, restrict these activities for reasons of public safety, administration, floral and fauna protection and management, or public use and enjoyment.

The National Park Service has consulted with the Florida Fresh Water Fish and Game Commission and there is mutual agreement to make the Preserve a Cooperative Wildlife Management Area governed by Florida Regulations 16E-802 and by paragraph (e) as set forth below.

Grazing

Grazing on public lands within the Preserve is permitted only pursuant to an agreement with the National Park Service (see 36 CFR 5.16).

Grazing has historically occurred on certain lands within the Preserve and it is considered appropriate that they be allowed to continue in accordance with rules that will limit and control the activity in order to carry out the purposes of the Act.

Public comments were almost unanimous for restricting grazing to the area that was currently being grazed.

Other comments were to limit grazing to beef cattle only, prohibit improvement of new pasture, and restrict fertilizer and pesticide applications.

Accordingly, a new paragraph (f), Grazing, is needed to limit and control grazing activities on Federal lands within the Preserve.

Agriculture

Regulations to limit and control agriculture are not necessary since there are no active agricultural activities within the Preserve.

Oil, Gas and Minerals

The National Park Service proposed regulations, on December 18, 1977 (42 FR 63058), Title 36 CFR, Chapter 1, Part 9, which will control all activities resulting from the exercise of rights to oil and gas not owned by the United States on lands within any unit of the National Park System. This is to insure that such activities are conducted in a manner consistent with the purposes for which the National Park System and each unit thereof was created, to prevent or minimize damage to the environment or other resource values, and to insure that the pristine beauty of the units are preserved. Because of the proposed servicewide regulations, additional special regulations are not proposed. The public has had the opportunity to review and comment on the proposed servicewide oil and gas regulations at the time of their publication.

Native American Rights

The proposed regulations do not address the benefits provided to the Miccosukee and Seminole Indian Tribes by the Big Cypress Preserve Establishment Act (16 U.S.C. 698f et seq., 88 Stat. 1258). The Act provides that members of the Miccosukee Tribe and members of the Seminole Tribe of Florida shall be permitted, subject to reasonable regulations established by the Secretary, to continue their usual and customary use and occupancy of Federal or federally acquired lands and waters within the Preserve, including hunting, fishing and trapping on a subsistence basis and traditional tribal ceremonies. These Tribal prerogatives, preserved by legislation, are now under study and will be the subject of a separate notice of rulemaking.

Authority

Section 3 of the Act of August 25, 1916 (39 Stat. 535 as amended, 16 U.S.C. 3); Act of October 11, 1974 (88 Stat. 1260, 16 U.S.C. 698i); 245 DM (27 FR 6395) as amended; National Park Service Order No. 77 (38 FR 7478, as amended).

Drafting Information

The following National Park Service personnel were the primary authors of these proposed regulations: John M. Good, Superintendent, Everglades National Park; Jack E. Stark, Former Superintendent, Everglades National Park; Claude W. McClain, Assistant Superintendent, Everglades National Park; Ralph Miele, Management Assistant, Everglades National Park; Irvin L. Mortenson, Park Manager, Big Cypress National Preserve; and Michael V. Finley, Division of Ranger Activities and Protection, Washington, D.C.

Impact Analysis

The National Park Service has determined that these rules are not significant rules and do not require a regulatory analysis under Executive Order 12044; nor is it a major Federal action significantly affecting the quality of the human environment which would require preparation of an Environmental Impact Statement.

Boyd Evison,
Acting Associate Director, Management and Operations, National Park Service.

January 24, 1979.

In consideration of the foregoing, it is proposed to amend Part 7 of Title 36 of the Code of Federal Regulations by the addition of a new section 7.86 as follows:

§ 7.86 Big Cypress National Preserve.

(a) *Motorized Vehicles.*

(1) *Definitions.*

(i) The term "motorized vehicle" means automobiles, trucks, glades or swamp buggies, airboats, amphibious or air cushion vehicles or any other device propelled by a motor and designed, modified for or capable of cross country travel on or immediately over land, water, marsh, swampland or other terrain, except boats which are driven by a propeller in the water.

(ii) The term "operator" means any person who operates, drives, controls or has charge of a motorized vehicle.

(iii) The term "preserve lands" means all federally owned or controlled lands and waters administered by the National Park Service within the boundaries of the Preserve.

(2) *Travel in Preserve Areas.*

V 4 4 / 2 0

(i) Areas open to motorized vehicles:

(A) The area south and west of Loop Road (State Road #94.)

(B) The area north of Tamiami Trail.

(C) The above areas open to travel by motorized vehicles are shown on a map numbered BC-91,001, dated November 1975, which is available for public inspection in the office of the Superintendent.

(D) Even though an area or route outside of an established public road or parking area has been established as open for motor vehicle use, the Superintendent may temporarily or permanently close or restrict the use of the areas and routes designated for use of motor vehicles, or close or restrict such areas or routes to the use of particular types of motor vehicles by the posting of appropriate signs, or by marking on a map which shall be available for public inspection at the office of the Superintendent, or both. In determining whether to close or restrict the uses of the areas or routes under this paragraph, the Superintendent shall be guided by the criteria contained in Sections 3 and 4 of E.O. 11644 (F.R. 2877) as amended, and shall also consider factors such as other visitor uses, safety, wildlife management, noise, erosion, geography, vegetation, resource protection, and other management considerations. Prior to making a permanent closure of an area or route, notice of such intention shall be published in the "FEDERAL REGISTER" and the public shall be provided a period of 30 days to comment.

(ii) All other areas are closed to motorized vehicles except as provided below:

(A) The areas between the Loop Road (State Hwy. #94) and the Tamiami Trail (U.S. Hwy. #41), except that the Superintendent may issue a permit to allow reasonable access for legal residents or oil and gas activities.

(B) Big Cypress Florida Trail, Section 1. One marked main hiking trail, from Tamiami Trail to Alligator Alley; and the two marked loop trails are closed to the use of all motorized vehicles, except that vehicles may cross the trails.

(C) The above areas closed to travel by motorized vehicles are shown on a map numbered BC-91,001, dated November 1975, which is available for public inspection in the office of the Superintendent.

(3) *Operations, Limitations and Equipment.*

(i) Vehicle operation.

(A) Off-road vehicle permits shall be required after December 31, 1979.

(B) Motorized vehicles shall not be operated in a manner causing, or likely to cause, signficant damage to or disturbance of the soil, wildlife habitat, improvements, cultural, or vegetative resources. Cutting, grading, filling or ditching to establish new trails or to improve old trails is prohibited, except under written permit where necessary in the exploration for and extraction of oil and gas.

(C) Passengers shall not ride on the fenders, hood, roof or tailgate, or in any other position outside of a moving vehicle.

(D) Motorized vehicles shall not be used to tow a person, on a sled, skis, box, surfboard, parachute, kite or other device.

(ii) Vehicle Limitations and Equipment.

(A) (RESERVED)

(B) The Superintendent, by the posting of appropriate signs or by marking on a map, which shall be available for public inspection in the office of the Superintendent, may require during dry periods, that a motorized vehicle or a particular class of motorized vehicle, operated off established roads and parking areas, shall be equipped with a spark arrestor that meets Standard 5100-1a of the Forest Service, U.S. Department of Agriculture, or the 80 percent efficiency level when determined by the appropriate Society of Automotive Engineers (SAE) Standard.

(C) A motorized vehicle, except an airboat, when operated off of established roads and parking areas, from one-half hour after sunset to one-half hour before sunrise, shall display at least one forward-facing white headlight and one red lighted taillight, which shall be visible from a distance of 500 feet to the front and rear under clear atmospheric conditions.

(D) Airboats and amphibious vehicles shall fly a safety flag at least 10 inches wide by 12 inches long at a minimum height of 10 feet above the botton of the vehicle or boat, and shall display one white light aft visible for 360° when running during periods of darkness.

(b) *Camp Structures.*

(1) Buildings or other structures, on lands not owned by claimants to these structures, existing prior to the effective date of these regulations, may be occupied and used by said claimants pursuant to a nonrenewable, nontransferrable permit. This use shall be for a maximum term of five (5) years from the date of Federal acquisition for preserve purposes of the land upon which the structures are situated or five years from the effective date of these regulations, whichever occurs first, *provided, however,* That the claimant to the structures by his application:

(i) Shows proof of ownership of the structure,

(ii) Submits a sketch and photograph of the structure and a map showing its geographic location, and

(iii) Agrees to vacate or remove the structure from the preserve upon the expiration of the permit.

(iv) The claimant acknowledges in the permit that he/she has no interest in the real property.

(2) Structures built after the effective date of these regulations will be removed upon acquisition by the Federal government of the lands upon which the structures are situated.

(3) Structures that are razed or destroyed by fire or storm, or deteriorate structurally to the point of being unsafe or uninhabitable shall not be rebuilt and the permit shall be cancelled.

(4) The National Park Service reserves the right to full and unrestricted use of the lands under permit including, but not limited to, such purposes as managed hunting programs executed in accordance with applicable State Game and Fish laws and regulations, use of existing roads and trails, and unrestricted public access.

(c) *Aircraft: Designated Landing Sites.*

(1) Except as provided for below, aircraft may be landed in the Preserve only at improved landing strips which were in existence at the time the lands were acquired for Preserve purposes, or the effective date of these regulations, whichever occurs first. A permit may be issued to the former land owner or airstrip user upon application which shall include a sketch showing location, airstrip license, if any, size of strip, type of landing surface, height of obstructions, special markings, and camps served.

(2) A map showing the locations, size, and limitations of each airstrip designated under a permit shall be available for public inspection at the office of the Superintendent.

(3) Rotorcraft used for purposes of oil and gas exploration or extraction, as provided for in Part 9 Subpart B of this chapter, may be operated only in accordance with an approved operating plan or a permit issued by the Superintendent.

(d) *Watershed Protection.*

(1) (RESERVED)

(2) The provisions of all Federal and Florida statutes pertaining to protection of waters and watersheds are applicable to the lands and waters of the Preserve.

(e) *Hunting, Fishing and Trapping.*

(1) Hunting, fishing and trapping are permitted in accordance with the general regulations found in Parts 1 and 2 of this chapter and applicable Florida law governing Cooperative Wildlife Management Areas.

(f) *Grazing.*

(1) Grazing privileges shall be available under permit to owners or lessees who were actually using land within the Preserve for grazing purposes on October 11, 1974, or who elected to request a permit at the time the land was acquired for Preserve purposes (See 36 CFR 5.16.)

(2) Such permit may be renewed during the lifetime of the permittee or his spouse.

(3) The breach of any of the terms or conditions of the permit or the regulations applicable thereto shall be grounds for termination, suspension or denial of grazing privileges.

(4) Failure to use land under permit for grazing or to renew the permit shall automatically terminate the permit and grazing privileges, *provided, however,* That a permittee may be granted a nonuse permit on an annual basis, not to exceed three consecutive years. Permitted nonuse beyond this time may be granted if necessitated by reasons clearly outside the control of the permittee.

(5) Annual fees based on Departmental regulations (43 CFR 4125.1-1 (m)) will be charged for all livestock grazing upon Preserve lands.

(6) Each permittee shall comply with the range management plan approved by the Superintendent for the area under permit.

(7) State laws and regulations relating to fencing, sanitation and branding are applicable to graziers using Preserve lands.

(8) The National Park Service reserves the right to full and unrestricted use of the lands under permit including, but not limited to, such purposes as managed hunting programs executed in accordance with applicable State Game and Fish laws and regulations, use of existing roads and trails, unrestricted public access, and the right to revoke the permit if the activity is causing or will cause considerable adverse effect on the soil, vegetation, watershed or wildlife habitat.

(9) Corporations formed by owners or lessees who were actually using lands within the Preserve for grazing purposes on October 11, 1974, may be issued annual permits for a period not to exceed twenty-five (25) years from the date of acquisition for preserve purposes.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 35]

[FRL 1004-1]

GRANTS FOR RESTORING PUBLICLY OWNED FRESHWATER LAKES—STATE AND LOCAL ASSISTANCE

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This proposed regulation establishes policies and procedures by which States may apply for grants to assist in carrying out approved methods and procedures for restoring publicly owned freshwater lakes, and protecting them against degradation, as authorized by section 314 of the Clean Water Act (33 U.S.C. § 1251 *et seq.*).

DATES: The public is invited to submit comments which must be received by EPA on or before March 30, 1979.

EFFECTIVE DATE: The provisions of these regulations govern only those clean lakes grants that are awarded on or after the final regulation promulgation date. Grants that are awarded before the promulgation date will not be affected by these regulations and will continue according to their original terms subject to the regulations under which the funds were awarded.

ADDRESSES: Submit comments, in writing, to Mr. Alexander Greene, Director, Grants Administration Division (PM-216), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Kenneth M. Mackenthun, Director, Criteria and Standards Division (WH-585), Environmental Protection Agency, Washington, D.C. 20460. Telephone: (202) 755-0100.

SUPPLEMENTARY INFORMATION: Section 314 of the Clean Water Act (33 U.S.C. § 1251 *et seq.*) provides the authority for Federal financial assistance for the restoration of publicly owned freshwater lakes. The program is called the clean lakes program.

Section 314 requires that each State prepare and submit a report to the Environmental Protection Agency (EPA) indicating: (1) an identification and classification of all publicly owned freshwater lakes in that State according to "eutrophic" condition; (2) procedures, processes, and methods (including land use requirements) to control sources of pollution of these lakes; and (3) methods and procedures, in conjunction with appropriate Federal agencies, to restore the quality of these lakes. Section 314 also provides financial assistance to States to implement lake restoration and protection methods and procedures that the Administrator has approved.

The Congress, in section 62 of Pub. L. 95-217, amended section 314(b) of the Clean Water Act by adding the following: "The Administrator shall provide financial assistance to States to prepare the identification and classification surveys required in subsection (a) (1) of this section." On July 10, 1978, EPA published a notice in the FEDERAL REGISTER that financial assistance would be provided to States for the identification and classification of publicly owned freshwater lakes according to trophic condition. EPA also would provide financial assistance for establishing a priority ranking for lakes in need of restoration, or conducting diagnostic or feasibility studies to determine methods and procedures to protect or restore the quality of those priority lakes (43 FR 29617). Each State can use up to $100,000 Federal funds for these studies. No award can exceed 70 percent of the eligible cost of the proposed project.

EPA carefully evaluated the performance of the clean lakes program during 1977 to determine how it might be improved, and based on this evaluation, developed the revised procedures contained in this regulation. EPA conducted meetings during this review with many State representatives. We later asked for and received comments from the States on draft recommendations that might improve the program. We considered and included those comments, where appropriate, into this proposed rule.

A principal concern that many States raised during the 1977 program review centered on the level of Federal financial assistance for clean lakes grants. First, the States indicated that they needed Federal support in order to develop technically sound lake restoration proposals. Second, they believed that the Federal share for implementing selected lake restoration methods and procedures should be increased above the current 50 percent level. During the program review we informed the States that we would review the possibility of increasing the Federal share by 5 to 10 percent above the 50 percent level.

The regulation provides the maximum allowable grant assistance level, 70 percent, to conduct diagnostic-feasibility studies to select the best available lake restoration procedures. Regarding the second concern, EPA has receved no quantitative documentation to indicate that increasing the support level by 5 or 10 percent would be effective in encourageing greater participation among the States in the clean lakes program. EPA is concerned that if we increase the support level by 5 or 10 percent, the limited annual appropriations will be used for fewer lake restoration projects. Based on direct discussions with State water quality representatives from the New England and Great Lakes States during the evaluation, and considering the comments receved from the States, EPA believes that the current 50 percent funding level is appropriate for implementing lake restoration procedures. This funding formula requires sufficient State/substate (non-Federal) commitment to ensure the

V 4 4 / 2 0
J A 2 9 7 9
UMI

best project implementation and proper maintenance of the project after implementation is completed. EPA is interested in receiving comments on this issue.

Another change in program procedures involves the eligibility of grant recipients. Section 314 allows grants to be made *only to the States*. States can elect to have substate agencies do part of the work that is specified in particular grants. Provisions contained in § 35.1615 allow States to enter into interagency agreements for this purpose.

In order to receive and include the largest amount of additohal input in the proposed section 314 regulations, EPA distributed in mid-August 1978 a draft copy of the proposed regulations to all of the States and Territories, 18 prominent environmental and public interest groups, to other Federal, State, and local agencies at their request, and to all program offices within EPA. Thirty-two responses have been received, but additional responses are anticipated and those comments will be considered in drafting the final regulations. Many of the comments received were helpful and were incorporated into the proposed regulations. Some of the concerns raised are discussed in the following pragraphs.

There were a significant number of questions regarding grant eligibility, administrative responsibility and establishing priorities for clean lakes projects. In the past, EPA used its research and demonstration grant regulations to award clean lakes grants since section 314 regulations were not developed. The research and demonstration authority allows grants to be made to substate entities as well as to States. However, since the proposed regulations are written specifically for section 314 of the Act, only State agencies will be eligible to receive clean lakes grant assistance. Since many States would prefer that substate entities carry out clean lakes grant activities, § 35.1615 allows delegation of the clean lakes grant activities to substate agencies by interagency agreement.

Even though tasks specified in clean lakes grants are delegable, the State ultimately is responsible. Therefore, all of the grant limitations and conditions specified under § 35.1650 are directed at the State. A particular question was raised about the State guaranteeing the non-Federal share required to support a clean lakes grant (see § 35.1650-3(a)(1)). This grant condition does not require that all non-Federal grant support money come from the State, and EPA expects that in most cases a significant portion, if not all, of the required non-Federal share will be provided from substate agency resources. The manner in which a State chooses to provide the matching grant share is not rigidly defined; however, the State must ensure that adequate non-Federal funds are available at the time the grant is accepted.

EPA received questions regarding the amount of annual funding that is available to the clean lakes program, and the manner in which EPA administers these monies. As with all publicly supported programs, appropriations from the Congress to the clean lakes program are limited. However, since the amount of these appropriations is relatively small, EPA cannot effectively allocate this money directly among all the States. Further, direct allocation is complicated by the variable needs of individual projects, by the fact that lakes are not uniformly distributed across the country, the fact that lake restoration needs of individual States fluctuate unpredictably, and the fact that States vary greatly in their ability to support lakes restoration projects. In order to ensure the most equitable distribution from available funding, EPA believes that clean lakes program appropriations should remain in a central account where all States can compete for the available Federal support on the basis of merit and demonstrated need. EPA will monitor continuously the distribution of funds to ensure an equitable distribution of annual appropriations among the States. EPA will take into account the lake restoration needs that States express to EPA as their annual water quality management plans.

EPA has considered other administrative methods for receiving and evaluating grant applications and making grant awards. Each method has its merits and demerits. EPA is interested in receiving further comments on the method they propose to use as well as alternative methods. These alternative methods could include a National competition where the regulation would specify a deadline for proposal submission. After the deadline EPA would evaluate all applications received against one another and award proposals with the highest rating based on the review criteria (see § 35.1640-1). This method could be modified where EPA would consider only the first priority proposals during a first round of evaluation, then the second priority proposals would be considered, and so forth, until all applications are evaluated or available funds are exhausted. We believe any method that specifies a deadline for submitting applications will increase the time EPA would require to reach a grant decision, possibly as much as six months. A third method could involve an allotment procedure of appropriated funds to the States or to the EPA Regional offices for disbursement to States within their jurisdictions. However, the only basis EPA has at this time to allocate funds would be an equal allotment to the 50 States, Territories and the District of Columbia.

To assure that the best projects are funded, EPA is requiring that States annually establish priority rankings for clean lakes projects. The priorities should reflect a State's Water Quality Management Plan and should consider the review criteria that the EPA will use in evaluating specific proposals (see § 35.1640-1). The review criteria are not weighted because EPA believes States should be allowed to emphasize certain factors above others, and that different States may emphasize different factors. EPA also requires that all projects provide for adequate public participation according to the procedures presented in Part 25 of this chapter. (Part 105 currently addresses public participation; Part 105 will be replaced by Part 25 when the latter is promulgated). Public participation requirements appear under §§ 35.1620-2, 35.1620-4 and Appendix A of this regulation. Until Part 25 is promulgated, the term Part 25 shall mean Part 105.

Since priorities within States are subject to change and unforeseen lake restoration needs can arise during the year that require priority attention, the proposed regulation (see § 35.1620-5(a)) allows States to alter priorities during the year and add projects to priority lists through a petition process.

In order to be eligible for clean lakes program assistance after January 1, 1982, States must have surveyed and classified their publicly owned freshwater lakes they believe are in need of protection or restoration. This survey is required under section 314(a) of the Act, and the information is necessary for States to establish priorities on clean lakes projects. The requirement does not mean that all of a State's publicly owned freshwater lakes must be surveyed, but that the States must provide EPA with survey results and a rationale for having selected specific lakes. As noted earlier, funding support for this purpose is being made available to the States through the July 10, 1978, FEDERAL REGISTER notice (43 FR 29617). Until January 1, 1982, States can apply for clean lakes program assistance without a complete lake survey; however, all grant applications received by EPA must include a State priority certification (see § 35.1620-2(a)).

Other significant concerns centered on the amount and type of technical information required in grant applications and the work to be conducted under clean lakes grants. The information required in a Phase 1 grant application, as specified under § 35.1620-2(b), is not excessive and is readily available to a grant applicant. Moreover, the information requirements are the same as those EPA specified in the July 10, 1978, FEDERAL REGISTER notice for conducting lake classification surveys. The required information is essential to provide EPA a sufficient technical basis to judge the merits of a proposed Phase 1 project and to make an appropriate funding decision.

Similarly, the scope of work requirements specified in Appendix A to this proposed regulation are the minimum amount of information to allow EPA to adequately assess project merits and to reach a technically sound Phase 2 grant funding decision. EPA understands that in certain situations some variation in these requirements might be advantageous to make a project more cost-effective without diminishing EPA's ability of adequately evaluating all relevant technical aspects of the project. Such situations will be dealt with on a case by case basis, with careful consultation between the grant applicant or grantee and EPA. If a grant applicant or grantee doubts the appropriateness of certain information requirements that are in the regulations, they should immediately contact the EPA Regional Office or Headquarters. This will minimize problems that could arise.

Some reviewers expressed their strong belief that protecting lakes is as important in some instances as restoring lakes, and that the clean lakes program should not be limited to lake restoration. Since the inception of clean lakes program, EPA has advocated that we will give water pollution controls, or lake protection measures, priority consideration in any clean lakes project for both high quality and degraded lakes. It is the EPA policy to support in-lake treatment measures only when pollution control is not sufficient to return a degraded lake to a useful condition in a reasonable amount of time.

In these and other regulations, EPA is developing the concept of a State/EPA Agreement. The Agreement will provide a way for EPA Regional Administrators and States to coordinate a variety of programs under the Clean Water Act, the Resource Conservation and Recovery Act, the Safe Drinking Water Act and other laws administered by EPA. Since this subpart governs only that part of the State/EPA Agreement which relates to Phase 1 and Phase 2 clean lakes grants, other programs included in the State/EPA Agreement will be governed by provisions found elsewhere in this chapter. In Fiscal Year 1979, the Regional Administrator and the State must develop the State/EPA Agreement sufficiently to assure a clean lakes grant will be consistent with the State/EPA Agreement. Beginning in FY 1980, State programs funded under section 314 of the Act will be part of the State/EPA Agreement and the State/EPA Agreement must be completed before grant award. EPA will issue guidance concerning the development and the content of the State/EPA Agreement.

REGULATORY ANALYSIS: We have determined that this proposal does not require regulatory analysis under Executive Order 12044.

EVALUATION: Section 2(d)(8) of Executive Order 12044 requires that each regulation be accompanied by a plan for evaluating a regulation after it is issued. In order to comply with this requirement, EPA will conduct an evaluation of this regulation which will either be presented in the section 304(j) report, which is scheduled to be published in December 1981, or published separately at that time.

Dated: January 17, 1979.

DOUGLAS M. COSTLE,
Administrator.

It is proposed to add Subpart H to Part 35 of Title 40 to read as set forth below:

Subpart H—Grants for Restoring Publicly Owned Freshwater Lakes

Sec.

35.1600 Purpose.

35.1650-4 Grant payment.
35.1650-5 Reports.
Appendix A—Guidance for Diagnostic-Feasibility Studies.

AUTHORITY: Secs. 314 and 501 of Pub. L. 92-500 (86 Stat. 816; 33 U.S.C. § 1251 *et seq.*) as amended by Pub. L. 95-217.

§ 35.1600 Purpose.

This subpart supplements the EPA general grant regulations and procedures (Part 30 of this chapter) and establishes policies and procedures for grants to assist States in carrying out approved methods and procedures for restoration (including protection against degradation) of publicly owned freshwater lakes.

§ 35.1603 Summary of clean lakes grant program.

(a) Under Section 314 of the Clean Water Act, EPA may provide financial assistance to States to implement methods and procedures to restore publicly owned freshwater lakes. Although grants may be awarded only to States, these regulations allow States, through intergovernmental agreements, to delegate some or all of the required work to substate agencies.

(b) The only projects that are eligible for grant assistance must deal with publicly owned freshwater lakes. The State must have assigned a priority to restore the lake, and the State must certify that the lake project is consistent with the State Water Quality Management Plan developed under the State/EPA Agreement. The State/EPA Agreement is a means for EPA Regional Administrators and States to coordinate a variety of programs under the Clean Water Act, the Resource Conservation and Recovery Act, the Safe Drinking Water Act and other laws administered by EPA.

(c) These regulations provide for Phase 1 grants and Plase 2 grants. The purpose of a Phase 1 grant is to allow a State to conduct a diagnostic-feasibility study to determine a lake's trophic characteristics and to evaluate possible solutions and to recommend a feasible program to restore and preserve the quality or the lake. A Phase 2 grant is to be used for implementing recommended methods and procedures for controlling pollution or restoring the lake. The fact that EPA has awarded a Phase 1 grant to a State does not obligate EPA to award a Phase 2 grant to that State. Additionally, the award of a Phase 1 grant is not a prerequisite for receiving a Phase 2 grant. However, a Phase 2 grant application for a proposed project which was not evaluated under a Phase 1 grant must contain the information specified in Appendix A.

(d) EPA will evaluate all applications for Phase 1 and Phase 2 grants in accordance with the application review criteria of § 35.1640-1. The review criteria include technical feasibility, public benefit, reasonableness of proposed costs, environmental impact, and the State's priority ranking of the lake project.

(e) Before awarding grant assistance, the Regional Administrator must determine that pollution control measures in the lake watershed authorized by secton 201, included in an approved

V 4 4 / 2 0

208 plan or required by section 402 of the Act have been completed or are being implemented according to a schedule that is included in an approved plan or discharge permit. Clean lakes funds may not be used to control the discharge of pollutants from a point source, where the cause of pollution can be alleviated through a municipal or industrial permit under section 402 of the Act or through the planning and construction of wastewater treatment facilities under section 201 of the Act.

§ 35.1605 Definitions.

The terms used in this subpart have the meanings defined in section 502 of the Act. In addition, the following terms shall have the meaning set forth below.

§ 35.1605–1 The Act.

The Clean Water Act, as amended (33 U.S.C. § 1251 *et seq.*).

§ 35.1605–2 Freshwater lake.

Any inland pond, reservoir, impoundment, or other similar body of water that has public recreational value, that exhibits no oceanic and tidal influences, and that has a total dissolved solids concentration of less than 1 percent.

§ 35.1605–3 Publicly owned freshwater lake.

A freshwater lake that offers public access to the lake through publicly owned contiguous land so that any member of the public may have the same or equivalent opportunity to enjoy privileges and benefits of the lake as any other member of the public or as any resident around the lake. If the user fees are charged for public use and access, the fees must be used solely of maintance of the access and recreational facilities, or for improving the lake.

§ 35.1605–4 Nonpoint source.

Pollutions sources which generally are not controlled by establishing effluent limitations under sections 301, 302, and 402 of the Act. Nonpoint source pollutants are pollutants which are not traceable to a discrete identifiable origin, but which generally result from runoff, precipitation, drainage, or seepage.

§ 35.1605–5 Eutrophic lake.

A lake that exhibits any of the following characteristics: (a) biomass accumulations of primary procedures; (b) rapid organic and inorganic sedimentation and shallowing; or (c) seasonal dissolved oxygen deficiencies in the bottom waters and a subsequent shift in species composition of aquatic fauna to forms that can tolerate lower concentrations of oxygen.

§ 35.1605–6 Trophic condition.

A relative description of a lakes biological productivity based on the availability of plant nutrients. The range of trophic conditions is characterized by the terms of oligotrophic for the least bilogically productive, to eutrophic for the most biological productive.

§ 35.1605–7 Desalinization.

Any mechanical procedure or process where some or all of the salt is removed from lake water and the freshwater portion is returned to the lake.

§ 35.1605–8 Diagnostic-feasibility study.

A two part study to determine a lake's current condition and to develop possible methods for lake restoration and protection.

(a) In the diagnostic portion of the study, information and data is gathered to determine the limnological, morphological, demographic, socioeconomic, and any other pertinent characteristics of the lake and its watershed. The purpose of gathering this information is to lead to an understanding of the quality of the lake, specifying the location and loading characteristics of significant sources polluting the lake.

(b) The feasibility portion of the study includes: (1) performing an analysis of the diagnostic information to define methods and procedures for controlling the sources of pollution; (2) determining the most energy and cost efficient procedures to improve the quality of the lake for maximum public benefit; (3) developing a technical plan and milestone schedule for implementing pollution control measures and in-lake restoration procedures; and (4) if necessary, conducting pilot scale evaluation.

§ 35.1610 Grant eligibility.

EPA shall award grants for restoring publicly owned freshwater lakes to a State agency designated by the State's Chief Executive. The award will be for projects which meet the requirements of this subchapter. EPA will not award grants for lakes that are used only as drinking water supplies.

§ 35.1615 Substate agreements.

States may make financial assistance available to substate agencies by means of a written interagency agreement transferring grant funds from the State to those agencies. The agreement shall be developed, administered and approved in accordance with the provisions of 40 CFR 33.240 (Intergovernmental agreements). A State may enter into an agreement with a substate agency to perform all or a portion of the work stated in a particular clean lakes grant agreement. All interagency agreements must be submitted to the Regional Administrator. If the sum involved exceeds $100,000, the agreement must be approved by the Regional Administrator before funds may be released by the State to the substate agency. The agreement shall incorporate by reference the provisions of this subchapter making such provisions applicable to the substate agency. The agreement shall specify outputs and the budget required to perform the associated work in the same manner as a grant agreement between the State and EPA.

§ 35.1620 Grant application requirements.

Grant applications will be processed in accordance with subpart B of Part 30 of this subchapter. Applicants for grants assistance under the clean lakes program shall submit EPA form 5700–33 (original with signature and two copies) to the appropriate EPA Regional Office (see 40 CFR Part 30.130). EPA will evaluate proposals under § 35.1640. Before applying for assistance, applicants should contact the appropriate Regional Administrator to determine EPA's current funding capability.

§ 35.1620–1 Types of grants assistance.

EPA will provide assistance in two phases in the clean lakes program.

(a) *Phase 1-Diagnostic-feasibility studies.* Phase 1 grants of up to $100,000 per award (requiring a 30 percent non-Federal match) are available to support diagnostic-feasibility studies (see Appendix A).

(b) *Phase 2-Implementation.* Phase 2 grants (requiring a 50 percent non-Federal match) are available to support the implementation of pollution control or in-lake restoration methods and procedures including final engineering design.

§ 35.1620–2 Contents of grant applications.

(a) All applications shall contain a written State certification that the project is consistent with the State Water Quality Management Plan (see § 35.1511 of this subchapter). Additionally, the State must indicate the priority ranking for the particular project (see § 35.1620–5).

(b) Phase 1 grant applications shall contain a narrative statement that describes the specific procedures that will be used by the grantee to conduct the diagnostic-feasibility study including a description of the public participation to be involved (see § 25.11 of this chapter), a milestone schedule, itemized estimated costs and a justification for those costs. For each lake being investigated, the Phase 1 grant application must also include the following information:

(1) The legal name of the lake, reservoir, or pond.

J A 2 9 7 9 UMI

(2) The location of the lake within the State, including the latitude and longitude, in degrees and minutes, of the approximate center of the lake.

(3) A description of the physical characteristics of the lake, including its maximum depth (in meters); its mean depth (in meters); its surface area (in hectares); its volume (in cubic meters); the presence or absence of stratified conditions; and major hydrologic inflows and outflows.

(4) A summary of available chemical and biological data demonstrating the current water quality of the lake.

(5) A description of the type and amount of public access to the lake, and the public benefits that will be derived by implementing pollution control and lake restoration procedures.

(6) A description of any recreational uses of the lake that are impaired due to degraded water quality. Indicate the cause of the impairment, such as algae, vascular aquatic plants, sediments, or other pollutants.

(7) A description of the lake water shed in terms of size, land use (list each major land use classification as a percentage of the whole), and the general topography, including major soil types.

(8) An identification of the major point source pollution discharges in the watershed. Indicate if the sources are currently controlled under the National Pollutant Discharge Elimination System (NPDES), and if so, include the permit numbers. If the information is available, applicants should indicate or estimate the percent contribution of total nutrient and sediment loading to the lake by the identified point sources.

(9) An indication of the major nonpoint sources in the watershed. If the sources are being controlled describe the control practice(s), including best land management practices.

(10) A description of the local interests and fiscal resources committed to restoring the lake.

(11) An indication of the lake restorative measures anticipated, including watershed management, and a projection of the net improvement in water quality.

(12) A statement of known or anticipated adverse environmental impacts resulting from the project.

(13) A description of the proposed monitoring program to provide the information required in Appendix A of this regulation.

(b) Phase 2 grant applications must contain the information specified in Appendix A in order to receive funding consideration. The appropriate areawide or State 208 planning agency must certify in writing as part of the application that the proposed Phase 2 lake restoration proposal is consistent with any approved 208 planning. Phase 2 grant applications must also contain all permits that are required for the discharge of dredged or fill material under section 404 of the Act.

§ 35.1620–3 Environmental evaluation.

Phase 2 applicants are required to submit an evaluation of the environmental impacts of the proposed project in accordance with the requirements in Appendix A of this regulation.

§ 35.1620–4 Public participation.

(a) In accordance with this Part and Part 25 of this chapter, the grant applicant shall provide for, encourage, and assist public participation in developing a proposed project for lake restoration.

(b) A Phase 1 grantee must solicit public comment in developing, evaluating, and selecting alternatives; in assessing potential adverse environmental impacts; and in identifying measures to mitigate any adverse impacts that were identified. The grantee shall provide information revelant to these decisions, in fact sheet or summary form, and distribute them to the public at least 30 days before the grantee finally selects a proposed course of lake restoration. A formal or informal meeting with the public shall be held after all pertinent information is distributed, but before a method of lake restoration is finally selected. If there is significant public interest in the grant activity, an advisory group to the study process shall be formed in accordance with the requirements of § 25.3(d)(4) of this chapter.

(c) A formal public hearing shall be held before the grantee finally selects the alternative for lake restoration if the alternative involves major construction, dredging, or significant modifications to the environment, or if the grantee or the Regional Administrator determines that a hearing would be beneficial. A summary of the grantee's response to all public comments, along with copies of any written comments, shall be prepared and submitted to EPA with a Phase 2 application.

(d) Where a proposed project has not been studied under a Phase 1 grant, the applicant for a Phase 2 grant shall provide an opportunity for public consultation with adequate and timely notice before the applicant submits the application to EPA. The public shall be given the opportunity to discuss the proposed project, the alternatives, and any potentially adverse environmental impacts. A public hearing should be held where the proposed project involves major construction or dredging or significant modification of the environment. The grant applicant shall provide a summary of his responses to all public comments and submit the summary, along with copies of any written comments, as part of the application.

(e) Public consultation may be coordinated with related activities to enhance the economy, the effectiveness, and the timeliness of the effort, or to enhance the clarity of the of the issue. This procedure cannot be detrimental by discouraging the widest possible participation by the public.

§ 35.1620–5 State priority.

(a) A State shall submit to the Regional Administrator as part of its annual work program (§ 35.1511 of this subchapter) a description of the activities it will conduct during the fiscal year to classify its lakes according to trophic condition (§ 35.1630 of this subpart) and to set priorities for implementing clean lakes projects within the State. The work plan must indicate on a priority basis the grant applications that will be submitted by the State for Phase 1 and Phase 2 grants during that fiscal year, along with the rationale used to establish project priorities. A State may petition the Regional Administrator to modify the EPA approved priority list.

(b) Clean lake restoration priorities should be consistent with the Statewide water quality management strategy (see § 35.1515–2 of this subchapter). In establishing priorities on particular lake restoration projects, States should use as criteria the application review criteria (§ 35.1640–1) that EPA will use in preparing funding recommendations for specific projects. If a State chooses to use different criteria, the State should indicate this to the Regional Administrator as part of the yearly work program.

§ 35.1620–6 State and local clearinghouse procedures.

In accordance with § 30.305 of this subchapter, all requirements of OMB Circular A–95 must be met prior to application submission to EPA.

§ 35.1630 State lake classification surveys.

States that wish to participate in the clean lakes program shall be required to establish and submit to EPA by January 1, 1982, a classification, according to trophic condition, of their publicly owned freshwater lakes that are in need of restoration or protection. States that have not complied with this requirement by January 1, 1982, will not be eligible for Federal financial assistance under this subpart until they meet this requirement.

§ 35.1640 Application review and evaluation.

EPA will review grant applications as they are received. EPA Headquarters may request peer review by appropriate experts to assist with technical

V 4 4 / 2 0
J A 2 9 7 9
UMI

evaluation. Funding decisions will be based on the merit of each application in accordance with the application review criteria under § 35.1640–1 of this subpart. Phase 1 grant applications will be considered separately from Phase 2 grant applications. Twenty percent, but not exceeding $5 million, of annual appropriations for the clean lakes program may be set aside to fund Phase 1 applications.

§ 35.1640–1 Application review criteria.

(a) EPA will consider the following criteria when evaluating both Phase 1 and Phase 2 applications:

(1) The technical feasability of the project, and where appropriate, the estimated improvement in lake water quality using the information supplied by the grant applicant; and the anticipated positive changes that the project would produce in the overall lake ecosystem, including the watershed, such as the net reduction in sediment, nutrient, and other pollutant loadings.

(2) The extent of anticipated benefits to the public. EPA will consider such factors as (i) the degree, nature and sufficiency of public access to the lake; (ii) the size and characteristics of the population residing near the lake which would use the improved lake for recreational and other purposes; (iii) the amount and kind of public transportation available for transport of the public to and from the public access points; (iv) whether other relatively clean publicly owned freshwater lakes already adequately serve the population; and (v) whether the restoration would benefit primarily the owners of private land adjacent to the lake.

(3) The degree to which the project considers the "open space" policies contained in sections 201(f), 201(g)(6), and 208(b)(2)(A) of the Act, as they are applicable.

(4) The reasonableness of the proposed costs relative to the proposed work, the likelihood that the project will succeed, and the potential public benefits.

(5) The means for controlling adverse environmental impacts which would result from the proposed restoration of the lake. EPA will give specific attention to the environemental concerns listed in Appendix A.

(6) The State priority ranking for a particular project. However, after consulting with the State, EPA can fund projects that are not the first priority according to the State's ranking.

(b) For Phase 1 applications, the review criteria presented in paragraph (a) of this section will be modified in relation to the smaller amount of technical information and analysis that is available in the grant application. Specifically, under criteria (a)(1) EPA will consider a technical assessment of the proposed project approach to meet the requirements stated in Appendix A to this regulation. Under criteria (a)(2), EPA will consider the degree of public access to the lake and the benefit. Under criteria (a)(5), EPA will consider known or anticipated adverse environmental impacts that have been identified in the application or that EPA can presume will occcur.

§ 35.1650 Grant award.

(a) Under § 30.345 of this Part, within 90 days after EPA has received a complete application, the application will either be (1) approved for funding by the Assistant Administrator for Water and Waste Management as the grant approving official, with a grant awarded by the Regional Administrator in an amount determined to be appropriate for the project; (2) returned to the applicant due to lack of funding; or (3) disapproved. The applicant shall be promptly notified by EPA in writing of any funding decisions.

(b) Applications that were disapproved can be submitted as new applications to EPA if the applicant resolves the issues indicated during EPA review. In the case of applications returned due to lack of funding, the applicant may resubmit them when additional appropriations are made available. If applications that were returned to States because of lack of funds are resubmitted with the highest State priority in the following fiscal year, these proposals will be given priority review by EPA in that fiscal year.

§ 35.1650–1 Project period.

(a) Phase 1 grants shall be approved for a project period of up to two years.

(b) Phase 2 grants shall be approved for a project period of up to four years. Implementation of complex projects and projects incorporating major construction may have longer project periods if approved by the Regional Administrator.

§ 35.1650–2 Limitations on awards.

(a) Before awarding grant assistance, the Regional Administrator shall determine that: (1) The applicant has met all of the applicable requirements of § 35.1620 of this subpart; and

(2) In fiscal year 1980 and subsequent fiscal years, State programs funded under section 314 of the Act are part of a State/EPA Agreement which must be completed before the grant is awarded.

(b) Before awarding Phase 2 grants, the Regional Administrator shall further determine that:

(1) When a Phase 1 grant was awarded, the final report prepared under a Phase 1 grant is used by the grantee to apply for a Phase 2 implementation grant. Only the lake restoration procedure selected under the Phase 1 grant as the best alternative can be implemented under a Phase 2 grant.

(2) Pollution control measures in the lake watershed authorized by section 201, included in an approved 208 plan, or required by section 402 of the Act have been completed or are being implemented according to a schedule that is included in an approved plan or discharge permit.

(3) The project does not include costs for controlling point source discharges of pollutants in cases where the cause(s) of pollution can be alleviated by permits issued under section 402 of the Act, or by the planning and construction of wastewater treatment facilities under section 201 of the Act.

(4) The "open space" policy presented in sections 201(f), 201(g)(6), and 208(b)(2)(A) of the Act has been considered appropriately by a State or substate agency in any wastewater management activities being implemented by them in the lake watershed through construction grants awarded by EPA under section 201 of the Act.

(5) The project does not include costs for harvesting aquatic vegetation, or for chemical treatment to alleviate temporarily the symptoms of eutrophication, or for maintaining lake aeration devices, or for providing other similarly palliative methods and procedures. However, a project may include a cost for such procedures when the grant applicant can verify that these procedures are the most energy efficient and cost effective approaches to provide a usable recreational lake facility. These approaches can be supported only where pollution in the lake watershed has been controlled to the greatest practicable extent, and where such methods and procedures are a necessary part of a project during the project period. EPA will determine the eligibility of such a project, based on the justification that the applicant has presented for the proposed restoration, the estimated time period for improved lake water quality, and public benefits associated with the restoration.

(6) The project does not include costs for desalinization procedures for naturally saline lakes.

(7) The project does not include costs for purchasing or long-term leasing of land to provide public access to a lake.

(8) The project costs associated with procedures for mitigating adverse environmental impacts resulting from lake restoration or protection cannot exceed 20 percent of the Phase 2 grant.

(9) The project does not include costs resulting from litigation against the grantee by EPA.

(10) The project does not include costs for measures to mitigate adverse environmental impacts that are not identified in the approved project scope of work. (EPA may allow additional costs for mitigation after it has reevaluated the cost-effectiveness of the selected alternative and has approved a request for a grant increase from the grantee.)

§ 35.1650–3 Grant conditions.

(a) In addition to the EPA General Grant conditions (Subpart C and Appendix A of Part 30 of this chapter), each clean lakes grant is subject to the following conditions:

(1) The State agrees to pay the non-Federal share of the project costs.

(2) The State agrees to monitor the project to provide, at a minimum, all of the information and procedures required in paragraph (a)(3) of Appendix A of this regulation, as well as any specific measurements that would be necessary to assess specific aspects of the project. The exact water quality monitoring program for each awarded project will be approved by the project officer in consultation with the State.

(b) In addition to the conditions stated in paragraph (a) to this subsection, Phase 1 grants are subject to the following condition. Before selecting the best alternative for controlling pollution and improving the lake, as required in paragraph (b)(1) of Appendix A of this regulation, and before undertaking any other work stated under paragraph (b) of Appendix A, the grantee must submit an interim report to the project officer. The interim report must include a discussion of the various available alternatives and a technical justification for the alternative which the grantee most likely will choose. The grantee must obtain EPA approval of the selected alternative before conducting additional work under the grant.

(c) In addition to the conditions stated in paragraph (a) to this subsection, Phase 2 grants are subject to the following conditions:

(1) The State agrees to manage and maintain the project for at least ten years after the project is completed in such a way that all pollution control measures supported under the grant will continue at the level of efficiency as at the end of the grant project period. The State will provide reports regarding project maintenance as required in the grant agreement.

(2) The State agrees to upgrade its water quality standards to reflect a higher water quality use classification if this was achieved for the subject lake, as required in 40 CFR section 130.17(c)(2).

(3) If an approved project allows purchase of equipment for lake maintenance, such as weed harvesters and aeration equipment, the State agrees to maintain and operate the equipment according to an approved lake maintenance plan for a period specified in the grant agreement, but in any case for not less than the time period it takes to completely amortize the equipment, or five years, whichever is greater.

(4) If primary adverse environmental impacts result from implementing approved lake restoration or protection procedures, the State shall include measures to mitigate these adverse impacts as part of the work under the grant.

§ 35.1650–4 Grant Payment.

Under § 30.615 of this chapter, EPA generally will make payments through letter of credit as the grantee accomplishes milestones that were in the approved application. However, the Regional Administrator may place any grantee on advance payment, except for construction projects, or on cost reimbursement, as he determines necessary.

§ 35.1650–5 Reports.

(a) States with Phase 1 grants shall submit quarterly progress reports (original and one copy) to the project officer within 30 days after the end of each quarter. These reports shall include the following:

(1) Work progress relative to the milestone schedule, and difficulties encountered during the quarter.

(2) Water quality monitoring data along with a brief analysis of these data to document the existing water quality of the lake, and where appropriate, sources of pollution to the lake.

(3) A justification of expenditures in the past quarter and those anticipated in the next quarter.

(b) States with phase 2 grants shall submit quarterly progress reports (original and one copy) to the project officer within 30 days after the end of the quarter. The Phase 2 quarterly progress report shall contain all of the information required for Phase 1 quarterly progress reports indicated in paragraph (a) of this subsection. This report also must include a discussion of the changes in water quality which appear to have resulted from the lake restoration activities implemented during the quarter.

(c) States shall prepare a final report for all grants in accordance with § 30.635–2 of this subchapter and the EPA manual on "Scientific and Technical Publications," May 14, 1974, as revised or updated. The States shall submit the report within 90 days after the project is completed.

APPENDIX A

GUIDANCE FOR DIAGNOSTIC-FEASIBILITY STUDIES

Phase 1 clean lakes projects must include in their scope of work at least the following information, preferably in the order presented and under appropriate subheadings.

(a) A diagnostic study consisting of:

1. An identification of the lakes to be restored or studied, including their names, the State in which they are located, their location within the State, their general hydrologic relationship to associated upstream and downstream waters and the approved State water quality standards for the lake under study.

2. A geological description of the drainage basin including soil types and soil loss to stream courses that are tributary to the lake.

3. A description of the public access to the lakes including the amount and type of public transportation to the access points.

4. A description of the size and characteristics of the population residing near the lake which would use the improved lake for recreation and other purposes.

5. A summary of historical lake uses, including recreational uses up to the present time, and how these uses may have changed because of water quality degradation.

6. If a particular segment of the lake user population is or will be more adversely impacted by lake degradation, this should be explained.

7. A statement regarding the water use of the lake compared to other lakes within a 50-mile radius.

8. An itemized inventory of known point source pollution discharges affecting or which have affected lake water quality over the past 5 years, and the abatement actions for these discharges that have been taken or are in progress. If corrective action for the pollution sources is contemplated in the future, the time period should be specified.

9. A description of the land uses in the lake watershed, with an indication of what percentages of the watershed each uses, and discussion of the amount of nonpoint pollutant loading produced by each identified land use category.

10. A discussion and analysis of historical baseline limnological data. This presentation must include the present trophic condition of the lake as well as its surface area, maximum depth, average depth, hydraulic residence time, the area of the watershed draining to the lake, and the physical, chemical, and biological quality of the lake and important lake tributary waters. Bathymetric maps should be provided. If dredging is expected to be included in the restoration activities, representative bottom sediment core samples must be collected and analyzed according to EPA approved methods for phosphorus, heavy metals, and persistent organic chemicals where appropriate. An assessment of the phosphorus (and nitrogen when it is the limiting lake nutrient) inflows and outflows associated with the lake and a hydraulic budget including ground water flow must be included. Vertical temperature and dissolved oxygen data must be determined for the lake if the hypolimnion becomes anoxic and, if so, for how long and over what extent of the bottom. Total and soluble phosphorus (P); and nitrite, nitrate, ammonia and organic nitrogen (N) concentrations must be determined for the lake. Chlorophyll a values should be measured for the upper mixing zone. Representative alkalinities should be determined. Algal assay bottle test data or total N to total P ratios should be used to define the growth limiting nutrient. The extent of algal blooms, and the predominant algal genera

V 4 4 / 2 0 J A 2 9 7 9 UMI

must be discussed. Algal biomass should be determined through cell density counts and volumetric mass counting and reported in biomass of each major genus identified. Secchi disk depth and/or suspended solids should be measured and reported. The portion of the shoreline and bottom that is impacted by vascular plants (submersed, floating, or emersed higher aquatic vegetation) must be estimated and that estimate must include an identification of the predominant species.

11. An identification and discussion of the biological resources in the lake, such as fish populations, and a discussion of the predominant genera of zooplankton and phytoplankton and the major known ecological relationships.

(b) A feasibility study consisting of:

1. An identification and discussion of the alternatives considered for pollution control or lake restoration and an identification and justification of the selected alternative after considering all alternatives. This should include a discussion of expected water quality improvement, technical feasibility, and estimated costs that are attached to each alternative. The discussion of each alternative and the selected lake restoration procedure must include detailed descriptions specifying exactly what activities would be undertaken under each, showing how and where these procedures would be implemented, illustrating the engineering specifications that would be followed including preliminary engineering drawings to show in detail the construction aspects of the project, and presenting a quantitative analysis of the pollution control effectiveness and the lake water quality improvement that is anticipated.

2. A discussion of the particular public benefits expected to result from implementing the project, including new public water uses that may result from the enhanced water quality.

3. A proposed monitoring program indicating the water quality sampling schedule. A single in-lake site should be sampled monthly during the months of September through April and biweekly during May through August. This site should be located in an area that best represents the limnological properties of the lake, preferably the deepest point in the lake. Additional sampling sites may be warranted in cases where lake basin morphometry creates distinctly different hydrological and limnological subbasins; and/or where major lake tributaries adversely affect lake water quality. The sampling schedule may be shifted according to seasonal differences at various latitudes. The biweekly samples should be scheduled to coincide with the period of elevated biological activity. If possible, a set of samples should be collected immediately following spring turnover of the lake. Samples should be collected between 0800 and 1600 hours of each sampling day unless diel studies are part of the monitoring program. Samples should be collected between one foot below the surface and one foot off the bottom, and should be collected at intervals of every five feet, or at six equal depth intervals, whichever number of samples is less. Collection and analyses of all samples should be conducted according to EPA approved methods. All of the samples collected should be analyzed for total and soluble phosphorus; nitrite, nitrate, ammonia, and organic nitrogen; pH; temperature; and dissolved oxygen. Representative alkalinities should be determined. Samples collected in the upper mixing zone should be analyzed for chlorophyll *a*. Algal biomass should be determined through algal genera identification, cell density counts, and volumetric mass counting; and reported in terms of biomass of each major genera identified. Secchi disk depth and/or suspended solids should be measured at each sampling period. The monitoring program for each clean lakes project should include all of the information mentioned above, in addition to any specific measurements that are found to be necessary to assess certain aspects of the project. Based on the information supplied by the applicant and the technical evaluation of the proposal, a detailed monitoring program will be established for each approved project and will be a condition of the grant agreement. Phase 2 grant projects will be monitored for at least one year after construction or pollution control practices are completed to evaluate project effectiveness.

4. A proposed milestone work schedule for completing the project with a proposed budget and a payment schedule that is related to the milestone.

5. A detailed description of how non-federal matching funds will be obtained for the proposed project.

6. A description of the relationship of the proposed project to pollution control programs such as the section 201 construction grants program, the section 208 areawide wastewater management program, the Soil Conservation Service programs under P.L. 83-566, the Department of Housing and Urban Development programs, and any other local, State, regional and Federal programs which may be related to the proposed project.

7. A summary of public participation in developing and assessing the proposed project under § 25.15 of this chapter.

8. Copies of all permits necessary to satisfy the requirements of section 404 of the Act. If the approved project includes dredging activities or other activities requiring permits, the State must obtain from the U.S. Army Corps of Engineers or other agencies the necessary permits required for the discharge of dredged or fill material under section 404 of the Act or other Federal, State or local requirements. Should additional information be required to obtain these permits, the State shall provide it. A Phase 2 grant shall not be awarded until all necessary section 404 permits have been obtained. Copies of section 404 permit applications must be provided to EPA at the time they are submitted to the U.S. Army Corps of Engineers. After reviewing the 404 permit applications, the project officer may provide recommendations for appropriate controls and treatment of supernatant derived from dredged material disposal sites to ensure the maximum effectiveness of lake restoration procedures.

(c) States shall complete and submit an environmental evaluation taking into consideration the questions listed below. In many cases the questions cannot be satisfactorily answered with a mere "Yes" or "No." Grantees are encouraged to address other considerations which they believe apply to their project.

1. Will the proposed project result in the displacement of any people?

2. Will the proposed project deface existing residences or residential areas? What mitigative actions such as landscaping, screening, or buffer zones have been considered? Are they included?

3. Will the proposed project be likely to lead to a change in established land use patterns, such as increased development pressure near the lake? To what extent and how will this change be controlled through land use planning, zoning, or through other methods?

4. How does this project conform to areawide waste treatment management plans, if any, developed under section 208 of the Act?

5. Will the proposed project adversely affect a significant amount of prime agricultural land or agricultural operations on such land?

6. Will the proposed project result in a significant adverse effect on parkland, other public land, or lands of recognized scenic value?

7. Has the State Historical Society or State Historical Preservation Officer been contacted by the grantee? Has he responded, and if so, what was the nature of that response? Will the proposed project result in a significant adverse effect on lands or structures of historic, architectural, archaeological or cultural value?

8. Will the proposed project lead to a significant long-range increase in energy demands?

9. Will the proposed project result in significant and long range adverse changes in ambient air quality or noise levels? Short term?

10. If the proposed project involves the use of in-lake chemical treatment, what long and short term adverse effects can be expected from that treatment? How will the grantee mitigate these effects?

11. Does the proposal contain all the information that EPA requires in order to determine whether the project complies with Executive Order 11988? Is the proposed project located in a floodplain? If so, will the project involve constructing of structures in the floodplain? What steps will be taken to reduce the possible effects of flood damage to the project?

12. If project involves physically modifying the lake shore or its bed, through dredging, for example, what steps will be taken to minimize any immediate and long term adverse effects of such activities? When dredging is employed, where will the dredged material be deposited, what can be expected and what measures will the grantee employ to minimize any significant adverse impacts from its deposition?

13. Does the proposed project proposal contain all information that EPA requires in order to determine whether the project complies with Executive Order 11990? Will the proposed project have a significant adverse effect on fish and wildlife, or on wetlands or any other wildlife habitat, especially those of endangered species? How significant is this impact in relation to the local or regional critical habitat needs? Have actions to mitigate habitat destruction been incorporated into the project? Has the applicant properly consulted with appropriate State and Federal fish, game and wildlife agencies and with the U.S. Fish and Wildlife Service? What were their replies?

14. Describe any feasible alternatives to the proposed project, in terms of environment impacts, commitments of resources, public interest and costs and why they were not proposed?

15. Describe other measures not discussed previously that are necessary to mitigate adverse environmental impacts resulting from the implementation of the proposed project.

[FRL 1048-5]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Notice of Proposed Revision to the New York State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This proposal announces receipt of a request from the State of New York to revise its State Implementation Plan (SIP). The proposed revision was submitted by the State as a substitute for the East and Harlem River Bridge Toll Strategy for New York City, which had been part of the currently approved SIP. As required by the 1977 Amendments to the Clean Air Act, the elimination of the bridge toll strategy was to be initiated by a request from the Governor of New York, including a certification that the SIP would be revised by August 7, 1978 to include certain measures to establish, expand, or improve public transportation to meet basic transportation needs, and to implement transportation control measures necessary to attain and maintain national ambient air quality standards. The Governor submitted such a request which resulted in the elimination of the bridge toll strategy. In fulfillment of his certification that he would revise the SIP, the Governor submitted to the Environmental Protection Agency (EPA) on August 6, 1978 a proposed SIP revision. This submittal is the subject of this FEDERAL REGISTER notice. Based on a initial review, the EPA finds that the State's proposed SIP revision is deficient. Consequently, EPA proposes herein to disapprove it. However, the State currently is preparing an improvement to the original submittal. EPA believes that this improvement will correct the deficiencies found in this submittal.

DATE: Written comments must be received on or before February 28, 1979.

ADDRESS: Written comments should be submitted to: Eckardt C. Beck, Regional Administrator, U.S. Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10007.

Copies of the proposal, including EPA's initial review thereof, December, 1978, are available for public inspection during normal business hours at:

U.S. Environmental Protection Agency, Air Programs Branch, Room 908, Region II Office. 26 Federal Plaza, New York, New York 10007.

U.S. Environmental Protection Agency, Central Docket Section, Waterside Mall, Room 2903 B, 401 M Street, S.W., Washington, D.C. 20460.

SUPPLEMENTAL INFORMATION:

A. Background

Under the 1970 Clean Air Act each state was required to develop a State Implementation Plan (SIP) that provided for the attainment and maintenance of air quality standards. In addition to emission controls on stationary sources and the federal new car emission control program, the Clean Air Act (Section 110(a)(2)(B)) specifically required that states implement transportation control measures where necessary to meet the air quality standards. As a result of a suit filed by the Natural Resources Defense Council (*NRDC* v. *EPA*, 475 F. 2d 968 (1973)), the U.S. Court of Appeals for the District of Columbia Circuit ordered the Administrator of the Environmental Protection Agency (EPA) to require submission during 1973 of complete SIP's, including transportation control measures where necessary.

The Governor of New York State submitted a SIP revision on April 17, 1973 which included the required transportation control measures for the New York City metropolitan area. This revision, as approved by EPA in 1973, included Strategy B-7, "Imposition of Tolls on All East River Bridges and Harlem River Bridges." The goal of this strategy was to create a uniform toll structure for all bridges to the borough of Manhattan in New York City, thereby reducing unnecessary travel by vehicles attempting to avoid existing tolled facilities. In addition, the surplus of funds generated from the strategy would have been available for mass transportation or other high priority programs.

The 1973 SIP revision contained a schedule calling for imposition of the tolls by January 1977. However, after approval of the SIP revision, necessary preliminary steps for the implementation of Strategy B-7 were not taken by the State. Consequently, the EPA Region II Administrator issued an Administrative Order in 1975 to require implementation of this strategy. Later, federal court orders also were obtained by environmental groups to require implementation of the strategy. In *Friends of the Earth III* (*Friends of the Earth* v. *Carey*, 552 F.2d 25 (1977)), the U.S. Court of Appeals for the Second Circuit held, on January 18, 1977, that requiring the State and City of New York to implement the State's own SIP was constitutional. Subsequently, the U.S. District Court, on February 18, 1977, ordered the State and city to comply with a schedule requiring the imposition of bridge tolls by August 1978.

In August 1977, the 1970 Clean Air Act was amended. The 1977 Amendments to the Clean Air Act include a new section 110(c)(5)(A) which provides that any measure in a SIP which requires a toll or other charge for the use of a bridge located entirely within one city must, upon application by the Governor, be eliminated from the plan by the Administrator of EPA. Section 110(c)(5) provides that this application must include a certification by the Governor that he will revise the SIP by August 7, 1978 to include comprehensive measures to establish, expand or improve public transportation measures, and to implement transportation control measures necessary to attain and maintain national ambient air quality standards.

Under provisions of this section, on October 19, 1977 the Governor of New York applied to the Administrator of EPA to eliminate the requirement for bridge tolls on all East and Harlem River bridges. On December 5, 1977, by notice in the FEDERAL REGISTER (42 FR 61453), the bridge toll requirement was removed from the SIP. Subsequently, the EPA Administrator, in a June 20, 1978 letter to the Governor, provided guidance as to the elements that a SIP revision should contain to meet the requirements of Section 110(c)(5)(B).

On July 26, 1978, the State held a public hearing on the SIP revision required by Section 110(c)(5)(B). This revision could not fully address the Administrator's June 20 guidance because the guidance was received by the State after the revision had been printed. The revision consisted of a document entitled, "New York State Air Quality Implementation Plan for Mass Transit Improvements in the New York City Metropolitan Area," June 1978. (The contents of this docu-

V 4 4 / 2 0 J A 2 9 7 9 J UMI

ment are summarized in Section C of this notice.) The Governor submitted this document to the Administrator in a letter dated August 6, 1978.

B. Requirements of Section 110(c)(5)(B)

Section 110(c)(5)(B) of the Clean Air Act requires that the SIP be revised to include comprehensive measures to establish, expand or improve public transportation to meet basic transportation needs. This necessitates that these needs be identified in the SIP and that an evaluation be made as to what extent existing and planned measures satisfy basic transportation needs. The assessment of basic transportation needs must also account for the impact of any decreased reliance on the provate automobile that might be necessary to provide for the attainment and maintenance of air quality standards.

Section 110(c)(5)(B) also requires that, for the purpose of implementing public transportation measures as would be necessary to meet basic transportation needs, the revised SIP must include requirements to use Federal grants and State or local funds in a manner consistent with the terms of their legislation. This requires the identification of the funding needs of the comprehensive measures to achieve basic transportation needs and any shortfall in presently available funds.

Another requirement of Section 110(c)(5)(B) is that the comprehensive measures provide for emission reductions equivalent to the reductions which were expected to be achieved through the eliminated tolls. This means that the revised SIP should contain a determination of the expected emission reductions and a demonstration that they will be obtained from the comprehensive measures. The final major requirement is that the comprehensive measures include transportation controls necessary to attain and maintain the national ambient air quality standards.

C. Contents of Proposed Revision Submitted by the State

The plan submitted by the Governor on August 6, 1978 consisted of an introduction, programs related to the public transit fare, transportation system management improvements, transit financing and calculation of emission reductions. These programs are generally described below.

Introduction.—The proposed plan revision submitted by the State to replace Strategy B-7, "Imposition of Tolls on All East River Bridges and Harlem River Bridges," is based on three objectives for the public transit system:

1. Retain the current ridership level;
2. Maintain the physical integrity and reliability of the system; and
3. Achieve improvements in service and attractiveness of the existing system and thereby achieve some increase in ridership.

The proposed SIP revision places emphasis on rail service improvements, with express bus service expansion held as a back-up strategy. Express bus service is considered as an interim approach for areas of high auto use and poor rail service and where rail service improvements are not possible in the near future.

Public Transit Fare.—The proposed SIP revision reiterates the announced intention of the Governor of New York State and Mayor of New York City to maintain current transit fares through 1981. The revision further states that, over the long term, a reasonable goal is to maintain transit fares at a level such that diversion from transit to auto travel because of fare changes will not take place. If, in the future, fare increases or service cutbacks occur that result in a significant number of people shifting from transit to auto use, then the SIP will be revised to add other strategies to offset the impact on air quality of this shift.

Transportation System Management and Improvement Elements.—In addition to stabilizing fare levels, the plan's objectives, contingent on several conditions, are to:

1. Provide more transit service on existing subway and suburban rail routes where appropriate to reduce overcrowding, and provide more frequent service, particulary during off-peak periods.
2. Accelerate the level of transit rehabilitation to retain the physical integrity and operational safety of the existing system and improve environmental factors of the system consistent with modern standards of noise, temperature levels, and physical appearance.

To meet these objectives, the revision commits to improve the subway system, commuter rail system, collection-distribution system, express bus service and work hour scheduling (staggered work hours).

Transit Financing.—The plan revision describes the public transit financing program for the region. It states that the policy of the State and City of New York is to provide adequate levels of public financing to the region's public transit system. The proposal presents current operational assistance levels and concludes that it is important for the federal government to approve an increase in the level of operating assistance.

The revision also summarized the components of the sources and uses of current and future annual capital programs. It concludes that the magnitude of the rehabilitation needs, particularly of the City subway system, necessitate increased funding levels beyond those currently received for the transit system to continue to serve its vital functions.

Emission Reductions from the SIP Revision.—The revision contains calculations of expected hydrocarbon reductions resulting from those changes in vehicle-miles-travelled (VMT) occurring from implementation of the substitute strategies. Calculations included in the 1973 plan revision and updated in a State report were identified as indicating that tolls on East and Harlem River Bridges would lower VMT in New York City by about one percent. Since the current average weekday City VMT is 36,000,000, bridge tolls were estimated by the State as being capable of lowering VMT by 360,000.

The plan references an evaluation performed by the Tri-State Regional Planning Commission of the impact of various public transit strategies, including some of those contained in the proposed SIP revision. Rail and express bus service improvements coupled with the establishment or expansion of park and ride lots were analyzed by Tri-State. Based on this analysis, the State estimated that the proposed SIP revision will produce in the region a diversion from auto use to transit sufficient to cause a reduction in VMT equal to that described above for the toll strategy.

D. EPA Review of Proposed Revision

EPA has found the plan revision to be deficient in several respects and, consequently, inadequate to satisfy statutory requirements of Section 110(c)(5)(B). Therefore, EPA is proposing disapproval. This proposed action is being taken for the following reasons:

1. The proposed revision contains no certification that a full examination of basic transportation needs was completed or indicatin of the extent to which the public transit improvements identified in the plan meet these needs. General objectives of the public transit system were identified in the proposed revision but they were, in most cases, qualitative in nature.
2. The proposed revision presents a package of measures which are intended to improve the public transit system. However, the extent to which these measures result in the transportation system meeting basic transportation needs could not be determined from the information contained in the plan.
3. A schedule containing increments of progress in sufficient detail to monitor implementation of the identified measures was not provided.

4. Similarly, a schedule was not provided to monitor implementation progress of the measures which will achieve emissions reductions equivalent to those expected from the eliminated bridge tolls.
5. A program for evaluating, adopting and implementing alternative transportation measures for attainment and maintenance of air quality standards was not included in the plan.
6. The proposed revision did not review and allocate all revenue sources to determine which funds could be applied for public transit or transportation control purposes.
7. In order to determine what funding is necessary for the comprehensive measures, the proposed revision should have contained a long-range projection of operating expenses for the Metropolitan Transportation Authority. This was not provided.

E. Improvements to the Proposed Revision

At the July 26, 1978 public hearing on the proposed SIP revision, the Hearing Officer announced that the public comment period was extended until August 23, 1978. This was done because public notification for the hearing was inadequate as a result of delays in publishing the notice of the hearing in the newspaper. In the Governor's August 6, 1978 letter, it was suggested that a further submission, based on a review of public comments received subsequent to the submittal date, might be made to modify the proposed SIP submission. This was elaborated upon in a December 1, 1978 letter from the Commissioner of the New York State Department of Transportation (NYSDOT), where it is indicated that the State would prepare a supplemental submission to address any public comments which were not covered in the August 6, 1978 submittal. In addition, the Commissioner informed EPA that the hearing record had been extended to October because of the problems with the hearing notice and the subsequent strike of New York City newspapers.

In addition to the changes that were expected to be made to the submittal as a result of public comments, frequent meetings among representatives of EPA, the Governor's Office, NYSDEC and NYSDOT have resulted in a commitment by the State to improve its plan to enable EPA to review it against the provisions of Section 110(c)(5)(B). The nature of the improvements to be made were documented in December 19, and December 20, 1978 letters between Regional Administrator Beck and the Director of State Operations, Thomas Frey. A schedule for this work was developed jointly by EPA and the State which calls for a public hearing in March and submittal of an improved plan by April 1, 1979. EPA expects that if the improvements conform to the agreement reached, the submittal will be approvable and EPA will be able to expedit its review to ensure a decision by June 30, 1979.

F. Purpose of This Notice

EPA has the responsibility under Section 110(a)(2) to take formal approval or disapproval action for any SIP revision proposed by a State. The disapproval action proposed in this notice is taken to meet this obligation. The public is advised that comments may be submitted as to whether the proposed revision to the New York State Implementation Plan should be approved or disapproved. The Administrator's decision regarding approval or disapproval of this proposed plan revision will be based on whether it meets the requirements of Section 110(c)(5)(B) of the Clean Air Act and EPA regulations in 40 CFR Part 51.

(Sections 110 and 301 of the Clean Air Act, as amended (42 U.S.C. 7410, 7601))

Dated: January 12, 1979.

ECKARDT C. BECK,
Regional Administrator.

PESTICIDE PROGRAMS

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Proposed Tolerance for the Pesticide Chemical Terbacil

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for residues of the herbicide terbacil on caneberries. The proposal was submitted by the Interregional Research Project No. 4. This regulation would establish a maximum permissible level for residues of terbacil on caneberries.

DATE: Comments must be received on or before February 28, 1979.

ADDRESS COMMENTS TO: Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M Street, SW, Washington DC 20460.

FOR FURTHER INFORMATION CONTACT:

Mrs. Patricia Critchlow, Registration Division (TS-767), Office of Pesticide Programs, EPA (202/755-4851).

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey State Agricultural Experiment Station, PO Box 231, Rutgers University, New Brunswick, NJ 08903, on behalf of the IR-4 Technical Committee and the Agricultural Experiment Stations of Arkansas, California, Florida, Michigan, New Jersey, Oregon, and Washington, has submitted a pesticide petition (PP 8E2084) to the EPA. This petition requests that the Administrator propose that 40 CFR 180.209 be amended by the establishment of a tolerance for combined residues of the herbicide terbacil (3-*tert*-butyl-5-chloro-6-methyluracil) and its hydroxylated metabolites (calculated as terbacil) in or on the raw agricultural commodity caneberries (blackberries, raspberries, boysenberries, dewberries, loganberries, and youngberries) at 0.1 part per million (ppm).

The data submitted in the petition and other relevant material have been evaluated. The Toxicological data considered in support of the proposed tolerance included a two-year rat feeding study with a no-observable-effect level (NOEL) of 250 ppm, a two-year dog feeding study with an NOEL of 250 ppm (the highest level fed). Based on the two-year dog feeding study NOEL and using a 100-fold safety factor, the acceptable daily intake (ADI) is 0.0125 milligram (mg)/kilogram (kg) of body weight (bw)/day.

Studies currently lacking include an oncogenicity study in a second mammalian species and a teratology study. Additional mutagenicity testing will be required when EPA guidelines are finalized.

Tolerances have previously been established for residues of terbacil on a variety of raw agricultural commodities at levels ranging from 5 ppm to 0.1 ppm. The metabolism of terbacil is adequately understood, and an adequate analytical method (microcoulometric gas chromatography) is available for enforcement purposes. Although the above toxicology studies are lacking, based on the available information and the insignificance of caneberries in the diet, it is concluded that the tolerance of 0.1 ppm on caneberries should be established.

The pesticide is considered useful for the purpose for which a tolerance is being sought, and it is concluded that the tolerance of 0.1 ppm on caneberries established by amending 40 CFR 180.209 will protect the public health. It is proposed, therefore, that

V 4 4 / 2 0 J A 2 9 7 9 UMI

the tolerance be established as set forth below.

Any person who has registered or submitted an application for the registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act, which contains any of the ingredients listed herein, may request within 30 days after publication of this proposal in the FEDERAL REGISTER that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject and the petition/document control number, "PP 8E2084/P101". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: January 23, 1979.

HERBERT S. HARRISON,
Acting Director,
Registration Division.

AUTHORITY: Section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)).

It is proposed that Part 180, Subpart C, § 180.209 be amended by alphabetically inserting caneberries at 0.1 ppm in the table to read as follows:

§ 180.209 Terbacil; tolerances for residues.

• • • • •

Commodity:	*Parts per million*
• • • • •	
Caneberries (blackberries, boysenberries, dewberries, loganberries, raspberries, and youngberries)	0.1
• • • • •

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 661]

COMMERCIAL AND RECREATIONAL SALMON FISHERIES OFF THE COASTS OF WASHINGTON, OREGON, AND CALIFORNIA

Extension of Public Comment Period

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of Extension of Public Comment Period.

SUMMARY: So that new information on the status of the salmon runs for 1979 may be reviewed and commented on, the Pacific Fishery Management Council has decided: (a) to make the new information available at its meeting during February 7–8, 1979; (b) to extend the public comment period until February 28, 1979; and (c) to postpone making its final decision on management measures for the salmon fisheries until its meeting during March 7–8, 1979.

DATES: Submit written comments to either of the contact persons listed below on or before February 28, 1979.

FOR FURTHER INFORMATION:

Mr. Lorry Nakatsu, Executive Director, Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, OR 97201, (503) 221-6352.

Mr. Donald R. Johnson, Director, Northwest Region, National Marine Fisheries Service, 1700 Westlake Avenue North, Seattle, WA 98109, (206) 442-7575.

SUPPLEMENTARY INFORMATION: On December 11, 1978, a notice was published in the FEDERAL REGISTER (43 FR 57931) that public hearings on the Draft Supplemental Environmental Impact Statement/Fishery Management Plan (FMP) for these salmon fisheries would be held during January 2–6, 1979, and that written comments would be accepted until January 22, 1979.

The Pacific Fishery Management Council originally intended to make its final decision and recommendations on the salmon fishery management plan for 1979, at its February meeting, because an extension of the 1978 plan with very little change was proposed. However, the Council has since become aware of the possibility that the 1979 chinook and coho salmon runs are anticipated to be considerably lower than normal, and further restriction in the sport and commercial harvest of salmon may be required. Additional data will be available at the Council's February meeting. To give the public adequate time to comment fully on this new data, the Council extended the closure of the public comment period from January 22, to February 28, 1979. The Council will also decide at its February meeting whether additional public hearings are warranted. The final decision on recommendations for amendments to the salmon FMP for 1979 will be made by the Council at its March 8–9 meeting in Eureka, California.

Copies of the draft supplement to the Environmental Impact Statement/Fishery Management Plan for the Commercial and Recreational Salmon Fisheries off the Coasts of Washington, Oregon, and California, commencing in 1978, are available from either of the contact persons listed above.

Dated: January 23, 1979.

WINFRED R. MEIBOHM,
Acting Executive Director,
National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Forest Service

NATIONAL FOREST SYSTEM ADVISORY COMMITTEE

Meeting

The National Forest System Advisory Committee will meet at 9:00 a.m. on February 20 and 21 in Room 3840-46, South Agriculture Building, U.S. Department of Agriculture, Washington, D.C.

This Committee, comprised of 12 members from a broad spectrum of geographic and interest areas, advises the Secretary of Agriculture and the Forest Service on the planning and management of the National Forests. Current management issues that will be discussed include RARE II, the Resources Planning Act, reforestation, National Grasslands management, and land management planning. Dr. M. Rupert Cutler, Assistant Secretary for Conservation, Research and Education, will chair the meeting.

The meeting will be open to the public. Persons who wish to attend should notify the Committee's Executive Secretary, James C. Overbay, USDA-Forest Service, P.O. Box 2417, Washington, D.C. 20013, telephone (202) 447-6341. Written statements may be filed with the Committee before or after the meeting.

JEROME A. MILES,
Deputy Chief.

DEPARTMENT OF COMMERCE

Office of the Secretary

COMMERCE TECHNICAL ADVISORY BOARD

Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), and the Office of Management and Budget Circular A-63 of March 1974, the Secretary of Commerce has determined that the renewal of the Commerce Technical Advisory Board (CTAB) is in the public interest in connection with the per-

V 4 4 / 2 0
J A 2 9 7 9
UMI

formance of duties by the Department.

The Committee was established by the Secretary of Commerce on January 30, 1963, and chartered in January 1973 pursuant to Executive Order 11007. The charter was renewed on January 10, 1975 and again on January 10, 1977. The purpose of the Committee is to advise the Secretary of Commerce on the technical activities of the Department of Commerce and recommend measures to increase their value to the business community. The Committee's advice is transmitted to the Secretary by the Assistant Secretary for Science and Technology, who also serves as chairman of the Committee.

The advice of the Committee has been very useful for the Department in scientific policy formulation and program planning by assessing the future and continuing role of the Department's scientific and technical agencies in terms of the changing requirements of industry and commerce. The Committee has been used continuously as a sounding board in scientific policy decisions. To the end that economic growth may be promoted, the Committee suggests ways of stimulating research and development by private industry for private industry, and in helping industry get the maximum benefit from Federally-sponsored research and development. The Committee also advises on all matters of Federal science and technology policies directly related to productivity, inflation, employment, and the U.S. balance of trade position.

The Committee will continue with a representation of approximately 20 members and will operate in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Committee's revised Charter will be filed with appropriate members of Congress and with the Library of Congress.

Inquiries for the Committee may be addressed to the Director, Commerce Technical Advisory Board, Office of the Assistant Secretary for Science and Technology, U.S. Department of Commerce, Washington, D.C. 20230.

Dated: January 19, 1979.

ELSA A. PORTER,
Assistant Secretary for Administration.

[FR Doc. 79-2861 Filed 1-26-79; 8:45 am]

[3510-17-M]

MARINE FISHERIES ADVISORY COMMITTEE

Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), and the Office of Management and Budget Circular A-63 of March 1974, the Secretary of Commerce has determined that the renewal of the Marine Fisheries Advisory Committee (MAFAC) is in the public interest in connection with the performance of duties by the Department.

The Committee was established by the Secretary of Commerce on February 17, 1971, pursuant to Executive Order 11007. The Committee charter was renewed on January 3, 1973, and amended on June 14, 1974, to include a provision to establish subgroups of its own members as necessary. The charter was again renewed on December 20, 1974, and January 10, 1977. The purpose of the Committee is to advise the Secretary of Commerce on matters pertinent to the Department's responsibilities for fisheries resources and on means to facilitate cooperation between public and private interests in these matters. Committee advice is transmitted to the Secretary through the Administrator, NOAA, who also serves as Chairman of the Committee. Actions concerned with these recommendations are generally implemented through the Assistant Administrator for Fisheries, NOAA, and the National Marine Fisheries Service (NMFS).

The advice of the Committee has been very useful to the Department and NOAA/NMFS in fishery policy formulation and program planning, particularly since NMFS is a constituency-oriented agency and the Committee represents a collective voice for the many and diverse interests concerned with marine fishery resources. The Committee has been used continually as a sounding board in policy decisions, many times changing the course of such policy.

The Committee will continue with a balanced representation of 27 members and will operate in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Committee's revised Charter will be filed with appropriate committees of the Congress, and with the Library of Congress.

Inquiries or comments may be addressed to the Executive Secretary, Marine Fisheries Advisory Committee, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Washington, D.C. 20235.

Dated: January 19, 1979.

ELSA A. PORTER,
Assistant Secretary for Administration, DOC.

DEPARTMENT OF COMMERCE

Industry and Trade Administration

FOREIGN AVAILABILITY SUBCOMMITTEE OF THE COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Open Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Foreign Availability Subcommittee of the Computer Systems Technical Advisory Committee will be held on Tuesday, February 13, 1979, at 1:30 p.m. in Room 3817, Main Commerce Building, 14th Street and Constitution Avenue, N.W., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, January 13, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Foreign Availability Subcommittee of the Computer Systems Technical Advisory Committee was established on July 8, 1975. On October 16, 1978, the Assistant Secretary for Industry and Trade approved the continuation of the Subcommittee pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to computer systems, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls. The Foreign Availability Subcommittee was formed to ascertain if certain kinds of equipment are available in non-COCOM and Communist countries, and if such equipment is available, then to ascertain if it is technically the same or similar to that available elsewhere.

The Subcommittee meeting agenda has four parts:

(1) Opening remarks by the Subcommittee Chairman.
(2) Presentation of papers or comments by the public.
(3) Review of East European and U.S.S.R. computer processing data rates.
(4) Review of work program for 1979.

The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

Copies of the minutes of the meeting will be available by calling Mrs. Margaret Cornejo, Operations Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C., telephone: A/C 202-377-2583.

For further information, contact Mr. Richard J. Isadore, Acting Director, Operations Division, Office of Export Administration, Industry and Trade Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4738.

Dated: January 25, 1979.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

LICENSING PROCEDURES SUBCOMMITTEE OF THE COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Open Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Licensing Procedures Subcommittee of the Computer Systems Technical Advisory Committee will be held on Tuesday, February 13, 1979, at 9:00 a.m. in Room 3817, Main Commerce Building, 14th Street and Constitution Avenue, N.W., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, January 13, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Licensing Procedures Subcommittee of the Computer Systems Technical Advisory Committee was initially established on February 4, 1974. On July 8, 1975, the Director, Office of Export Administration, approved the reestablishment of this Subcommittee, pursuant to the charter of the Committee. And, on October 16, 1978, the Assistant Secretary for Industry and Trade approved the continuation of the Subcommittee pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to computer systems, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls. The Licensing Procedures Subcommittee was formed to review the procedural aspects of export licensing and recommended areas where improvements can be made.

The Subcommittee meeting agenda has six parts:

1. Opening remarks by the Subcommittee Chairman.
2. Presentation of papers or comments by the public.
3. Review status of pending Subcommittee recommendations to the Department of Commerce.
4. Review and discussion of the Government accounting Office report, October 31, 1978, on "Administration of U.S. Export Licensing Should Be Consolidated To Be More Responsive To Industry."
5. Discussion and clarification of "Qualified Product/General Distribution License."
6. Review of licensing procedures applying to repair parts and supplies, including recent revisions of GLR and Service Supply License.

The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

For further information, contact Mr. Richard J. Isadore, Acting Director, Operations Division, Office of Export Administration, Industry and Trade Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4733.

Copies of the minutes of the meeting can be obtained by calling Mrs. Margaret Cornejo, Operations Division, Office of Export Administration (202) 377-2538.

Dated: January 25, 1979.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

DEPARTMENT OF DEFENSE

Department of the Army

ARMED FORCES EPIDEMIOLOGICAL BOARD

Partially Closed Meeting

1. In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 920463) announcement is made of the following committee meeting:

Name of Committee: Armed Forces Epidemiological Board.

Date of Meeting: 15-16 February 1979.

Time: 0900-1700 15 February, 0830-1400 16 February.

Place: Conference Room 3092, Walter Reed Army Institute of Research, Walter Reed Army Medical Center, Washington, DC.

Proposed Agenda: The proposed agenda will include briefings on National Security Planning, AFEB subcommittee progress reports, a report on the November 1978 USAMRIID meeting and the Armed Forces Preventive Medicine Officers will discuss their current activities. The meeting will conclude with a Board executive session.

2. The meeting will be partially closed to the public because there will be classified briefings and classified discussions concerning National Security. The portion of the meting that will be closed is between 0900-1030 hours, 15 February 1979. This portion will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof.

3. All other portions of the meeting will be open to the public, but limited by space accommodations. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. Interested persons wishing to participate should contact the Executive Secretary, DASG-AFEB, Room 1B472 Pentagon, Washington, D.C. 20310 (Telephone 695-9115).

Dated: January 17, 1979.

CHARLES W. HALVERSON,
CDR, MSC, USN, Executive Secretary.

ARMY SCIENCE BOARD

Partially Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee meeting:

V 4 4 / 2 0 J A 2 9 7 9 UMI

NAME OF COMMITTEE: Army Science Board.

DATES OF MEETING: 20-21 February 1979.

PLACE: Headquarters, 7th Infantry Division and Fort Ord, California.

TIME: 0800-1800 hours, 20 February 1979—Partially Closed. 0800-1700 hours, 21 February 1979—Open.

PROPOSED AGENDA: The meeting is partially closed because the members will receive classified briefings and classified discussions on studies done by certain ASB Members which relate to the offensive and defensive postures of the U.S. and other nations. The portion of the meeting that will be closed is between 0800-1200 hours, 20 February 1979. This portion will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof.

ROBERT F. SWEENEY,
Lieutenant Colonel, GS, Executive Secretary, Army Science Board.

DEPARTMENT OF DEFENSE

Defense Logistics Agency

PRIVACY ACT OF 1974

Amendment to System of Record

AGENCY: Defense Logistics Agency (DLA).

ACTION: Notice of amendment to system of records.

SUMMARY: The Defense Logistics Agency proposes to amend a system of records subject to the Privacy Act of 1974. Specific change to the system being amended is set forth below followed by the system published in its entirety as amended.

DATES: This system shall be amended as proposed without further notice on February 28, 1979 unless comments are received on or before February 28, 1979, which would result in a contrary determination and require republication for further comments.

ADDRESS: Any comments, including written data, views or arguments concerning the amendment should be addressed to the System Manager identified in the record system.

FOR FURTHER INFORMATION CONTACT:

Mr. Anthony W. Hudson, Staff Director, Civilian Personnel, HQ DLA, Cameron Station, Alexandria, VA. 22314, telephone 202-274-6025.

SUPPLEMENTARY INFORMATION: The Defense Logistics Agency (DLA) systems of records notices as prescribed by the Privacy Act have been published in the FEDERAL REGISTER as follows:

FR Doc. 77-28255 (42 FR 51388) September 28, 1977.
FR Doc. 78-25678 (43 FR 40904) September 13, 1978.
FR Doc. 78-25919 (43 FR 42379) September 20, 1978.

The proposed amendment is within the purview of the provisions of 5 U.S.C. 552a(o) of the Privacy Act which requires submission of an altered system report.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

JANUARY 23, 1979.

AMENDMENT

S434.15 DLA-KP

System name:

S434.15 Automated Payroll, Cost and Personnel System (APCAPS) Personnel Subsystem (42 FR 51420) September 28, 1977.

Change:

Categories of records in the system:

In the last sentence of the first paragraph after the word sex, add: "minority Group designator".

S434.15 DLA-KP

System name:

434.15 Automated Payroll, Cost and Personnel System (APCAPS) Personnel Subsystem

System location:

Offices of Civilian Personnel at:
Defense Construction Supply Center (DCSC)
Defense Electronics Supply Center (DESC)
Defense General Supply Center (DGSC)
Defense Personnel Support Center (DPSC)
Defense Property Disposal Service (DPDS)
Defense Depot Memphis (DDMT)
Defense Depot Ogden (DDOU)
Defense Depot Tracy (DDTC)
Defense Depot Mechanicsburg (DDMP)
Defense Logistics Agency Administrative Support Center (DASC)

Categories of individuals covered by the system:

Defense Logistics Agency (DLA) civilian employees serviced by Offices of Civilian Personnel at the activities listed under LOCATION and other Department of Defense civilian employees who are both serviced by the Offices of Civilian Personnel and paid by the activities listed under LOCATION.

Categories of records in the system:

Employee data segment of APCAPS data bank, including data being manually collected prior to implementation of the automated record system. For the civilian personnel segment of APCAPS, the employee data segment of the APCAPS data bank contains, for civilian employees, current personnel data on employment status and selected personal data, such as Social Security Number (SSN), name, sex, minority group designator, date of birth, age, physical handicap, Government insurance, military reserve status, retired military status, education, whether individual passed the Federal Service Entrance Examination or the Professional and Administrative Career Examination, status preceding employment with DLA, U.S. citizenship, and veterans preference.

Position data segment of APCAPS data bank. For the civilian personnel segment of APCAPS, the position data segment of the APCAPS data bank contains position data pertinent to established positions, both those positions occupied by a civilian employee as well as those not so occupied.

Personnel history file. The personnel history file contains a profile of selected civilian employee personnel data as of the most recent transaction processed against it, as well as a chronological extract of all prior transactions processed on the employee.

Authority for maintenance of the system:

5 U.S.C., Sec. 301, 302; EO 10561; Federal Personnel Manual, Chapter 293.

Routine uses of records maintained in the system, including catagories of users and the purposes of such uses:

Purposes of the system are to effect Federal personnel actions, maintain the Federal personnel service control system, fulfill Federal personnel reporting requirements, and provide information to officials of DLA for effective personnel management and personnel administration.

Prospective employees. For employment determination purposes.

Credit firms. For verification of data for credit determination purposes.

Taxing authorities. For tax administration purposes.

Officials of the Executive Branch. For performance of official duties.

Officials of the Legislative Branch. For performance of official duties.

Officials of the Judicial Branch. For performance of official duties.

Hospitals, medical offices and institutions. For medical/hospital administration purposes.

Executor or administrator of the estate of a deceased employee, former employee, or annuitant, or next-of-kin. For estate settlement purposes.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Computer magnetic tapes or discs. Computer paper printouts. Paper records in file folders.

Retrievability:

Information identified to a specific civilian employee is accessed and retrieved by Social Security Number.

Safeguards:

Records are either secured in locked storage and/or file cabinets or under the constant observation of personnel office officials during duty hours. During non-duty hours, records are either secured in locked storage and/or file cabinets; the records file area is locked, and/or the building in which the records are stored is protected by building security guard. If the records area is not protected by security guard, all records must be locked. Individually identifiable personnel documents will either be handcarried or will be transmitted in envelopes addressed to a specific office or individual and marked to be opened by addressee only. Magnetic tapes and disc are kept in the computer room which is itself a security container with locked door and access limited to persons appropriately cleared and identified. Tapes and disc packs are stored in a tape library when not used in processing, and are logged in and out only to cleared personnel with an official need. Reports with individual data are closely controlled. Computer personnel who process these reports are appropriately cleared and maintain continuous observation of reports during all processing phases. Individual requesting information must identify himself/herself and his/her relationship to the individual upon whom the record information is being requested. Individual other than the individual of record must specify what information is requested and the purpose for which it would be used if disclosed. Personnel office official determines if request is reasonable and consistent with provisions of the Freedom of Information Act and the Privacy Act of 1974. In order to prevent unauthorized modification of records contents, original records documents may only be reviewed in the presence of a witness designated by the Personnel Office.

Physical access, that is the ability to obtain the record, is limited to:
Personnel office officials
Civil Service Commission officials
Data processing officials
Supervisors for those records for which they are authorized to maintain.

Responsible officials are granted temporary custody of an original record in order to monitor the review of the record by the individual to whom it pertains, when the individual is geographically remote from the personnel office.

Retention and disposal:

Records which are filed in the Official Personnel folder (OPF) are retained in the personnel office until the employee leaves the agency. At that time the permanent portion of the OPF is transferred to the gaining Federal agency and temporary OPF records are destroyed by shredding or burning. Copies of records which are furnished to the employee concerned, may be retained at his or her discretion. Copies of records authorized to be maintained by supervisors or other operating offices are destroyed by shredding or burning when the employee leaves the agency. Operating records maintained within the Civilian Personnel Office may be retained up to three years, as needed. At that time, or sooner, they may be destroyed by burning or shredding.

System manager(s) and address:

Staff Director, Civilian Personnel, HQ DLA and Directors of Civilian Personnel at DCSC DPDS, DESC, DGSC, DPSC, DDMT, DDOU, DDTC DDMP, OR DASC.

Notification procedure:

Written or personal requests may be directed to the SYSMANAGER at the activity where the record is maintained. Individual must provide name (last, first, middle intitial) and SSN in order to determine whether or not the system contains a record about him/her. If a written request, individual must provide a return address.

For personal visits, the individual should be able to provide some acceptable identification, such as employing office identification card.

Record access procedures:

Written requests are required. The request is to contain the name of the individual (last, first, middle initial), SSN, return mailing address, telephone number where individual can be reached during the day, and a signed statement certifying that the individual understands that knowingly or willfully seeking or obtaining access to records about another individual under false pretenses is punishable by a fine of up to 5,000 dollars. Complete records are maintained only on magnetic tapes or discs and are not available for access by personal visits.

Contesting record procedures:

The agency's rules for contesting contents and appealing initial determination by the individual concerned may be obtained from the SYSMANAGER.

Record source categories:

Agency supervisors and administrative personnel, medical officials, previous Federal employers, U.S. Civil Service Commission, applications and forms completed by individual.

Systems exempted from certain provisions of the act:

None

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CS75-348, *et al.*]

BOW VALLEY PETROLEUM INC. & BOW VALLEY COAL RESOURCES, INC.

Applications for "Small Producer" Certificates [1]

JANUARY 18, 1979.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before February 14, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and sub-

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

V 44/20 JA 29 79 UMI

ject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the Public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-180257; FRL 1046-2]

OREGON AND WASHINGTON DEPARTMENTS OF AGRICULTURE

Issuance of Specific Exemptions to Use Metribuzin To Control Cheatgrass on Winter Wheat and Barley

The Environmental Protection Agency (EPA) has granted specific exemptions to the Oregon and Washington State Departments of Agriculture (hereafter referred to as "Oregon" and "Washington") to use the herbicide metribuzin in a single post-emergence application for the control of cheatgrass on a maximum of 100,000 acres in Oregon and 280,000 acres in Washington. These exemptions were granted in accordance with, and are subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the applications on file with the Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M St., S.W., Room E-315, Washington, D.C. 20460.

According to Oregon and Washington, cheatgrass (downy brome) is an annual grass weed found throughout both States; cheatgrass infestation of winter wheat is a problem every year, but the problem is particularly severe this year due to excessive summer moisture that has resulted in favorable conditions for seed germination. Oregon estimated that loss due to competition with cheatgrass might run as much as $5,250,000 if an effective herbicide was not applied; Washington estimated a loss of $12,600,000.

Atrazine is registered for cheatgrass control in Oregon and Washington; however, Atrazine should not be applied post-emergence and the winter wheat and barley are presently emerging.

Therefore, a single post-emergency application of metribuzin (4-Amino-6-(1,1 -dimethylethyl)-3- (methylthio)-1,2,4-triazin-5(4H)-one), distributed under the trade names of Sencor and Lexone, was requested. A maximum of 100,000 acres in the following counties of eastern Oregon may require treatment: Gilliam, Morrow, Sherman, Umatilla, Union, Wallowa, and Wasco. A maximum of 280,000 acres in Washington east of the crest of the Cascade Mountains may require treatment. Application instructions were to be furnished by the Oregon and Washington Departments of Agriculture. Application of metribuzin to winter wheat and barley in these two States is expected to pose minimal hazard to the environment.

After reviewing the applications and other available information, EPA determined that (a) pest outbreaks of cheatgrass on winter wheat and barley have occurred; (b) there is no effective pesticide presently available for use to control cheatgrass in Oregon and Washington; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the cheatgrass is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, Oregon and Washington have been granted specific exemptions to use the pesticide noted above until April 1, 1979, to the extent and in the manner set forth in the applications. The specific exemptions are also subject to the following conditions:

1. A single post-emergence application of Lexone 50WP (EPA Reg. No. 352-375) or Sencor 50WP (EPA Reg. No. 3125-277) may be made at a rate of 0.25 to 0.50 pound active ingredient per acre;

2. Applications will be made with ground or air equipment;

3. Spray mixture volumes of 10-40 gallons per acre will be applied by ground equipment or 5-10 gallons by aircraft;

4. A maximum of 100,000 acres in Oregon in the counties named above and 280,000 acres in Washington counties east of the crest of the Cascade Mountain may be treated;

5. All applications will be made by qualified growers or by State-licensed commercial applicators. Information on rates and timing will be furnished by Oregon State University research specialists and extension agents and Washington State Unversity extension agents;

6. Precautions will be taken to avoid spray drift to non-target areas;

7. Residue levels of metribuzin and its triazinone metabolites are not expected to exceed 0.75 part per million (ppm) in or on wheat grain, 1.0 ppm in or on wheat straw, and 2.0 ppm in or on wheat forage. Wheat grain and straw with residues which are not in excess of these levels may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

8. Treated fields may not be grazed for 14 days following application;

9. All applicable directions, restrictions, and precautions on the EPA-registered label must be followed;

10. Oregon and Washington are responsible for ensuring that all of the provisions of these specific exemptions are met, and must submit reports summarizing the results of these programs by July 15, 1979; and

11. The EPA shall be immediately informed of any adverse effects resulting from the use of metribuzin in connection with these exemptions.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136))

Dated: January 22, 1979.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

PESTICIDE PROGRAMS

Cancellation of Certain Pesticide Products

On February 17, 1976 the Administrator, Environmental Protection Agency (EPA) issued a Decision and Order cancelling certain registered uses of mercury compounds as fungicides and bacteriocides. (This Order was published at 41 FR 16497, April 19, 1976.) Following the issuance of the Order, several parties filed petitions for review pursuant to Section 16(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

Several registrants appealed this Order by commencing court action. On August 19, 1976, the Administrator issued a "Settlement and Order" with respect to those registrations. In accordance with the settlement, the effective date of the Order of February 17, 1976 was stayed until August 31, 1978 insofar as it cancelled (a) registrations for mercurial seed treatment pesticide products, and (b) registrations for mercurial fungicide products for use against summer turf diseases.

Pursuant to the Settlement and Order, notice is hereby given that the registrations of the following pesticide products were cancelled effective August 31, 1978. Under the Settlement and Order, products produced before August 31, 1978 will be treated as "existing stocks," the continued sale, distribution and use of which will be permitted.

Reg. No.	Product Name	Registrant
7501-5	Mist-O-Matic Drill Box Treatment	Gustafson, Inc., 6350 LBJ Freeway, Dallas, TX 75240
7501-2	Mist-O-Matic Liquid Seed Disinfectant.	Do.
538-149	Pro Turf Broad Spectrum Fungicide	O. M. Scott & Sons, Co., Maryville, OH 43040
538-148	Pro Turf Fertilizer Plus Fungicide	Do.
538-150	Pro Turf California Fertilizer Plus Fungicide.	Do.
605-37	Gallotox Liquid Seed Disinfectant	Guard Chem. Co., One Ave. L., Newark, NJ 07105

Dated: January 22, 1979.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

PESTICIDE PROGRAMS

Approval of Application to Register Pesticide Product Containing New Active Ingredient

On April 29, 1977, notice was given (42 FR 21837) that AgBioChem, Inc., 3 Fleetwood Court, Orinda, CA 94563, had filed an application (EPA File Symbol No. 40230-R) with the Environmental Protection Agency (EPA) to register the pesticide product GALLTROL-A containing 1.7 x 10^{10} colony forming units/plate of the active ingredient agrobacterium radiobacter which was not previously registered at the time of submission. As stated in the April 29, 1977 notice, the pesticide is primarily used for control of crown gall on non-bearing nut and fruit tree transplants. Additionally, pursuant to 40 CFR 162.8(a)(3), the company has requested, and the Agency has granted, waivers of certain toxicity and all environmental chemistry, and environmental safety data.

This application was approved January 5, 1979, and the product has been assigned the EPA Registration No. 40230-1. GALLTROL-A is classified for general use. A copy of the approved label and list of data references used to support registration are available for public inspection in the office of the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Program, Rm. 401, East Tower, 401 M St., SW., Washington, D.C. 20460. The data and other scientific information used to support registration, except for the material specifically protected by Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136) will be available for public inspection in accordance with Section 3(c)(2) of FIFRA, within 30 days after the registration date of January 5, 1979. Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), EPA, 401 M St., SW., Washington, D.C. 20460. Such requests should: (1) identify the product by name and registration number and (2) specify the data or information desired.

Dated: January 22, 1979.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

[6560-01-M]

[FRL 1046-8; PP 6G1708/T182]

METOLACHLOR

Renewal Temporary Tolerances

On February 8, 1978, th Environmental Protection Agency (EPA) announced (43 FR 5564) in response to a pesticide petition (PP 6G1708) submitted by Ciba-Geigy Corp., P.O. Box 1142, Greensboro, N.C. 27409, a renewal of temporary tolerances for combined residues of the herbicide metolachlor (2-chloro-*N*-(2-ethyl-6-methylphenyl *N*-(2-methoxy-1-methylethyl)) acetamide and its metabolites determined as 2-([2-ethyl-6-methylphenyl]amino) propanol and 4-(2-ethl-6-methylphenyl)-2-hydroxy-5-methyl (calculated as the herbicide) in or on the raw agricultural commodities soybean forage and hay at 1.25 parts per million (ppm); soybeans at 0.1 ppm; and meat, milk, poultry, and eggs at 0.02 ppm.

This renewal expired January 6, 1979. (Permanent tolerances are being established for residues of metolachlor and the above metabolites in or on soybeans at 0.1 ppm and eggs, meat, milk, and poultry at 0.02 ppm.)

Ciga-Geigy Corp. requested a one-year renewal of the temporary tolerances on soybean forage and hay at 1.25 ppm both to permit continued testing to obtain additional data and to permit the marketing of the soybean forage and hay when treated in accordance with the provisions of the experimental use permit 100-EUP-43 that was renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and all other relevant material were evaluated, and it was determined that a renewal of the temporary tolerances of 1.25 ppm on soybean forage and hay would protect the public health. Therefore, the temporary tolerances have been renewed on condition that the pesticide be used in accordance with the experimental use permit with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Ciba-Geigy Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire January 6, 1980. Residues not in excess of 1.25 ppm remaining in or on soybean forage and soybean hay after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Ms. Willa Garner, Product Manager 23, Registration Division (TS-767), Office of Pesticide Programs, 401 M St., SW., Washington D.C. 20460 (202/755-1397).

(Sec. 408(j), Federal Food, Drug and Cosmetic Act (21 U.S.C. 346a(j)))

Dated: January 23, 1979.

PESTICIDE PROGRAMS

Filing of Food Additive Petition

Elanco Products Co., Division of Eli Lilly & Co., P.O. Box 1750, Indianapolis, IN 46206, has submitted a petition (FAP 9H5202) to the Environmental Protection Agency (EPA) which proposes to amend 21 CFR 193 by establishing a regulation permitting the use of the herbicide fluridone (1-methyl-3-phenyl-5-[3-(trifluoromethyl)-phenyl]-4-(1*H*)pyridinone) in connection with an experimental program involving the use of the herbicide in an aquatic plant management systems with a tolerance limitation of 0.1 part per million in potable water. Notice of this submission is given pursuant to the provisions of section 409(b)(5) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this petition to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St., S.W., Washington D.C. 20460. Inquiries concerning this petition may be directed to Product Manager (PM) 23, Registration Division (TS-767), Office of Pesticide Programs, at the above address, or by telephone at 202/755-1397. Written comments should bear a notation indicating the petition number.

Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: January 23, 1979.

HERBERT S. HARRISON,
Acting Director, Registration Division.

ENVIRONMENTAL IMPACT STATEMENTS

Availability

AGENCY: Office of Federal Activities. Environmental Protection Agency.

PURPOSE: This Notice lists the Environmental Impact Statements which have been officially filed with the EPA and distributed to Federal Agencies and interested groups, organizations and individuals for review pursuant to the Council on Environmental Quality's Regulations (40 CFR 1506.9).

PERIOD COVERED: This Notice includes EIS's filed during the week of January 15 to 19, 1979.

REVIEW PERIODS: The 45-day review period for draft EIS's listed in this Notice is calculated from January 26, 1979 and will end on March 12, 1979. The 30-day wait period for final EIS's will be computed from the date of receipt by EPA and commenting parties.

EIS AVAILABILITY: To obtain a copy of an EIS listed in this Notice you should contact the Federal agency which prepared the EIS. This Notice will give a contact person for each Federal agency which has filed an EIS during the period covered by the Notice. If a Federal agency does not have the EIS available upon request you may contact the Office of Federal Activities, EPA for further information.

BACK COPIES OF EIS'S: Copies of EIS's previously filed with EPA or CEQ which are no longer available from the originating agency are available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

FOR FURTHER INFORMATION CONTACT:

Kathi Weaver Wilson, Office of Federal Activities, A-104, Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460 (202) 755-0780.

SUMMARY OF NOTICE: Appendix I sets forth a list of EIS's filed with EPA during the week of January 15 to 19, 1979, the Federal agency filing the EIS, the name, address, and telephone number of the Federal agency contact for copies of the EIS, the filing status of the EIS, the actual date the EIS was filed with EPA, the title of the EIS, the State(s) and County(ies) of the proposed action and a brief summary of the proposed Federal action and the Federal agency EIS number if available. Commenting entities on draft EIS's are listed for final EIS's.

Appendix II sets forth the EIS's which agencies have granted an extended review period or a waiver from the prescribed review period. The Appendix II includes the Federal agency responsible for the EIS, the name, address, and telephone number of the Federal agency contact, the title, State(s) and County(ies) of the EIS, the date EPA announced availability of the EIS in the FEDERAL REGISTER and the extended date for comments.

Appendix III sets forth a list of EIS's which have been withdrawn by a Federal agency.

Appendix IV sets forth a list of EIS retractions concerning previous Notices of Availability which have been made because of procedural noncompliance with NEPA or the CEQ regulations by the originating Federal agencies.

Appendix V sets forth a list of reports or additional supplemental information on previously filed EIS's which have been made available to EPA by Federal agencies.

Appendix VI sets forth official corrections which have been called to EPA's attention.

Dated: January 24, 1979.

WILLIAM N. HEDEMAN, Jr.,
Director, Office of Federal Activities.

APPENDIX I

EIS'S FILED WITH EPA DURING THE WEEK OF JANUARY 15 TO 19, 1979

DEPARTMENT OF AGRICULTURE

Contact: Mr. Barry Flamm, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 359A, Washington, D.C. 20250, 202-447-3965.

FOREST SERVICE

Final

Angelina National Forest, Timber Management Plan Several County, Tex., January 15: The proposed action is implementation of an eight year timber management plan for the Angelina National Forest. The Angelina National Forest is located in Angelina, San Augustine, Jasper and Nacogdoches Counties in east Texas and lies on both sides of the 114,500 acre Sam Rayburn Reservoir, approximstely 391,000 acres of land lie inside the forest boundary, of which thirty-nine percent or 154,991 acres is national forest land. Private land ownership within the forest boundary is mixed and includes home sites, farm and pasture land, and woodlands. This plan proposes evenages forest management on the commercial forest for production of timber products. (USDA-FS-R8-(DES(ADM)-78-07) Comments made by: EPA, AHP, USDA, DOT, DOI, State agencies, groups and individuals. (EIS Order No. 81303)

DEPARTMENT OF COMMERCE

Contact: Dr. Sidney R. Galler, Assistant Secretary for Environmental Affairs, Department of Commerce, Washington, D.C. 20230, 202-377-4335.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Final

Alaska Coast High Seas Salmon Fishery, FMP Alaska, January 19: The proposed action is to adopt and implement a fishery management plan for the High Seas Salmon Fishery of the coast of Alaska east of 175 degrees east longitude under provisions of Title III of the Fishery Conservation and Management Act of 1976. This act extends jurisdiction over fishery resources and establishes a program for their management. The purpose of the management plan is to manage ocean salmon resources off the coast of Alaska and the troll fishery on those resources. Comments made by: DOC, CGD, State and Local agencies individuals and businesses. (EIS Order No. 90076)

DEPARTMENT OF DEFENSE, ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy, Attention: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, S.W., Washington, D.C. 20314, 202-693-6795.

Final

Flood Control, Central and Southern Florida, Hendry County, Fla., January 19: Proposed is the Hendry County segment of the Central and Southern Florida flood control project. This section of the proposal consists of a canal and control structure designed to remove flood waters more efficiently and prevent overdrainage of 261 sq. mi. area in Eastern Hendry County, with an integrated pumping station and canal system, the project will also provide for the conveyance of agricultural water supply from lake Okeechobee during periods of drought for distribution to part of the project area and to Big Cypress Seminole Indian Reservation which is located about 5 miles south of the project area. (Jacksonville district). Comments made by: USDA, DOI, EPA, State and local agencies. (EIS Order No. 90075).

DEPARTMENT OF DEFENSE, ARMY

Contact: George Q. Cunney, Jr., Acting Chief, Environmental Office, Office of the Assistant Chief of Engineers, Department of the Army, Room 1E676, Pentagon, Washington, D.C. 20310, 202-694-4269.

Final

Fort Irwin National Training Center, San Bernardino County, Calif., January 19: Proposed is the establishment of a National Training Center at Fort Irwin located in the High Mojave Desert, San Bernardino County, California. The purpose is to pro-

V 4 4 / 2 0

vide simulated full-scale combat situations to support the Army's combined arms tactical unit training and to integrate similar exercises with the Air Force, Navy and Marine Corps. The proposed program would involve reopening post facilities with construction and rehabilitation proceeding operations. Fort Irwin was selected from eleven alternative sites. Comments made by: USDA, DOD, DOI, DOT, EPA, NASA, State and local agencies, groups, individuals and businesses. (EIS Order No. 90078).

DEPARTMENT OF DEFENSE, NAVY

Contact: Mr. Ed Johnson, Head, Environmental Impact Statement/RDT&E Branch, Office of the Chief of Naval Operations, Department of the Navy, Washington, D.C. 20350, 202-697-3689.

Draft

New Naval Regional Medical Center, San Diego County, Calif., January 18: Proposed is the replacement of approximately 69 substandard buildings with a modern Naval Regional Medical Center (NRMC) located in San Diego County, California. The NRMC will include: A 600-bed acute area and 300-bed light care hospital, outpatient and emergency medical care facilities, the Naval School of Health Sciences, and parking facilities. The existing major surgical facility will be retained, upgraded, and converted to other uses. Renovation will be planned such that the structure can be reconverted to a medical facility under emergency conditions. Five alternatives, including nine alternate sites are considered. (EIS Order No. 90070).

DEPARTMENT OF ENERGY

Contact: Mr. Robert Stern, Acting Director, Division of NEPA Affairs, Department of Energy, Federal Building, Room 7119, 1200 Pennsylvania Avenue, NW., Washington, D.C. 20461, (202) 566-9760.

BONNEVILLE POWER ADMINISTRATION

Draft

Southwest Oregon area service, facility plan FY79s, several counties in Oregon and Idaho, January 19: Proposed is the facility planning supplement to the BPA FY 1979 program for the southwest Oregon service area to allow power generated in Wyoming to be delivered and to facilitate the exchange of electric power between the Pacific Northwest and the Middle Snake region. Construction of two transmission facilities proposed includes: (1) 500 kV line from Brownlee substation in Idaho to Slatt substation near Arlington, Oregon and (2) 500 kV line from Buckley to Malin, Oregon. The new transmission line would provide backup to the overall system. (DOE-EIS-0005-DS-2.) (EIS Order No. 90072.)

GENERAL SERVICES ADMINSTRATION

Contact: Mr. Andrew E. Kauders, Executive Director, Environmental Affairs Division, General Services Administration, 18th and F Streets, NW., Washington, D.C. 20405, (202) 566-0405.

Final

Charlestown Naval Auxiliary Landing Field, Washington County, R.I., January 19: This action involves the disposing of Federal Properties which have been determined to be no longer needed for the purposes for which they were formerly used. Charlestown Naval Auxiliary Landing Field (NALF) is located in the southern tier of Washington County of Rhode Island, Charlestown and the abutting Communities of Hopkinton, Richmond, South Kingstown, and westerly are the five communities most liable to be subjected to changes brought about by proposals to reuse the Charlestown NALF. Comments made by: USDA, DOE, DOI, State, and local agencies, groups, individuals, and businesses. (EIS Order No. 90077.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, (202) 755-6308.

Draft

Denver Metropolitan Areawide Plan, several counties in Colorado, January 18: Proposed is the approval of the Denver Regional Council of Governments (DRCOG) Regional Growth and Development Plan as the basis for evaluating future housing development applications of HUD assisted or insured housing in the Denver Metropolitan area. The counties involved are: Denver, Boulder, Jefferson, Adams, and Arapahoe. Approval of this plan would allow HUD to discontinue its practice of preparing a full EIS for each project unless conditions are found which have not been dealt with adequately in this statement which examines the over-all cumulative impacts of areawide development. (EIS Order No. 90067.)

Brays Village East Subdivision, Harris County, Tex., January 16: Proposed is the issuance of HUD Home Mortgage Insurance for the Brays Village East Subdivision located in Harris County, Texas. The development will encompass approximately 96.4 acreas and will be composed of 616 single-family homes. (HUD-R06-79-54D.) (EIS Order No. 90063.)

Dale City Subdivision, Prince William County, Va., January 16: Proposed is the issuance of HUD home mortgage insurance for Dale City located in Prince William County, Virginia. The plan applies to approximately 3,500 acres which will encompass 5,263 single family houses, 1,036 townhouses and 4,152 apartments. The development, when completed, will also contain 332 acres for commercial use, 208 acres for utilities and major highways, 851 acres for parks and open space and 500 acres for schools and other uses. (EIS Order No. 90064.)

Final

Woodland Oaks Subdivision, Harris County, Tex., January 16: Proposed is the acceptance for mortgage insurance purposes of the Woodland Oaks subdivision in Harris County, Texas. Project plans call for the development of 475.907 acres into a community composed of single-family homes. (HUD-R06-76-46F.) Comments made by: EPA, DOI, USDA, COE, AHP, State agencies. (EIS order No. 90062.)

SECTION 104(h)

The following are community development block grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local executive. Copies are not available from HUD.

Draft

Adams Normandie 4321 Redevelopment, Los Angeles, Los Angeles County, Calif., January 19: The purpose of the proposed project is to eliminate blighted conditions in the project area through the initiation and encouragement of rehabilitation and new development. The goal of the Adams Normandie 4321 Redevelopment, which is located in the city and county of Los Angeles, California, includes the rehabilitation of dwellings and commercial structures which do not comply with current standards, newly constructed dwellings for low/moderate income and the elderly, new commercial and manufacturing development and expansion of park and recreation facilities. (EIS Order No. 90073.)

Charleston Center, Redevelopment, Charleston County, S.C., January 18: Proposed is a mixed-use development plan for Charleston Center in Charleston County, South Carolina. The plan will consist of hotel/commercial/convention facilities and parking, The project, which is located on 8.5 acres in the lower peninsula of Charleston City, also includes improvements of: the adjacent area, street system, and related infrastructure. The city of Charleston has withdrawn the draft EIS previously filed on this project. (EIS order No. 90068.)

Final

Navy Yard City, Rehabilitation, Bremerton, Kitsap County, Wash., January 17: Proposed is the rehabilitation of existing housing and improvement of public services in and around Navy Yard City, Kitsap County, Washington. The project will include: 1) improvement/resurfacing of streets along WA-3, 2) construction of sidewalks, 3) installation of a storm drainage system, 4) improvement of coverage of the sanitary sewer system, 5) construction of a new fire station, 6) construction of a covered play area, and 7) rehabilitation of existing housing. Comments made by: DOI, EPA, USDA, State and local agencies. (EIS Order No. 90066.)

DEPARTMENT OF THE INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256, Interior Bldg., Department of the Interior, Washington, D.C. 20240, (202) 343-3891.

NATIONAL PARK SERVICE

Draft

Grand Canyon National Park, Burro Control, Mohave and Coconino Counties, Ariz., January 15: Proposed is a management and restoration plan within four areas impacted by feral burros in Grand Canyon National Park, Mohave and Coconino Counties, Arizona. The plan proposes to remove approximately 500 feral burros, primarily by shooting and secondarily by herding, and to fence a 2.5 mile section of the Park boundary to prevent ingress of burros from surrounding Federal lands. The alternatives considered include: (1) no action, (2) total removal of burros by live removal techniques, (3) partial retention of burros in the park, and (4) other methods to achieve total or partial reduction. (DES-79-4.) (EIS Order No. 90059.)

Final

Cumberland Gap N.P. Master Plan, Kentucky, Tennessee, and Virginia, January 19: Proposed is a master plan for the Cumberland Gap National Historical Park, located in Kentucky, Virginia, and Tennessee. The plan calls for relocation of US 25E, recreating the wilderness appearance of Historic Cumberland Gap, construction of a motor-history trail serving Hensley settlement, and boundary changes requiring land acquisition in Kentucky and Tennessee. The relocation of US 25E will have significant economic, ecologic, and sociologic impacts on the park and region. (FES 79-2.) Comments made by: COE, DOI, DOT, EPA, TVA, State agencies, groups. (EIS Order No. 90074.)

J A 2 9 7 9 UMI

GEOLOGICAL SURVEY

Final

Coal Creek Mine, Mining and Reclamation Plan, Campbell County, Wyo., January 18: Proposed is the approval of the surface mining and reclamation plan for the Coal Creek Mine, Campbell County, Wyoming. The plan proposes mining about 330 million tons of coal at a production rate of 4.5 million tons during the first two years and 10 million tons during the following thirty-two years. Mining operations will occur on State, private, and 5,800 acres of federally owned land. The coal will be used for electric power generation in the Midwest and in the South. (FES 79-01.) (EIS order No. 90071.)

OHIO RIVER BASIN COMMISSION

Contact: Mr. Fred E. Morr, Chairman, Suite 208-20, Ohio River Basin Commission, 36 East Fourth Street, Cincinnati, Ohio 45202, 513-684-3831.

Final

The Ohio Main Stem CCJP and Study Report, several counties in Ohio, January 17: Proposed is a plan for 35,000 square miles of the Ohio River main stem in the States of Illinois, Indiana, Kentucky, Ohio, Pennsylvania, and West Virginia, the plan includes 594 projects relating to: Watersheds, navigation, reservoirs, flood protection, water quality, State parks/public areas/wild and scenic rivers, local and regional parks/historical sites, natural areas, wildlife habitat, embayments, wetlands, and islands. The EIS finalizes four draft statements: No. 80259, dated March 17, 1978 and No. 80313, No. 80314, No. 80315, dated March 31, 1978. Comments made by: USDA, USA, DOC, DOE, EPA, HEW, HUD, DOI, USCG, State agencies, groups. (EIS order No. 90065.)

DEPARTMENT OF TRANSPORTATION

Contact Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street SW., Washington, D.C. 20590, 202-426-4357.

FEDERAL HIGHWAY ADMINISTRATION

Final

Arundel Expressway, MD-648 to MD-100, Anne Arundel County, Md., January 15: The proposed highway improvement consists of the continuation of the Arundel Expressway on new location from Old Annapolis Road (Maryland Route 648) in Glen Burnie southerly to Maryland Route 100. The project involves 2.1 miles of 4-lane divided highway. (FHWA-MD-EIS-75-04-F.) Comments made by: USDA, USCG, DOT, EPA, DOI, State and local agencies. (EIS Order No. 90058.)

MI-20 Bridge replacement, Big Rapids, Mecosta County, Mich., January 19: Proposed is the selection of a location and alignment for a bridge to replace the current structure carrying MI-20 (Maple Street) over the Muskegon River in the city of Big Rapids, Mecosta County, Michigan. Plan implementation calls for the construction of the bridge and reconstruction of approaches, including widening of up to 2,100 feet (640 meters) of MI-20 in Big Rapids. Adverse impacts include the displacement of 0 to 24 residential units, depending upon the alternate selected, and 7 commercial establishments; increased traffic; and increased noise pollution. (FHWA-MICH-EIS-7706-F.) Comments made by: DOI, USDA, DOC, DOE, State and local agencies. (EIS Order No. 90079.)

Final

Jefferson Freeway (KY-84), 31W to KY-155, Jefferson County, Ky., January 15: Proposed is the construction of approximately 23 miles of the Jefferson Freeway (KY-84) in Jefferson County, Kentucky. The freeway generally forms a ten-mile radius of circumferential belt line around Louisville. KY-84 would begin at Dixie Highway (US 31W) and extends northeasterly to its terminus at Taylorville Road (KY-155). The freeway will be a fully controlled access facility of four-lanes. (FHWA-KY-EIS-73-04-F.) (EIS Order No. 9060.)

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT SCIENTIFIC ADVISORY PANEL

Open Meeting

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Notice of open meeting.

SUMMARY: There will be a two-day special subcommittee meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel from 9:00 a.m. to 5:00 p.m. each day on Wednesday and Thursday, February 14 and 15, 1979. The meeting will be held in Room 1112A, Crystal Mall, Building No. 2, 1921 Jefferson Davis Highway, Arlington, Va., and will be open to the public.

FOR FURTHER INFORMATION CONTACT:

Dr. H. Wade Fowler, Jr., Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (TS-766), Rm. 803, Crystal Mall, Building No. 2, at the above address, telephone 703/557-7560.

SUPPLEMENTARY INFORMATION: In accordance with Section 25(d) of the amended FIFRA, the Scientific Advisory Panel will comment on the impact on health and the environment of regulatory actions under Sections 6(b) and 25(a) prior to implementation. The purpose of this meeting is to discuss the following topics:

Subpart H—Label Development (draft), and Subpart I—Experimental Use Permits (draft) of the Guidelines for Registering Pesticides in the United States.

Any member of the public wishing to attend this meeting should contact Dr. H. Wade Fowler, Jr., at the address shown above. Time will be allotted for brief comments by the public each day; interested persons should contact Dr. Fowler for special instructions regarding oral statements. Individuals who wish to file written statements are advised to contact the Executive Secretary in a timely manner to ensure appropriate consideration by the Advisory Panel. All statements will be made a part of the record and will be taken into consideration by the Panel in formulating comments.

All interested persons are further advised that the meeting announced in this notice is a subcommittee meeting of the Advisory Panel for the purpose of conducting preliminary reviews of draft proposed rulemaking. Formal review of topics considered by the subcommittee will be conducted by the FIFRA Scientific Advisory Panel at a later date.

(Sec. 25(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 186) and sec. 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 86 Stat. 770).)

Dated: January 24, 1979.

EDWIN L. THOMAS,
Deputy Assistant Administrator for Pesticide Programs.

FEDERAL MARITIME COMMISSION

AGREEMENTS FILED

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10423; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before February 19, 1979. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No. 5600-37.
Filing party: Charles F. Warren, Esq., Warren & Associates, P. C., 1100 Connecticut Avenue, N.W., Washington, D.C. 20036.
Summary: Agreement No. 5600-37 would extend, indefinitely, the authority granted the Philippines North America Conference to establish through and joint rate intermodal arrangements. The authority is presently set to expire on February 17, 1979.

Agreement No. 9735-10.
Filing party: John T. Reed, National Executive Secretary, Steamship Operators Intermodal Committee, 450 Mission Street, San Francisco, California 94105.
Summary: Agreement No. 9735-10, by the member lines of the Steamship Operators Intermodal Committee, modifies their basic agreement by providing that actions of the Executive Council shall require unanimous vote except that actions receiving two-thirds vote of the Executive Council shall be submitted to the individual member lines. Such actions then receiving two-thirds majority of the member lines will be adopted.

Agreement No. 9735-11.
Filing party: John T. Reed, National Executive Secretary, Steamship Operators Intermodal Committee, 450 Mission Street, San Francisco, California 94105.
Summary: Agreement No. 9735-11, by the member lines of the Steamship Operators Intermodal Committee, modifies their basic agreement by adding as areas of common interest to the member lines (1) the intermodal movement of containers, (2) the structure of rates and rules pertaining to intermodal movements, (3) governmental regulation of intermodal movements and (4) free time rules pertaining to containers and related equipment. This amendment also provides that the parties, as a whole, may consult with individual rail, motor, or air carriers, forwarders, shippers or insures in addition to associations of same as their agreement presently provides.

Agreement No. 10182-3.
Filing party: Howard A. Levy, Esq., Suite 727, 17 Battery Place, New York, New York 10004.
Summary: Agreement No. 10182-3, among the parties of the Eurogulf Self-Policing Agreement would amend Article 4.1 of the basic agreement and Section 1 of the Annex by deleting all references to the *Executive Director of the Associated North Atlantic Freight Conferences* contained therein. The term "Executive Director" as used in the agreement shall mean the chief executive officer of the independent neutral body so appointed to serve as the exclusive enforcement authority.

Agreement No. T-3769.
Filing party: Leslie E. Still, Jr., Senior Deputy City Attorney, Harbor Administration Building, P.O. Box 570, Long Beach, California 90801.
Summary: Agreement No. T-3769, between the City of Long Beach (Port) and Sohio Transportation Company of California (Sohio), provides for the Port's 22-year lease to Sohio of certain premises at the Port of Long Beach, California, to be used as a pipeline right-of-way, a tank farm site, and a marine terminal site. The premises are to be operated by Sohio as a common carrier for the acceptance, conveyance and transportation of crude oil delivered in vessels to the terminal. Sohio, whose name will be changed to Pactex Pipeline Company, will operate and maintain a crude oil receiving terminal and transmission facility, primarily for the transport of North Slope Alaska Crude oil. As compensation, Sohio shall: (1) reimburse Port for the cost of improvements to the premises as outlined in the agreement; (2) pay Port a throughput charge of $.011 per net barrel of crude oil off-loaded at the premises; and (3) pay charges for pilotage, and for fresh water and electricity pursuant to the Port's tariff. Sohio shall collect and keep dockage charges assessed according to the Port's tariff. During the period of improvement construction and prior to the assessment of throughput charges, Sohio shall pay the Port $8,333.33 per month for the use of the premises.

By Order of the Federal Maritime Commission.

Dated: January 24, 1978.

FRANCIS C. HURNEY,
Secretary.

[6730-01-M]

[Docket No. 79-5]

LEONARD T. BUTLER D.B.A. MANUFACTURERS FORWARDING—INDEPENDENT OCEAN FREIGHT FORWARDER APPLICATION AND INTERMODAL SALES, INC. POSSIBLE VIOLATIONS OF SECTIONS 15 AND 18(b)(3).

Order of Investigation and Hearing

Leonard T. Butler as a sole proprietor d.b.a. Manufacturers Forwarding filed an application with the Commission for a license as an independent ocean freight forwarder. During the course of the Commission's investigation of Leonard T. Butler d.b.a. Manufacturers Forwarding, information was received which may indicate that:

1. Intermodal Sales, Inc. of which Mr. Butler is President and majority stockholder under the trade name Intermodal Services, Inc., maintains with the Commission an NVOCC tariff as required by section 18, Shipping Act, 1916. Evidence deduced in the course of the investigation appeared to demonstrate that Intermodal Services, Inc. violated section 18(b)(3), Shipping Act, 1916, (46 U.S.C. 817) on at least eleven of the nineteen shipments it handled during the period January 15, 1978 through May 12, 1978 in charging, demanding or collecting a greater, lesser or different compensation for the transportation of property than the

V 4 4 / 2 0

rates and charges specified in its tariff on file with the Commission.

2. Intermodal Sales Inc. d.b.a. Intermodal Services, Inc. appeared to violate section 15, Shipping Act, 1916, (46 U.S.C. 814) in that it and Seaway Express Lines, a vessel operating common carrier by water, entered into an exclusive, non-competitive cooperative working agreement subject to the filing and approval requirements of the aforementioned section 15, implementing that agreement in carrying out its terms without the pre-requisite Commission sanction.

In view of the above, Leonard T. Butler, 52% owner and President of Intermodal Sales, Inc. would appear to lack the fitness to properly carry on the business of forwarding and to conform to the provisions of the Shipping Act, 1916, and the requirements, rules and regulations of the Commission issued thereunder as required by section 44 and the Commission's Rules and Regulations issued pursuant to section 44 of the Shipping Act, 1916.

Pursuant to section 510.8 of the Commission's General Order 4 (46 CFR 510.8), the Commission, on October 30, 1978, advised Leonard T. Butler d.b.a. Manufacturers Forwarding of its intent to deny the application for the reasons set out hereinabove. In accordance with General Order 4 an applicant may, within 20 days of receipt of such advice, request a hearing on the application.

By letter dated November 6, 1978, Leonard T. Butler d.b.a. Manufacturers Forwarding requested the opportunity to show at a hearing that the denial of the application is unwarranted.

NOW, THEREFORE, IT IS ORDERED, That pursuant to sections 15, 18(b), 22 and 44 (46 U.S.C. 814, 817, 821 and 841(b)) of the Shipping Act, 1916 and section 510.8 of the Commission's General Order 4 (46 CFR 510.8) a proceeding is hereby instituted to determine:

1. Whether Intermodal Sales Inc. d.b.a. Intermodal Services, Inc. has violated section 15 Shipping Act, 1916, by entering into an exclusive non-competitive cooperative working agreement with Seaway Express Lines without the pre-requisite Commission approval;

2. Whether Intermodal Sales, Inc. d.b.a. Intermodal Services, Inc. has violated section 18(b)(3), Shipping Act, 1916, by transporting property at rates and charges other than those specified in its tariff on file with the Commission, and

3. Whether, in light of the evidence, adduced pursuant to the foregoing issues, together with any other evidence adduced, Leonard T. Butler d.b.a. Manufacturers Forwarding possess the requisite fitness, within the meaning of section 44(b), Shipping Act, 1916, to properly carry on the business of forwarding and to conform to the provisions of the Shipping Act, 1916, and the requirements, rules and regulations of the Commission issued thereunder.

IT IS FURTHER ORDERED, That Leonard T. Butler d.b.a. Manufacturers Forwarding and Intermodal Sales, Inc. be made the Respondents in this proceeding and that the matter be assigned for public hearing before an Administrative Law Judge at a date and place to be determined by the Administrative Law Judge presiding, but in no event, later than July 20, 1979. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon a showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents, or that the nature of the matters in issue is such that an oral hearing and cross/examination are otherwise necessary for the development of an adequate record;

IT IS FURTHER ORDERED, That this Order be published in the FEDERAL REGISTER and a copy thereof be served upon the Respondent;

IT IS FURTHER ORDERED, That any person other than Respondents and the Commission's Bureau of Hearing Counsel, having an interest and desiring to participate in this proceeding, may do so by filing a timely petition for leave to intervene pursuant to section 502.72 of the Commission's Rules;

IT IS FURTHER ORDERED, That all future notices issued by or on behalf of the Commission, including notice of time and place of hearing or of prehearing conference, shall be mailed directly to all parties of record.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on January 22, 1979. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed CAB and ICC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before February 13, 1979, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

CIVIL AERONAUTICS BOARD

The CAB requests clearance of the application and notice requirements governing unused nonstop route authority contained in a new Part 321 of the Board's Procedural Regulations. This new Part supersedes the original application and notice requirements found in Subpart R of 14 CFR Part 302, Rules of Practice in Economic Proceedings. (PR-180, October 18, 1978; 43 FR 49549, October 24, 1978). The CAB estimates respondents will number approximately 75 Certificated Route Air Carriers and respondent burden will average 5 hours.

INTERSTATE COMMERCE COMMISSION

The ICC request clearance of a new Annual Report, Form R-3, required to be filed by approximately 470 Class III line-haul railroads, switching and terminal companies and stockyard companies, pursuant to Section 20 of the Interstate Commerce Act. Data collected by Form R-3 will be used for economic regulatory purposes. The establishment of this report resulted from the Commission's designation of a Class III railroad classification. This class will be required to file Form R-3 annually starting with the calendar year beginning January 1, 1978. Reports are mandatory and available for use by the public. The ICC estimates reporting burden for carriers will average 22 hours per annual report.

ICC's Final Rule in Docket No. 36730 (Sub-No. 1), decided December 11, 1978, service date December 22, 1978, promulgated Form R-3, Annual Report, Class III Railroads. Although the Rule specified that the new Form R-3 becomes effective for the reporting year beginning January 1, 1978, this effective date is contingent upon ICC's compliance with 44 U.S.C. 3512 which precludes the collection of information from ten or more persons until the Comptroller General has had the opportunity to advise that the information is not presently available from other Federal sources and that the proposed report forms are consistent with the provisions of section 3512. This notice represents the beginning of our review.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Assistant Secretary for Education

PUBLIC AND NONPUBLIC ELEMENTARY AND SECONDARY SCHOOL FINANCING

Review of Draft Study Plan

AGENCY: Department of Health, Education, and Welfare

ACTION: Notice of Availability for Public Review.

SUMMARY: The *draft study plan* describes the proposed research agenda for the study of public and nonpublic elementary and secondary school financing mandated by the Education Amendments of 1978.

DATE: January 26, 1979

LOCATION: Room 4145, 400 Maryland Ave., S.W., Washington, D.C. 20202.

CONTACT: William E. McLaughlin, (202) 245-6996.

SUPPLEMENTARY INFORMATION: The Education Amendments of 1978 direct the Secretary of the Department of Health, Education, and Welfare to conduct a comprehensive, three-year study of elementary and secondary school finance. The legislation provides the following framework for the study:

(1) Investigation of the availability of reliable and comparative data on the status and trends in financing elementary and secondary education.

(2) Conduct of studies necessary to understand and analyze the trends and problems affecting the financing of elementary and secondary education, both public and nonpublic, including the prospects for adequate financing during the next ten years.

(3) Development of recommendations for Federal policies to assist in improving the equity and efficiency of Federal and State systems for raising and distributing revenues to support elementary and secondary education.

The authorizing legislation requires that the Secretary submit a *study plan* to Congress by March 1, 1979. The Department has prepared an ititial *draft* of this research program and is seeking review by interested groups and individuals. Comments received by February 9 will be considered.

Dated: January 22, 1979.

MARY BERRY,
Assistant Secretary for Education.

Dated: January 22, 1979.

BEN W. HEINEMAN,
Acting Assistant Secretary for Planning and Evaluation.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

RESULTS OF POSTAL VOTING PROCEDURES ON PROPOSALS TO ADD CERTAIN MAMMALS AND INSECTS TO THE CONVENTION OF INTERNATIONAL TRADE IN ENDANGERED SPECIES OF WILD FAUNA AND FLORA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The Service announces the results of postal procedures under the Convention on International in Endangered Species of Wild Fauna and Flora on certain proposals made by the United Kingdom. The Parties decided to include the Himalayan population of musk deer in Appendix I, and the remainder of the genus to which it belongs on Appendix II. They also decided to include three genera of birdwing butterflies in Appendix II. The actions enter into force on February 16, 1979, except as to Parties which enter reservations. The Service requests comment as to whether any reservation should be so entered. Since objections were made to the proposals to include Hartmann's mountain zebra and Grevy's zebra in Appendix II, a postal vote by the Parties will be conducted. The Service announces how and why it will vote.

DATE: All comments concerning a possible reservation on the Himalayan population of the Musk deer and the birdwing butterfly genera will be considered if received by February 5, 1979.

ADDRESS: Comments should be sent to the Director, U.S. Fish and Wildlife Service, Federal Wildlife Permit Office, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Arthur Lazarowitz, Staff Legal Assistant Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone 703-235-2418.

SUPPLEMENTARY INFORMATION: On August 18, 1978 the Service published an advanced notice requesting public comment within 30 days on a United Kingdom postal procedures proposal to amend the Convention by including Grevy's zebra, *Equus grevyi*, Hartmann's mountain zebra, *Equus zebra hartmannae*, and the Himalayan population of the musk deer, *Moschus moschiferus*, (in lieu of *Moschus moschiferus moschiferus*) in Appendix I; and by including the balance of genus *Moschus* and three birdwing butterfly

JAN 29 79
UMI

V 4 4 / 2 0 J A 2 9 7 9 UMI

genera, *Ornithoptera*, *Trogonoptera* and *Troides* in Appendix II.

All comments received by September 18, 1978 were to have been considered by the Service in making any reply or objection to these proposals. Objections were to have been received by the Secretariat before November 18, 1978. During the period October 1 to November 11, 1978, the Service could not consider or take any action with regard to these proposals due to a lapse in its authorization for endangered species programs. In light of the limited time available to the Service no replies or objections were submitted to the Secretariat.

The Secretariat has communicated the comments it had received from several Parties and has informed the Parties that no objections were made with regard to the birdwing butterfly and musk deer proposals. This being so, the amendments relevant to these taxa as set forth above will enter into force on February 16, 1979 with respect to all Parties unless a Party enters a reservation on or before that date. The Service requests public comments as to whether a reservation should be entered by the United States with regard to these amendments. A Party which enters a reservation will be treated as a State not a Party to the Convention with respect to trade in the species concerned. Under current practice, this would mean that trade between the United States and other Parties would require documentation similar to that which would be required had no reservation been entered.

Objections were received by the Secretariat to the proposals to include Grevy's zebra and Hartmann's mountain zebra in Appendix I. These proposals have been submitted to the Parties for a postal vote. Adoption must be by a two-thirds majority. Ballots must be received by the Secretariat by February 3, 1979. If ballots are not cast by at least one-half of the Parties, these proposals will be referred to the Second Meeting of the Conference of the Parties to be held in San Jose, Costa Rica, March 19-30, 1979. The Service has received several comments with regard to these proposals and has considered them in determining how it shall vote. Following is a summary and analysis of the comments received as to each species subject to the postal vote, and a statement showing how and why the Service intends to vote.

Inclusion of Hartmann's Mountain Zebra in Appendix I

The United States Endangered Species Scientific Authority ("ESSA"), the staff of the New York Zoological Society and the Riverbanks Zoological Park of Columbia, South Carolina support this proposal. Riverbanks cites population levels of 7,000 individuals. Safari Club International, which opposes the proposal, states that an additional 4,200 individuals are in protected areas of Namibia, and that listing on Appendix I would effectively end trophy hunuting. Trophy hunting currently provides cattle ranchers with an additional source of income. Without this source of income, asserts Safari Club, the ranchers would destroy the Hartmann's mountain zebra which competes with their cattle for food. Safari Club International as well as the conservation authorities in Namibia would support a proposal to include the species in Appendix II.

The Service supports this proposal and will so cast its ballot. The Hartmann's mountain zebra has been severely depleted from its historical levels. An Appendix I listing would provide particularly strict regulation in order not to endanger their survival. It would prohibit importations of specimens to be used primarily for commercial purposes. It would allow importations of trophies of this species where the ESSA advised that such importations would provide "countervailing benefits" to the species concerned.

Inclusion of Grevy's Zebra in Appendix I

ESSA, the staff of the New York Zoological Society and the Riverbanks Zoological Park support this proposal. Information obtained by the New York Zoological Society from a survey by the Kenya Rangeland Ecological Monitoring Unit indicates that there are 13,718 individuals in Kenya as of this year. This contradicts recently published estimates of 1,500 individuals. In spite of this increased population estimate, the Kenyan authorities fear that export of items from illegally taken specimens represents a real threat to the species. Safari Club International opposes the proposal because of the increased number of individuals found and because it believes Kenya trade controls are sufficient.

The Service supports the addition of Grevy's zebra to Appendix I and will so cast its ballot. Although recent surveys have found larger populations than were originally estimated, management control of these populations is apparently difficult and rather different from those for Hartmann's mountain zebra discussed above. Much of the population occurs in areas which are neither privately owned nor susceptible to effective policing. As a result there has apparently been substantial poaching and illegal trade. The Service believes that stronger international controls are essential to prevent uncontrolled exploitation.

The Service will publish a Federal Register notice announcing the results of the postal voting or of any action taken at the Second Meeting of the Conference of the Parties should there be an insufficient number of ballots cast. If the proposals are approved, that notice will also request comments with regard to whether a reservation should be entered.

Dated: January 23, 1979.

Lynn A. Greenwalt,
Director, U.S. Fish and Wildlife Service.

[FR Doc. 79-2901 Filed 1-26-79; 8:45 am]

[4310-84-M]

Bureau of Land Management

OUTER CONTINENTAL SHELF, MID-ATLANTIC

Outer Continental Shelf Leasing Systems, Sale No. 49

Section 8(a)(8) (43 U.S.C. 1337(a)) of the Outer Continental Shelf Lands Act, as amended, requires that, at least 30 days before any lease sale, a notice be submitted to the Congress and published in the Federal Register:

(A) Identifying the bidding systems to be used and the reasons for such use; and

, (B) Designating the tracts to be offered under each bidding system and the reasons for such designation.

This notice is published pursuant to these requirements.

Bidding Systems To Be Used

In OCS Lease Sale No. 49, a system employing a cash bonus bid with a constant royalty fixed at 16⅔ percent will be used on 53 tracts. This system is authrized by Sec. 8(a)(1)(A) of the OCS Lands Act, as amended. A system employing a cash bonus bid with a royalty established according to a semi-logarithmic sliding scale will be used on 58 tracts. This system is authorized by Sec. 8(a)(1)(C) of the OCS Lands Act, as amended. The use of the sliding scale royalty system was first introduced in OCS Lease Sale No. 43 and used again in OCS Lease Sales No. 45, No. 65 and No. 51, as part of the commitment by the Department of the Interior and the Department of Energy to develop and test new bidding systems.

The sliding scale is designed to establish higher royalty rates for larger reservoirs with higher production rates. In such cases, the expected bonus would be reduced, which may improve competition for leases. This would also tend to reduce the likelihood of production losses that could result if royalty rates are set by other means, such as royalty bidding at levels so high that production is made uneconomic. These production losses are dependent upon the different exploration, development and production costs for the specific area. Because the assumed costs were different in the Sale No. 49 area than other areas, the formula provided for this sale is slightly different from that utilized in recent sales.

The sliding scale used in Sales No. 43 and No. 45 was linear in form. Although this form is easy to depict it has three disadvantages which may affect the socially optimal level of production. At certain levels of production, a linear royalty causes abrupt jumps in the royalty rate charged on increments in output leading producers to make socially non-optimal production decisions in order to minimize these royalty impacts on revenues. Marginal royalty rates also can reach very high levels even though average rates are low. In addition, because production costs are non-linear it can be shown that the royalty rate schedule should more closely conform to the functional form of these costs in order to minimize production losses.

The fixed sliding scale formula operates in the following way: when the quarterly value of production, adjusted for inflation, is less than $15.929026 million, a royalty of 16.66667 percent in amount or value or production saved, removed or sold will be due on the unadjusted value or amount of production. When the adjusted quarterly value of production is equal to or greater than $15.929026 million, but less than or equal to $3423.822697 million, the royalty percent due on the unadjusted value is given by the formula

$R_i = b(\mathrm{Ln}(V_i/S))$

Where:

R_i = the percent royalty that is due and payable on the unadjusted amount or value of all production saved, removed or sold in quarter ,

$b = 9.0$

V_i = the value of production in quarter , adjusted for inflation, in millions of dollars

$S = 2.5$

When the adjusted quarterly value of production is greater than $3423.822697 million, a royalty of 65.00000 percent in amount or value of production saved, removed or sold will be due on the unadjusted quarterly value of production. Thus, in no instance will the quarterly royalty due exceed 65.00000 percent in amount or value of quarterly production saved, removed or sold.

When the adjusted quarterly value of production is greater than $3423.822697 million, a royalty of 65.00000 percent in amount or value of production saved, removed or sold will be due on the unadjusted quarterly value of production. Thus, in no instance will the quarterly royalty due exceed 65.00000 percent in amount or value of quarterly production saved, removed or sold.

The form of the sliding scale royalty schedule is illustrated in Figure 1. Note that the effective quarterly royalty rate depends upon the inflation adjusted quarterly value of production. However, this rate is applied to the unadjusted quarterly value of production to determine the royalty payments due.

[4310-84-M]

TRACTS TO BE OFFERED FOR BONUS WITH A FIXED SLIDING SCALE ROYALTY

49-1, 49-2, 49-3, 49-4, 49-5, 49-6, 49-7, 49-8, 49-9, 49-10, 49-11, 49-13, 49-15, 49-16, 49-17, 49-18, 49-38, 49-39, 49-43, 49-46, 49-84, 49-85, 49-86, 49-87, 49-88, 49-89, 49-90, 49-91, 49-92, 49-93, 49-94, 49-95, 49-96, 49-97, 49-98, 49-99, 49-101, 49-102, 49-104, 49-105, 49-106, 49-107, 49-108, 49-109, 49-110, 49-111, 49-112, 49-113, 49-114, 49-115, 49-116, 49-118, 49-119, 49-120, 49-123, 49-124, 49-125, and 49-126.

TRACTS TO BE OFFERED FOR BONUS BIDDING WITH A FIXED CONSTANT ROYALTY

Bids on the remaining tracts to be offered at this sale must be on a cash bonus with a fixed royalty of 16⅔ percent.

The selection of tracts of be offered under the sliding scale royalty system was made for the following reasons:

1. A sufficient number of tracts was needed to provide data for valid statistical analysis while limiting the risk of losses cause by unforeseen problems which could arise in the use of any new bidding system A sample size of approximately 52 percent or 58 tracts was determined to be appropriate.

2. The range and distribution of the characteristics of sliding scale royalty tracts were to match, as closely as possible, the range and distribution of the characteristics of the tracts being offered in the sale. Such characteristics include estimated resources, water depth, structure depth, favorable vs. unfavorable location of tracts on structures, and the distribution of tracts across trends.

ARNOLD E. PETTY,
Acting Associate Director,
Bureau of Land Management.

Approved: January 23, 1979.

CECIL D. ANDRUS,
Secretary of the Interior.

[4310-84-M]

MID-ATLANTIC OUTER CONTINENTAL SHELF OIL AND GAS LEASE SALE NO. 49

Bidding and Sale Information

1. *Authority.* This notice is published pursuant to the Outer Continental Shelf Lands Act (43 U.S.C. 1331-1343), as amended, and the regulations issued thereunder (43 CFR Part 3300).

2. *Filing of Bids.* Sealed bids will be received by the Manager, New York Outer Continental Shelf (OCS) Office, Bureau of Land Management, 26 Federal Plaza, Suite 32-120, New York, New York 10007. Bids may be delivered, either by mail or in person, to the above address until 4:30 p.m., e.s.t., February 27, 1979; or by personal delivery to Felt Forum, 8th Avenue and 33rd Streets, New York, New York 10001, between the hours of 8:30 a.m., e.s.t., and 9:30 a.m., e.s.t., February 28, 1979. Bids received by the Manager later than the times and dates specified above will be returned unopened to the bidders. Bids may not be modified or withdrawn unless written modification or withdrawal is received by the Manager prior to 9:30 a.m., e.s.t., February 28, 1979. All bids must be submitted and will be considered in accordance with applicable laws and regulations, including 43 CFR Part 3300. The list of restricted joint bidders which applies to this sale was published in 43 FR 49856, October 25, 1978.

3. *Method of Bidding.* A separate bid in a sealed envelope, labeled "Sealed bid for Oil and Gas Lease (insert number of tract), not to be opened until 10 a.m., e.s.t., February 28, 1979," must be submitted for each tract. A suggested form appears in paragraph 17 of this notice. Bidders are advised that tract numbers are assigned solely for administrative purposes and are not the same as block numbers found on official protraction diagrams. All bids received shall be deemed submitted for a numbered tract. Bidders must submit with each bid one-fifth of the cash bonus in cash or by cashier's check, bank draft, certified check, or money order payable to the order of the Bureau of Land Management. No bid for less than a full tract as described in paragraph 13 will be considered. Bidders submitting joint bids must state on the bid form the proportionate interest of each participating bidder, in percent to a maximum of five decimal places, as well as submit a sworn statement that the bidder is qualified under 43 CFR Subpart 3302. The suggested form for this statement to be used in joint bids appears in paragraph 18. Other documents may be required of bidders under 43 CFR 3302.4. Bidders are warned against violation of 18 U.S.C. 1860, prohibiting unlawful combination or intimidation of bidders.

4. *Bonus Bidding With a Fixed Sliding Scale Royalty.* Bids on tracts 49-1, 49-2, 49-3, 49-4, 49-5, 49-6, 49-7, 49-8, 49-9, 49-10, 49-11, 49-13, 49-15, 49-16, 49-17, 49-18, 49-38, 49-39, 49-43, 49-46, 49-84, 49-85, 49-86, 49-87, 49-88, 49-89, 49-90, 49-91, 49-92, 49-93, 49-94, 49-95, 49-96, 49-97, 49-98, 49-99, 49-101, 49-102, 49-104, 49-105, 49-106, 49-107, 49-108, 49-109, 49-110, 49-111, 49-112, 49-113, 49-114, 49-115, 49-116, 49-118, 49-119, 49-120, 49-123, 49-124, 49-125, and 49-126, must be submitted on a cash bonus bid basis with the percent royalty due in amount or value of production saved, removed or sold fixed according to the sliding scale formula described below. This formula fixes the percent royalty at a level determined by the value of lease production during each calendar quarter. For purposes of determining the percent royalty due on production during a quarter, the value of production during the quarter will be adjusted for inflation as described below. The determination of the value of the production on which royalty is due will be made pursuant to 30 CFR 250.64 and Sec. 6(b) of the lease form.

The fixed sliding scale formula operates in the following way: when the quarterly value of production, adjusted for inflation, is less than $15.92026 million, a royalty of 16.66667 percent in amount or value of production saved, removed or sold will be due on the unadjusted value or amount of production. When the adjusted quarterly value of production is equal to or greater than $15.929026 million, but less than or equal to $3423.822697 million, the royalty percent due on the unadjusted value or amount of production is given by

$$R_j = b[\mathrm{Ln}\,(V_j/S)]$$

Where:

R_j = the percent royalty that is due and payable on the unadjusted amount or value of all production saved, removed or sold in quarter j
b = 9.0
Ln = natural logarithm
V_j = the value of production in quarter j, adjusted for inflation, in millions of dollars
S = 2.5

When the adjusted quarterly value of production is greater than $3423.822697 million, a royalty of 65.00000 percent in amount or value of production saved, removed or sold will be due on the unadjusted quarterly value of production. Thus, in no instance will the quarterly royalty due exceed 65.00000 percent in amount or value of quarterly production saved, removed or sold.

In determining the quarterly percent royalty due, R_j, the calculation will be rounded to five decimal places (for example, 18.59859 percent). This calculation will incorporate the adjusted quarterly value of production, V_j, in millions of dollars, rounded to the sixth digit, i.e., to the nearest dollar (for example, 19.743026 millions of dollars).

The form of the sliding scale royalty schedule is illustrated in Figure 1. Note that the effective quarterly royalty rate depends upon the inflation adjusted quarterly value of production. However, this rate is applied to the unadjusted quarterly value of production to determine the royalty payments due.

a Column (2) divided by 150.0 (assumed value of GNP fixed weighted price index at time leases are issued).

b Column (1) divided by Inflation Factor.

c Column (1) times Column (5).

[4310-84-M]

In adjusting the quarterly value of production for use in calculating the percent royalty due on production during the quarter, the actual value of production will be adjusted to account for the effects of inflation by dividing the actual value of production by the following inflation adjustment factor. The inflation adjustment factor used will be the ratio of the GNP fixed weighted price index for the calendar quarter preceding the quarter of production to the value of that index for the quarter preceding the issuance of the lease. The GNP fixed weighted price index is published monthly in the Survey of Current Business by the Bureau of Economic Analysis, U.S. Department of Commerce. The percent royalty will be due and payable on the actual amount or value of production saved, removed, or sold as determined pursuant to 30 CFR 250.64 and Sec. 6 (b) of the lease form. The timing of procedures for inflation adjustments and determinations of the royalty due will be specified at a later date. Table 1 provides hypothetical examples of quarterly royalty calculations using the sliding scale formula just described under two different values for the quarterly price index.

Leases awarded on the basis of a cash bonus bid with fixed sliding scale royalty will provide for a yearly rental or mininim royalty payment of $8 per hectare or fraction thereof.

Bidders for these tracts should recognize that the Department of Energy is authorized, under Section 302 (b) and (c) of the Department of Energy Organization Act, to establish production rates for all Federal oil and gas leases.

5. *Bonus Bidding With a Fixed Constant Royalty.* Bids on the remaining tracts to be offered at this sale must be on a cash bonus basis with a fixed royalty of 16⅔ percent. Leases which may be issued will provide for a yearly rental payment or minimum royalty payment of $8 per hectare or fraction thereof. A suggested cash bonus bid form is shown in paragraph 17.

6. *Equal Opportunity.* Each bidder must have submitted by 9:30 a.m., e.s.t., February 28, 1979, the certification required by 41 CFR 60-1.7(b) and Executive Order No. 11246 of September 24, 1965, as amended by Executive Order No. 11375 of October 13, 1967, on the Compliance Report Certification Form, Form 1140-8 (November 1973), and the Affirmative Action Representation Form, Form 1140-7 (December 1971).

7. *Bid Opening.* Bids will be opened on February 28, 1979, beginning at 10 a.m., e.s.t. at the address stated in paragraph 2. The opening of the bids is for the sole purpose of publicly announcing and recording bids received and no bids will be accepted or rejected at that time. If the Department is prohibited for any reason from opening any bid before midnight, February 28, 1979, that bid will be returned unopened to the bidder, as soon thereafter as possible.

8. *Deposit of Payment.* Any cash, cashier's checks, certified checks, bank drafts, or money orders submitted with a bid may be deposited in a suspense account in the Treasury during the period the bids are being considered. Such a deposit does not constitute and shall not be construed as acceptance of any bid on behalf of the United States.

9. *Withdrawal of Tracts.* The United States reserves the right to withdraw any tract from this sale prior to issuance of a written acceptance of a bid for that tract.

10. *Acceptance or Rejection of Bids.* The United States reserves the right to reject any and all bids for any tract. In any case, no bid for any tract will be accepted and no lease for any tract will be awarded to any bidder unless:

(a) The bidder has complied with all requirements of this notice and applicable regulations;

(b) The bid is from the highest responsible, qualified bidder; and

(c) The amount of the bid has been determined to be adequate by the Secretary of the Interior.

No bid will be considered for acceptance unless it offers a cash bonus in the amount of $62 or more per hectare or fraction thereof.

11. *Successful Bidders.* Each person who has submitted a bid accepted by the Secretary of the Interior will be required to execute copies of the lease specified below, pay the balance of the cash bonus bid together with the first year's annual rental and satisfy the bonding requirements of 43 CFR 3304.1 within the time provided in 43 CFR 3302.5.

12. *Protraction Diagram.* Tracks offered for lease may be located on the following protraction diagrams which are available from the Manager, New York Outer Continental Shelf Office at the address stated in paragraph 2, at $2 each.

(a) Outer Continental Shelf Official Protraction Diagram No. NJ 18-3.

(b) Outer Continental Shelf Official Protraction Diagram No. NJ 18-5 Salisbury.

(c) Outer Continental Shelf Official Protraction Diagram No. NJ 18-6.

(d) Outer Continental Shelf Official Protraction Diagram No. NJ 18-8 Chincoteague.

13. *Tract Descriptions.* The tracts offered for bid are as follows:

NOTE.—There are gaps in the numbers of the tracts listed. Some of the blocks identified in the final environmental statement are not included in this notice.

[4310-84-M]

14. *Lease Terms and Stipulations.* All leases issued as a result of this sale will be for an initial term of 5 years. Leases issued will be on Form 3300-1 (September 1978), available from the Manager, New York Outer Continental Shelf Office, at the address stated in paragraph 2. Section 6 of the lease form will be amended for tracts offered on a cash bonus basis with a fixed sliding scale royalty, listed in Paragraph 4, as follows:

Sec. 6 *Royalty on Production.* (a) To pay the lessor a royalty of that percent in amount or value of production saved, removed or sold from the leased area as determined by the sliding scale royalty formula as follows. When the quarterly value of production, adjusted for inflation, is less than $15.929026 million, a royalty of 16.66667 percent in amount or value of production saved, removed or sold will be due on the unadjusted value or amount of production. When the adjusted quarterly value of production is equal to or greater than $15.929026 million, but less than or equal to $3423.822697 million, the royalty percent due on the unadjusted value or amount of production is given by

$$R_j = b[Ln(V_j/S)]$$

Where:
R_j = the percent royalty that is due and payable on the unadjusted amount or value of all production saved, removed or sold in quarter j
b = 9.0
Ln = natural logarithm
V_j = the value of production in quarter j, adjusted for inflation, in millions of dollars
S = 2.5

When the adjusted quarterly value of production is greater than $3423.822697 million, a royalty of 65.00000 percent in amount or value of production saved, removed or sold will be due on the unadjusted quarterly value of production. Thus, in no instance will the quarterly royalty due exceed 65.00000 percent in amount or value of quarterly production saved, removed or sold.

In determining the quarterly percent royalty due, R_j, the calculation will be rounded to five decimal places (for example, 16.59859 percent). This calculation will incorporate the adjusted quarterly value of production, V_j, in millions of dollars, rounded to the sixth digit, i.e., to the nearest dollar (for example, 19.743026 millions of dollars) * * *.

Except as otherwise noted, the following stipulations will be included in each lease resulting from this sale. In the following stipulations the term Supervisor refers to the Atlantic Area Oil and Gas Supervisor for Operations of the Geological Survey and the term Manager refers to the Manager of the New York OCS Office of the Bureau of Land Management.

STIPULATION No. 1

If the Supervisor having reason to believe that a site, structure or object of historical or archeological significance hereinafter referred to as "cultural resource", may exist in the lease area, gives the lessee written notice that the lessor is invoking the provisions of this stipulation, the lessee shall upon receipt of such notice comply with the following requirements:

Prior to any drilling activity or the construction or placement of any structure for exploration or development on the lease, including but not limited to, well drilling and pipeline and platform placement, hereinafter in this stipulation referred to as "operation," the lessee shall conduct remote sensing surveys to determine the potential existence of any cultural resource that may be affected by such operations. All data produced by such remote sensing surveys as well as other pertinent natural and cultural environmental data shall be examined by a qualified marine survey archeologist to determine if indications are present suggesting the existence of a cultural resource that may be adversely affected by any lease operation. A report of this survey and assessment prepared by the marine survey archeologist shall be submitted by the lessee to the Supervisor and to the Manager for review.

If such cultural resource indicators are present the lessee shall: (1) locate the site of such operation so as not to adversely affect the identified location; or (2) establish, to the satisfaction of the supervisor, on the basis of further archeological investigation conducted by a qualified marine survey archeologist or underwater archeologist using such survey equipment and techniques as deemed necessary by the Supervisor, either that such operation will not adversely affect the location identified or that the potential cultural resource suggested by the occurrence of the indicators does not exist.

A report of this investigation prepared by the marine survey archeologist or underwater archeologist shall be submitted to the Supervisor and Manager for their review. Should the Supervisor determine that the existence of a cultural recource which may be adversely affected by such operation is sufficiently established to warrant protection, the lessee shall take no action that may result in an adverse effect on such cultural resource until the Supervisor has given directions as to its preservation.

The lessee agrees that if any site, structure, or object of historical or archeological significance should be discovered during the conduct of any operations of the leased area, he shall report immediately such findings to the Supervisor, and make every reasonable effort to preserve and protect the cultural resource from damage until the Supervisor has given directions as to its preservation.

STIPULATION No. 2

If biological populations or habitats which may require additional protection are identified by the Supervisor in the leasing area, the Supervisor will require the lessee to conduct environmental surveys or studies, as approved by the Supervisor, to determine the extent and composition of biological populations or habitats, and the effects of proposed or existing operations on the populations or habitats which might require additional protective measures. The Supervisor shall provide written notice to the lessee of his decision to require such surveys. The nature and extent of any surveys or studies will be determined by the Supervisor on a case-by-case basis.

Based on any surveys or studies which the Supervisor may require of the lessee, the Supervisor may require the lessee to: (1) relocate the site of operations so as not to affect adversely the significant biological populations or habitats deserving protection; or (2) modify operations in such a way as not to affect adversely the significant biological populations or habitats deserving protection; or (3) establish to the satisfaction of the Supervisor that such operations will not adversely affect the significant biological populations or habitats, deserving protection.

Operations, including siting, must be conducted to insure the protection and continued viability of significant biological populations or habitats in a manner consistent with the other purposes of the Outer Continental Shelf Lands Act, as amended.

The lessee shall submit all data obtained in the course of such surveys to the Supervisor, with the locational information for drilling or other activity. The lessee may take no action that might result in any effect on the biological populations or habitats until the Supervisor provides written directions to the lessee, with regard to permissible actions.

In the event that important biological populations or habitats are identified subsequent to commencement of operations, the lessee shall make every reasonable effort to preserve and protect all biological populations and habitats within the lease area, until the Supervisor provides written instructions to the lessee with regard to the biological populations or habitats identified.

STIPULATION No. 3.

Pipelines will be required, (1) if pipeline rights-of-way can be determined and obtained, (2) if laying such pipelines is technically feasible and environmentally preferable, and (3) if, in the option of the lessor, pipelines can be laid without net social loss, taking into account any incremental costs of pipelines over alternative methods of transportation and any incremental benefits in the form of increased environmental protection or reduced multiple use conflicts. The lessor specifically reserves the right to require that any pipeline used for transporting production to shore be placed in certain designated management areas. In selecting the means of transportation, consideration will be given to any recommendation of the intergovernmental planning program for assessment and management of transportation of Outer Continental Shelf oil and gas with the participation of Federal, State, and local government and industry. Where feasible and environmentally preferable, all pipelines, including both flow lines and gathering lines for oil and gas, shall be buried to a depth suitable for adequate protection from water currents, sand waves, storm scouring, fisheries trawling gear, and other factors as determined on a case-by-case basis.

Following the completion of pipeline installation, no crude oil production will be transported by surface vessel from offshore production sites, except in the case of emergency. Determinations as to emergency conditions and appropriate responses to these conditions will be made by the Supervisor. Where the three criteria set forth in the first sentence of this stipulation are not met and surface transportation must be employed, all vessels used for carrying hydrocarbons to shore from the leased area will conform with all standards established for such vessels pursuant to the Ports and Waterways Safety Act of 1972, as amended (42 U.S.C. 391a).

V 44 / 20 JA 29 79 UMI

V 4 4 / 2 0 J A 2 9 7 9 UMI

STIPULATION No. 4

Drilling cuttings and drilling muds shall be disposed of by shunting the material through a downpipe to a depth of 20-50 feet below the ocean surface or by transporting these materials to pre-selected disposal sites approved by the Supervisor, and the Environmental Protection Agency. Based on the compostition of produced formation waters and the site-specific environmental conditions, the Supervisor may require reinjection of such formation waters.

STIPULATION No. 5

(Leases for the following tracts will include this stipulation, which will apply only to operations within the designated portion of such tracts: 49-22, NE¼SE¼; 49-28, SE¼; and 49-29, SE¼NW¼.)

Before operations may proceed on the designated portion of this lease block lessee must demonstrate to the Supervisor's satisfaction that a particular hazardous accumulation of shallow gas does not exist, or that drilling plans can be designed to assure safe operations in the area.

STIPULATION No. 6

(Leases for the following tracts will include this stipulation, which will apply only to operations within the designated portions of such tracts: 49-29, S½SE¼; 49-30, S½, NE¼, SE¼NW¼; 49-51, S½, NE¼, S½NW¼, NE¼NW¼; 49-56, SE¼, S½NE¼; 49-58, E½; 49-64, S½, NE¼, SE¼NW¼; 49-70, S½, S½NE¼; 49-71, S½, NE¼, S½NW¼; 49-76, S½, S½NE¼; 49-80, S½SE¼, NE¼SE¼; 49-81, S½, NE¼, S½NW¼, NE¼NW¼; 49-88, SE¼SW¼; 49-92, W½; 49-94, E½SE¼; 49-96, SE¼, SE¼NE¼; 49-97, W½; 49-98, SE¼SE¼; 49-99, S½, NE¼, SE¼NW¼; 49-101, S½, NW¼; 49-102, S½, NE¼, S½NW¼; 49-104, E½NE¼, SW¼NE¼, 49-107, SE¼SE¼; 49-108, S½, S½NE¼, SE¼NW¼; 49-111, E½, SE¼SW¼; 49-113, W½; 49-115, E½SE¼, SE¼NE¼; 49-118, W½; 49-119, S½SE¼; 49-120, S½, NE¼; 49-124, E½; 49-125, S½, NW¼; 49-126, S½, NE¼, E½NW¼, SW¼NW¼; 49-132, E½SE¼; 49-135, SE¼SE¼; and 49-136, S½, NE¼.)

Exploratory drilling operations, emplacement of structures (platforms) or seafloor wellheads for production or storage of oil or gas, and the emplacement of pipelines will not be allowed within the designated portion of this lease block unless or until the lessee has demonstrated to the Supervisor's satisfacton that mass movement of sediments is unlikely or that exploratory drilling operations, structures (platforms), casing, wellheads and pipelines can be safely designed to protect the environment in case such mass movement occurs at the proposed location. If exploratory drilling operations are allowed, site specific surveys shall be conducted to determine the potential for slumping and mass movement of sediments. If emplacement of structures (platforms) or seafloor wellheads for production or storage of oil or gas are allowed all sump blocks or mass movements of sediments in the lease block must be mapped. Down-hole pressure-actuated control devices must be located below the base of the slump blocks located in the area in order to protect the environment in case such mass movement occurs at the proposed location. This may necessitate all exploration for and development of oil and gas be performed from locations outside of the area of unstable sediments, either within or outside of this lease block.

STIPULATION No. 7

(To be included only in leases resulting from this sale for tracts 49-24, 49-47, 49-57, 49-59, 49-72, 49-77, 49-78, 49-83, 49-105, 49-109, 49-112, and 49-116.)

Exploratory drilling operations, emplacement of structures (platforms) or seafloor wellheads for production or storage of oil or gas, and the emplacement of pipelines will not be allowed within this lease block unless or until the lessee has demonstrated to the Supervisor's satisfaction that mass movement of sediments is unlikely or that exploratory drilling operations, structures (platforms), casing, wellheads and pipelines can be safely designed to protect the environment in case such mass movement occurs at the proposed location. If exploratory drilling operations are allowed, site specific surveys shall be conducted to determine the potential for slumping and mass movement of sediments. If emplacement of structures (platforms) or seafloor wellheads for production or storage of oil or gas are allowed all slump blocks or mass movements of sediments in the lease block must be mapped. Down-hole pressure-actuated control devices must be located below the base of the slump blocks located in the area in order to protect the environment in case such mass movement occurs at the proposed location. This may necessitate all exploration for and development of oil or gas be performed from locations off this lease block and outside of the area of unstable sediments.

STIPULATION No. 8

(To be included only in lease resulting from this sale for tracts 49-1, 49-2, 49-3, 49-4, 49-5, 49-6, 49-7, 49-8, 49-9, 49-10, 49-20, 49-21, 49-22, 49-25, 49-26, 49-27, 49-33, 49-34, 49-35, 49-38, 49-39, 49-43, 49-46, 49-47, 49-51, 49-55, 49-56, 49-57, 49-58, 49-59, 49-61, 49-62, 49-63, 49-64, 49-66, 49-67, 49-68, 49-69, 49-70, 49-71, 49-72, 49-73, 49-74, 49-75, 49-76, 49-77, 49-78, 49-79, 49-80, 49-81, 49-82, 49-83, 49-84, 49-85, 49-86, 49-87, 49-88, 49-89, 49-90, 49-91, 49-92, 49-93, 49-94, 49-96, 49-97, 49-98, 49-99, 49-101, 49-102, 49-105, 49-123, 49-124, 49-132, 49-133, 49-134, 49-135, and 49-136)

(a) Whether or not compensation for such damage or injury might be due under a theory of strict liability or otherwise, the lessee assumes all risks of damage or injury to persons or property, which occurs in, on, or above the Outer Continental Shelf, to any person or persons who are agents, employees, or invitees of the lessee, its agents, independent contractors or subcontractors doing business with the lessee in connection with any activities being performed by or on behalf of the lessee in, on, or above the Outer Continental Shelf, if such injury or damage to such person or property occurs by reason of the activities of any agency of the U.S. Government, its contractors or subcontractors, or any of their officers, agents, or employees being conducted as a part of, or in connection with, the programs and activities of the Commanding Officer, Fleet Area Control and Surveillance Facility, Virginia Capes OPAREA, Naval Air Station, Oceana, Virginia. The lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault, of the United States, its contractors or subcontractors, or any of their officers, agents, or employees.

Notwithstanding any limitation of the lessee's liability in Sec. 14 of the lease, the lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault, of the United States, its contractors or subcontractors, or any of theri officers, agents, or employees. The lessee further agrees to indemnify and save harmless the United States against and to defend at its own expense the United States against all claims for loss, damage, or injury sustained by the lessee, and to indemnify and save harmless the United States against, and to defend at its own expense the United States against, all claims for loss, damage, or injury sustained by the agents, employees, or invitees of the lessee, its agents, or any independent contractors or subcontractors doing business with the lessee in connection with the programs and activities of the aforementioned military installations, whether the same be caused in whole or in part by the negligence or fault of the United States, its contractors, or subcontractors, or any of their officers, agents, or employees and whether such claims might be sustained under a theory of strict or absolute liability or otherwise.

(b) The lessee, when operating or causing to be operated on its behalf boat or aircraft traffic into the individual designated warning areas, shall enter into an agreement with the Commanding Officer, Fleet Area Control and Surveillance Facility, Virginia Capes OPAREA, Naval Air Station, Oceana, Virginia, utilizing an individual designated warning area prior to commencing such traffic. Such agreement will provide for positive control of boats and aircraft operating into the warning areas at all times.

STIPULATION No. 9

(To be included only in leases resulting from this sale for tracts 49-55, 49-56, 49-57, 49-58, 49-59, 49-61, 49-62, 49-63, 49-64, 49-66, 49-67, 49-68, 49-69, 49-70, 49-71, 49-72, 49-73, 49-74, 49-75, 49-76, 49-77, 49-78, 49-79, 49-80, 49-81, 49-82, 49-83, 49-84, 49-85, 49-86, 49-87, 49-88, 49-89, 49-90, 49-91, 49-92, 49-93, 49-94, 49-96, 49-97, 49-98, 49-99, 49-101, 49-102, 49-103, 49-104, 49-105, 49-106, 49-107, 49-108, 49-109, 49-110, 49-111, 49-112, 49-113, 49-114, 49-115, 49-116, 49-118, 49-119, 49-120, 49-123, 49-124, 49-125, 49-126, 49-132, 49-133, 49-134, 49-135, and 49-136.)

(a) Whether or not compensation for such damage or injury might be due under a theory of strict or absolute liability or otherwise, the lessee assumes all risk of damage or injury to persons or property, which occurs in, on, or above the Outer Continental Shelf, to any person or persons or to any property of any person or persons who are agents, employees or invitees of the lessee, its agents, independent contractors or subcontractors doing business with the lessee in connection with any activities being performed by or on behalf of the lessee in, on, or above the Outer Continental Shelf, if such injury or damage to such person or property occurs by reason of the activities of any agency of the U.S. Government, its contractors or subcontractors, or any of their officers, agents, or employees being conducted as a part of, or in connection with, the programs and activities of the National Aeronautics and Space Administration (NASA), Wallops Flight Center. The lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault, of the United States, its contractors or subcontractors, or any of their officers, agents, or employees.

Notwithstanding any limitation of the lessee's liability in Sec. 14 of the lease, the lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault, of the United States, its contractors, or subcontractors, or any of their officers, agents or employees. The lessee further agrees to indemnify and save harmless the United States against and to defend at its own expense the United States against all claims for loss, damage, or injury sustained by the lessee, and to indemnify and save harmless the United States against, and to defend at its own expense the United States against, all claims for loss, damage, or injury sustained by the agents, employees, or invitees of the lessee, its agents, or any independent contractors, or subcontractors doing business with the lessee in connection with the programs and activities of the NASA, Wallops Flight Center whether the same be caused in whole or in part by the negligence or fault of the United States, its contractors, or subcontractors or any of their officers, agents, or employees and whether such claims might be sustained under a theory of strict or absolute liability or otherwise.

(b) The lessee, when operating or causing to be operated on its behalf, boat, ship, or aircraft traffic into the leased area or surrounding area of the lease, including any part of the Outer Continental Shelf between the 35th and 39th parallels, shall enter into an agreement with the Director, Wallops Flight Center prior to commencing such traffic. Such agreement shall provide for positive control of boats, ships, and aircraft operating in the above designated areas and will provide for the avoidance of interference with the programs and activities of the NASA Wallops Flight Center.

(c) Upon recommendation by the Director, Wallops Flight Center when the activities of the NASA Wallops Flight Center may endanger personnel or property, the lessee agrees, upon receipt of the notice from the Supervisor, to evacuate all personnel from all structures on the lease and to shut-in and secure all wells and other equipment, including pipelines on the lease, within forty-eight (48) hours or within such longer period as may be specified by the Supervisor. The Supervisor shall not require evacuation of personnel and shutting-in and securing of equipment for a period of time greater than seventy-two (72) hours; however, such period of time may be extended by subsequent notice from the Supervisor. Equipment and structures may remain in place on the lease during such time as the evacuation remains in effect.

(d) The lessee agrees to control his own electromagnetic emissions and those of his agents, employees, invitees, independent contractors or subcontractors emanating from the leased area or surrounding area of the lease, including any part of the Outer Continental Shelf between the 35th and 39th parallels, in accordance with the requirements specified by the Director, Wallops Flight Center, to the degree necessary to prevent damage to, or unacceptable interference with, the programs and activities of the NASA, Wallops Flight Center.

Necessary monitoring, control and coordination with the lessee, his agents, employees, invitees, independent contractors or subcontractors, will be effected by the Director, Wallops Flight Center; provided, however, that control of such electromagnetic communication shall in no instance prohibit all manner of electromagnetic communications during any period of time between a lessee, its agents, employees, invitees, independent contractors or subcontractors and onshore facilities.

STIPULATION No. 10

(To be included in any leases resulting from this sale for the sliding scale royalty tracts listed in paragraph 4 of this notice.)

(a) The royalty rate on production saved, removed or sold from this lease is subject to consideration for reduction under the same authority that applies to all other oil and gas leases on the Outer Continental Shelf (30 CFR 250.12(e)). The Director, Geological Survey, may grant a reduction for only one year at a time. Reduction of royalty rates will not be approved unless production has been underway for one year or more.

(b) Although the royalty rate specified in Sec. 6(a) of this lease or as subsequently modified in accordance with applicable regulations and stipulations is applicable to all production under this lease, not more than 16⅔ percent of the production saved, removed or sold from the lease area may be taken as royalty in amount, except as provided in Sec. 15(d) of this lease: the royalty on any portion of the production saved, removed or sold from the lease in excess of 16⅔ percent may only be taken in value of the production saved, removed or sold from the lease area.

15. *Information to Lessees.* On September 18, 1978, the OCS Lands Act Amendments of 1978 were enacted. Some sections of current regulations applicable to OCS leasing operations are inconsistent with this new legislation, and the legislation requires the issuance of some new regulations. The inconsistencies will be corrected by rulemakings and the new regulations will be issued as soon as possible. Nevertheless, bidders are notified that provisions of the OCS Lands Act Amendments shall apply to all leases offered at this lease sale and shall supersede all inconsistent provisions in current regulations applicable to OCS leasing operations.

Some of the tracts offered for lease may fall in areas which may be included in fairways, precautionary zones, or traffic separation schemes. Corps of Engineers permits are required for construction of any artifical islands, installations and other devices permanently or temporarily attached to the seabed located on the Outer Continental Shelf in accordance with the Outer Continental Shelf Lands Act, as amended.

Bidders are advised that the Departments of the Interior and Transportation have entered into a Memorandum of Understanding dated May 6, 1976, concerning the design, installation, operation and maintenance of offshore pipelines. Bidders should consult both Departments for regulations applicable to offshore pipelines.

Bidders are also advised that in accordance with Sec. 16 of each lease offered at this sale the lessor may require a lessee to operate under a unit, pooling or drilling agreement and that the lessor will give particular consideration to requiring unitization in instances where one or more reservoirs underlie two or more leases with either a different royalty rate or a royalty rate based on a sliding scale.

In the enforcement of Stipulation 2, the Supervisor will receive recommendations from a committee composed of designated representatives of the Bureau of Land Management, U.S. Fish and Wildlife Service, U.S. Geological Survey, the National Marine Fisheries Service, the Environmental Protection Agency, and representatives of the affected States. It is intended that this committee will remain in existence throughout the operating life of the field. The Supervisor will consult with the committee in identifying areas of resources of biological importance on the conduct of the biological surveys by lessees, and on the appropriate course of action after the surveys have been conducted.

The committee has completed a preliminary review of the sale area and has determined that it will recommend to the Supervisor that no preexploration surveys be required on any of the tracts offered, with the possible exception of those noted below. The committee may recommend that surveys be required prior to development.

Exception The BLM is currently funding a study of the canyon areas in the Mid and North Atlantic regions. This Canyon Assessment Study shall involve an analysis of historical data and a field surveys of ten of the seventeen canyon blocks. The analysis of historical data, available in April, 1979, may provide information on the faunal communities in Tracts 49-92, 49-96, 49-97, 49-101, 49-104, 49-113, 49-118, 49-124, 49-125, and 49-126. Preliminary interpretations of the field surveys, conducted in Tracts 49-113, 49-118, 49-124, 49-125, and 49-126, shall be available in July, 1979. Seven other blocks, although not included in the Canyon Assessment Study, may also be evaluated at that time because of their bathymetric characteristics. These tracts are 49-88, 49-106, 49-109, 49-111, 49-116, 49-120, and 49-132. Based on the analysis of the historical and field data, the committee may recommend to the Supervisor that preexploration surveys be required on any or all of the above mentioned tracts.

In applying safety, environmental, and conservation laws and regulations, the Supervisor, in accordance with

V 4 4 / 2 0 J A 2 9 7 9 UMI

Sec. 21(b) of the OSC Lands Act, as amended, will require the use of the best available and safest technologies which are determined to be economically feasible. To the extent practicable, the Supervisor will consult with the relevant Federal agencies and the affected State(s) in the execution of these responsibilities.

16. *OCS Orders.* Operations on all leases resulting from this sale will be conducted in accordance with the provisions of all Mid-Atlantic Orders, as of their effective date, and any other applicable OCS Order as it becomes effective.

17. *Suggested Bid Form.* It is suggested that bidders submit their bids to Manager, New York Outer Continental Shelf Office, in the following form:

OIL AND GAS BID

The following bid is submitted for an oil and gas lease on the tract of the Outer Continental Shelf specified below:

Tract No.

Total Amount Bid

Amount per Hectare

[Serial No. AR-032505]

ARIZONA

Order Providing for Opening of Public Lands

1. Pursuant to the Act of March 1, 1907 (34 Stat. 1052; 43 U.S.C. 682) entitled "an Act to authorize the sale of public lands for cemetery purposes", a patent was issued on the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 7 S., R. 27 E.,
Sec. 21, SE¼NW¼SE¼, NE¼SW¼SE¼, NW¼SE¼SE¼.

The area described aggregates 30 acres in Graham County, Arizona.

2. The lands have not been used by the patentee for the purposes allowed by the granting Act and have been reconveyed to the United States.

3. The lands are located approximately 9 miles east of Safford, Arizona. Topography varies from gentle rolling to level desert land. Elevation is approximately 3100 feet above sea level.

4. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the subject lands are hereby opened to operation of the public land laws, including the mining laws (Ch. 2, Title 30 U.S.C.). The lands have been and remain open to filing under the mineral leasing laws. All valid applications received at or prior to 10:00 a.m., on March 1, 1979, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

5. Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Dated: January 18, 1979.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

NATIONAL PARK SERVICE

GOLDEN GATE NATIONAL RECREATION AREA ADVISORY COMMISSION

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Golden Gate National Recreation Areas Advisory Commission will be held on February 24, 1979 at 9:30 a.m. (PST) at Tamalpais High School Student Center, Miller Avenue and Camino Alto, Mill Valley, CA.

The Advisory Commission was established by Pub. L. 92-589 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service system in Marin and San Francisco couties.

Members of the Commission are as follows:

Mr. Frank Boerger, Chairman
Ms. Amy Meyer, Secretary
Mr. Ernest Ayala
Mr. Richard Bartke
Mr. Fred Blumberg
Ms. Daphne Greene
Mr. Peter Haas, Sr.
Mr. John Jacobs
Ms. Gimmy Park Li
Mr. Joseph Mendoza
Mr. John Mitchell
Mr. Merritt Robinson
Mr. Jack Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

The major agenda items will be a vote upon the Marin County GGNRA pet policy guidelines, a Northeast Waterfront Committee report, a Fort Mason Committee report, a procedures committee report, and an update on the Sir Francis Drake ceremony.

This meeting is open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing to receive further information on this meeting or who wish to submit written statements may contact Lynn H. Thompson, General Superintendent, Golden Gate National Recreation Area, Fort Mason, San Francisco, CA 94123, telephone 415-556-2920.

Minutes of the meeting will be available for the public inspection by March 24, 1979 in the Office of the General Superintendent, Golden Gate National Recreation Area, Fort Mason, San Francisco, CA.

Dated: January 19, 1979.

LYNN H. THOMPSON,
General Superintendent, Golden Gate National Recreation Area.

[4310-70-M]

PICTURED ROCKS NATIONAL LAKESHORE ADVISORY COMMISSION

Meeting

Notice is hereby given in accordance with Public Law 92-463 that a meeting of the Pictured Rocks National Lakeshore Advisory Commission will be held February 24, 1979, at 10 a.m. (EDT), at the Munising Community Center, Munising, Michigan.

The Commission was established by Public Law 89-668 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the development of the Pictured Rocks National Lakeshore.

The members of the Commission are:

Dr. John Tanton (Chairman)
Mr. Leo Gariepy
Mr. Glenn C. Gregg
Mr. David C. West
Mr. James Becker

Matters to be addressed at the meeting will include a discussion of the Park Buffer Zone and General Development priorities. A brief report on planning progress will also be offered.

The meeting will be open to the public. Any member of the public may file with the Commission prior to the meeting a written statement concerning the matters to be discussed. Persons wishing further information concerning the meeting, or who wish to submit written statements, may contact Donald F. Gillespie, Superintendent, Pictured Rocks National Lakeshore, P.O. Box 40, Munising, Michigan 49862, telephone 906-387-2607.

Minutes of the meeting will be available for public inspection two weeks after the meeting at Pictured Rocks National Lakeshore headquarters at Sand Point, four miles east of Munising, Michigan.

V 4 4 / 2 0 J A 2 9 7 9 UMI

Dated January 16, 1979.

RANDALL R. POPE,
Acting Regional Director, Midwest Region.

[7020-02-M]

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-58]

CERTAIN FABRICATED STEEL PLATE FROM JAPAN

Commission Action on the Presiding Officer's Recommendation

Background. The United States International Trade Commission instituted investigation No. 337-TA-58 on Certain Fabricated Steel Plate From Japan on September 11, 1978. The investigation was based upon the allegations contained in a complaint filed on behalf of the Steel Plate Fabricators Association (Complainant) under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337). Notice of the institution of the complaint was published in the FEDERAL REGISTER on September 15, 1978 (43 FR 41299). Named as respondents in that notice were four Japanese corporations, Ishikawajima-Harima Heavy Industries, Kobe Steel Co., C. Itoh & Co., and Japan Steel Works.

On November 6, 1978, Complainant filed a motion for termination of the section 337 investigation and a request for the institution of an investigation under section 332 of the Tariff Act of 1930 (19 U.S.C. 1332). In its motion, Complainant stated continuation of the investigation would be wasteful of the resources of itself and the Commission staff. Complainant also contended that more productive results would be obtained from a nonadjudicative Commission investigation under section 332.

On December 8, 1978, the presiding officer issued his recommended determination. The presiding officer determined and recommended that there is no evidence of violation of section 337 owing to alleged collusive bidding and individual and concerted actions implementing predatory pricing schemes facilitated by alleged sales at unusually low or below cost prices. This recommended determination was rendered under Commission rule 210.53(a) (19 CFR 210.53(a)). In addition, the presiding officer recommended that Complainant's motion to terminate be granted. Finally, the presiding officer determines that Complainant's request for an investigation under Section 332 was not properly before him.

Commission determination and order. Having considered Complainant's motion to terminate this investigation and request for a Section 332 investigation, the subsequent submissions of the parties and the recommended determination of the presiding officer, and the entire adminstrative record, the Commission determines that there is no violation of section 337 of the Tariff Act of 1930, as amended, by reason of the importation into the United States and the sale of steel plate that is the subject of this investigation, and that an investigation under section 332 of the Tariff Act of 1930 is not warranted.

Therefore, the Commission grants Complainant's motion to terminate and denies Complainant's request for an investigation under secton 332.[1]

Complainant has failed to establish on the record that a past or present violation of section 337 existed or exists. Therefore, the respondents are entitled to a determination of no past or present violation of the statute in the importation into the United States or in the sale of fabricated steel.

Complainant joined to its motion for termination of the present investigation a "request for institution of Investigation under 19 U.S.C. 1332". In support of this request, Complainant stated:

> Far more productive results (than a continuation of the 337 investigation) would obtain from a non-adjudicative Commission investigation and report to the President and to Congress as to the products identified in the Complaint. Such an investigation and report, undertaken pursuant to 19 U.S.C. sec. 1332, would serve the dual purposes of alerting appropriate governmental officials of the severe problems the domestic steel plate fabricating industry faces from unfair foreign competitive practices, and of accumulating data essential to future investigations under Section 337.

The presiding officer correctly found that he lacked authority to institute a 332 proceeding and that such authority was exclusively within the province of the Commission in the absence of delegation of power. In short, Complainant's request was addressed to the wrong party. However, in this case we believe that the request should be treated as properly before the Commission, since there would be no benefit to the parties or to the Commission by requiring Complainant to refile the request.

Complainant's request for a section 332 investigation is denied at this time for the following reasons. First, Complainant has failed to describe the scope of the proposed investigation. Second, Complainant has failed to come forward with any factual support for its allegations of unfair trade practices. Third the Commission is by this order terminating an investigation concerning the same subject matter. Finally, there has been no showing that a section 332 investigation would be of benefit to Complainant or in the public interest.

Issued: January 24, 1979.

By order of the Commission.

KENNETH R. MASON,
Secretary.

[FR Doc. 79-2991 Filed 1-26-79; 8:45 am]

[1] Commissioner Alberger notes that respondent Ishikawajima-Harima Heavy Industries (IHI) made a cross motion for termination on the basis of default by the complainant. The presiding officer recommended denial of the motion. Since the Commission is granting the present motion it is unnecessary to address respondent's request for default. The investigation being terminated, all pending motions are moot.

[6820-49-M]

NATIONAL COMMISSION ON THE INTERNATIONAL YEAR OF THE CHILD, 1979

MEETING

In accordance with Section 10(a) of the Federal Advisory Committee Act (5 USC Appendix I), announcement is made of the following National Commission meetings schedule to assemble on February 8 and 9, 1979.

NATIONAL COMMISSION ON THE INTERNATIONAL YEAR OF THE CHILD

February 8, 1979—10:00 A.M. to 12:00 Noon; 1:00 P.M. to 5:00 P.M.
February 9, 1979—9:00 A.M. to 12:00 Noon; 1:00 P.M. to 3:30 P.M.
New Executive Office Building (Room 2010), 726 Jackson Place, N.W., Washington, D.C. 20506.

OPEN MEETING

Contact: Barbara P. Pomeroy, Executive Director, National Commission on the International Year of the Child, Room 505, 600 E Street, N.W., Washington, D.C. 20471.

Purpose: The National Commission serves as the focal point for the observance of all International Year of the Child activities in the country, and for all United States cooperation on International Year of the Child observances with other countries. It will provide a forum for examining the fundamental needs of children; it will create a better understanding of the needs of children; both in the United States and abroad; it will encourage and/or coordinate Federal, State, and local programs to meet these needs; and it will write a report to the President on its activities and findings, including recommendations of future actions relating to the well-being of children.

The Commission will assess and identify programs which could be endorsed or replicated nationally; receive and disseminate information, ideas, and proposals for improving the well-being of the nation's children; encourage local citizen support for meeting the basic human needs of children; such as health, nutrition, legal rights, education and physical development; and foster the creation of new programs and the improvement of existing programs directed at permanently improving the status of children.

Agenda: The Commissioners will address the aforementioned issues, especially in relation to the following: (a) media, (b) public awareness, (c) participation of children in program development, (d) children around the world, and (e) the development of special projects.

Attendance by the public will be limited to space available.

BENEDICT J. LATTERI,
Administrative Officer, National Commission on the International Year of the Child.

JANUARY 23, 1979.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

National Endowment for the Arts

MEDIA ARTS PANEL (AFI/ARCHIVAL)

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), as amended, notice is hereby given that a meeting of the Media Arts Panel (AFI/Archival) to the National Council on the Arts will be held February 13, 1979, from 9:00 a.m. to 5:30 p.m., in Room 1426, Columbia Office Complex, 2401 E Street NW., Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER of March 17, 1977, these sessions will be closed to the public pursuant to subsection (c)(4), (6) and 9(B) of section 552 of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6070.

JOHN H. CLARK,
Director, Office of Council and Panel Operations, National Endowment for the Arts.

JANUARY 19, 1979.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-348A 50-364A]

ALABAMA POWER CO. (JOSEPH M. FARLEY NUCLEAR PLANT UNITS 1 AND 2)

Order Regarding Argument

JANUARY 23, 1979.

The Board will hear argument on the exceptions filed by all parties in this antitrust case at 9:30 a.m. on Wednesday, February 28, 1979, in the Commission's Public Hearing Room, 5th floor, 4350 East-West Highway, Bethesda, Maryland.

Counsel for the Alabama Power Company will be heard first and is allotted one hour to open; counsel for the other parties will have ninety minutes for their arguments, that time to be divided equally among them unless some other arrangement is agreed to; counsel for Alabama Power will then have one-half hour for its closing argument.

Parties on the same side are encouraged to consolidate their arguments so that common issues are argued by one counsel only; duplicative arguments are obviously an inefficient use of the time available. Moreover, any attempt to touch upon every subject covered in the briefs would be neither helpful nor appropriate. Rather, it would be more useful for counsel to attempt to justify their main points by responding to the arguments most forcefully developed in their opponents' briefs.

Each party shall, by letter to the Board Secretary, promptly acknowledge receipt of this notice and advise us of the name, address and telephone number of counsel who will argue on its behalf.

It is so ordered.

For the Appeal Board.

MARGARET E. DU FLO,
Secretary to the Appeal Board.

[7590-01-M]

[Docket No. 50-293]

BOSTON EDISON CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 36 to Facility Operating License No. DPR-35, issued to Boston Edison Company (the licensee), which revised the license and Technical Specifications for operation of the Pilgrim Nuclear Power Station Unit No. 1 (the facility) located near Plymouth, Massachusetts. The amendment is effective as of its date of issuance.

This amendment changes the license and Technical Specifications relating to the receipt, possession, and use of byproduct, source and special nuclear material.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated November 12, 1976, as supplemented October 16 and November 2, 1978, (2) Amendment No. 36 to License No. DPR-35, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Plymouth Public Library on North Street in Plymouth, Massachusetts 02360. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 17th day of January 1979.

For the Nuclear Regulatory Commission.

THOMAS A. IPPOLITO,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc. 79-2878 Filed 1-26-79; 8:45 am]

[7590-01-M]

[Docket No. 50-325]

CAROLINA POWER & LIGHT CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 18 to Facility Operating License No. DPR-71, issued to Carolina Power & Light Company (the

V 4 4 / 2 0

licensee) for operation of the Brunswick Steam Electric Plant, Unit No. 1 (the facility), located in Brunswick County, North Carolina. The amendment is effective as of its date of issuance.

The amendment adds a Special Test Exception to allow lowering the reactor vessel water level for extended maintenance during the current refueling outage.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated January 18, 1978, (2) Amendment No. 18 to License No. DPR-71, and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Southport-Brunswick County Library, 109 West Moore Street, Southport, North Carolina 28461. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 19th day of January 1979.

For the Nuclear Regulatory Commission.

THOMAS A. IPPOLITO,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc. 79-2879 Filed 1-26-79; 8:45 am]

[7590-01-M]

[Docket Nos. 50-454, 50-455, 50-456, 50-457]

COMMONWEALTH EDISON CO.

Establishment of Atomic Safety and Licensing Board To Preside in Proceeding

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and/or requests for hearing and to preside over the proceeding in the event that a hearing is ordered.

COMMONWEALTH EDISON CO. (Byron Station, Units 1 and 2; and Braidwood Station, Units 1 and 2) Construction Permit Nos. CPPR-130, CPPR-131, CPPR-132, and CPPR-333

This action is in reference to a notice published by the Commission on December 15, 1978, in the FEDERAL REGISTER (43 FR 58659-60) entitled "Receipt of Application for Facility Operating Licenses; Notice of Consideration of Issuance of Facility Operating Licenses; Notice of Availability of Environmental Reports; and Notice of Opportunity for Hearing".

The Chairman of this Board and his address is as follows:

Edward Luton, Esq., Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

The other members of the Board and their addresses are as follows:

Dr. A. Dixon Callihan, Union Carbide Corporation, P.O. Box Y, Oak Ridge, Tennessee 37830.

Dr. Franklin C. Daiber, College of Marine Studies, University of Delaware, Newark, Delaware 19711.

Dated at Bethesda, Md., this 23rd day of January 1979.

ROBERT M. LAZO,
Acting Chairman, Atomic Safety and Licensing Board Panel.

[FR Doc. 79-2880 Filed 1-26-79; 8:45 am]

[7590-01-M]

[Docket No. 50-255]

CONSUMERS POWER CO.

Proposed Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has received from the Consumers Power Company (the licensee) a request dated January 3, 1979, for any commission review and approval required to replace the steam generators at the Palisades Plant (the facility) located in Covert Township, Van Buren County, Michigan. Such replacement will entail the issuance of an amendment to Provisional Operating License No. DPR-20.

Accordingly, notice is hereby given that the Commission has under consideration an amendment to this license which would authorize the licensee to remove the steam generators now in use in the facility, to replace such steam generators with new steam generators and to return the facility to operation using the new steam generators.

The Commission will not issue the amendment: (1) Until the completion of a Safety Evaluation on the licensee's request by its Office of Nuclear Reactor Regulation and the completion of any environmental review which may be required by the Commission's regulations in 10 CFR Part 51; and (2) unless favorable findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations have been made.

By February 28, 1979, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel), will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend his petition, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, the petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party. Contentions shall be limited to the matters within the scope of the amendment under consideration. A petition that sets forth contentions relating only to matters outside the scope of the amendment under consideration will be denied. Persons whose petitions are denied for such reason, and persons whose contentions are denied as outside the scope of the amendment under consideration, may file requests with respect to such matters with the Director of the Office of Nuclear Reactor Regulation in accordance with 10 CFR 2.206.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Dennis L. Ziemann: (petitioner's name and telephone number): (date petition was mailed); (plant name); and (publication date and page number of this FEDERAL REGISTER notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to M. I. Miller, Esquire, Isham, Lincoln & Beale, Suite 4200, One First National Plaza, Chicago, Illinois 60670, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer, or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a) (i)–(v) and 2.714(d).

As part of its authority to regulate the conduct of the hearing, if one is held, the presiding Atomic Safety and Licensing Board may, in accordance with 10 CFR Part 2, Appendix A, upon request of a party or on its own initiative, consider a particular issue or issues, encompassed within the amendment under consideration, separately from and prior to other issues; and may issue a separate initial decision thereupon, if deemed appropriate, which shall be dispositive of such issue(s) in the absence of appeal or Commission or Appeal Board review, before hearing on and consideration of the remaining issues in the proceeding.

For further details pertinent to these matters, see the licensee's letter dated January 3, 1979, and the enclosed Steam Generator Repair Report, in addition to other material that may be submitted by the licensee in support of this action, all of which are or will be available for public inspection at the NRC's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Michigan 49006.

Dated at Bethesda, Md., this 19th day of January, 1979.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[Docket No. 50-322]

LONG ISLAND LIGHTING CO.

Relocation of Local Public Document Room

Notice is hereby given that the Nuclear Regulatory Commission has relocated the Local Public Document Room (LPDR) for Long Island Lighting Company's Shoreham Nuclear Power Station being built in Suffolk County, Long Island, New York.

The Shoreham LPDR document collection has been on file at the Comsewogue Public Library in Port Jefferson since 1971; but, due to a space problem, they can no longer continue to serve as a local public document room and asked that the material be moved.

Members of the public may now inspect documents and correspondence relating to the proposed Shoreham Station at the Shoreham-Wading River Public Library, Route 25A, Shoreham, New York 11786. The Library's hours of operation are as follows: Monday and Wednesday from 1:00 pm to 9:00 pm; Tuesday, Thursday and Friday from 10:00 am to 9:00 pm; and Saturday from 10:00 am to 5:00 pm.

Documents and correspondence relating to the Shoreham Station are also available for inspection and copying at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555.

Dated at Bethesda, Md., this 23d day of January, 1979.

For the Nuclear Regulatory Commission.

STEVEN A. VARGA,
Chief, Light Water Reactors Branch No. 4, Division of Project Management.

[Docket Nos. 50-245 and 50-336]

NORTHEAST NUCLEAR ENERGY CO., CONNECTICUT LIGHT AND POWER CO., HARTFORD ELECTRIC LIGHT CO., AND WESTERN MASSACHUSETTS ELECTRIC CO.

Issuance of Amendments to Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 57 to Provisional Operating License No. DPR-21 and Amendment No. 47 to Facility Operating License No. DPR-65 to Northeast Nuclear Energy Company, The Connecticut Light and Power Company, The Hartford Electric Light Company, and Western Massachusetts Electric Company, which revised the Technical Specifications for operation of the Millstone Nuclear Power Station, Unit Nos. 1 and 2, located in the Town of Waterford, Connecticut. The amendments are effective as of their date of issuance.

These amendments modify the Environmental Technical Specifications to allow test and improvements to the design of the fish barrier in the discharge canal and to reflect changes necessitated by a reorganization of the Nuclear Engineering and Operations Departments.

The applications for the amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and

J A 2 9 7 9 UMI

V 4 4 / 2 0 J A 2 9 7 9 UMI

regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the applications for amendments dated March 21, 1978 and August 15, 1978, (2) Amendment Nos. 57 and 47 to License Nos. DPR-21 and DPR-65, respectively, and (3) the Commission's related evaluation as contained in the letter transmitting these amendments. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 12th day of January, 1979.

For the Nuclear Regulatory Commission.

THOMAS V. WAMBACH,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[Docket No. 50-244]

ROCHESTER GAS AND ELECTRIC CORP.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 22 to Provisional Operating License No. DPR-18, issued to Rochester Gas and Electric Corporation (the licensee), which revised the Technical Specifications for operation of the R. E. Ginna Plant (the facility) located in Wayne County, New York. The amendment is effective as of its date of issuance.

The amendment consists of changes to the Technical Specifications relating to the offsite and onsite management organization.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated October 11, 1978 (transmitted by letter dated October 16, 1978), and (2) Amendment No. 22 to License No. DPR-18, including the Commission's related transmittal letter. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Rochester Public Library, 115 South Avenue, Rochester, New York 14627. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 17th day of January 1979.

For the Nuclear Regulatory Commission.

[Docket No. 50-259]

TENNESSEE VALLEY AUTHORITY

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 47 to Facility Operating License No. DPR-33 issued to Tennessee Valley Authority (the licensee), which revised the Technical Specifications for operation of the Browns Ferry Nuclear Plant, Unit No. 1 (the facility) located in Limestone County, Alabama. The amendment is effective as of the date of issuance.

This amendment permits operation of Browns Ferry Unit No. 1 in Cycle No. 3 following the second refueling outage.

The application for this amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated September 8, 1978, as supplemented by letters dated October 5, 1978, November 30, 1978, December 5, 1978, December 14, 1978, January 8, 1979 and January 9, 1979, (2) Amendment No. 47 to License No. DPR-33, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Athens Public Library, South and Forrest, Athens, Alabama 35611. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 17th day of January 1979.

[Docket No. 50-271]

VERMONT YANKEE NUCLEAR POWER CORP.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 49 to Facility Operating License No. DPR-28, issued to Vermont Yankee Nuclear Power Corporation which revised Technical Specifications for operation of the Vermont Yankee Nuclear Power Station (the facility) located near Vernon, Vermont. The amendment is effective as of its date of issuance.

The amendment revises the Technical Specifications relating to the standby gas treatment systems.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated June 8, 1976, as supplemented May 11, 1978, (2) Amendment No. 49 to License No. DPR-28, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Brooks Memorial Library, 224 Main Street, Brattleboro, Vermont.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 19th day of January 1979.

[Docket Nos. 50-280, 50-281]

VIRGINIA ELECTRIC AND POWER CO.

Issuance of Amendments to Facility Operating Licenses and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 47 and 46 to Facility Operating License Nos. DPR-32 and DPR-37, issued to Virginia Electric and Power Company for operation of the Surry Power Station Unit Nos. 1 and 2 (the facilities) located in Surry County, Virginia. These amendments are effective as of the date of issuance.

The amendments approve the steam generator repair program for the Surry Power Station, Units 1 and 2 and provide license conditions related to the repair and post-repair operations.

The amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Notice of Proposed Issuance of Amendments to Facility Operating Licenses in connection with this action was published in the FEDERAL REGISTER on October 27, 1977 (42 FR 56652). No request for hearing was filed in response to that notice.

The Commission has prepared an environmental impact appraisal for the license amendments and has concluded that an environmental impact statement for this particular action is not warranted because the action will not significantly affect the quality of the human environment.

For further details with respect to this action, see (1) Amendment Nos. 47 and 46 to DPR-32 and DPR-37, (2) the Commission's related Safety Evalua-

V 4 4 / 2 0

tion dated December 15, 1978 and (3) the Commission's Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room 1717 H Street, N.W., Washington, D.C. and at the Swem Library, College of William and Mary, Williamsburg, Virginia. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 20th day of January 1979.

[Docket No. 50-305]

WISCONSIN PUBLIC SERVICE CORP., WISCONSIN POWER AND LIGHT CO. AND MADISON GAS AND ELECTRIC CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 25 to Facility Operating License No. DPR-43 issued to Wisconsin Public Service Corporation, Wisconsin Power and Light Company, and Madison Gas and Electric Company (the licensee) which revised Technical Specifications for operation of the Kewaunee Nuclear power Plant located in Kewaunee, Wisconsin. The amendment is effective as of the date of issuance.

The amendment corrects the definition of rated power, updates the listing of safety-related shock suppressors, corrects several errors in the listing of fire detectors, corrects the minimum auto start pressure for fire pumps, and deletes a definition relevant to Cycle 1 only.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 10, 1978, (2) Amendment No. 25 to Facility Operating License No. DPR-43, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Kewaunee Public Library, 314 Milwaukee Street, Kewaunee, Wisconsin 54216. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 20893; 70-5741]

SOUTHWESTERN ELECTRIC POWER CO. AND PUBIC SERVICE CO. OF OKLAHOMA

Proposed Rail Car Maintenance Facility Agreement Between Subsidiaries

JANUARY 19, 1979.

Notice is hereby given that Southwestern Electric Power Company ("SWEPCO"), P.O. Box 21106, Shreveport, Lousiana 71156, and Public Service Company of Oklahoma ("PSO"), P.O. Box 201, Tulsa, Oklahoma 74102, both electric utility subsidiaries of Central and South West Corporation ("CSW"), a registered holding company, have filed post-effective amendments to an application-declaration previously filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Sections 6(a), 7, 9(a) and 10 of the Act and Rule 50 promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the application-declaration, as amended, which is summarized below, for a complete statement of the proposed transaction.

By orders dated April 6, 1976 and August 9, 1976 (HCAR Nos. 19468 and 19643) issued in this proceeding, SWEPCO was authorized to acquire, finance, construct and operate a unit train repair shop ("Repair Shop") near Alliance, Nebraska. The Repair Shop is to be used for the maintenance and repair of railroad cars for the transportation of coal to SWEPCO's generating plants. The previous order of August 9, 1976 stated that no rail transportation services utilizing the subject cars shall be provided by SWEPCO for any associated company in the CSW system except pursuant to a further order of this Commission.

PSO has under construction two 450 Mw coal-fired generating units at its Northeastern Station near Oologah, Oklahoma. The coal for these units will come from a Wyoming mine, a distance of about 1,100 miles from the Northeastern Station. To make transportation over such distance feasible PSO will use unit trains. The details respecting the purchase and the financing arrangements for the unit trains will be the subject of a separate filing with the Commission. PSO's trains will run over the same Burlington Northern tracks through Alliance, Nebraska as SWEPCO's unit trains. The Repair Shop can be expanded to handle all of PSO's maintenance needs through the addition of labor force and equipment without the need to construct additional plant space.

SWEPCO and PSO ("the Companies") have now filed post-effective amendments proposing that they enter into a Rail Car Maintenance Facility Agreement ("Facility Agreement") which provides for PSO's participation in the cost and the use of the Repair Shop. The Companies propose a formula for the sharing of lease payments, all other costs capitalized according to generally accepted accounting principles, and general operation and maintenance costs. The Companies propose that the above itemized costs be shared between them on a "Cost Ratio", a proportion equal to the ratio that each Comapny's direct labor costs for its rail cars actually repaired or inspected at the Facility bears to the total direct labor costs for all rail cars owned by the Companies repaired or inspected at the Facility. The "Cost Ratio" will be determined of the last day of each calendar month commencing with the month of the first delivery of PSO rail cars. Each Company will pay the actual direct costs of inspection and maintenance of its own rail cars, including parts, maintenance, labor and other expenses capable of direct assignment to a specific rail car. All costs to PSO will be determined in accordance with Rule 91.

In the event that leasehold improvements are made in the future, the Companies agree that they will share the costs of such improvements on such terms and conditions as are agreed to by the Companies at the time of such improvements and as are approved by further application to the Commission. In reaching such agreement the Companies have indicated that full consideration will be given to which Company's increased number of rail cars necessitated the improvement.

Pursuant to the Facility Agreement, PSO has been granted an irrevocable option to elect to take legal title to a certain portion of the Repair Shop at such time as SWEPCO acquires legal title to the Repair Shop. PSO's option will allow it to take title to a portion in a percentage equal to the proportion that leasehold and capital payments made by PSO bears to the total leasehold and capital payments related to the Repair Shop made by both PSO and SWEPCO.

PSO intends to include the full amount of its lease and capital payments in determining its fuel costs for purposes of the fuel cost adjustment clauses in its rates, subject to applicable regulatory authority approval. SWEPCO will treat PSO's payments in the nature of sublease payments and they will be credited to its fuel costs for purposes of its fuel cost adjustment clause.

SWEPCO, pursuant to the Facility Agreement, will retain all the tax benefits of its equitable ownership of the repair shop and PSO will receive as a credit to the payments required by the Facility Agreement a share of such tax benefits based on a weighted average cost ratio for each fiscal year.

It is stated that no state commission, and no federal commission other than this Commission has jurisdiction over the proposed transaction. Fees and expenses to be incurred in connection with the proposed transaction are estimated at $6,000, including legal fees of $5,000.

Notice is further given that any interested person may, not later than February 12, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as further amended by said post-effective amendments, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D. C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addressed, and proof of service (by affidavit or, in case of attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended by said post-effective amendments, or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01-M]

[Release No. 6017; 18-30]

THE THOMPSON, HINE AND FLORY

Filing of Application Pursuant to Section 3(a)(2) of the Securities Act of 1933 for an Order Exempting From the Provisions of Section 5 of the Act Interests or Participations in the Thompson, Hine and Flory Profit-Sharing Plan

Notice is hereby given that Thompson, Hine and Flory (hereinafter referred to as the "Applicant" or the "Firm"), National City Bank building, Cleveland, Ohio 44114 a law firm organized as a partnership under the laws of the State of Ohio, on January 11, 1979, filed an application for exemption from the registration requirements of the Securities Act of 1933 (the "Act") for participations or interests issued in connection with the Thompson, Hine and Flory Profit-Sharing Retirement Plan (the "Plan"). All interested persons are referred to that document, which is on file with the Commission, for the facts and representations contained therein, which are summarized below.

The Plan covers the Firm's partners and lawyer and non-lawyer employees, of whom 42 partners, 24 lawyers, and 46 non-lawyer employees were participating on November 30, 1978. All employees of the Firm are eligible to participate in the Plan if they participated in the Plan prior to December 1, 1976, or have completed three years of service with the Firm and are at least 25 years of age.

Applicant states that the Plan is of the type commonly referred to as a "Keogh" plan, which covers persons (in this case, Applicant's partners) who are employees within the meaning of Section 401(c)(1) of the Internal Revenue Code of 1954, as amended (the "Code"), and therefore, is excepted from the exemption provided by Section 3(a)(2) of the Act for interests or participations in employee benefit plans of corporate employers. Section 3(a)(2) of the Act provides, however, that the Commission may exempt from the provisions of Section 5 of the Act, any interest or participation issued in connection with a pension or profit-sharing plan which covers employees, some or all of whom are employees within the meaning of Section 401(c)(1) of the Code, if and to the extent that the Commission determines this to be necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

JAN 29 1979 UMI

DESCRIPTION AND ADMINISTRATION OF THE PLAN

Applicant states that the Plan was originally adopted in 1969 and was amended and restated in its entirety, effective as of December 1, 1976, in order to comply with the Employee Retirement Income Security Act of 1974 ("ERISA"). The Internal Revenue Service has issued a ruling to the effect that the Plan, as so amended and restated continues to be a qualified plan under Section 401 (a) of the Code. The Plan is an "employee pension benefit plan" subject to the fiduciary standards and to the full reporting and disclosure requirements of ERISA.

Applicant makes annual contributions to the Plan on behalf of all participants in amounts equal to specified percentages of their compensation. In addition, each participant may make voluntary contributions of not more than 10% of such participant's aggregate compensation for all years during which the person has been a participant, subject to certain limitations. Since November, 1976, participants may elect to direct voluntary contributions to either an Income Fund which principally invests in government securities and corporate bonds, or a General Fund, which principally invests in common stocks and bonds.

Applicant states that the Society National Bank of Cleveland is trustee (the "Trustee") for the Plan under an Amended Trust Agreement (the "Trust Agreement"). Under the Trust Agreement, the Trustee is solely responsible for the investment of amounts contributed to the Plan, except where the Firm has appointed an investment manager. Currently, the Income Fund is managed by the Trustee, while the General Fund is managed by Alexander, Van Cleef & Wood, a division of Alliance Capital Management Corporation and a registered investment adviser.

Applicant represents that none of the assets of the Plan have or will be invested in any collective or commingled fund containing assets other than assets of the Plan.

The Plan is administered by the Firm's Retirement Committee, which presently consists of three partners of the Firm. The Retirement Committee has general authority to control the operation of the Plan and to supervise its administration. It also has authority to employ investment counsel, accountants and other experts to assist in the administration of the Plan.

Applicant states that were the Firm a corporation, rather than a partnership, interests or participations issued in connection with the Plan would be exempt from registration under Section 3(a)(2) of the Act, because no person who would be an "employee" within the meaning of Section 401(c)(1) of the Code would participate in the Plan. Applicant submits that the mere fact that were the Firm conducts its business as a partnership rather than as a corporation should not result in a requirement that interests in the Plan be registered under the Act.

Applicant states that the Firm's partners not permitted to participate in the Plan, the interests or participations issued in connection with the Plan would be exempt under Section 3(a)(2) since no other persons covered by the Plan would be "employees" within the meaning of Section 401(c)(1) of the Code. Applicant submits that there is no valid basis for a contrary result merely because the Plan also covers partners in the Firm.

Applicant further submits that the characteristics of the Plan are essentially typical of those maintained by many single corporate employers and the legislative history of the relevant language in Section 3(a)(2) of the Act does not suggest intent on the part of Congress that interests issued in connection with single-employer Keogh plans necessarily should be registered under the Act. Rather, Congress excluded interests issued in connection with Keogh plans from the Section 3(a)(2) exemption primarily out of concern over interests or participations in commingled or collective Keogh funds which might be marketed by sponsoring financial institutions to self-employed persons unsophisticated in the securities field. The Plan is not a master or prototype plan and Plan assets are not invested in or commingled with assets of any other plans or collective funds, and the Plan, like similar plans of large corporations, has been specifically tailored to meet the Firm's own particular requirements.

Applicant represents that it has not distributed and does not intend to distribute any type of promotional material relating to the Plan (other than such material as Applicant is required under ERISA to distribute to participants). In addition, Applicant makes available to Plan participants on request the latest interim financial statements of the Plan.

Applicant states that it is engaged in furnishing legal services of a type which necessarily involves sophisticated and complex financial matters and, accordingly, is able to represent adequately its interests and the interests of its employees who are participants in the Plan.

Applicant concludes that for the foregoing reasons, granting the requested exemption would be appropriate in the public interest, consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than February 13, 1979, at 5:30 P.M., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney at law, by certificate) shall be filed contemporaneously with the request. An order disposing of the matter will be issued as of course following February 13, 1979, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[License No. 02/02-0073]

COMMUNICATIONS FUND, INC.

Filing of an Application for a Transfer of Control of a Licensed Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to Section 107.701 of the Regulations governing small business investment companies (13 CFR 107.701) (1979), to transfer control of Communications Fund, Inc. (CF), 1271 Avenue of the Americas, New York, New York 10020, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act).

Communications Fund, Inc., was licensed by SBA on July 27, 1961. Its present paid in capital and paid-in surplus is $171,250.

The proposed transfer of control and ownership is subject to and contigent upon approval by SBA.

The outstanding stock of CF is owned 100 percent by the Communications Corporation of America (CCA). Mr Walliser is CF's current President, Treasurer and General Manager. The change in ownership and control would result from the sale of CCA's outstanding stock presently owned 87 percent by Blair Walliser to Jordan S. Cohen and three other investors.

After the transfer of control the officers, directors and shareholders of CCA will be as follows:

Name and Title

Jordan S. Cohen, 307 Lester Court, West Hempstead, New York 11552, President, Director, 59%.
David P. Catsman, 1110 Brickel Avenue, Miami, Florida 33131, Counsel, Director, 16.1%.
Leonard D. Pearlman, 969 Park Avenue, New York, New York 10017, Vice President, Director, 19.6%.
Charles Kaufman, CPA, 3671 Hudson Manor Terrace, Riverdale, New York 10463, Comptroller, Director, 5.3%.
Jack Farber, 5708 Bamboo Circle, Tamarac, Florida 33319, Director.

These individuals will serve in similar capacities as officers and directors of CF under Jordan Cohen who will be its General Manager.

Matters involved in the SBA consideration of the application include the general business reputation and character of the proposed owners and management, including adequate profitability and financial soundness, in accordance with the Act and SBA Rules and Regulations promulgated thereunder.

Any person may on or before February 13, 1979 submit to the SBA written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this Notice shall be published in a newspaper of general circulation in New York, New York.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies).

Dated: January 22, 1979.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

[FR Doc. 79-2859 Filed 1-26-79; 8:45 am]

[8025-01-M]

[License No. 01/01-0295]

MANSFIELD CAPITAL CORP.

Issuance of License To Operate as a Small Business Investment Company

On December 27, 1978, a Notice was published in the FEDERAL REGISTER (43 FR 60363) stating that Mansfield Capital Corporation, Mountain Road, Stowe, Vermont 05672, had filed an application with the Small Business Administration, pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1978)) for a License to operate as a small business investment company.

Interested persons were given until the close of business on January 11, 1979, to submit written comments on the Application to the SBA.

Notice is hereby given that no comments were received and, having considered the Application and all other pertinent information, the SBA approved the issuance of License No. 01/01-0295, to Mansfield Capital Corporation on January 22, 1979, pursuant to Section 301(c) of the Small Business Investment Act of 1958, as amended.

(Catalogue of Federal Domestic Assistance Program No. 59.011 Small Business Investment Companies)

Dated: January 22, 1979.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

DEPARTMENT OF STATE

[Public Notice CM-8/153]

ADVISORY COMMITTEE ON THE LAW OF THE SEA

Partially Closed Meeting

In accordance with Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) as amended by Pub. L. 94-409 Section 5(c), notice is hereby given that the Advisory Committee on the Law of the Sea will meet in closed sessions on Thursday, March 8 and in both open and closed sessions on Friday, March 9, 1979. The open session of the meeting will convene Friday at 2:30 p.m. in the Dean Acheson Auditorium, U.S. Department of State, 21st and C Streets, NW., Washington, D.C.

The purpose of the closed meeting is to discuss specific conference issues and formal planning and policy preparations for the U.S. Delegation to the Eighth Session of the Third United Nations Conference on the Law of the Sea to be held in Geneva beginning March 19, 1979. During these closed sessions, documents classified under the provisions of Executive Order 12065 will be discussed.

These documents relate to the issues which the United States will be negotiating at the Conference. The documents are exempt under 5 U.S.C. 552b (c) (1), and are required to be withheld from disclosure in the public interest.

The issues cover such subjects as freedom of navigation on the high seas and in international straits, national security interests, the nature of a deep seabeds mining regime and proposed deep seabed mining legislation, the breadth of the continental margin, the juridical status of the economic zone, fisheries, vessel source pollution, scientific research, dispute settlement, and other related topics involving U.S. national security matters. Premature disclosure of the contents of these documents could adversely affect our foreign relations interests and jeopardize the chances of obtaining a timely and satisfactory Law of the Sea Treaty.

The open session of the Advisory Committee meeting will discuss all principal agenda issues to be considered during the Third United Nations Conference on the Law of the Sea, including those issues stated above, but will not examine the classified items discussed during the closed session.

The Advisory Committee on the Law of the Sea represents a broad cross-section of industries, professions, academic disciplines and other public groups. As such, it will comprehensively review the proposals which will come before the Conference.

At the open session, beginning at 2:30 p.m., March 9, the general public attending may participate in the discussion subject to instructions of the Chairman.

As entrance to the State Department is controlled, members of the public who wish to attend the open session should contact Mr. Thomas Okada by March 2 and provide their name and affiliation to facilitate their attendance. Mr. Okada's telephone number is (area code 202) 632-8232.

Dated: January 10, 1979.

ALAN BERLIND,
Director, Office of the Law of the Sea Negotiations.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 79-015]

PORT ACCESS ROUTES

Relationship to OCS and Gas Leases

The Coast Guard is undertaking a study of the potential vessel traffic density and the need for safe access routes for vessels in the North Atlantic Ocean. The results of this study could cause restrictions on the manner in which specific areas leased after the date of this Notice may be explored and developed for natural resources. Any action taken as a result of the study would be consistent with subsections 4(c)(1) and 4(c)(2) of the Ports and Waterways Safety Act

V 4 4 / 2 0 JA 29 79 UMI

V 4 4 / 2 0

(PWSA), (Pub. L. 95-474, 92 Stat. 1473).

The area to be studied extends from the coast of the United States to the 1800 meter curve (approximately 1000 fathoms) or the limit of Canadian jurisdiction on the Outer Continental Shelf, from 35° N. Latitude to 43° N. Latitude. This study is being conducted under the standards contained in sub-section 4(c)(3)(A) of the PWSA. As a result of this study it is anticipated that suitable ships' routing measures, such as shipping safety fairways and/or traffic separation schemes, may be proposed in a future FEDERAL REGISTER. Implementing regulations of any routing measures will be in accordance with the PWSA and the Administrative Procedures Act. In accordance with the PWSA, the Coast Guard will consult with the Secretaries of State, Interior, Commerce, and the Army, and the Governors of the affected States, concerning this matter.

This study continues the process initiated by the U.S. Army Corps of Engineers (COE) for provisional access routes in the study area because the responsibility for establishing access routes is now vested in the Secretary of Transportation (delegated to the Coast Guard) by the amended PWSA. All comments received by the COE in response to prior Notices will be considered by the Coast Guard in any conclusions reached by the study. Specifically, the Coast Guard has received from the COE all comments as a result of the following Notices:

a. "Notice of Proposal to Establish Shipping Safety Fairways in the North Atlantic" dated February 22, 1978. This Notice contained the proposal for a comprehensive system of shiping safety fairways that had been submitted by the Council of American Master Mariners (CAMM). (Copies may be obtained from the North Atlantic Division, Corps of Engineers, 90 Church Street, New York, NY 10007.);

b. "Port Access Routes in the North Atlantic Ocean" dated June 30, 1978. This Notice contained the Coast Guard's proposal for providing safe access routes to New York Harbor and Delaware Bay. (43 FR 28523); and

c. "Provisional Access Routes (PARs) in the North Atlantic Ocean" dated November 21, 1978. This gave notice of a public hearing on the subject, which was held in New York, NY on December 13, 1978. (43 FR 54269)

The Coast Guard is interested in receiving additional views from interested parties who have information that might pertain to the safe routing of ships as affected by other reasonable uses of the area. Written comments should include the docket number (CGD 79-015), the name and address of the person submitting the comments, and the reason for the comment.

Further information can be obtained from and comments should be submittd to:

LT William Chubb, c/o Commander (mps), Third Coast Guard District, Bldg. 108, Governors Island, New York, New York 10004, (212) 668-7179 or
LCDR John Bannan, c/o Commandant (G-WLE-4/73), U.S. Coast Guard, 400 Seventh Street, S.W., Washington, D.C. 20590, (202) 426-4958.

This is the initial study to be conducted by the Coast Guard under subsection 4(c) of the PWSA. The Coast Guard intends to publish a schedule of studies, which will consider all areas of the U.S. coasts, within the next three months.

F. P. SCHUBERT,
Captain, U.S. Coast Guard, Acting Chief, Office of Marine Environment and Systems.

JANUARY 24, 1979.

Federal Aviation Administration

RADIO TECHNICAL COMMISSION FOR AERONAUTICS (RTCA)

SPECIAL COMMITTEE 132—AIRBORNE AUDIO SYSTEMS AND EQUIPMENT

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the RTCA Special Committee 132 on Airborne Audio Systems and Equipment to be held February 21 through 23, 1979, in Conference Room 7B, DOT/Federal Aviation Administration Building, 800 Independence Avenue, S.W., Washington, D.C., commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of Minutes of Sixth Meeting held August 1 through 3, 1978; (3) Review of Proposed Changes to Draft Final Report; and (4) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present oral statements or obtain information should contact the RTCA Secretariat, 1717 H Street, N.W., Washington, D.C. 20006; (202) 296-0484. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C., on January 18, 1979.

KARL F. BIERACH,
Designated Officer.

DEVELOPMENT OF ACTIVE BEACON COLLISION AVOIDANCE SYSTEM (BCAS) TECHNICAL STATUS

Meeting

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Notice of Meeting.

SUMMARY: This notice announces an informal public meeting sponsored by the FAA on the technical status of development of the Active BCAS, including the characteristics of equipment hardware and software.

DATE: Meeting to be held February 21, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. R. L. Bowers or Mr. William Hyland, Aircraft Separation Assurance Branch, ARD-250, Communications Division, Systems Research and Development Service, Federal Aviation Administration, 2100 Second Street, SW., Washington, D.C. Telephone Numbers—Mr. William Hyland (202) 426-0986. Mr. R. L. Bowers (202) 426-9382.

SUPPLEMENTARY INFORMATION: This meeting concerns the development of Active Beacon Collision Avoidance System (BCAS). Notice is given that on February 21, 1979, an informal public meeting will be held in Room A-166 of Lincoln Laboratory, 244 Wood Street, Hanscom Field, Lexington, Mass. 02173. The purpose of this one-day meeting is to provide information on the technical status of development of Active BCAS, including the characteristics of equipment hardware and software. The briefing will review the Active BCAS performance requirements implied by the recently published Draft National Standard. The principal elements of the system being developed at Lincoln Laboratory and results of earlier feasibility tests will be described. The approach to the major hardware components will be reviewed and descriptions of the software will be presented including estimates of the processing capacity required for the principal software functions.

Interested persons are requested to contact the FAA, Mr. William Hyland at (202) 426-0986 or Mr. Richard Bowers at (202) 426-9382, for further information concerning the meeting, and to preregister, as space will be limited.

J A 2 9 7 9

UMI

Preregistration should be completed by February 14, 1979. Authority: Section 313(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a)).

Issued in Washington, D.C., on January 22, 1979.

DAVID J. SHEFTEL,
Director, Systems Research and Development Service, ARD-1.

AUTOMOTIVE FUEL ECONOMY PROGRAM

Report to Congress

JANUARY 23, 1979.

The attached document "Automotive Fuel Economy Program, Third Annual Report to Congress" has been prepared pursuant to Section 502(a)(2) of the Motor Vehicle Information and Cost Savings Act (Pub. L. 92-513), as amended by the Energy Policy and Conservation Act (Pub. L. 94-163), which requires in pertinent part that "each year, beginning in 1977, the Secretary shall transmit to each House of Congress, and publish in the FEDERAL REGISTER a review of average fuel economy standards under this part."

JOAN CLAYBROOK,
Administrator.

PREFACE

This Third Annual Report to the Congress is a comprehensive analysis of the Automotive Fuel Economy Program, established in December 1975 by the Energy Policy and Conservation Act (Pub. L. 94-163), and implemented by the applicable sections of Title V: "Improving Automotive Efficiency" of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2001 et seq.) as amended. Section 502(a) of the act requires the submission of a report and publication in the FEDERAL REGISTER by January 15 of each year, as well as the inclusion of a comprehensive analysis of the fuel economy program in the report to be transmitted not later than January 15, 1979.

By Title V, the Secretary of Transportation was required to implement a program for improving the fuel economy of new automobiles in the U.S. market and to administratively establish passenger car fuel economy standards for 1981 through 1984, and light truck fuel economy standards beginning with the 1979 model year. Fuel economy standards have currently been promulgated for passenger cars for the 1981-84 model years and for light trucks for the 1979-81 model years.

As directed by the Act, this report includes an analysis of the ability of motor vehicle manufacturers to meet the average fuel economy standard for model year 1985, as well as an evaluation of the program's impact on the conservation of fuel, the nation's dependence on foreign petroleum sources, the consumer, the automotive industry and the national and regional economies.

CONTENTS

Preface.
Executive Summary.
I. Introduction.
II. Background.
III. Program Description and Achievements.
IV. Technical Outlook.
A. From 1979 through 1985.
B. Toward the 1990's.
C. Utilization of Advanced Automotive Technology.
V. Economic Impacts.
A. Impact on Consumers.
B. Impact on Automotive Manufacturers.
Operational Effects.
Capital Requirements.
Effects on Competition.
C. Impact on Material and Component Suppliers.
D. Impact on the National Economy.
Employment.
Gross National Product.
Inflation.
VI. Program Improvements.
A. Low Volume Automobile Manufacturers.
B. Domestic Production of Foreign Automobiles.
Appendixes.
A. Summaries of Comments on Automotive Fuel Economy Program Issues and Conclusions.
B. FEDERAL REGISTER, Volume 43, No. 228—Monday, November 27, 1978—Automotive Fuel Economy Program Report to Congress—Request for Public Comments.
Acronyms and Abbreviations.

V-7 Chrysler North American Sources and Uses of Funds.

EXECUTIVE SUMMARY

This is the Third Annual Report to Congress on the progress and achievements of the Automotive Fuel Economy Program. The Energy Policy and Conservation Act, December 22, 1975, the first major "energy crisis" legislation enacted after the oil embargo of 1973-74 required that the automobile industry almost double the fleet-average fuel economy of passenger cars over the 1975 to 1985 decade, raising fleet-average fuel economy from slightly less than 14 miles per gallon (mpg) for 1974 model year to 27.5 mpg by the 1985 model year. The Secretary of Transportation was required to administratively establish, at the maximum feasible level, passenger car fuel economy standards for 1981 through 1984, and light truck fuel economy standards beginning with the 1979 model year.

At this point, fuel economy standards have been promulgated for passenger cars for the 1981-84 model years and for light trucks for the 1979-81 model years. Current passenger automobile standards increase to 27.5 mpg in 1985; standards for two-wheel-drive light trucks reach 18.0 mpg, and those for four-wheel-drive light trucks reach 15.5 mpg in 1981.

These standards will result in the conservation of 220 billion gallons of gasoline for vehicles produced from MY 1978 through MY 1990 relative to the fuel economy levels in effect prior to the establishment of these standards. Using these standards, total annual passenger automobile and light truck gasoline consumption would have reached 131 billion gallons in 1990, compared with the 97 billion gallons now expected in the same year. With motor vehicles now accounting for almost one-half of the petroleum consumed in the U.S., these savings will reduce anticipated passenger car and light truck petroleum consumption by about 28 percent in the 1990's. While placing a dollar value on these savings understates their real value to the Nation, it does place the accomplishments of the program in perspective. Conservatively valuing gasoline at 65 cents per gallon, the total present value of the fuel saved through 1990 in 1978 dollars (discounted at 10%) is $60 billion.

During 1977 the U.S. imported foreign oil at the rate of 8.7 million barrels[1] each day. This amounted to a cost of $45 billion. In comparison, the total trade deficit was $26.5 billion. The high cost associated with foreign oil, as well as the uncertainty of its source of supply (for example, the recent experience in Iran), make reduced dependency upon imports a National goal. If the average fuel economy of the existing fleet were now at the levels specified for 1985 for cars and 1981 for light trucks, foreign oil imports would have dropped by 26% down to 6.4 million barrels per day, with a $12 billion reduction in our annual trade deficit.

To achieve these fuel savings, the auto industry will have to accelerate the pace at which they introduce new technology into production vehicles, accompanied by a concomitant increase in their capital spending relative to historical rates and levels. This acceleration will be significant. Our current analysis projects that from 1978 to 1984, the period of peak capital investment, aggregate investment will rise by $11.5 billion to $36.0 billion from a trend spending level of $24.5 billion.

Currently, auto manufacturers, even when introducing what they charac-

[1] 42 gallons=1 barrel.

V 4 4 / 2 0 J A 2 9 7 9 UMI

terize as a completely new car, do not replace all components. While car models undergo major change on a five-year cycle, the life of an engine or transmission design, for example, can be twenty years. Under the fuel economy program, manufacturers cannot achieve the mpg levels specified merely by restyling an existing car body and placing it on an existing powertrain. Rather, compliance with the standards requires that the whole vehicle body and structure be downsized, the powertrain be redesigned, and weight be eliminated throughout the vehicle.

Our current assessment confirms that the fuel economy levels specified in the statute can be achieved by all domestic manufacturers without a significant change in the mix of their fleet and without a reliance on diesel engines. Further it appears that most foreign manufacturers can meet the standards without any diesels, but that a few of the limited-line manufacturers will have to rely on diesels to meet the standards.

The National Highway Traffic Safety Administration (NHTSA), which administers the Fuel Economy program, recently requested further comments on these and other findings as part of the final preparation for this report to Congress. Several responses from the industry now question the economic practicability of meeting the standards currently set. The continuing refinement of information with respect to technological development in a dynamic and changing economy is not unexpected. The statute required that the standards for MY 1981 through 1984 passenger car fuel economy be established at the maximum feasible level and be issued by July 1, 1977, to provide the industry with plenty of time to implement them in an orderly fashion. At that time, the manufacturers publicly committed themselves to meet those standards. The Department of Transportation (DOT) will continue to assess the situation using the best and most recent information in order to determine whether significant changes in earlier findings have occurred and whether rulemaking to modify these standards would be justified and in the public interest.

Based upon data developed in the course of our rulemaking proceedings, as well as more recent (August–October 1978) information supplied by the manufacturers in response to NHTSA questionnaires, DOT believes that the average purchaser of a 1985 model year car will realize a net reduction in operating expenses over the life of that car on the order of $500 when compared to a 1977 model.

Our assessment shows that both the consumer and the national economy are better off as a result of this fuel economy program. To achieve these benefits the standards are having a significant impact on the industry. The Congress, in establishing the program, devised a unique measurement instrument, fleetwide average fuel economy, to permit diversity in the market while still assuring steady improvement in fuel conservation. Thus, through proper balancing of the mix of vehicles (having below- and above-standard fuel economies) produced and sold, a manufacturer can satisfy a broad range of consumer demand with his annual fleet and still meet the applicable fuel economy standard.

In meeting these standards, manufacturers are required to accelerate their spending levels to keep pace with the accelerated changeover cycle that the standards require. It is important to differentiate between the measurement device of average fuel economy and the specific standards set by Congress and by Department rulemaking action. Both the degree of energy saving to be attained and the challenge to the industry are the result of the latter.

The Department has concluded that the measurement device of average fuel economy is appropriate for the automobile industry. It balances the need to save fuel with the goal of insuring consumers a range of choices, and it has developed a regulatory scheme which is flexible and yet fosters the improvements sought by Congress. Our current assessment indicates that the statutory 27.5 mpg level for MY 1985 is both technologically feasible and economically practicable for each automobile manufacturer. This is not to say that the difficulty each manufacturer faces in meeting the standards is equal. Rather the relative effort that each manufacturer will have to make will depend upon its financial strength, technical capability and the nature of its product line.

The domestic automobile manufacturing industry is one of the most highly concentrated industries in the U.S. For decades, it has been growing more concentrated, with the larger manufacturers realizing larger profits. Our analysis demonstrated anew that any program requiring a large financial commitment from the manufacturers imposes a heavier burden on smaller manufacturers than on larger ones. These burdens are not dissimilar from the normal business demands routinely faced by smaller manufacturers; such burdens, in fact, have been major factors leading to the high level of concentration in the industry. In addition to the smaller domestic manufacturers, the foreign limited line manufacturers who produce larger cars face unique types of problems. These manufacturers generally have average fuel economy that exceeds the early standards but they have targeted their production at a specific market segment and, unlike a full-line manufacturer, cannot offset lower fuel economy on one line of vehicles with higher fuel economy on other lines.

For both classes of manufacturers, but particularly for the smaller domestic producers, serious problems could develop in the event of a serious economic downturn since the manufacturers are faced with what they believe to be a nondeferable investment schedule. Thus, on November 22, 1978, the Department issued a notice seeking comments on whether it should seek revisions in the basic statute as a result of these issues. The Department also continued its own assessment of the factors involved to see if reasonable modifications to the program could be devised.

Responses to the notice confirmed some of the Department's findings, but revealed no workable approach to modifying the statute, short of increasing the size limit under which companies are eligible for exemption from the standards (for whom alternative standards are developed). The statute now permits exemptions for manufacturers with worldwide production below 10,000 vehicles per year. A number of commenters recommended that this level be raised to manufacturers with *sales* in the *U.S. market* of less than 100,000 vehicles. However, there are significant elements of unfairness in the development of company-specific standards for large worldwide manufacturers making this an unattractive alternative.

The Department examined other options involving slippage of implementation schedules, or lowering of standards applied to smaller manufacturers, but could not develop any modifications that, in its view, successfully eliminated or even mitigated problems faced by these procedures without entailing either a significant loss in energy conservation, competitive disadvantages, equity problems, or massive administrative difficulties.

The statute does provide, however, sufficient latitude to modify regulations if the economy were to falter and auto sales were to decline dramatically. The Secretary has the authority under the law to revise regulations if it is determined that the standards that were "economically practicable" in a healthy economy prove to be "impracticable" in a recession.

The Department now recommends only that the system of credits and penalties under the Act be modified. The Act now imposes a substantial penalty on manufacturers who fall below the specified standards, although it does not prohibit the sale of

cars in such a situation. Further, if the Federal Trade Commission (FTC) determines that imposition of a penalty would result in a substantial lessening of competition, the Secretary then has the authority to waive or reduce the penalty. In any case, the statute permits credits to be earned by exceeding a particular year's standard, which then be carried forward (or backward) for one year and applied against possible penalties in those years. DOT recommends that credits be allowed to be carried forward (or backward) for three years to enable manufacturers to benefit from their early conservation efforts and better balance future planning.

In commenting on the notice, both Ford and GM asserted that the selection of maximum feasible fuel economy passenger car standards for 1981 through 1984 was imposing a very large cost penalty on them and, ultimately, on the consumer. Both manufacturers argue that reaching 27.5 mpg in 1985 in 1.5 mpg annual increments from the 20 mpg-1980 level is far more cost-effective than the path selected through the rulemaking process (which would increase fuel economy by 2 mpg in each of the years 1981, 1982 and 1983).

The Department is prepared to reexamine the regulations when substantial new information indicates that the basis for its findings are significantly changed. Both manufacturers have been requested to specify what factors have changed since the July 1977 regulation establishing the 1981–84 passenger car standards that would justify amending them.

It is important to note that while costs to the industry might be revised upwards in the face of more recent data, the cost of oil is also increasing. As recently as December 18, 1978, OPEC announced another 15% increase in the price of oil. Thus, under the current schedule of standards, consumers and the national economy are both in a better position to deal with this price increase than they would have been with a lower standard. Moreover, as the price of oil increases in the future, long after industry investments have been made, the benefits of this program will increase still further. It may be readily concluded that the benefits of the fuel economy program to the Nation are significantly greater than its costs.

I. Introduction

In December 1975, the Congress enacted the Energy Policy and Conservation Act (Pub. L. 94-163). It established the automotive fuel economy regulatory program by adding Title V—"Improving Automotive Efficiency" (The Act) to the Motor Vehicle Information and Cost Savings Act and required that the Secretary of Transportation report annually, not later than January 15 of each year beginning in 1977, on the progress made under that program. It also established the fuel economy labeling, and mileage guide programs, and the Federal fleet purchase program of fuel efficient vehicles.

This is the Third Annual Report. As required, it contains a comprehensive analysis of the program and specifically assesses the ability of motor vehicle manufacturers to meet the average fuel economy standard of 27.5 mpg for model year (MY) 1985 passenger automobiles set by the Congress. Included in the analysis is an examination of the manufacturers' capability to comply with each of the present fuel economy standards, as well as an evaluation of the program's impacts on: conservation of fuel; the nation's dependence on foreign petroleum sources; the consumer; the automotive industry; and, the national economy. This report also examines the structure of the program and makes recommendations for modifications. It reports on the fuel economy labeling program and the Federal fleet purchasing program. In addition, as required by section 305 of the Department of Energy Act of 1978—Civilian Applications (Pub. L. 95-238), it evaluates the utilization of advanced automotive technology.

Several key events in the recent history of automotive fuel economy are listed below:

DOT starts R&D program on automotive fuel economy

1973
- Oil embargo, "energy crises" starts
- GM starts plans for downsized standard car
- Average fuel economy of model year 1974 cars is 14 mpg

1974
- DOT - EPA report to Congress on Fuel Economy
- Auto manufacturers voluntarily agree to improve fuel economy by 40% by MY 1980

1975
- Congress established automotive fuel economy regulatory program

1976
- Report of Federal Task Force on Motor Vehicle Goals Beyond 1980
- Average fuel economy of 1977 model car is 17.6 mpg

1977
- DOT issues passenger automobile standards for model years 1981-84

1978
- DOT issues light truck standards for model years 1980-81
- Average fuel economy of 1979 model cars is 19.7 mpg

II. BACKGROUND

A. OVERALL ENERGY DEMAND AND SUPPLY

Reducing energy consumption is a national priority because of the limited availability of petroleum. The Department of Energy[2] projects increased U.S. demand for petroleum products and increased U.S. dependence on foreign petroleum supplies.

Domestic demand for refined petroleum products (Table II-1) experienced a 2.3 percent average annual growth rate between 1972-1978. This 1972-1978 average rate was much lower than historical growth rate trends because of the 1973-1974 oil embargo. The sharp increases in energy prices after the embargo, coupled with the 1974-1975 recession, constrained the total increase in petroleum demand to 15 percent from 1972 to 1978; during that same period, however, the portion of U.S. petroleum supplied by imports increased to 42 percent.

TABLE II—1. *Total U.S. Refined Petroleum Products Domestic Demand*

Year	Thousand Barrels/Day
1972	−16,367
1973	−17,306
1974	−16,653
1975	−16,322
1976	−17,461
1977	−18,418
1978 (Jan-Sept)	−18,814

Source: "Monthly Energy Review," U.S. Department of Energy, Energy Information Administration, November 1978, p. 18.

Table II-2 illustrates this growing importance of, and dependence upon, imports. Through the sixties, petroleum imports were stable at about 20 percent of total consumption. As noted above, by the late 1970's, the share of domestic demand supplied by imports had approximately doubled.

TABLE II-2.—*Percent of U.S. Domestic Demand for Crude and Refined Petroleum Supplied directly by OPEC Countries and All Importers*

Year	Total imports	OPEC countries
1960	19	13
1961	19	13
1962	20	12

Sources: (1) "Annual Report to Congress—Volume III, 1977, Statistics and Trends of Energy Supply, Demand, and Prices," U.S. Department of Energy, Energy Information Administration, May 1978, pp. 23 and 27; (2) "Monthly Energy Review", U.S. Department of Energy, November 1978, pp. 16-19.

Domestic petroleum production is not likely to keep pace with increased demand, even if the slower-than-historical growth rates continue. The Energy Information Administration, Department of Energy, predicts that domestic production will grow at a rate of only 3.1% annually between 1976 and 1979, with production shifting to frontier sites (implying greater costs) such as offshore areas. These sites are expected to provide 30% of domestically-produced oil by 1990.

Oil imports currently cost the U.S. about $45 billion a year. This import bill is a major factor in the U.S. balance-of-trade deficit, which in turn has led, in significant part, to a decline in international confidence in the dollar. A further consequence of this deficit is added inflation, with both imported and domestically produced goods rising in price. Since forecasts predict that the United States will continue to be the major importer of petroleum, the ability and willingness of petroleum suppliers to continue to expand production in response to increasing world demand is particularly critical for the U.S. Although recent public reports indicate that Mexico could become a major new source of supply for meeting world petroleum demand, it is not yet clear when Mexican petroleum will be available in sufficient volume to significantly affect the world market. Moreover, substitution of petroleum imports from Mexico for petroleum imports from OPEC countries will only reduce the U.S. balance-of-trade deficit if Mexican oil is priced below the world level.

B. TRANSPORTATION ENERGY DEMAND AND SUPPLY

Federal policies to influence energy use in transportation are critical since the transportation sector, in the aggregate, is the major consumer of petroleum-based fuels. Transportation accounts for 55% of the total U.S. consumption of petroleum (Table II-3). Of this amount, 72% is gasoline.

TABLE II-3.—*Petroleum Consumption by Sector, 1976*

Sector	Petroleum consumption (000's barrels/day)	% of total consumption
Transportation	9,571	54.8
(Passenger Cars & Trucks)	(7,963)	(45.6)
(Other Transportation)	(1,608)	(9.2)
Industrial	3,210	18.4
Residential-Commercial	2,992	17.1
Electric Utilities	1,510	8.7
Miscellaneous	178	1.0
Totals	17,461	100.0

Source: "Annual Report to Congress: Statistics and Trends of Energy Supply, Demand, and Prices," Volume III, 1977, U.S. Department of Energy, Energy Information Administration, May, 1978, p. 35.

Passenger cars and trucks consume approximately 83 percent of the energy used in transportation (Table II-4). They are virtually totally dependent on petroleum-based fuels. The significance of automobiles, as energy consumers, is further indicated by the fact that automobiles are responsible for about 91% of domestic passenger travel.

TABLE II-4.—*Petroleum Consumption by Transportation Mode*

Mode	Percent*
Passenger Cars	57.0
Trucks	26.2
Air Transport	7.9
Water Transport	5.0
Railroads	2.8
Buses	0.7
Transit	0.3
Motorcycles	0.3

*Does not total 100% due to rounding.

Source: National Transportation Statistics, Transportation Systems Center, U.S. DOT, September 1978.

Gasoline consumption fluctuated similarly to total petroleum consumption in response to the 1973-74 oil embargo. During 1976-78, consumption exceeded the 1973 levels and continued to grow, although at a slightly slower rate than the pre-embargo rate. According to the Energy Information Administration, average motor gasoline use was 7.4 million barrels per day during the first 9 months of 1978, 3% more than the average for the same period in 1977.

III. PROGRAM DESCRIPTION AND ACHIEVEMENTS

A. REQUIREMENTS AND RESPONSIBILITIES

The Act establishes a conservation program for passenger automobiles and light trucks. It specifies that average fuel economy standards must be set at the maximum feasible levels. These levels are determined while considering the following criteria: (1) Technological feasibility; (2) economic practicability; (3) the effect of other Federal standards on fuel economy; and, (4) the need of the Nation to conserve energy. A "feasible technology" must be sufficiently developed to be usable in mass production in time to comply with the standards. Although "economic practicability" is not explicit defined, the criteria applied required that mandated automobile fuel economy improvements be achievable without threatening the financial survival of the industry. The third criterion required consideration of the possible adverse effects of safety and emissions standards on fuel economy, while the last criterion has been discussed previously.

Within the Department, the National Highway Traffic Safety Administration (NHTSA) has been delegated the responsibility for administering the fuel economy program. The Act also assigned responsibilities to the Federal Energy Administration (now in the Department of Energy), the Environmental Protection Agency, the Federal Trade Commission, and the General Services Administration. The responsibilities of these other agencies include:

The Department of Energy (DOE)

- Working with EPA on the fuel economy labelling requirements.
- Assessing the energy outlook.
- Publishing and distributing the mileage guides.

The Environmental Protection Agency (EPA)

- Establishing rules for the fuel economy labelling program.
- Developing fuel economy testing and calculation procedures.
- Preparing the gas mileage guides.
- Vehicle testing for standards compliance, labelling and the gas mileage guide.

The Federal Trade Commission (FTC)

- Assessing the effects on competition that would result from the payment of civil penalties for noncompliance with standards.
- Regulating the use of EPA fuel economy values in advertising.

The General Services Administration (GSA)

- Purchasing fuel efficient passenger automobiles and light trucks for use by Federal agencies.

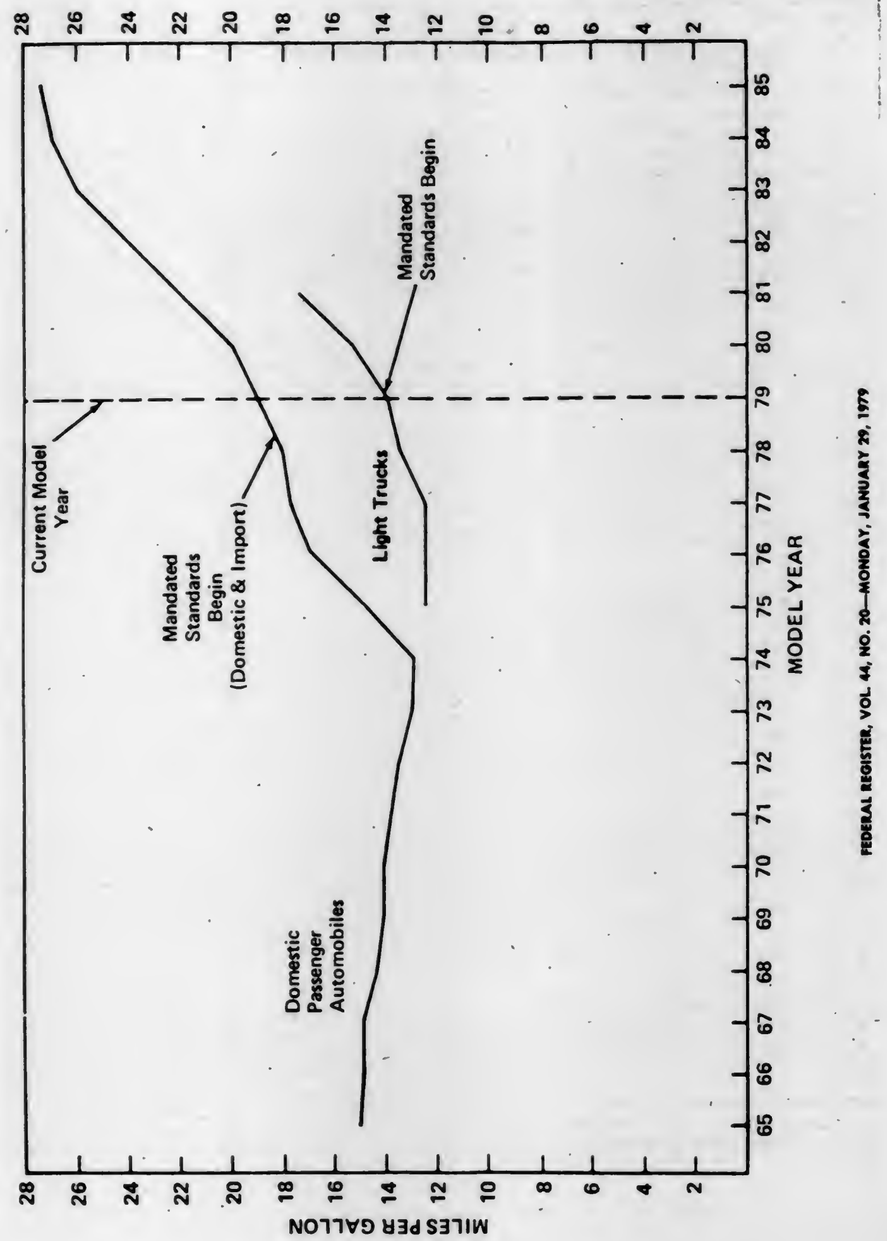
The Act requires that fuel economy standards be established for new four-wheeled motor vehicles sold in the U.S. up to 6,000 pounds gross vehicle weight rating (GVWR). Standards may also be set for vehicles up to 10,000 pounds GVWR. These vehicles, together, are categories as passenger automobiles and light trucks (pick-ups, vans and utility vehicles). In standard setting, both passenger cars and light trucks are treated separately; standards pertain to the average fuel economy performance of a manufacturer's annual model year production fleet of vehicles by category: Passenger cars or light trucks or to categories of light trucks (e.g., two-wheel- or four-wheel-drive light trucks). Standards for categories of passenger cars are not permitted except for manufacturers producing fewer than 10,000 units worldwide.

The Act specifies fleet-average fuel economy standards for passenger automobiles at 18 miles per gallon (mpg) in MY 1978, 19 mpg in MY 1979, 20 mpg in MY 1980, and 27.5 mpg in MY 1985, and thereafter. The Secretary of Transportation, in accordance with his statutory responsibility, set standards for MY's 1981-1984 in June 1977 at the following levels: 22 mpg in MY 1981, 24 mpg in MY 1982, 26 mpg in MY 1983, and 27 mpg in MY 1984.

If the Secretary of Transportation decreases the standard for MY 1985 (and thereafter) below 26.0 mpg, or raises it above 27.5 mpg, either House of Congress may disapprove the action within 60 calendar days of its submission to Congress.

B. ASSUMPTIONS

In selecting the fuel economy levels for the 1981-84 AFE standards the NHTSA made the following assumptions regarding the automobile industry and automobile performance: (1) A rapid, but not an unreasonable, rate of introduction of technology; (2) a 10-percent reduction in vehicle acceleration; and, (3) the use of a wide range of technological options including: weight reduction; improved transmissions and lubricants, reduced aerodynamic drag; reduced accessory losses; and reduced tire rolling resistance. Shifts in the mix of automobile sizes and the use of diesel engines were not considered necessary to meet the standards—although either or both of these options might be used by manufacturers in their individual approaches to meeting the standards.



C. ESTABLISHED FUEL ECONOMY STANDARDS

NHTSA issued fuel economy standards for light trucks beginning with MY 1979, covering vehicles up to 6,000 pounds GVWR; these standards also applied to captive imports (vehicles imported by a domestic producer and sold as part of its product line). Standards levels were established at 15.8 mpg for four-wheel-drive, general-utility vehicles, and at 17.2 mpg for all other light trucks. Manufacturers of four-wheel-drive, general-utility vehicles can include these vehicles with their other light trucks and meet the 17.2 mpg standard. In March 1978, these standards were further expanded to include MY 1980 and MY 1981 vehicles up to 8500 pounds GVWR. For two-wheel-drive light trucks, the standards are 16.0 mpg in MY 1980 and 18.0 mpg in MY 1981. Standards for four-wheel-drive vehicles were set at 14.0 mpg and 15.5 mpg, respectively, for MY 1980 and 1981. An additional set of standards was established at 14 mpg and 15 mpg for MY 1980 and MY 1981, respectively, for manufacturers whose light truck fleets are powered exclusively by basic engines which are not also used in passenger automobiles. (These separate standards were set to avoid undue burden on manufacturers which had not had the benefit of several years development of fuel-economic passenger automobile engines).

The MY 1981 light truck standards are to be reduced by 0.5 mpg if EPA has not fully approved improved lubricants for use in fuel economy testing by January 1, 1980. Captive imports may not be included in a domestic manfacturer's fleet after model year 1979 for purposes of determining compliance with the established standards. NHTSA has received a petition for lowering the MY 1981 light truck standard; analysis of this petition is currently being conducted, with a decision expected in the early part of 1979.

Figure III-1
New Vehicle Fleet Average Fuel Economy

[4910-59-C]

FEDERAL REGISTER, VOL. 44, NO. 20—MONDAY, JANUARY 29, 1979

[4910-59-M]

Until 1974, the fuel economy of new domestic passenger automobiles had steadily declined for a number of years, but the trend was reversed beginning in MY 1975 (see Figure III-1). The trend of fuel economy values for light trucks is also upward, and that trend is expected to continue. Later sections of this report will show that it is technically feasible for most automobile manufacturers to meet the passenger automobile average fuel economy standard of 27.5 mpg in MY 1985 and simultaneously comply with established safety and emissions regulations. The domestic manufacturers can meet the 1985 standard without the use of diesel engines by employing existing techniques to reduce weight (redesign, material substitution, and new models), improving engines and transmissions, and applying other available technology. (The special situation of low volume manufacturers will be discussed later in the text.)

D. CONSERVATION IMPACTS

The program has not been in effect for a sufficiently long time to permit measurement of real vehicle fuel savings, as distinguished from other factors affecting fuel consumption. However, program effectiveness with respect to potential fuel conservation can be estimated by making the reasonable assumption that the larger domestic manufacturers comply with, but do not exceed, the standards. The level of energy savings can only be determined by comparing energy consumption associated with the standards higher fleet-average miles per gallon (mpg) to the estimated (or assumed) level of fleet-average mpg in the absence of those standards. This latter level, the baseline for measuring fuel savings, is equivocal. The manufacturers might have continued to produce vehicles of the same fuel economy level existing in 1975, (when the statute was passed), or as that existing in 1978 (1979 for light trucks) when the standards first became effective. However, the manufacturers faced with compelling market forces then developing might have increased fleet-average fuel economy on their own initiative, although in all probability, to some lower level than those mandated under the program. Savings could also be computed using the manufacturers' 1974 voluntary goal of a 40% improvement for passenger automobiles by 1980. Any one of the above has merit. However, the actual magnitudes of yearly fleet-average fuel economy levels which *would* have been attained through the effects of market forces, or by the voluntary program, will never be know. For this report, fuel savings are evaluated with reference to a MY 1977 base, the year before the mandatory standards became effective and the latest year for which full data are available.

By any measure, the fuel economy program has contributed, and will continue to contribute, major benefits to the Nation by reducing fuel consumption. Projecting fuel savings estimates through MY 1990, cumulative passenger automobile fuel savings, beginning with MY 1978, will approximate 145 billion gallons, with an estimated concomitant cost savings of $39 billion (discounted [3] present value at 65 cents per gallon)—assuming that the established MY 1985 fuel economy standard remains unchanged through 1990. Similarly, if the fuel economy standards for light trucks remain at the MY 1981 standard, the fuel savings from MY 1978 through 1990 will approximate 75 billion gallons of fuel, yielding an estimated savings of $21 billion. Between MY's 1978 and 1990, the automobile and light truck fleets will use about 15% less fuel than they would have if the MY 1977 fuel economy levels remained unchanged.

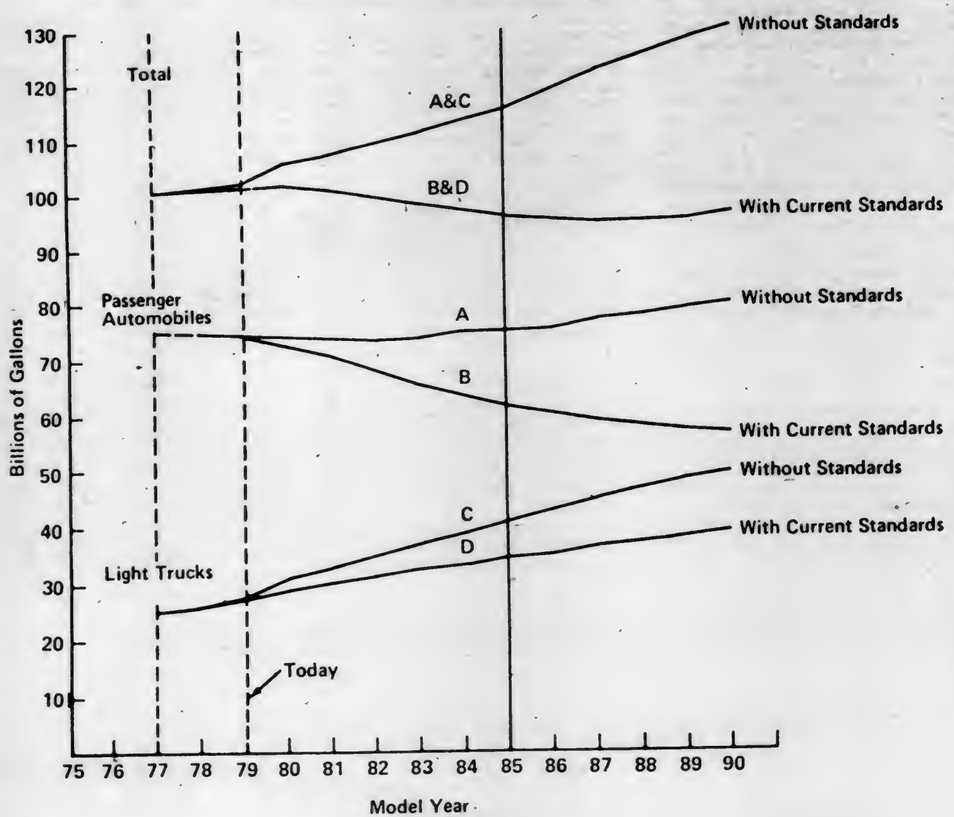

Figure III-2 illustrates the reduction in fuel consumption based upon anticipated compliance with the fuel economy standards which have been enacted to date for both passenger automobiles and light trucks. It shows a projected reduction during calendar year 1985 of 13.5 billion gallons resulting from the passenger car standards, and of 3.5 billion gallons resulting from the light truck standards. Reduction in the fuel consumption of these vehicles, in 1985, is thus projected to be 17.0 billion gallons, or 15% of the total that would have been consumed.

The promulgated standards for Model Year 1981 light trucks are estimated to save approximately 5.8 billion gallons of fuel over the lifetime of the MY 1981 light truck fleet compared to that fleet's projected consumption if light truck fuel economy remained at the estimated MY 1979 level.

[3] 10% discount rate.

[4910-59-C]

Figure III-2
Projected Annual Fuel Consumption

[4910-59-M]

These estimates of potential fuel savings are based on the fuel economy values which EPA assesses for each manufacturer. Recently, there has been considerable controversy over EPA's fuel economy measurements because of the difference between its measurements and the actual miles per gallon experienced by cars on the road. Preliminary studies show that the EPA-measured value is consistently higher than the actual on-the-road fuel economy. DOE studies have pointed out a further complication; that the discount from the EPA test results varies with the fuel economy value itself—so that cars with high mpg test results have more of a discount than cars with low mpg test results. Although these limitations exist, the EPA assessments comprise the most complete and reliable data on U.S. automobiles. In this report, baseline values as well as projected values of fuel economy are based on EPA assessments; thus, the differences between them are real.

During the 1970's, light truck sales have increased almost three times as rapidly as passenger automobile sales. Since light truck fuel economy is much below that of cars, the total amount of fuel consumed by light trucks has significantly increased in a short time span.

Since 1975, the U.S. Department of Energy and its predecessor agencies have been actively encouraging petroleum conservation in all sectors. The Department of Transportation has assumed major responsibility for transportation sector programs such as carpooling, the 55 mph national speed limit, the voluntary program for trucks and buses, and transportation and highway efficiency improvements. These programs, in the aggregate, have the potential for saving as much as 16.4 billion gallons of fuel annually (depending upon the percent of compliance); this saving is in addition to the savings resulting directly from fuel economy standards.

E. OPTIONS FOR STANDARDS MODIFICATION

The Secretary is also authorized to prescribe rules reducing 1978, 1979, or 1980 average passenger automobile fuel economy requirements for a manufacturer which demonstrates that more stringent Federal automobile standards in other areas are likely to produce a reduction in fuel economy despite the use of a "reasonably selected technology" (i.e., one which minimizes Federal standards fuel economy losses). Relevant Federal standards include: (1) Emissions standards under the Clean Air Act, (2) motor vehicle safety standards under the National Traffic and Motor Vehicle Safety Act of 1966, (3) noise emissions standards under the Noise Control Act of 1972, and (4) property loss reduction standards under the Motor Vehicle Information and Cost Savings Act.

The Act provides that post-1980 average fuel economy standards may be increased by the Secretary as long as the amended standard is promulgated at least 18 months before the beginning of the model year to which the amendment applies. Any person who may be adversely affected by rules authorized by the Act for defining terms, setting average fuel economy standards, determination of average fuel economy, and automobile labeling may, at any time prior to 60 days after such rule is prescribed, petition for a judicial review. Judicial review pursuant to a civil penalty assessment may be obtained by filing a notice of appeal within 30 days after the date of assessment determination.

Section 502(c) of the Act provides that low volume manufacturers (those manufacturing less than 10,000 passenger automobiles world-wide in the affected year, and the second model year preceding the affected year) can petition for reduction from average fuel economy standards. A rule establishing the format and content requirements for petition was issued in July 1977. A low volume manufacturer must have submitted a petition for exemption at least 12 months before the beginning of model year 1979, and must submit subsequent petitions as least 24 months before the beginning of model year 1980 and thereafter. If an exemption is granted, NHTSA establishes an alternative maximum feasible average fuel economy standard applicable to that manufacturer. The petition must contain financial data, sales figures and projections, product mix and engineering data, and fuel economy projections by fleet and by model type.

The Agency's proposed decisions are published in the FEDERAL REGISTER to invite comments. Exemptions are granted only if NHTSA determines that the standard otherwise applicable is more stringent than the maximum feasible average fuel economy attainable by the low volume manufacturer.

Six low volume manufacturers petitioned for exemption from the 1978 standards. One was found to be ineligible because it is controlled by a larger manufacturer; four were granted exemptions and a proposed decision has been published relative to the sixth.

F. FUEL ECONOMY MEASUREMENT

The EPA is responsible for testing vehicles and calculating a manufacturer's fleet average fuel economy values. The fuel economy values for most vehicles are determined on the basis of tests performed on vehicles submitted by the auto industry to EPA to demonstrate compliance with emission standards. Some few vehicles are tested only for fuel economy purposes under precisely controlled conditions by professional drivers in a laboratory on a dynamometer. To represent the usage pattern of the average vehicle, 55 percent of the final fuel economy value is produced from a "city test" simulating a 7.5 mile, stop-and-go trip at an average speed of 20 mpg and involving both cold and hot starts. The remaining 45 percent is produced from a "highway test" simulating a 10 mile, non-stop trip at an average speed of about 50 mph.

EPA selects a representative sample of each manufacturer's fleet (passenger automobiles or specific classes of light trucks) and uses the fuel economy values to calculate a corporate, production-weighted average fuel economy. Testing is done largely before the start of the model year so that the manufacturers' models may be certified as meeting emission standards. An *expected* manufacturer's average fuel economy may be estimated from production plans. The actual average fuel economy, however, can be computed only after the end of the model year when actual production and sales data are available.

G. COMPLIANCE/NON-COMPLIANCE CONSIDERATIONS

The use of an *average* standard allows the manufacturer to balance off his sales of larger, below-standard models with compensating sales of smaller, above-standard models. Manufacturers failing to comply with applicable average fuel economy standards are liable for civil penalties. For each one-tenth mpg shortfall in the average, the Secretary of Transportation is authorized to assess a charge of $5 per vehicle manufactured. The penalty burden may be lightened by the Secretary to prevent manufacturer bankruptcy, preserve competition in the automobile industry (given a finding by the Federal Trade Commission), or allow for the effects on a manufacturer resulting from extraordinary circumstances (acts of God, fires, strikes). Manufacturers exceeding applicable AFE standards receive credits which may only be applied to any civil penalty imposed in the preceding model year, or in the succeeding model year. A credit is applicable only within the same category of vehicle for which the credit was earned.

The National Energy Conservation Policy Act, Public Law 95-619, amends the Act and gives the Secretary authority to raise the amount of civil penalty to $10 for each one-tenth of a mile, using rulemaking procedures. To do so, the Secretary must conduct

V 4 4 / 2 0 J A 2 9 7 9 UMI

V 4 4 / 2 0 J A 2 9 7 9 J UMI

hearings in order to determine the magnitude of energy conservation, impacts on competition, and impacts on imports of raising the penalty.

H. RESEARCH AND DEVELOPMENT

During the past 5 years, DOT has developed the capability to conduct comprehensive assessments of the ability of manufacturers to improve the fuel economy of their products and to assess the impacts of those improvements on the industry, the consumer, and on the National economy. These assessments can be made in such areas as technology, engineering, manufacturing cost, economic, and marketing consequences.

The objectives of this research and development (R&D) program are to develop, maintain, and update the data bases and the analytical tools necessary for rulemaking and policy formulation activities in the area of automotive energy conservation. In FY 1978, approximately $6.0 million was spent on private sector R&D contracts.

The R&D program is divided into six areas:

(1) *Assessment of Automotive Technology,* which deals with the identification and evaluation of production and projected hardware available to manufacturers for achieving fuel economy improvements. This includes both passenger automobiles and light trucks with less than 10,000 pounds GVWR (individually and in fleets) and encompasses weight and acceleration reduction, engine and drive train improvements, use of alternative engines and transmissions, improved lubricants, reduced accessory losses, and reduced aerodynamic drag and rolling resistance.

(2) *Effects of Federal Standards on Fuel Economy,* which deals primarily with possible fuel economy effects resulting from emission, noise, safety, and damageability standards (either in effect or under consideration). It also deals with the effects of other Federal standards (occupational safety, health, and environmental) on manufacturing plants and production capabilities.

(3) *Industrial Analysis,* which addresses the evaluation of manufacturability and costs of technological improvements, both individually and in combinations; the assessment of manufacturers' capabilities and leadtimes in implementing fuel economy improvements; and, capital requirements and the feasibility of obtaining capital.

(4) *Economic Analyses and Impact Evaluation,* which focuses on the identification and evaluation of impacts of fuel economy standards (and other related conservation actions) on automobile prices, automobile demand, and employment, and on the cost of ownership and operation of automobiles. It also deals with domestic competition, imports, and aggregated economic effects on the automotive sector of the economy, on the national economy, on petroleum and other national resources, on air quality, and on highway safety. Important considerations in these analyses are fuel availability and price.

(5) *Market Analyses and Impact Evaluation,* which examines the mutual interactions between automobile products offered by the manufacturers and their acceptance in the marketplace within the context of fuel economy standards, Government policies, and fuel prices. The impacts of these products on consumer choice and vehicle usage patterns are important in assessing the impacts of the program and are, therefore, under continuing investigation.

(6) *Implementation of Innovation in the Motor Vehicle Industry,* which deals with the assessment of the responses from the motor vehicle industry to Federal initiatives and regulations in safety, fuel economy and emissions, and the assessment of policy alternatives to stimulate innovation in the industry to produce "socially responsible" motor vehicles.

The research and development program has produced comprehensive data bases and methodologies in all technical areas. In Automotive Technology the contract work which produced the data bases for spark ignition and diesel engines has demonstrated, on the basis of preliminary results, that a 3000 lb. automobile can achieve 33 mpg fuel economy at emission levels below the statutory 1981 standards of .41/3.4/1.0 for HC, Co and NO_x, respectively. The establishment of this data base has also resulted in the turbo-diesel Volkswagen Rabbit with 60 mpg, and 40 mph frontal crash protection. In the Industrial Analysis area, a comprehensive data base of the plants facilities, tooling, employment, production capacity, and conversion costs for the automotive manufacturers and suppliers has been developed to support analyses of urban impacts, and financial impacts on manufacturers. A corresponding data base has been developed which encompasses manufacturability, costs, and lead times for components and vehicles. In the Market Analysis area, consumer discussion groups are being conducted to probe consumer attitudes and preferences in energy conservation and fuel efficient vehicles.

The results of the Automotive Fuel Economy Research Contract program have been presented at the Automotive Fuel Economy Research and Analysis Program Contractor's Coordination Meetings held in April and December 1978. These contract results, together with material obtained from manufacturers and other sources, are documented in source documents which represent the state of knowledge on the various specific subjects. Source documents are not rule-specific and cover a time period which extends beyond the period covered by current rulemaking activities. Source documents prepared or initiated in FY 1978, are as follows:

- "Impact of Federal Regulations on the Financial Structure of the Motor Vehicle Industry."
- "Future Potential of the Spark Ignition Engine."
- "Material, Labor, and Capital Requirements for Implementation of Federal Motor Vehicle Regulations."
- "Future Potential of the Diesel Engine."
- "Motor Vehicle Weight Reduction."

The state of our knowledge on diesel particulate emissions and their potential health effects was reported in a workshop on that subject, held in April 1978.

I. PUBLIC INFORMATION PROGRAM

The Act requires several public information activities. Automobiles manufactured more than 90 days after FY 1976 must bear labels indicating vehicle fuel economy, estimated annual fuel costs, and the fuel economy range of comparable automobiles. The EPA is responsible for prescribing the form, content, and display requirements for these labels.

The EPA must also prepare annually a booklet (*The Gas Mileage Guide* [1]) providing information on fuel economy of automobiles manufactured in a given model year, including estimated annual fuel costs associated with automobile operation. The Department of Energy must publish and distribute the booklets, which automobile dealers are required to make available without charge to their customers.

NHTSA is responsible for the enforcement of the *Gas Mileage Guide* regulations which provide that failure to comply with consumer information requirements may result in a civil penalty of not more than $10,000 for each violation. To date, NHTSA has investigated 368 new dealerships across the country. Of these 368 dealerships, 46 percent were not in compliance with the regulations. These cases are being adjudicated. Dealership compliance is likely to improve rapidly as more dealers become aware of the active enforcement program.

[1] The first edition is published with the gas mileage available in September of each year, the beginning of the model year for domestic manufacturers. A second is published in February with more complete data on vehicles certified later for both foreign and domestic manufacturers.

J. FEDERAL PURCHASING PROGRAM

Section 510 of Title V requires that all passenger automobiles acquired by all executive agencies, in each fiscal year between 1977 and 1985, achieve a fleet average fuel economy of not less than 18 mpg, or the average fuel economy standard applicable to the individual automobile manufacturers, whichever is greater. This section defines acquisitions as those vehicles purchased or leased for a period of 60 continuous days or more. Specifically excluded from this program were passenger automobiles designed to perform combat related missions, law enforcement work, and emergency rescue work. In July 1977, these requirements were extended to include light trucks, effective in FY 1978. As mandated by Executive Order, the fleet average fuel economy for all passenger automobiles federally acquired must exceed the statutory fuel economy standard by 2 mpg in FY 1978, 3 mpg in FY 1979, and 4 mpg in FY 1980-85. No automobile may be acquired if the mpg rating is below the standard for that particular year. The applicable fleet average fuel economy objectives, by fiscal year, are as follows:

TABLE III—1. *Fleet Average Fuel Economy Objectives*

Fiscal year	Average fuel economy standard (mpg)	GSA fleet average fuel economy objectives
1978	18.0	20.0
1979	19.0	22.0
1980	20.0	24.0
1981	22.0	26.0
1982	24.0	28.0
1983	26.0	30.0
1984	27.0	31.0
1985	27.5	31.5

During the FY 1977, Federal executive agencies acquired 18,670 passenger automobiles. The fleet average fuel economy was 19.3 mpg, resulting in a gasoline savings of approximately 11.12 million gallons (or 265,000 barrels) of gasoline over the expected useful life of the vehicles. Through August 31, 1978, agencies had acquired 13,594 vehicles attaining a fleet average fuel economy of 21 mpg. This will result in a gasoline saving of 14.4 million gallons (or 343,000 barrels) of gasoline over the 60,000 miles expected life of the vehicle. The gasoline savings for both years are based upon the premise that, in the absence of this program, Federal Agencies would have continued to acquire a combination of 8 cylinder midsize and standard sedans and station wagons which are less fuel efficient. Additonal savings are expected in FY 1979 as the fleet average fuel economy objective increases to 22 mpg, the fuel economy standard rises to 19 mpg, and the program is extended to include light trucks of 6,000 pounds GVWR. There will be an even greater savings in subsequent years as the CSA program is extended to include light trucks up to 8,500 pounds GVWR and the differential between the GSA passenger automobile fleet average fuel economy and the fuel economy standard rises to a maximum of 4 mpg.

K. REPORTING REQUIREMENTS

The Act requires manufacturers to submit reports semiannually to DOT containing: (1) Information on manufacturers' abilities to comply with applicable fuel economy standards; (2) a plan describing steps taken by the manufacturer to comply with the standards; and, (3) such additional information as may be required by the Secretary.

Two reports required by the Act have previously been submitted by the Secretary of Transportation to the Congress:

(1) *Effective of Miles-Per-Gallon Meters as a Means to Conserve Gasoline in Automobiles,* July 1976, and (2) *Advisability of Regulating Electric Vehicles for Energy Conservation,* August 1976.

IV. TECHNICAL OUTLOOK

A. FROM 1979 THRU 1985

Introduction

This section discusses the technical capability of motor vehicle manufacturers to comply with the present fuel economy standards, those set by the Act, and those established by the Secretary of Transportation.

When the Department of Transportation issued passenger car standards for Model Years 1981 through 1984, supporting documentation for those standards included the Rulemaking Support Paper dated July 1977, and the Final Impact Assessment dated June 30, 1977. Subsequently, at hearings conducted by the Subcommittee on Science, Technology, and Space of the Senate Committee on Commerce, Science and Transportaton, executives of each of the four major U.S. passenger car manufacuturers stated that they would meet the imposed standards—and would monitor and adjust production schedules, if necessary, to insure compliance.

The Department of Transportation/NHTSA does not purport to be able to predict the exact path that each manufacturer will adopt for complying with the standards. Rather, NHTSA has projected product plans for each manufacturer, assuming implementation rates of fuel economy improvements which are technologically feasible for the appropriate vehicles. In these plans, each automobile configuration is separately projected into the future. Engine, transmission, related component and assembly capacities are then coordinated with manufacturing plans. The values used for the technological improvements to fuel economy are based on manufacturers' responses to questionnaires and on estimates developed by the NHTSA technical staff on the basis of engineering fundamentals and information in the open literature.

The Rulemaking Support Paper for the 1981-1984 passenger car standards presented detailed evidence in support of the conclusion that techholgy would be available for achieving the required standards. The analysis was specific for each of the domestic manufacturers and did not include the additional fuel economy improvements that could be achieved either by shifts in the mix of models toward cars with smaller interior volume or by the application of diesel engines. Nor did the analysis include other potential technologies for improving fuel economy, such as turbocharging and engines in which some of the cylinders can be deactivated (dual-displacement engines). These technologies provided an even larger safety margin in case some of the ongoing developments are not fully successful.

In the last 18 months, since the passenger car standards were issued, the NHTSA has updated its information base and its methodology for estimating technologically feasible fuel economy for each manufacturer. It has used test data on later model cars, additional information received in response to information requests from the automobile manufacturers and suppliers, additional research results, and information from the trade press. The earlier conclusion that the average fuel economy standards of 27.5 miles per gallon for each of the domestic passenger automobile manufacturers is technologically feasible for model year MY 1985 has been confirmed by the latest analyses. Each manufacturer has a wide range of technical options which can be combined in various proportions to meet the fuel economy standard.

Because manufacturers have been less concerned with fuel economy for light trucks, less information has been available. The first efforts to develop data comparable to that available for passenger cars occurred with the initial rulemaking for MY 1979 and continued with the rulemaking for MY's 1980-81. More data is being developed in the course of rulemaking for light trucks for MY's 1982-1984. A proposal is expected this Spring.

An important factor complicating light truck fuel economy projections is the difference in car/light truck usage. While the car is designed to transport passengers, the light truck is

V 4 4 / 2 0

primarily designed to carry heavy and/or bulk cargo. The light truck is also designed to carry loads on unprepared surfaces (e.g., those encountered at construction sites, recreational areas, etc.). Many owners may use their trucks to maximum capability only rarely, if at all. Consumers who might want somewhat "less truck" in terms of hauling capability do not now have a suitable alternative available in today's market. The small imports do not provide the cab space desired by many people, nor are their truck beds sized to accommodate standard building materials used in this country. In addition, the current foreign exchange rates are rapidly placing these trucks at a considerable price disadvantage when compared with the lightest domestic trucks. There is a size gap between the smallest domestically produced light trucks and the largest imported light trucks. As "intermediate" size pickups and vans are introduced, light truck fleet fuel economy can be expected to increase.

Seven categories of technological improvement have been identified which could lead to increased fuel economy in the mid-eighties for both passenger automobiles and light trucks (see Table IV-1). The major ones are weight reduction, and engine and transmission improvements. The following paragraphs discuss each category in more detail.

Weight Reduction

The NHTSA estimates that the average inertia weight of new passenger automobiles can be reduced from about 3,900 lbs. in MY 1977 to about 3,000 lbs. in 1985. This reduction by itself could increase fuel economy by about 23% (assuming that acceleration performance is held constant).

TABLE IV-1

Representative Fuel Economy Improvement Techniques for Passenger Cars and Light Trucks In the Mid-Eighties

Technology	Typical Improvement in Fuel Economy from 1978 (1)	
1. Weight Reduction (downsizing, materials substitution, and/or alternate configurations for body or powertrain)	10% reduction in weight increases fuel economy by 8% at constant acceleration performance.	
2. Engine Improvement		
Improved Spark Ignition Engine Efficiency		
a. Optimized control	1-3%	
b. Engine quality	0-20% (2)	
Alternate Engines		
a. Diesel	25%	
b. PROCO	20%	
Turbocharging	car-specific depending on replacement of current engine by a smaller turbocharged engine. Typically 5-10% improvement in fuel economy	
3. Transmission Improvement		
Improved Automatic Transmission related to current 3-speed		
a. Locked-up torque converter	3-6%	
b. Wide range 3-speed	2%	
c. Wide range 4-speed	5%	
d. Improved efficiency	1-2%	
e. Improved engine/transmission matching	1-2%	
f. 4-speed with locked-up torque converter	8-11%	
Overdrive Manual Transmission	5%	
4. Improved Lubricants		
a. Crankcase		
1. lower viscosity	1%	3% total
2. friction modified	1%	
b. Rear axle lower viscosity	1%	
5. Reduced Parasitic Losses	1-4%	
6. Reduced Tire Rolling Losses	5%	
7. Improved Aerodynamics		
a. Complete Body redesign	5%	
b. Add-on devices	3%	

(1) These values are not necessarily additive
(2) As compared to an average 1978 engine.

V 4 4 / 2 0

[4910-59-M]

There are a number of ways to accomplish such a weight reduction including:

- Substituting new vehicles with smaller external dimensions, while maintaining interior space, into the same market class (downsizing),
- Redesigning current smaller exterior dimension vehicles and providing them with a nameplate of a vehicle with a larger size market image (also called downsizing),
- Substituting lighter weight materials (materials substitution),
- Introducing smaller, lighter weight engines, and other components,
- Applying front wheel drive in a new design,
- Using modified space arrangements (minivans replacing station wagons),
- Using various combinations of these approaches.

Downsizing has been the main weight reduction technique applied since MY 1977. General Motors, Ford, and Chrysler have introduced new vehicles that are smaller in external dimensions and lighter than the automobiles they replaced, while retaining or increasing interior roominess, The manufacturers used all-new designs and facelifts in the process. The first round of downsizing will probably be completed by the early eighties. Some additional downsizing will probably take place later, but most of the major car lines will have been subjected to this process by the early 1980's. (Mix shift, a mechanism for reducing the average weight which is different from downsizing, includes a reduction in utility—downsizing does not.)

In addition to "downsizing" the vehicle, redesign of many of the components to achieve further weight savings is possible. As an example, it is estimated that about 75 lbs. could be saved from an average vehicle by using lighter engine and accessory components.

Material substitution means that aluminum, plastic, and HSLA (High Strength, Low Alloy) steel are substituted for carbon steel, the main component of current automobiles and light trucks. All of these lighter weight materials are expected to be used to a greater extent in the mid-eighties than they are today. The mix of substitute materials will depend on the development of production techniques and the relative economic advantage of the different materials. The use of aluminum and plastic materials may be limited by supplier/industry production capacitities. There does not appear to be a limitation on the availability of HSLA steel in the mid-eighties. This subject is discussed further in Section V.

Reduction in the size and weight of the engine can be accomplished, while maintaining the needed power, by applying turbocharging. The weight of a turbocharged engine of a given power level will be in the range of 100 to 250 pounds lighter than that of a conventional engine.

The use of front wheel drive is also expected to provide substantial savings in weight when compared to conventional rear-wheel-drive automobiles. Several models now use front-wheel drive, and General Motors has announced plans to use this technology throughout its products by the mid-eighties.

Still another way to reduce vehicle weight is to use an alternate vehicle configuration, such as a van type space arrangement as a replacement for station wagons. It appears possible to reduce vehicle weight by 500 to 700 pounds with the van type arrangement.

Engine Improvements

The possible fuel economy improvement to be realized through engine improvements depends on the engine type. Three types were considered: spark ignition (SI), compression ignition (diesel), and continuous combustion (gas turbine, Stirling, steam).

The spark ignition engine is expected to be the dominant engine in the mid-eighties, accounting for about 90% of the new vehicle fleet. On the average, the fuel economy of spark ignition engines will be little changed from 1978 to the mid-eighties due to the scheduled tightening of emission standards. NHTSA considered four factors in arriving at this conclusion. They are:

- The diversity of the baseline (1978) engines,
- The changes in emission standards between now and the mid-eighties,
- The fuel economy improvement potential attainable by changing control strategies,
- The fuel economy improvement potential achievable through engine design-variable changes.

Diesel engines are already being used in some car and light truck models. Manufacturers' plans indicate that about 10% of the new passenger car fleet may be diesel, with fuel economy improvements of at least 25% at the same performance level. The extent of diesel engine application is brought into question by concern over the possible health effects of diesel particulate emissions. This issue is discussed later in more detail.

Currently, two types of stratified-charge engines are either under development or in production: the open-chamber and divided-chamber types. Current indications are that the divided-chamber engine (such as the Honda CVCC) has little or no advantage in efficiency over a conventional homogeneous charge SI engine at the 1981 emissions level, particularly in the large engine/vehicle combinations.

The open-chamber stratified charge engine (such as the Ford PROCO) is approximately 20% more fuel efficient than a comparable homogeneous charge SI engine. The open-chamber stratified charge concept should work very well in rotary engines as well, due to the gas dynamics that occur in this design. Several manufacturers are experimenting with this concept, and one or more production engines may appear in the eighties.

The open-chamber stratified charge engine could work in trucks, but it is likely that it will be allocated to passenger cars in the early 1980's where it can be developed under less severe operating conditions. Light truck usage may follow with these engines introduced in the low-load-range portion of the light truck market (as has been the case with the Oldsmobile light duty automotive diesel).

Continuous combustion engines (e.g., Stirling, gas turbine) are not expected to be in production before 1990 at the earliest. Several development programs now underway are expected to provide fuller understanding of the fuel economy such engines could achieve in production.

Transmission Improvements

The fuel economy of passenger automobiles and light trucks can be increased by the use of advanced transmissions.

One significant cause of energy loss in automatic transmissions is the loss inherent in torque converter slippage. A lock-up clutch on the torque converter eliminates this slippage and increases fuel economy between 3 to 6 percent. Chrysler has introduced such a feature on some three-speed automatic transmissions in model year 1978, and other manufacturers are expected to follow. By the mid-eighties, it is expected that most automatic transmissions will incorporate either lock-up clutches or other means of mechanically by-passing the torque converter to avoid losses.

Further gains in fuel economy are possible by adding an overdrive, either in the form of a wide range three-speed (a change from the conventional ratios) or a fourth gear. With an overdrive transmission, a 2 to 5 percent fuel economy improvement is possible which is additive to that obtained from the torque converter lock-up.

Improved Lubricants

Recently, a number of new lubricants featuring reduced-viscosity and/or friction-modifying additives have been introduced. At present the friction-modified oils are not approved by

J A 2 9 7 9 UMI

the EPA for use in fuel economy certification testing. The EPA, however, does allow their use in EPA durability vehicles, and it is assumed that by the early eighties these oils will have been approved for use in fuel economy testing and that the total fleet will be using them. The 1981 light truck fuel economy standard has a one-half mile per gallon contingency; i.e., the standard is reduced by one-half mile per gallon if the EPA does not approve the use of these oils. It is projected that a 3% improvement is possible with the use of both low-viscosity and friction-modified oils in the engine crankcase and driveline.

Reduced Engine Accessory Power Requirements

Reducing the loads placed on the engine by accessories will have a positive effect on fuel economy. The engine accessories include the oil pump, water pump, fan, air pump, and alternator, and, for the bulk of automobiles sold in this country, air conditioning and power steering pump. All of these accessories, because they require engine power to operate, have an adverse influence on fuel economy. An increase in fuel economy of up to 2% is possible with improved individual accessory components. Improvements of 2-4% are possible through the use of improved accessory drives (which would reduce the engine power needed to drive the accessories at higher engine speeds). The improvement with accessory drives is not generally additive to the improvements from individual accessory components.

Reduced Tire Rolling Losses

By the early eighties, the NHTSA projects that tire rolling resistance can be reduced by 35% over today's radial tire, resulting in a 5% improvement in the fuel economy of passenger automobiles. The improvements for light trucks may not be so large. The 35% rolling resistance reduction will be achieved by combinations of technical design and operational improvements in the following four areas: (1) Type of rubber base stock and additives used in rubber compounds, (2) cord and belt material, (3) increased inflation pressure, and (4) use of an oversized tire operated in an under-loaded condition.

Reduced Aerodynamic Drag

The NHTSA estimates that fuel economy can be improved by 5% through the early 1980's when new body designs are introduced, or by 3% through the use of aerodynamic add-on devices. Presently, at highway speeds approximately half the amount of energy being consumed by the engine is used to overcome aerodynamic drag. It is estimated that it may ultimately be possible to reduce the aerodynamic drag of passenger automobiles by 20 to 50% by careful body design.

Advanced Vehicle Designs

Through its Research Safety Vehicle (RSV) Program, the Department has shown that a "socially responsible" automobile can be a near-term reality by demonstrating that the production of vehicles with high fuel economy, excellent safety characteristics, and low emissions is not only feasible, but practical. Under the Program, one contractor has modified an existing four-door, five-passenger car in such a way that its fuel economy is predicted to be more than 28 mpg, its emissions can meet the currently more-stringent California emission standards, and its structure can sustain zero damage in a 7 mph frontal crash (current standard is 5 mph) and provide occupant protection at 40-45 mph (as compared to 30 mph for the existing standard). These improvements can be made at minimum cost, using existing production techniques, and with high probability of consumer acceptance.

The RSV Program has also demonstrated even more innovative concepts in design and technology. A prototype 2,250 pound two-door, four-passenger vehicle with a mid/rear transverse spark ignition engine has been developed which not only surpasses the most stringent emission and safety requirements, but also is projected to attain a fuel economy of nearly 35 mpg and sustain no permanent damage in a 10 mph frontal crash. The vehicle utilizes new materials and production processes, including the use of lightweight, foam-filled metal sides and front.

This structure provides increased energy absorption (and occupant protection) while reducing weight to improve fuel economy, The industry has shown interest in this structural concept, and one manufacturer is establishing, in contract with the government's contractor, to attempt prototype applications while another is closely following the evaluation of the concept.

Average Fuel Economy Projections

Projections of fuel economy for the 1980 through 1985 passenger car fleets are presented in Table IV-2. Similar assessments were conducted in the course of rulemaking to establish the 1981 through 1984 passenger car standards. On balance, the conclusions reached during the 1981-84 rulemaking (and published in the Rulemaking Support Paper dated July 1977) are similar to those resulting from the most recent assessments. These analyses indicate that all domestic manufacturers can exceed the scheduled standards for each year through 1985.

The specific fuel economy levels shown for each domestic manufacturer do differ from earlier estimates, but not to any significant degree. For the most part, these differences are attributable to the use of more recent EPA certification data than that used during the rulemaking. In this case, 1978 model year information was used because it is the most complete data base for passenger cars is not yet complete).

TABLE IV-2.—*Domestic Manufacturer Automobile Average Fuel Economy Projections*

[Miles per Gallon]

Manufacturer	Model year					
	1980	1981	1982	1983	1984	1985
AFE Standard	20.0	22.0	24.0	26.0	27.0	27.5
American Motors	21.5	23.6	24.6	24.8	28.7	29.5
Chrysler	21.8	24.3	25.9	26.8	28.9	30.1
Ford	21.7	24.7	25.3	27.6	29.1	29.7
General Motors	22.5	23.7	25.3	26.4	28.6	29.8

It should be noted that manufacturers' plans are always being revised, and within the last month, some manufacturers have indicated substantial changes. These changes obviously are not reflected in Table IV-2 and are now being evaluated by the Department.

The case where the manufacturers could use no diesel engines was also considered. This case affects only Chrysler and General Motors. The Chrysler fuel economy values shown in Table IV-2 would be reduced by 0.1 mpg in 1984 and 1985 if diesel engine use should not be permitted. For General Motors, model years 1984 and 1985 average fuel economy estimates are 28.0 and 28.7 mpg, respectively, without diesel engines (instead of those values shown in Table IV-2). If Ford's PROCO program is not included, Ford fuel economy estimates would

V 4 4 / 2 0

be reduced to 27.3 mpg, 28.2 mpg and 28.4 mpg for model years 1983 through 1985, respectively.

The NHTSA estimates that all of the foreign manufacturers (not including low volume manufacturers) can meet the mandated standard of 27.5 mpg in 1985, although Mercedes-Benz, BMW, Volvo, and Peugeot would apparently fall below 27.5 mpg without diesel engines in their fleets. These four manufacturers historically have produced a limited line of vehicles for market segments that until recently were not covered by the domestic manufacturers. These foreign manufacturers believe a change in vehicle size or characteristics will adversely affect the marketability of their products. Their approaches to increasing fuel economy appear to rely more on technology that does not include weight reduction through downsizing. Further, it appears that if Mercedes does not take sufficient steps to reduce the weight of their vehicles, they must increase their diesel market share to more than 60% if they are to meet the 1985 standard. The analysis shows that none of the four manufacturers can meet the standard without diesel engines unless they reduce their vehicle weights substantially.

Diesel Engines

The future of the diesel engine as a powerplant in light duty vehicles is highly uncertain due to increasingly stringent, federally-mandated emission standards and an unknown ultimate degree of acceptance by consumers in the marketplace. Emission control technology for diesel engines and the concomitant tradeoffs with fuel economy is in its infancy, and it is difficult to make projections of future performance with a high degree of confidence. Nonetheless, it seems quite apparent from the limited data available that the fuel savings potential of the diesel is considerable.

When compared to average 1978 spark ignition (SI) engines, after adjusting for equivalent performance, currently-produced diesel-powered passenger cars and light trucks show fuel economy advantages ranging anywhere from 22 to 52 percent. Currently-produced diesels for these light duty vehicles are all naturally-aspirated, indirect-injection engines, with the sole exception of the turbo-charged Mercedes 300 SD. Advanced technologies, such as turbo-charging and direct fuel injection, offer near-term potential to further increase fuel economy at least an additional 15 to 20% above that of the currently-produced diesels. Further out in time, various technologies hold promise for even greater fuel economy improvements while simultaneously reducing emissions and improving performance.

Some of these technologies include: turbo-compounding, variable compression ratio, water emulsions, alternative fuels, and advanced fuel injection systems (higher pressures and/or electronic control of timing and volume).

As in the case of the spark ignition engine, a number of vehicle characteristics affect the diesel-powered vehicle's fuel economy. The diesel's sensitivities to these vehicle characteristics are different from those of the SI engine because of differences in their part-load performance characteristics. In general, the diesel-powered vehicle will achieve a larger increase in fuel economy than an SI-powered vehicle for similar reductions in aerodynamic drag and tire rolling losses.

Two major issues that may preclude a significant increase in diesel penetration are the unknown health effects associated with diesel exhaust particulates and the potential requirement to meet stringent NO_x emission levels while simultaneously lowering particulate emissions.

EPA and DOE have ongoing research programs investigating the potential health effects associated with diesel exhaust. The outcome of this research will, of course, bear heavily on determining the stringency of future emission standards and the viability of the diesel as a future alternative powerplant. This research is designed to provide at least preliminary answers by the fall of 1979, prior to the point in time when the manufacturers must make large capital expenditures on tooling in order to meet the fuel economy standards. EPA has made it quite clear, however, that automobile manufacturers are completely responsible for insuring that the use of diesel engines does not constitute an unreasonable risk to human health.

Recently, EPA has proposed particulate standards of 0.6 g/mile in 1981 and 0.2 g/mile in 1983. The relative ability of diesel passenger cars to simultaneously meet the proposed particulate levels and the 1981 gaseous emission standards of 0.41 HC/3.4 CO/1.0 NO_x g/mile with a given control technology is dependent on vehicle and engine size. Current DOT-funded research on diesel emissions indicates that the combination of the 1981 gaseous emission standards with a 0.2 to 0.3 g/mile restriction of particulate emissions can only be considered highly likely in a vehicle with an inertia weight of 2500 lbs. or less, utilizing injection retardation and turbocharging. Vehicles between 2500 and 3500 lbs. can achieve an emission standard of 0.41/3.4/1.5 in combination with particulate levels of about 0.3 g/mile. Naturally-aspirated engines in this same weight class would yield about 0.5 g/mile particulate levels. The lower NO_x level and proposed 1983 particulate standard of 0.2 g/mile can possibly be achieved in this weight class with technologies which may include modifications to current diesel fuel and the use of oxidation catalysts, in addition to injection retardation and turbocharging. Since these technologies have not been developed and tested, their potentials are yet to be demonstrated. Finally, DOT has seen no data where vehicles exceeding 3500 lbs. inertia weight, using currently available technology, are meeting the 1981 gaseous emission standards in combination with a 0.2 g/mile particulate level, and it is not clear that engines for these vehicles can be designed using currently demonstrated technology. Particulate traps will be required in addition to all of the above technology. As of today, traps have not demonstrated effectiveness for longer periods than 5000 miles and, thus are not currently practical for production vehicles. This discussion is intended to provide perspective on this issue based on data on hand today and not to prejudge the outcome of EPA's regulatory proceeding.

EPA Test Procedures

The Act requires that the EPA establish the fuel economy testing and calculation procedures for determining fleet average fuel economy values for a manufacturer. The procedure is required by law to yield results comparable to those obtained under the procedures for model year 1975. The EPA is required to develop and provide mileage information to the public in a *Gas Mileage Guide* and on labels for vehicles. The Act requires measurement of fuel economy in conjunction with emissions to the maximum extent possible, although it does not expressly require that fuel economy testing for developing mileage guide and standards compliance information be conducted at the same time. However, to date, practical considerations have dictated that it be done in this manner.

Two significant issues have arisen out of the above constraints. First, EPA has issued a number of "guidelines" for manufacturers to follow in emissions certification and fuel economy testing. EPA contends that the guidelines have been necessary to close loopholes in the test procedure and render "more accurate" test results. The DOT has agreed with EPA's efforts along these lines in principle. The manufacturers, on the other hand, contend that EPA has continually revised its procedures since 1975, to the extent that the present fuel economy test procedures no longer yield results comparable to those obtained under the 1975 test procedures, as required in the Act. DOT has insufficient information at this time to judge the validity of either argument,

although it is recognized that the effects may be sizeable. It is imperative that this issue be carefully studied in 1979; the steps to accomplish this are presently being undertaken.

The second issue concerns the ability of the EPA test procedure to accurately predict "real-world" fuel economy. Ever since EPA began publishing mileage information begining with 1973 model year cars, there has been a growing public awareness of a descrepancy between the test ratings and real-world performance. Moreover, an examination of the data over time reveals a trend indicating the discrepancy may be growing rather than diminishing. These findings are of concern from several viewpoints. From the consumer's viewpoint, the purchaser of a vehicle is receiving less fuel economy than expected. From the national viewpoint, less energy is being conserved than expected. The sources of the discrepancies are many and varies, e.g., driving habits, ambient temperature, road load, engine accessory loading, and production vs. certification vehicle considerations. More work is required to quantify the effects of the various discrepancies and adjust the test procedure and/or mileage guide accordingly. The apparent conflict between the desirability of achieving more representative fuel economy figures and the statutory requirement that the test procedure for compliance remain equivalent to 1975 is an issue that DOT will address in the coming year with EPA and DOE.

B. TOWARD THE 1990'S [5]

Although it is premature to attempt to quantify average fuel economy standards for the late 1980's and 1990's, it is possible and necessary to confront some of the basic issues. These include the need for further improvements in fuel economy, the rate of such improvements, the availability of technology, economic practicability, and the Government role.

As the Secretary of Transportation pointed out in his speech before the Detroit Economic Club in December 1978, the existing fuel economy standards, as challenging as they may be for some to meet, will not suffice for the future. By the early 1990's the effect of the present fuel economy standards largely will have been realized and energy demand will spurt again under the continuing demand for mobility. Unless cooperative and constructive efforts are initiated now, sufficient supplies of affordable fuel will not be available. Beyond 1985, even a one mile-per-gallon improvement in fuel economy per year for new cars probably will not be sufficient to offset increases in total demand for motor fuel. Thus, it is necessary to focus on the things that must be done to make major increases in average fuel economy (e.g., to again double the fleet fuel economy averge to something like 50 miles per gallon, or its equivalent, before the new century). Advances now being made in automotive fuel economy are the result of technology developments which occurred over the past twenty years or so. The NHTSA estimates that most of the currently known technologies for improving fuel economy will have been utilized by 1990. By that time, the possibilities for further fuel economy improvements using existing commercial technologies will come close to being exhausted, although incremental improvements will still be possible. But, if the next generation of cars and light trucks is to meet the conditions of the 1990's it is necessary to begin now to develop advanced automotive technologies so that they will be ready for commercialization. Two primary avenues exist for further increases in fuel economy: (1) The use of lighter weight vehicles; and (2) the application of engines with lower specific fuel consumption than current engines (e.g., improved diesels, stratified charge, and Stirling engines).

Concerning lighter weight vehicles, by 1990 downsizing will have gone as far as possible, and only massive shifts in the mix of cars sold will allow a reduction in average vehicle weight. Consumers would have to accept smaller cars, or cars with lower acceleration capability, to achieve fuel economy increases without new technologies or materials application. However, lighter vehicles can be expected to result from the widespread use of composite materials such as fiber-reinforced plastics, and the further application of monocoque type design. Together, these techniques could reduce the average weight of passenger automobiles by about 500–700 pounds below that expected by the mid-eighties. The weight reduction anticipated for light trucks is about two hundred pounds. Unfortunately, to achieve these weight savings, new production practices would need to be developed by the auto industry. Although the practices in themselves would be different from those used today, they could be introduced into fleet manufacture in the industry's normal evolutionary manner.

Concerning engines with lower specific fuel consumption, one engine type which could provide improved fuel economy in the nineties is an advanced version of the diesel engine (although turbocharged spark ignition engines of new designs also offer significant improvements over today's spark ignition engines). Widespread application of such diesel engines could increase fuel economy by 40–50 percent over current spark ignition engines. The part-load fuel economy of the diesel shows significant improvement over that of the spark ignition engine. The widespread application of diesel engines, however, awaits the resolution of questions concerning the health effects of diesel exhaust emissions and appropriate control technology, as previously discussed.

If it were possibe to develop the light weight designs, and the health effects of controlled diesel engine exhausts were found to be acceptable, fuel economy values in the range of 50 mpg for the passenger automobile fleet and 30 mpg for the light truck fleet would be technologically achievable.

An insight into the fuel consumption implications of higher average fuel economy levels can be gained by looking at Figures IV-1A and IV-1B which show an estimated range of fuel consumption and cumulative fuel saving for the passenger automobile fleet between the years 1985 and 2005. The curves show the projections for possible future fleet average standards of 27.5 mpg, as well as higher levels. Figure IV-1B projects a cumulative saving of between 4 and 6 billion barrels by the year 2005 with higher fuel economy levels than the 27.5 mpg standard maintained indefinitely.

The cost of the required change in the industry to achieve these fuel economy projections is difficult to estimate without considerably more analysis than has been completed to date. It is important, however, to realize that the technology needed, while understood, is not yet available for production. The research and development needed to bring this technology into being must still be done. It is also important that the Federal Government take action now and in the early 1980's to insure that the Nation will have available the technological ability to achieve future improvements in fuel economy.

[5] The speech of the Secretary of Transportation before the Detroit Economic Club in December 1978 served to focus public attention on this subject.

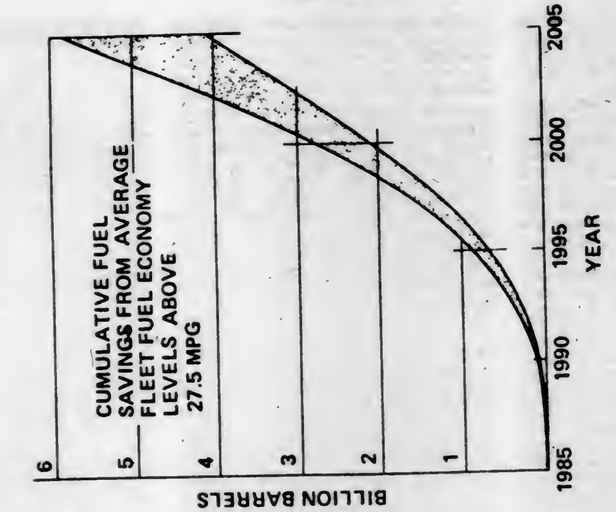

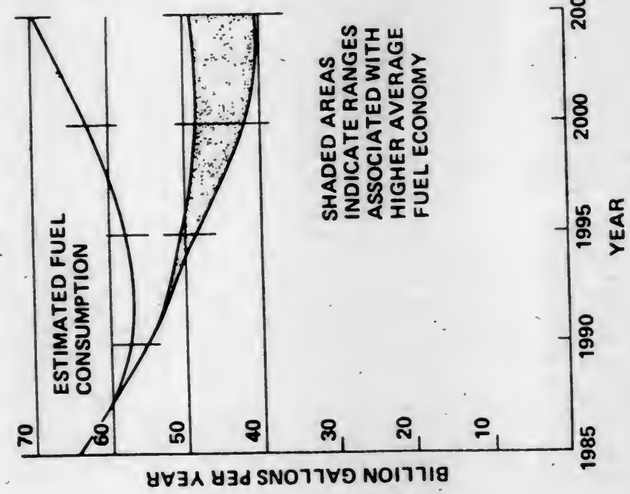

Figure IV-1A

FEDERAL REGISTER, VOL. 44, NO. 20—MONDAY, JANUARY 29, 1979

[4910-59-M]

The Department has taken a definitive step forward by suggesting a conference of leaders in the auto industry and within government agencies that support and regulate that industry. The industry has been invited to join with the Government in a coordinated program dedicated to developing the advance automotive technology that will allow major advances in fuel economy and safety.

It is necessary that the auto industry and the government jointly focus on long range goals as well as short term objectives, since the long range program may well exceed the commercial capabilities of the industry alone. The Federal Government can and must play a key role in fostering and, to the extent possible, assisting is such a development program. Substantial sums of tax dollars are already being invested in automotive-related research and development.

Federally-supported research and development programs should be the catalyst for a concerted, cooperative government-industry effort toward the goal of greatly increased fuel economy that serves national, industrial, and consumer interests. The committed involvement of industry and the private sector is required to overcome the common technical problems that stand in the way of that goal

Considerable effort has already been applied to the development of the automobile of the 1990's. An assortment of experimental safety vehicles, with improved crash protection and fuel economy, have been built and tested under the direction of the Department of Transportation. The industry has carried out, and is presently conducting with the support of the Department of Energy, a variety of alternative engine programs—the Stirling,[6] the turbine, the electric and hybrids. There are other more exciting prospects—advances that depend on significant developments in materials, heat transfer technologies and energy storage systems.

C. UTILIZATION OF ADVANCED AUTOMOTIVE TECHNOLOGY

With the passage of the Department of Energy Act of 1978—Civilian Applications on February 25, 1978, the Congress placed a specific requirement on the Secretary of Transportation to report annually on "the extent to which the automobile industry utilizes advanced automotive technology which is or could be made available to it," including "recommendations which may encourage the utilization" of such technology. Due to the close relation between this requirement and the purpose of this report, the report required by the DOE Act of 1978 is included here. Three topics are covered in highlight fashion: the evaluation process, the extent of technology application, and recommendations. Refer also to the preceding parts of Section IV.

NHTSA's ongoing evaluation of the extent to which the automobile industry utilizes advanced technology was continued during 1978. In June, questionnaires were sent to the major domestic and selected foreign manufacturers of passenger automobiles seeking, among other things, information on the technological improvements the manufacturers foresee through the mid-eighties and intend to use. The light truck manufacturers were presented with a similar request in July 1978. A symposium on Technology, Government and the Automotive Future, jointly sponsored by the Department and Harvard University, was held in October 1978. In December, the Secretary called for a Government-Industry meeting to explore what can be done to foster the development and utilization of advanced technology by the U.S. automotive industry.

A number of new technologies have been introduced, or are planned for introduction in the near future. These include:

- Diesel Engines—These engines are increasingly being used in automobiles sold in the United States. General Motors now offers two diesel engines, and it appears to be ready to introduce additional diesel engines. Other manufacturers already offering diesel-powered cars include Mercedes-Benz, Peugeot, and Volkswagen. A number of other manufacturers are actively working on diesel engines for cars. Work performed under contract to DOT by Chrysler, Volkswagen and Fiat is aimed at developing a data base on diesel engine technology. Manufacturers, however, are completely responsible for diesel engines emission control treatment.
- Turbo-charged Spark Ignition Engines—General Motors, Ford, Saab, and Porsche are now offering turbocharged engines in at least one of their lines of automobiles. Volkswagen has developed, under contract to DOT, test data showing that a turbocharged spark ignition engine in a 3000 lb. inertia weight vehicle can achieve 33 mpg EPA composite fuel economy, while meeting 1981 emission standards.
- Stratified Charge Engines—Ford has been developing a direct-injection stratified charge engine, called PROCO, for a number of years. It appears this engine will be in production in the early 1980's.
- Other engines—The Department of Energy is sponsoring development of gas turbine and Stirling engines and has a major program to develop and demonstrate electric and hybrid vehicles.
- Electronic Controls—Most of the manufacturers will be introducing electronic engine and emissions controls (spark advance, air/fuel mixture, and exhaust gas recirculation).
- Improved Transmissions—The four-speed automatic transmission with lock-up clutch will be introduced in model year 1980 or 1981. Widespread application of this technology is expected.
- Downsizing—This was the major technique starting in 1977 in which the external dimensions of some automobile models were reduced without reducing the internal dimensions in order to make large reductions in weight.
- Material Substitution—Since 1975, the application of high-strength low-alloy steel, plastics and aluminum has increased in passenger automobiles and light trucks. Ford Motor Company has announced its intention to introduce a graphite fiber reinforced component in the 1980 Mustang.
- Front Wheel Drive—General Motors has publicly stated that the major part of its product line will utilize front-wheel drive in the mid-eighties. New front-wheel drive vehicles will be introduced in MY 1979 by General Motors. Currently, the Chrysler Omni/Horizon is a front-wheel drive automobile.
- Computer-Aided Design—This is a technology not obvious to the consumer; however, the application of advanced design techniques has allowed the more rapid introduction of downsized vehicles and different materials. It permits better structural design for both crashworthiness and durability while reducing weight.

The Department is still studying what can be done to encourage the utilization of advanced technology in the automobile industry. It appears that the rate of introduction will be influenced by financial considerations. At this time, it is premature to present recommendations pending the outcome of the discussions between the Federal Government and the manufacturers recently proposed by the Secretary.

V

ECONOMIC IMPACTS

Having reviewed in Section IV the various factors involved in the technological feasibility of achieving the statutory standard of 27.5 mpg by 1985, and why that achievement should not

[6] Ford Motor Company recently announced cancellation of its participation in the DOE Stirling Program because it needed all its resources to meet fuel economy and emission standards, not because of any serious doubts about the potential of the engine itself.

V 4 4 / 2 0 J A 2 9 7 9 UMI

V 4 4 / 2 0

be a problem, attention is now directed to a review of associated economic impacts. The technological improvements to reach the 1985 standards (as well as those of intermediate years) will require significant increases in the capital spending patterns of the industry, will probably result in an increase in real prices of vehicles, and will continue to have major impacts on the auto industry. The fuel savings described earlier generate real benefits for the consumer (in excess of the estimated increases in vehicle prices), and serve as a significant aid to the Nation's economic health. The impacts of the program on the consumer, the auto industry, and the national economy are discussed below.

A. IMPACT ON CONSUMERS

There are several basic areas in which the fuel economy standards may affect consumers. First, there is a decreased amount of gasoline consumed resulting in a reduction in lifetime operating cost. Second, there is an increase in the initial vehicle cost. Finally, there are possible changes in acceleration characteristics and vehicle appearance.

In order to determine the present value of the cost of gasoline saved resulting from the increasing vehicle miles per gallon, three basic assumptions were made:

(1) Vehicle lifetime and miles travelled are approximately 10 years and 100,000 miles for passenger cars and 14 years and 134,000 miles for light trucks. Both types of vehicles are driven a greater number of miles per year when they are new than when they are old.

(2) The discount rate used to obtain the present value of monetary savings was 10%, and,

(3) The price of gasoline was taken to be 65 cents [7] per gallon.

Tables V-1 and V-2 show: (1) The amount of fuel saved over the lifetime of passenger cars and light trucks, respectively; (2) the incremental present value of the fuel savings over the average previous model year vehicle; and, (3) the cumulative effect relative to a model year 1977 vehicle. Note that the average MY 1981 light truck will be saving 2,181 gallons of gasoline in comparison to the MY 1978 light truck, which is more than the average MY 1985 passenger car will be saving in comparison to a MY 1977 passenger car—2,045 gallons of gasoline. This occurs for two reasons. First, a light truck is estimated to travel 134,000 miles over its lifetime in comparison to 100,000 miles for passenger cars. Second, the 1978 light truck has a low base fuel economy level and, thus, a greater potential to save fuel. Hence, an increase of only 3.8 mpg results in a 28% increase in fuel economy. Note, however, that over their respective lifetimes, the average MY 1981 light truck will use about 40% more fuel than an average MY 1978 passenger car. Similarly we note that a 1 mpg improvement in the 1979 passenger automobile over its 18 mpg predecessor saves 292 gallons while a 1 mpg improvement in the 1984 model over its 26 mpg predecessor saves only 142 gallons. As the base gets higher, we have to redouble our efforts to continue saving.

TABLE V-1.—*Fuel Savings for New Passenger Automobile Purchasers*

[Lifetime (100,000 miles) fuel savings per passenger automobile as a result of increasing fuel economy standards over previous model year's level]

	Standard (MPG)	Gallons saved		Present value of fuel savings per car [1]	
		Incremental [2]	Cumulative [3]	Incremental [2]	Cumulative [3]
Model year:					
1978	18.0	126	126	$56	$56
1979	19.0	292	418	131	187
1980	20.0	263	681	118	305
1981	22.0	455	1136	203	508
1982	24.0	379	1515	169	677
1983	26.0	321	1836	143	520
1984	27.0	142	1978	64	884
1985	27.5	67	2045	30	914

[1] Savings based upon fuel price of 65 cents per gallon, discounted 10 percent annually back to the purchase year.

[2] "Incremental" indicates savings over the previous year's model; "Cumulative" indicates savings over the 1977 base year model, which averaged 17.6 miles per gallon.

TABLE V-2.—*Fuel Savings for New Light Truck Purchasers*

[Lifetime (134,000 miles) fuel savings per truck as a result of increasing fuel economy standards over previous model year's level]

	Fuel economy [2] (MPG)	Gallons saved		Present value of fuel savings per truck [1]	
		Incremental	Cumulative	Incremental	Cumulative
Model year:					
1979 [3]	14.0	355	355	$137	$137
1980	15.6	982	1337	378	515
1981	17.3	844	2181	325	840

[1] Savings based upon fuel price of 65 cents per gallon, discounted 10 percent annually back to the purchase year.

[2] Fuel economy based on projected sales mix of 4-wheel drive and 2-wheel drive vehicles.

[3] Model Year 1979 compared to estimated MY 1978 average light truck fuel economy of 13.5 miles per gallon.

Passenger automobiles and light trucks are expected to increase slightly in price as a result of fuel economy regulations. DOT estimates of North American [4] capital spending by General Motors, Ford, and Chrysler (based primarily on manufacturers' plans) indicate significant increases over historical spending levels. It is estimated that these additional capital expenditures and related product engineering costs, and costs of introducing a new product, if allocated over all vehicles, will result in an approximate $400 increase in the total cost of MY 1985 passenger cars and light trucks.[5] This estimate does not include the effects of variable manufacturing costs which may either increase (due to use of technologies such as turbochargers and 4-speed automatic transmissions) or decrease (due to material cost savings from weight reduction by downsizing). On balance, it is expected that variable manufacturing costs will increase slightly. However, any price increase resulting from manufacturing costs due to fuel economy regulations alone should be more than offset by the lifetime fuel savings of $914 for an average MY 1985 passenger car, and $840 for a MY 1981 light truck.

[7] The price used is somewhat low by 1979 pump prices. The effect is to understate the savings slightly and make the computation conservative.

[4] U.S. domestic and Canadian.

[5] The Department has assumed model changes for light trucks after MY 1981 even though fuel economy standards for these years have not been promulgated at this time.

J A 2 9 7 9 UMI

To date there have been few problems concerning consumer acceptance of lighter automobiles. General Motors' downsized large cars were an instant success when introduced in MY 1977. GM's downsized mid-size cars sold slowly at first, but sales recovered completely later in the model year. Ford's lightweight Fairmont/Zephyr line achieved record sales for a new model in its first year. Chrysler's Omni/Horizon line of small cars has also done extremely well since its introduction; an indication of its success is the much higher than average rate of foreign car trade-ins by purchasers of this model.

The issue of consumer acceptance of lower acceleration capabilities is still unresolved (particularly, since acceleration capabilities have been promoted by the industry for so many years). This second major fuel-saving approach involves the reduction in the power (and, therefore, size and weight) of the engine relative to the weight of the entire vehicle. Not only does the overall weight decrease save fuel, but the engine cruises somewhat closer to full throttle which is more efficient for most spark ignition engines. The apparent consumer drawbacks would be the loss of acceleration at lower speed, a lack of reserve power at high speed and a decrease in maximum speed up a grade. All of these would be expected to generate consumer resistance. In practice, however, little such resistance has thus far been detected. Earlier reductions in power-to-weight ratio occurred about the time of the introduction of the catalytic converter (which allowed retuning of the engine for better response), and the imposition of the national 55 mpg speed limit (which allowed gearing for better low speed performance and reduced the need for high speed reserve or hill climbing). As a result, any perceptible degradation in performance has not reached the point where manufacturers would expect customer resistance. The response to still smaller engines is not known, and close attention (through market surveys and other means) will be directed to this area.

An issue which has been raised recently by automobile manufacturers relative to consumer impacts is their claim that the current fuel economy standards would result in price increases much higher than the cost savings realized by the buyers of these fuel efficient vehicles. In short, in their view, the currently established standards would not be cost-beneficial for the consumer. There are, in fact, two questions involved: (1) How correct is the NHTSA analysis of consumer costs and and benefits? and (2) what bearing does such an analysis have on setting fuel economy standards? Relative to the first question, the operating cost portion of the analysis is straightforward and conservative since recent OPEC actions will make gasoline more expensive than the value used in this analysis. The present value computation technique is well known. Moreover, the estimate of cost-based changes in price used the best and most recent information available to DOT. The Department will continue to examine new information as it becomes available and will refine the consumer cost-benefit analysis accordingly. At present that analysis still indicates that the standards are very cost-beneficial.

Relative to the second question, the statute does not make the cost-effectiveness of the standards an explicit basis for rulemaking. Rather, the Secretary is directed to consider technological feasibility, economic practicability, the effect of other Federal standards on fuel economy, and the need of the Nation to conserve energy. While it is obviously desirable for any Federal rulemaking to produce a net consumer benefit, the relationship between individual monetary savings and national benefits resulting from energy conservation is not clearly defined. Since the Act explicitly cites the latter, it might be interpreted that the intent of Congress was to achieve energy conservation even at the cost of some consumer self-sacrifice. Of course, the Department will make every effort possible under the law to minimize consumer costs. The present standards provide a very significant benefit for consumers.

B. IMPACT ON AUTOMOTIVE MANUFACTURERS

Operational Effects

To understand the fundamental effect that the fuel economy program has had, and will continue to have, on the automotive manufacturing industry, it is useful to consider how the industry operates and how various technological changes to meet the fuel economy standards compare to historical patterns of change within the industry.

Traditionally, the domestic auto industry (while introducing new models every year) has never redesigned all cars each year. Full-line manufacturers have generally made significant changes to the body or frame in each line every 3 to 6 years, and minor changes during intervening years. Thus, over a several-year period, full-line manufacturers have revised the configuration of their entire product lines. However, the manufacturing life of certain components is frequently much longer. Some basic engines have been in production for over 20 years, and it is common for the manufacturer to retain axles, transmissions, and other major vehicle components unchanged while making major overall vehicle revisions.

In reponse to the fuel economy program, the manufacturers hae altered this cycle. Since the program's goals will be largely met by changing the sizes and structures of vehicles, by reducing weights, and by making major changes to engines and drivetrains, the industry is and will be accelerating its changeover cycle and increasing the scope of those changes.

There is no doubt that such a mandated program of change may place burdens on the industry and entail some risks. The next section analyzes the costs and risks, but it is useful here to consider the benefits to the manufacturers from the program.

To begin with, the vehicles will need to be redesigned from the ground up. Rather than patching a new body style on an old drivetrain, the cars can be engineered as a coherent unit to incorporate the best technology for fuel economy, occupant protection, damage protection and emissions control. Manufacturers can build in, rather than add on, features to improve the quality and durability of their product.

In this period of change, there will be an opportunity to modernize and upgrade plants and facilities now approaching obsolescence. The newest and most efficient machinery and processes can be incorporated into the planning for a significant improvement in productivity.

Not all of the changes to the automobiles involve an increase in cost. For example, one benefit of downsizing is a reduction in the amount of materials needed to produce an automobile. Based on the average 1977 cost of materials (excluding overhead, amortization, etc.), the cost reduction attributable to a 700 pound downsizing is conservatively estimated to be $210 per vehicle.[10] These are the variable costs that the industry would have incurred without downsizing.

The industry will also be in a more competitive position with respect to foreign vehicles, both in the United States and abroad. At home, with increased competition in the small car market—long the domain of Japanese and European imports—the import share of vehicle sales should decline. Conversely, with the production of more standardized parts, as well as more fuel-efficient vehicles (so necessary in Europe where the price of gasoline is 3 to 4 times that in this country), the industry is expected to compete more actively and effectively overseas. The development of a "world

[10] Final Impact Assessment of the Automotive Fuel Economy Standards for Model Years 1981-84 Passenger Cars, June 30, 1977, DOT/NHTSA, Washington, D.C., P. I-6, ($0.30/lb.×700 lbs.)

V 44/20
JA 29 79
UMI

car" is on the horizon and although Chrysler has recently sold its European subsidiaries (Chrysler still has partial ownership of Peugeot), the other companies are planning to expand their overseas activities.

Ford has long been the domestic leader in sales overseas; moreover, its foreign operations are very profitable. General Motors, to compete more effectively overseas with Ford and foreign manufacturers, has doubled the assets of its overseas division and anticipates becoming the world's major producer of small cars.[11] American Motors, based on negotiations with Renault, also expects increased access to overseas markets, using Renault's dealer network for AMC's very profitable Jeeps and possibly its passenger cars.

It is only reasonable to ask, however, why extensive redesign of the product and modernization of the plant could not take place under normal circumstances if they were so badly needed. What is special about the fuel economy program which facilitates those changes? Redesign, retooling and rebuilding, of course, does not come free and those costs will be reflected in the price of the cars for sale. In normal times, any manufacturer attempting such an ambitious program unilaterally would not only face the investment and innovation risks, but also the risk that competitors could seriously underprice it, in the short term particularly. While the changeover would offer great long-term benefits, the manufacturer who attempted it alone could be at a severe short-term disadvantage. GM might have the resources to go it alone, but as the industry sales leader, may lack the incentive. Ford, Chrysler and AMC probably could not risk it.

The mandated fuel economy program forces all the manufacturers to make the changeover together. The competitive risk is not that one manufacturer will hang back and underprice the rest, but rather that one will do a better job in changeover than the others. All new cars will cost more, but, as was shown earlier, the cost will be more than offset by savings on fuel. Furthermore, because of the present situation of the dollar in international markets, domestic manufacturers are relatively free from foreign price competition. It will mean work, and there are risks, but there is not likely to be a better opportunity for the U.S. automobile industry to revitalize.

No group within the industry is more excited by the challenges associated with these efforts than the automotive engineer. Engineers and others in the industry are inspired by the program's goals and have publicly stated their enthusiasm for the opportunity to use their skills to the fullest extent.[12] This kind of reaction itself often sparks innovations which might not otherwise have a favorable environment in which to flower.

Capital Requirements

One of the most common measures used to determine the effect of the program on manufacturers is the increased level of capital investment (special tools and property, plant, and equipment) associated with making fuel economy improvements. Section IV discussed a variety of capital and non-capital intensive technologies available to improve fuel economy. Many of these technological options require capital investments for their implementation (e.g., downsizing, new engine lines or transmission facilities). The magnitudes of annual capital expenditures will depend on the technologies chosen and the rate of which they are introduced.

Different companies will choose different technologies and strategies to achieve compliance. For example, some may elect to buy components from suppliers, reducing their capital investment requirements but increasing their variable manufacturing costs. This strategy increases consumer cost or lowers the manufacturer's margin of profit but reduces the financial risk and allows greater flexibility. The capital investment is demanded of the suppliers along with some of the risk. If the overall costs of the components are higher and are reflected in the vehicle price, the manufacturer may risk consumer resistance. As an alternative strategy, a company could invest heavily in high technology production processes to reduce manufacturing cost with the concomitant risk that the product would be successful and remain in production long enough to pay off the investment. In the design area, fuel economy standards might be met by substituting a smaller engine if one were available in production. Both investment and manufacturing cost changes could thus be small, but the loss of acceleration capability could risk consumer resistance. Any of the multitude of available strategies has certain associated costs and risks. Companies will choose among them on the basis of their market position, current product line, capability of raising capital and past experience.

The costs discussed below are based on DOT analyses using manufacturer and supplier information as the basis of the estimates. Under the previous historical pattern, North American capital spending for the 1978–84 period, the time during which capital investments for model years 1979–85 would be made, would have been approximately $24.5 billion, in 1978 dollars. Based upon analyses of the cost of anticipated changes, it is estimated that the auto industry will need to invest approximately $36.0 billion during the same time period—an increase of $11.5 billion or 47 percent. It is useful to place these costs in perspective. The seven years, 1978–84, will also witness North American automobile industry revenues projected at $590 billion. This, additional investment is less than 2 percent of total revenues. These estimates do not necessarily imply that all future capital investments are necessary for complying with the fuel economy standards. Rather, these estimates reflect certain combinations of technologies which the automobile manufacturers have indicated they are likely to use in order to improve their fleet average fuel economy.

The increase in investment discussed here in but one measure of possible costs of the program. These figures should not be interpreted as meaning the cost of meeting all government regulations is $36.0 billion, or that the cost of fuel economy standards equivalent to the $11.5 billion increase in investment. To separate the costs of a redesigned car into regulatory and non-regulatory costs is a difficult, if not an impossible, task. Some costs are brought about by market pressures, others by competitive decisions. The numbers discussed in this section only reflect an analysis of historical auto

(3) Annual Stockholders Meeting, May 2, 1978.

history investment patterns which indicates that, to meet fuel economy requirements while maintaining traditional manufacturing and marketing practices (such as offering a full range of styling options within each market class), a significant acceleration in industry investment level is likely.

As noted previously, these capital investment requirements are affected by the rate at which the options are introduced, as well as the nature of the options themselves. In this connection, the manufacturers have raised the issue that by increasing the fuel economy standards by 2 mpg per year in 1981 to 1983, instead of using a linear increase of 1.5 mpg per year to attain the 1985 standards of 27.5 mpg, an unduly burdensome task has been placed on the manufacturers that will not result in commensurate reductions in fuel consumption or consumer expenditures. For example:

- Chrysler estimates that the standards, as established, "will increase the automobile industry's capital requirements beginning in 1979 by $2.5 to $3.0 billion"[13] as compared to equal 1.5 mpg increments.
- Ford stated that the difference in fuel savings in 1985 between the current standards and straightline standards is only slight. By straightlining, the risks of introducing major new and costly technology risks of consumer rejection could be substantially reduced. At the same time, investment costs could be spread out more efficiently—those mitigating the inflationalry impact.[14]

Recent industry positions on this question are summarized in Appendix A as responses to NHTSA's request for public comments (Docket FE 78-02). This continuing dialogue between the industry and the Department is a vital part of the rulemaking process. The NHTSA is continually reevaluating the capabilities of the manufacturers in light of domestic and world conditions, both for the purpose of setting new rules and of modifying rules already set as may be appropriate. It is not in the best interests of the Nation or the industry for the Department to vacillate on rules which must form the bases of long range corporate planning. The Act contains adequate provisions for making changes to the current standards if the facts warrant.

During the next 5 years the number of new or resized engine and transmission lines planned to be put in operation is over 3 times the historical average of 3 new or modified lines per year. This planned change is the outcome of industry plans as it gears to reduce production of large engines in favor of small engines. Similarly, changes will be made in the transmission lines as manufacturers switch production from three-speed rear-wheel-drive automatic transmissions to four-speed rear-wheel-drive automatic transmissions, and to front-wheel drive transmissions.

However, the important impact of the fuel economy program on the industry relates directly to the fact that the industry must have the resources directly to generate an "extra" $11.5 billion in capital. This ability to make increased investments while maintaining financial health is the criterion which was of prime importance in determining whether the standards are "economically practicable." The Department largely views this criterion to mean that the investment requirements are within the industry's capability but not so stringent as to threaten economic hardship for the industry as a whole.

Congress recognized that different firms in the industry have different financial capabilities. The legislative history includes a discussion of the relatively small number of firms in the industry but at the same time stated that the standards ". . . should not be keyed to the single manufacturer which might have the most difficulty acheiving a given level of average fuel economy."[15] If the standards were to be set at the level to present no risk to the least capable manufacturer, the fuel economy attainable by the program could be greatly diminished. Thus, the "need to conserve energy" was to be balanced with the various abilities of the separate companies.

Based on industry information, Table V-3 provides the average estimated annual increases in capital investment required for each of the three largest domestic automobile manufacturers[16] between 1978 and 1984 compared with historical investment trends. While the investment requirements for the industry as a whole are useful in placing broad issues in perspective, the process of examining the financial impacts on individual manufacturers uncovers one of the most important economic issues related to the fuel economy regulatory program. The values in Table V-3 show that the capital investments anticipated by the industry are not distributed uniformly among the manufacturers.

*The investments are best estimates for North American automobile and light truck poduction for the domestic "big three" manufacturers.

[4910-59-M]

Prior to discussing the significance of the additional investments, a brief introduction to the companies' financial sources is necessary. Auto manufacturers generally depend on internal cash flows to meet capital expenditure investment—traditionally, manufacturers have not incurred significant amounts of long-term debt. Sales revenues are the prime determinant of the magnitude of cash flows. Retained earnings from the profit on sales provide one source of capital. Depreciation and amortization of property and equipment must supply most of the remainder, or the company must look for outside sources of capital. While GM and Ford have fairly easy access to outside capital, Chrysler is currently in a less favorable position with respect to the capital market." Table V-4 shows the magnitude of seven-year cumulative projections of cash in-flow for the individual manufacturers for North American operations as estimated by the Department through the use of publicly available information and assuming normal sales conditions. Normal sales are based on the historical annual growth of motor vehicle sales for the industry of approximately 2 percent. These estimates indicate that the cumulative cash in-flow produced by General Motors' car and light truck operation may be nearly three times the cash inflow generated by Ford, and almost twelve times that of Chrysler. This is disproportionate, as GM has twice the sales of Ford and 5 times those of Chrysler. Similarly, Ford, with roughly 2-3 times Chrysler's sales, generates almost 4 times the amount of cash flowing into the company.

"Historically, the auto industry has had an aversion to borrow even though their credit rating would have made borrowing easy. For example, Dun & Bradstreet, Nov. 1978 lists the credit rating of GM, Ford, and Chrysler as high, high, and good, respectively.

The significance of these figures is not a good indicator of relative financial ability. Rather, the large companies generate significantly more cash flow per vehicle sold than do the smaller ones.

TABLE V-4.—*Calendar Year 1978-1984 Cumulative Projections of North American Fund Sources Planned Spending—Normal Sales*

[Billions of 1978 dollars]

Manufacturer	Chrysler	Ford	General Motors
Earnings after Taxes	0.26	5.13	15.53
Depreciation and Amortization	2.99	7.67	19.16
Total Cash In-flow	3.25	12.80	37.49

Having estimated the magnitude of the revenue available during the 1978-84 period, a comparison of cash outflows is necessary. In addition to the capital investments to be made as shown in Table V-3, funds must also be used for dividend payments and other purposes (e.g., debt requirement). These are shown in Tables V-5, V-6, and V-7.

These projections are based on DOT's best judgment of conditions and business practices within the industry and among the individual firms, consistent with the maintenance of continued financial viability. For example, in each of the cases below, stock dividends are assumed to remain constant and positive in each year. This is primarily because auto stocks are generally considered to have less than average growth potential due to the mature nature of the industry. Thus, to attract investment funds from this source, firms must be prepared to offer relatively stable dividend payments. The magnitude of the dividends are based on historical levels for each company, and are assumed constant in the absence of other projections.

[4910–59–M]

In the case of planned capital spending, DOT estimates indicate that Chrysler may have a cumulative cash deficit of $1.8 billion during the peak capital spending years of 1978–82 and $2.0 billion for the seven-year period. Under this condition, Chrysler may be required to generate more than $300 million per year from external funding sources.[18] The Chrysler Corporation has experienced a significant decline in its market share since the beginning of the 1970's. This competition-induced decline has placed the firm in a relatively weak financial position and has lessened its ability to finance planned capital expenditure programs. In order to keep its capital investment requirements low, Chrysler is turning to domestic and foreign component suppliers which reduces its profit margin per vehicle. Chrysler's planned capital expenditures are intended to modernize their operations and product offerings to remain competitive, keep their full line of vehicle offerings, and comply with the fuel economy standards. These planned investments may be difficult to achieve in a serious economic downturn. However, as discussed earlier, there are other paths which Chrysler can choose to comply with the standards.

Recent actions such as the sale of foreign operations, the issuance of new stock, and a recent loan by several insurance companies have put Chrysler in a better position to meet its targeted spending levels than it was 6 months ago. Publicly, Chrysler executives have expressed confidence that they can achieve success now that their new "master plan" is in place.[19]

The estimate of Ford's cash deficit for capital spending is $1.3 billion for 1978–82. General Motors' cash deficit is estimated at $2.3 billion for the same period. (It should be noted that during this period Ford is projected to pay out dividends of $1.8 billion, and General Motors is projected to pay out almost $10.0 billion in dividends.) Both General Motors and Ford could generate cash flows of this magnitude through debt issues. Also, GM and Ford, with profitable overseas operations, could shift resources to make up any short-term deficits, although such a use of funds could affect overseas competitive positions in the long run.

American Motors' financial situation is not analyzed because of the current uncertainty of their negotiations with Renault. They, however, also have expressed optimism over the future. AMC's chief executive states that AMC will remain profitable, even in a recession.

Effects on Competition

Before examining the impacts of the program on competition, it must first be stated that the domestic automobile industry is not homogeneous. General Motors produces about half of the new vehicles made in the U.S., and has revenues double those of the second largest company, Ford. Chrysler and AMC, on the other hand, *combined* have only half the revenues of Ford, or a quarater of those of GM. Neither the scale of operation nor the resources available among the domestic companies can be said to be uniform.

In addition, there has been a long-term trend toward concentration in the automobile industry. Nearly half a dozen firms ceased production between 1945 and 1965 (Studebaker, Packard, Willys, Hudson, Kaiser, etc.), long before Government regulations were first issued. Among the remaining four large firms, Chrysler's share of the car and light truck market has fallen from about 15.5 percent in 1970 to about 11.5 percent in 1977[20] and AMC's has been cut in half in the last 2 years from 4 percent in 1975 to less than 2 percent in 1977.

The central question that must be addressed is whether, in the face of the increasing concentration in the industry, the fuel economy program adds to these pressures. To the extent that a program requires large capital investment, it imposes a heavier burden on smaller manufacturers which do not have the same financial strength as GM or Ford. On a daily basis, smaller companies operate at a disadvantage with or without Government regulation because they exist in an industry that requires large capital investments.

The special difficulty of the mandated program is that it sets a time schedule for investments and, for the manufacturer which borrows to make the capital investments, sets a schedule of repayments. If things go well, the added costs are covered in the prices of the cars and over several years the revenues will pay off the debt. But the manufacturer has lost the opportunity to defer investments or payments if revenues falter. If sales slump for the industry as a whole, the provisions of the Act would allow the standards to be revised to reflect the change in economic practicability. If a new design fails to sell as well as the competition, the manufacturer will be in trouble. A manufacturer who makes a major product mistake is in trouble any time, but the mandated schedule heightens the risk.

On the other hand, there are risks to small manufacturers in not having a mandated program. In view of the competitive pressures for fuel economy improvements, especially from the foreign manufacturers, some companies are going to make rapid fuel economy improvements anyway which some of the smaller manufacturers might defer and find themselves at a competitive disadvantage in the marketplace. The standards provide a large measure of stability for all manufacturers.

Foreign manufacturers are also affected by the program. If domestic manufacturers market more small cars, there will be more direct competition between the major foreign manufacturers and the domestic companies. Indeed, domestic manufacturers may make further inroads into the import's 15–20 percent of the market, in addition to those resulting from the recent dollar devaluations. They should also be in a stronger position to weather a future oil shortage when demand for smaller fuel-economical vehicles would increase greatly. Depending upon product offerings, this shift may benefit Chrysler and AMC. An example is Chrysler's successful introduction of the Omni/Horizon models.

The regulations may also have a competitive impact on limited-product-line manufacturers which do not build mini- or subcompact cars. For example, a number of foreign manufacturers have traditionally built cars which compared in size to American mid-size models. By comparison to American cars of their class, they were fuel-efficient and had relatively short wheelbases. For these limited-line manufacturers, the steps needed to meet an average fuel economy standard targeted at full-line manufacturers could mean significant changes in their marketing image unless they use diesel engines in large numbers. The degree of change that some limitedline manufacturers may be forced to make places a different burden on them than on their competitors, U.S. and foreign, because of the greater market risk involve.

In both instances, the case of smaller full-line manufacturers and the case of some limited-line manufacturers, the fact that they must meet an average fuel economy standard places them under pressures that could possibly lead to further concentration in the industry. DOT believes that further concentration in the industry is undesirable. First, there would be a reduction in choices available to consumers. Second, much of the innovation in

[18] Contractual studies funded by NHTSA, e.g., by Harbridge House, Inc., and the Futures Group, also show that smaller manufacturers may have difficulty in financing their planned capital expenditures, although these studies did not assess whether the absence of fuel economy requirements would have altered that picture.

[19] N.Y. Times, December 17, 1978.

[20] *Corporate Strategies of Automotive Manufacturers*, Vol. III, Harbridge House, Inc., July 1978 and *Final Impact Assessment of Light Truck and Van Fuel Economy Standards for FY's 1980–81*, NHTSA, March 15, 1978.

J A 2 9 7 9 UMI

V 4 4 / 2 0

the industry which has originated from the smaller manufacturers would decline. It would certainly not benefit the Nation if future innovation is stifled because entry into the American market becomes harder.

If accelerated investment requirements tend to foster concentration, reductions in those requirements for the entire industry by reducing fuel economy standards would lessen some of those pressures. However, a lowest-common-denominator approach to fuel economy regulation, while possibly solving problems of smaller full-line manufacturers and a few limited-line producers, does so only at the cost of increasing petroleum consumption as it lowers the fuel economy improvement attained by the majority of manufacturers, and it was specifically proscibed in the Conference report on the Act. The Department has set the fuel economy requirements with all of the issues considered and balanced as carefully as possible.

The Act recognizes that at least one class of manufacturers (low volume manufacturers) would need relief from the requirements of the law. Thus, in order to encourage diversity, manufacturers of fewer than 10,000 passenger automobiles worldwide may be exempted from the established standards and must meet alternative standards tailored to their individual capabilities.

In addition, the Congress was aware of the financial differences among the domestic auto manufacturers and provided relief mechanisms for possible financial difficulties. The provision of civil penalties and credits acts as a safety-valve mechanism when a manufacturer, despite its efforts, cannot comply with the standard. The Secretary can modify the penalties to prevent bankruptcy or insolvency, when the violation is a result of an act of God, a strike, or a fire, or when the Federal Trade Commission has determined that the modification of such penalty is necessary to prevent a substantial lessening of competition.

Recognizing then, that although the statute can have the possible effect of increasing competition but might also increase pressure for concentration in the industry, with an accompanying reduction of competition and lessening of the incentive to innovate, the Department has examined alternatives to the current statutory scheme for small full-line manufacturers and limited-line manufacturers.

The Act was examined to determine what changes, if any, should be advanced to insure that the program did not result in any serious anti-competitive pressures.

DOT explored options where implementation schedules could slip, or lower standards would apply to smaller manufacturers. DOT also analyzed the development of company-specific standards or class standards. However, no modification could be devised that could successfully eliminate or significantly mitigate the potential problems faced by smaller producers or limited-line manufacturers without creating equally serious equity or regulatory problems. The Department concluded that the problems faced by the various classes of manufacturers are largely inherent in the structure of the industry. The Department, therefore, recommends only that the system of credits and penalties under the Act be modified. The Act now imposes a substantial penalty on manufacturers who fall below the specified standards. It also permits credits to be earned by exceeding a particular year's standard, which can then be carried forward (or backward) for one year and applied against possible penalties in those years. The Department recommends that credits be allowed to be carried forward (or backward) for three years to enable manufacturers to benefit from their early conservation efforts and better balance future planning.

A number of manufacturers have raised the point that failure to meet the fuel economy standards involves a violation of the law, regardless of whether the short fall involves a penalty or involves the use of credits being carried forward or backward. The manufacturers have expressed strong reluctance to engage in any corporate planning that would involve violations. While the Department believes that the fuel economy standards are reasonable and feasible, it is also recognized that Congress intended to provide manufacturers with some degree of flexibility through the penalty provision. If the concept in the present law of penalties and violations does, in fact, inhibit the occasional use of the flexibility which Congress built into the statute, then, it is possible that consideration might be given to a proposal that would assess a tax or fee in lieu of the penalty. It is not clear, however, that such a change would result in the manufacturers modifying their behavior, in view of the size of the penalties, the stigma of not meeting the standards, and the competitive disadvantage in the marketplace.

DOT also analyzed the degree to which potential anti-competitive pressures would be increased if the economy were to suffer a downturn. Certainly in a severe economic downturn, companies with a weaker financial base will find their resources strained more severely. However, the statute does provide sufficient latitude in the standards' enforcement to preclude severe financial impacts on the industry in such an event. Thus, if a serious decline in auto sales occurs in conjunction with a severe economic downturn, the Department has the authority to revise the standards since regulations that were "economically practicable" in a healthy economy might not be so in a recession. Because of investment lead-time considerations, of course, the relief granted would necessarily have to be in the form of modified standards established for the period two-to-three years beyond the year (or years) in which the economic downturn/sales decline occurs. This would allow manufacturers to delay commitment of scarce resources to capital requirements for subsequent year models until the economy recovered.

There is no practical way to protect a manufacturer in advance from the results of product mistakes or poor management decisions. Neither does it appear desirable to take any blanket action that would lower the market incentive for excellence on the part of any producer of motor vehicles.

C. IMPACT ON MATERIAL AND COMPONENT SUPPLIERS

The domestic automobile manufacturers purchase a large amount of materials and components from outside suppliers. As these manufacturers implement changes to improve the fuel efficiency of their vehicles, material and component suppliers are being challenged to provide light weight, efficient components for the new designs of autos and trucks. There are new opportunities for many suppliers to increase their business with the major manufacturers

The automobile manufacturing industry used approximately 100 pounds of aluminum in each of its MY 1977 automobiles. In MY 1985 the industry may require an increase of approximately 200 pounds per vehicle, which represents 1.4 to 2.0 million tons over the MY 1977 level.

The aluminum industry is defined to include both the aluminum ingot producers and the aluminum processors. About 1 million tons/year of aluminum are consumed by the domestic motor vehicle industry; this represents about 15 percent of the domestic aluminum ingot capacity of 6 million tons/year. The production of the 1985 passenger car and light truck fleet may consume about 2 million tons/year of aluminum if material substitution techniques are heavily emphasized. The projected rate of aluminum consumption by the motor vehicle industry will be two to five times the present rate.

Since the domestic motor vehicle manufacturers are beginning to increase their aluminum capacity, employment in aluminum foundries should substantially increase.

The reinforced plastics industry is an industry with growing capacity. The amount of plastics consumed by the motor vehicle industry has been projected to grow from about 165 lbs. per motor vehicle in 1977 to about 350 lbs. per vehicle by 1985. The plastics industry will be called upon to supply up to an additional 2 million tons of plastic to the automotive industry. Mandated standards have provided the plastics industry with a unique opportunity to displace cold-rolled sheet carbon steel with reinforced plastics in some applications. The plastics industry has a major advantage in the competition with the mature steel industry, in that the plastics industry is used to applying a larger fraction of their technical resources to application engineering. Employment outlook in the plastics industry looks promising.

The steel industry, unlike the aluminum and plastic industries, does not face the need to expand capacity to meet the future demands of the automotive industry. Planned vehicle weight reduction programs through MY 1985 are likely to balance the increase in manufacturing volume, thus keeping the demand for steel by the automotive sector at a level near that of 1977.

The motor vehicle industry consumes about 40 percent of the hot-rolled, and about 50 percent of the cold-rolled sheet steel produced in the United States. Hot-rolled steel is primarily used for motor vehicle structural parts such as the frame and chassis, and the cold-rolled steel is used for hang-on parts such as fenders, hoods and side panels.

The impact of fuel economy standards on the steel industry will in part depend on the rate of replacement of carbon sheet steel panels, hoods, and fenders with reinforced plastics. If the 1985 motor vehicle remains predominantly steel, the primary impact of fuel economy standards will be a leveling of demand for steel by the auto industry. This leveling will occur despite increasing motor vehicle sales because the increase in manufacturing demand for steel historically associated with increasing sales will be counter-balanced by reduced steel usage per vehicle as downsizing continues. On the other hand, if sheet-aluminum-reinforced plastics are used extensively for hang-on parts, there will be a significant drop in the use of cold-rolled sheet steel, and employment gains would shift to the aluminum and plastic industries.

All the major components of a motor vehicle in cast iron are potential candidates for redesign in cast aluminum. The current domestic capacity for engineered cast iron casting is about 7 million tons. The motor vehicle industry currently uses more than 50 percent of this capacity. By 1985, it is projected that the demand by the auto industry for engineering cast iron will be cut by half, from 4 million tons to 2 million tons. The reduction in cast iron demand will result both from cast aluminum substitution and the use of 4 and 6 cylinder engines rather than 8 cylinder engines.

As the demand for cast iron is cut back, the domestic motor vehicle manufacturers will bring work into their own central foundries rather than sending the work out to the smaller independent foundries which, in the past, have provided overflow capacity. The fall-off in demand for iron castings, combined with EPA clean air and water requirements, could result in a rapid consolidation of the domestic iron casting capacity. The major domestic motor vehicle manufacturers may even subcontract their unused capacity.

An essential factor in meeting mandated fuel economy is the capacity of the machine tool industry to design, build, and install the production facilities necessary to mass produce the required powertrains. It is estimated that between thirty and forty new engine and transmission lines will be required by the motor vehicle industry in the next six years in order to produce the necessary engines and transmissions.

An engine, transmission or component manufacturing process consists, in part, of a series of transfer lines that automate the metal cutting process. For example, an engine line includes one transfer line to automatically machine the block, and another transfer line to automatically machine the cylinder head. The total transfer line industry has an annual sales volume of about $350 million; the motor vehicle industry utilizes about one-half the capacity of the transfer line industry.

The changeover of engines, transmissions and components to meet fuel economy standards are seen by the transfer line sector of the machine tool industry as an unprecedented demand with an uncertain future. The general machine tool industry consists of a large number of suppliers; they will have no difficulty in providing the necessary general machine tool capacity. This is not the case for the transfer line industry. The design, development, and installation of a transfer line requires specialized skills and floor space, which only a few companies have available. (A transfer line is, in general, operated and checked out at the supplier's plant before being installed on the final production site.)

For some of the less specialized metal cutting transfer lines, the motor vehicle manufacturers are going overseas; however the transfer lines for the most complex engine and transmission components will likely continue to be custom built in the Detroit area.

The employment in the transfer line sector of the machine tool industry will increase moderately in the Detroit area. The employment increase may, however, prove to be transitory, and is primarily limited by the near term availability of trained machine tool designers.

D. IMPACT ON THE NATIONAL ECONOMY

Employment

Employment levels in the domestic automobile manufacturer and equipment supplier industries increased from 774,000 workers in 1975 to 890,600 workers in 1977. The growth rate of employment is projected to peak in 1978 and then stabilize at about 1 percent per year through 1985, yielding a total of just over one million employees in that year.

Industry employment in the future will be based on the following changes:

(1) As a result of retail price increases, sales might increase at a slower rate than would be projected in the absence of standards. However, this is not likely to result in a reduction in employment because of anticipated sales growth, but only a slowing of the rate of employment increase. The effect on domestic employment would be further reduced because of greater price increases on imported vehicles.

(2) Investment may increase employment in the capital equipment suppliers industry.

(3) The fuel savings and resulting increase in disposable income should increase overall U.S. employment slightly as the additional expenditures ripple through the economy.

(4) A potential failure to meet a standard by a manufacturer may result in reduced sales if the manufacturer decides to curtail production of the less fuel-efficient vehicles as a means of complying.

(5) Some domestic manufacturers may purchase components overseas, which would adversely affect the domestic employment. This, however, would be a short-term phenomenon.

(6) An increase in the export of domestically-produced vehicles, as is now planned, would increase domestic employment.

(7) The elimination of "captive imports" in fuel economy calculations and the incentive for foreign countries to domestically produce vehicles—such as is already being done by Volkswagen—will increase employment.

The overriding factor will be the continuing growth in motor vehicle sales volume. Increasing sales volumes in the automobile industry are in turn primarily dependent upon a healthy overall economic environment.

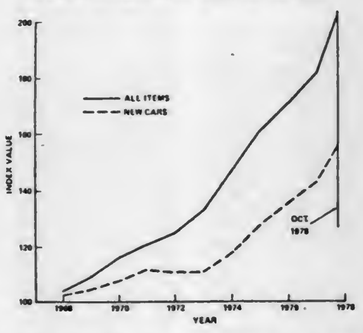
JA 29 79
UMI

V 4 4 / 2 0

Gross national product

Fuel economy regulations are unlikely to have any measurable impact on Gross National Product (GNP). As we noted previously, the cost to each consumer for automobile will be somewhat less (depending upon the difference between the increased purchase price and decreased fuel costs of the new automobiles). This will result, mainly, in a re-allocation in consumers' budgets between transportation expenditures and other expenditures and possibly a slight stimulus to the economy. In addition there would be the positive effect on GNP resulting from a decrease in the consumption of foreign oil which would lessen the level of income leakages from the domestic economy.

The impact of investment on GNP may be either neutral or positive. In some cases, the investment undertaken by automobile manufacturers may simply displace investment that would have been undertaken by other sectors of the economy; while in other cases, there may be a net increase in overall investment.



Inflation

Traditionally, prices in the motor vehicle industry have not increased at as rapid a rate as has the overall consumer price index (Figure V-1). Undoubtedly, the fuel-economy-related technology improvements embodied in new vehicles will result in some additions to the vehicle costs and retail prices of those vehicles.

It is important to recognize, however, that an upward influence on vehicle price is not the only effect of fuel economy improvements. Such improvements will also result in reduced ownership and operating costs to the consumer over the life of the vehicle. Such cost reductions will significantly exceed initial purchase price increases, thus more than compensating for the effects of the initial price increases.

The perceived impact on inflation in any one year of vehicle price changes and fuel economy improvement is complicated. Savings in operating cost are spread over the life of the car but weighted toward the early portion because of greater usage. On the other hand, many buyers finance automobile purchases and spread the cost over several years. For the purchaser who finances the car over three years, the fuel cost savings will roughly balance out the addition to financing payments from the fuel economy changes.

Figure V-1
Consumer Price Indexes / U.S. City Average / 1967 = 1000

The Nation's bill for imported oil is quite high and has contributed to domestic inflation, the balance of trade deficit, and a decline in the value of the dollar overseas. The fuel economy program would mitigate inflation rather than cause it by lowering the consumption of imported oil. It is estimated by NHTSA that more fuel efficient passenger cars and light trucks will decrease fuel consumption by 1.4 million barrels per day (MBD) in 1985, and 2.2 MBD by 1990. Such savings would permit a reduction in projected U.S. oil imports by 15 percent in 1985 and 20 percent [21] in 1990. At the crude oil price of $14.50 per imported barrel, the oil savings from improved fuel economy in the U.S. would permit reductions in import expenditures of $7.2 billion in 1985 and $11.8 billion by 1990. These dollar savings are of sufficient magnitude that they could by themselves serve to substantially reduce the U.S. balance of trade deficit, strengthen the dollar in the world market, and help mitigate domestic inflation.

[21] Based on oil imports data contained Annual Report to the Congress, Vol. II, 1977, Energy Information Administration, U.S. Department of Energy, 1977, pp. 137-138.

VI. Program Improvements

The administration of the automotive fuel economy program over the last three years has revealed to NHTSA two areas of the Act which could be improved. These are minor in the sense that few barrels of fuel are involved, but they are major to those automobile manufacturers who must deal with them. Accordingly, the following recommendations for changes to the Act, relating to (1) low volume manufacturers and (2) domestic production of foreign cars, are proposed.

A. Low Volume Automobile Manufacturers

The statute provides automobile manufacturers producing less than 10,000 vehicles per year an opportunity for an exemption from established fuel economy standards, providing that an alternative fuel economy standard is established for them based upon maximum feasible average fuel economy criteria. By this provision, all manufacturers, even the very small ones, are even-handedly pressured to improve fuel economy. Experience in administering this section of the statute demonstrates:

1—The time consumed in the process of setting an alternative standard (especially the information gathering), by both the manufacturer and NHTSA, is not justified by the possible fuel economy gain. The process is particularly burdensome on small manufacturers because of the effort necessary to gather or develop required data and information to support their exemption petitions.

2—Small manufacturers have been less able to predict future fuel economy improvement than large manufacturers because their technical expertise is very limited and their dependence on suppliers makes them unable to control their access to advanced technology.

3—Low volume automobile manufacturers typically do not have the engineering or financial resources for changing current methods of operation.

Most petitions have been received by NHTSA from manufacturers which build a relatively small number (200-300 per year) of very expensive and very luxurious vehicles designed specifically for the wealthy. The largest petitioner, Checker, is unique in that it is an American manufacturer that produces 5,000 taxis per year.

Public opinion concerning exemptions varies from those who request exemption for all low volume manufacturers, "in the name of common sense," to those who would force the manufacturers of very expensive, very luxurious vehicles to comply with the existing standards and pass on the appropriate penalties to their wealthy customers.

No significant fuel savings can be obtained from the low volume manufacturers. Alternate standards, set at the maximum feasible level, impose a heavy regulatory burden on small business, and use NHTSA's resources on tasks that conserve little fuel.

Based upon this conclusion, the most logical alternative appears to be to exempt these companies from the provisions of the statute. It is also imporant that any solution be fair to all manufacturers. However, all the options that were examined still resulted in an unreasonable administrative burden being imposed on these companies with no commensurate reduction in fuel consumed. Therefore, the Department recommends that automobile manufacturers producing fewer than 10,000 vehicles per year be exempt from both the fuel economy standards and the statute's semiannual reporting requirements.

RECOMMENDATION 1: Section 502(c) of the Motor Vehicle Information and Cost Savings Act be amended by the revision of its text to read:

"(c) The requirements for passenger automobiles of this section and Sections 502(a) and 505(a) do not apply to a manufacturer in any year in which it manufactured (whether or not in the United States) fewer than 10,000 passenger automobiles."

B. Domestic Production of Foreign Automobiles

The statute allows domestic manufacturers to include "captive imports" with their domestic fleets for the purpose of calculating their corporate average fuel economies in model years 1978 and 1979. After model year 1979, the domestic fleet will be comprised of only the cars which have at least 75 percent of their content (or value added) produced in the United States and Canada. The captive imports will be considered a separate fleet for average fuel economy calculations. Both fleets of cars must comply with the standards.

Congressional intent of this provision was to discourage domestic manufacturers from importing large numbers of fuel efficient vehicles to the detriment of employment in the U.S. automobile manufacturing industry. However, the provision has unexpectedly created a situation which discriminates against foreign manufacturers who are establishing, or who want to establish, automobile production facilitites in the U.S. (thus creating domestic employment opportunities).

Thus, while the provision originally was aimed at preventing "job exportation," it may reduce the potential for employment growth in the U.S. automobile manufacturing industry by acting as a disincentive for foreign corporations to produce automobiles in this country.

At least three foreign manufacturers have expressed an interest in U.S. production of part of their fleets. One such manufacturer, Volkswagen, has suggested that the Act be amended to allow a manufacturer to average the fuel economies of its foreign and domestic fleets together if their combined average fuel economy would exceed that of the imported fleet alone.

The Volkswagen proposal would encourage foreign manufacturers who have decided to build cars in the U.S. to produce their most fuel efficient vehicles here. However, it would discourage foreign manufacturers from producing their more labor-intensive automobile in the U.S.A. If a manufacturer can meet the fuel economy standards by counting its foreign and domestic fleets together, there is no reason to favor domestic production of high fuel economy vehicles over the lower ones.

Another alternative would be to raise the value added requirement for domestic manufacturers to 90 percent. Although this would help somewhat, foreign manufacturers would still be discouraged from achieving the 100 percent domestic-added content which would maximize U.S. employment opportunities. It appears that any percentage value-added requirement creates a disincentive for foreign manufacturers to maximize domestic content.

Because of the apparent drawbacks of the previous proposals, the following recommendation is offered and is believed to be capable of maximizing employment and competitive benefits while not changing the percentage limit on the U.S./Canada value-added content.

It is recommended that the statute be amended to allow a manufacturer to average U.S. assembled automobiles with imports if U.S. production began after the Act was passed. This proposal would continue the existing statute's discouragement of job exportation by domestic manufacturers and eliminate its current disincentive to U.S. production by foreign manufacturers.

RECOMMENDATION 2: Section 503 (b) (1) of the Motor Vehicle Information and Cost Savings Act be amended by the addition, following the word "manufacturer" in the first sentence, of the phrase, "other than a manufacturer whose domestically manufactured production commenced after December 22, 1975."

Appendix A—Summaries of Comments on Automotive Fuel Economy Program Issues and Conclusions

A. Introduction

On January 27, 1978, the National Highway Traffic Safety Administration (NHTSA), Office of Automotive Fuel Economy, issued a request (Docket No. FE 78-02, Notice 1) for public comments on four tentative conclusions which it planned to include in this (January 1979) Annual Report to the Congress, as well as on four associated issues relating to competition, equity, technological innovation, and other matters. The request, published in Federal Register Vol. 43, No. 228, Monday, November 27, 1978, is reproduced in its entirety in Appendix B. It is recommended that the reader consult Appendix B for the complete presentation of each of the four since, because of their length, inclusion here would be distractive. The subsequent summaries of comments on these issues are keyed in a one-to-one correspondence, to the order in which the issues are cited in Appendix B.

The purpose of the request was to obtain as broad a range of pertinent viewpoints as possible to assist NHTSA in its rulemaking activities and in preparing this report. Responses to the request included submissions from motor vehicle manufacturers, private citizens, public and special interest groups, and Federal and state government agencies.

Summaries of the responses received are presented in Sections *B* and *C* which follow. No "adhoc" analyses or evaluations of the responses (taken individually or collectively) are attempted in this Appendix since all of the factors and concerns raised in the responses are addressed, in their appropriate contexts, within the body of this report.

B. Summaries of Responses to NHTSA's Tentative Conclusions

The notice indentified the four tentative conclusions formulating NHTSA Fuel Economy Program findings to date. A summary of comments received follows. The individual conclusions on which the various comments were focused are included here, as well as in Appendix B, for clarity and ease of reference.

1. "The technology is available that will enable manufacturers to achieve an average fuel economy of 27.5 mpg without reducing vehicle interior space or significantly affecting performance and without significantly changing the mix of size classes."

Nine commenters disagreed with this conclusion. Eight were manufacturers, each of whom stressed that *their* product would be changed significantly. The only non-manufacturer comment entailed a statement by the DAA[1] that, unless diesel engines were used extensively, passenger automobiles would get smaller and less safe.

Most manufacturers detailed their plans for significant changes in model mix, interior volume and performance. Rolls-Royce stated that the conclusion does hold true for it because it is a very small manufacturer without a large "mix" of vehicles. Chrysler said that its fleet will have reduced acceleration and reduced interior volume and that its sales mix will change to include a much higher percentage of the smallest vehicles. DBAG stated that its plans call for some change in comfort and convenience options normally offered in the U.S. Also, DBAG noted it would reduce acceleration on some gasoline models. BMW indicated its automobiles will change by introducing a diesel engine for one or more models, and sales of the heavier cars may be curtailed in the future. AM concludes that the high volume, full-line manufacturers will have to

[1] Abbreviations are used for manufacturer interest groups and government agency names and titles to facilitate readability. A list identifying the abbreviations is included at the end of this appendix.

JAN 29 1979 UMI

V 4 4 / 2 0

compromise vehicle interior space, reduce vehicle responsiveness and alter sales mix from that which existed in 1975-77 model years.

Ford indicated the conclusion is wishful thinking on NHTSA's part. The technology on which Ford's predictions are based are the PROCO and/or diesel engines. They indicated that neither engine is "available" at the present time because of various problems yet to be solved. Ford also said the second round of downsizing will decrease interior volume unless very expensive materials are used and indicated that smaller engines in its vehicles will cause reduced vehicle acceleration.

GM stated that the rise of standards at the rate of two miles-per-gallon per year will cause all manufacturers to introduce unproven technology and that there will be compromises in vehicle acceleration and owner utility. GM stated that much of the available technology is "high risk," and may not be "commerically practicable in production hardware."

Renault indicated that their interior volume and sales mix will probably change.

2. "The significant changes in automotive design needed to achieve 27.5 mpg by 1985 will require increases in automotive industry investment above traditional levels, although such investments, for the industry as a whole are economically practicable and yield cost-effective improvements in fuel economy."

Commenters to this conclusion generally agreed that capital expenditures to meet fuel economy standards would be large, but disagreed that they were economically practicable or cost-effective.

Ford stated its costs were double those identified in previous analyses and that it will be pressed to the limit. In comparing the costs of compliance to the cost of alternate sources of gasoline such as from tar sands and shale, etc., Ford stated the standard of 27.5 mpg will not be cost-beneficial. GM asked for a more complete review of the capital expenditures and stated a reasonable interpretation of "economic practicability" requires more than a demonstration that fuel economy benefits exceed the cost of vehicle changes. Chrysler stated that although larger companies are better able to finance investments for fuel economy there is still a question whether it is economically practicable for any company to do so. Chrysler indicated it would revise its compliance timing in the event of a recession.

BL and R-R said that the cost is beyond the benefit derived from a 27.5 mpg level. Renault stated that although it agrees that compliance will be costly, it believes it will need new technical ideas and that overall, the standards will result in less service to the public. DBAG stated that it cannot develop a reasonable corporate strategy to comply with 27.5 mpg in 1985. Volvo believes that limited-line manufacturers are at a disadvantage to meet capital requirements for the quick introduction of new models, presumably to meet the FE standards and has cited its average of seven elapsed years between model changes.

DOE stated, "A manufacturer's inability to obtain the needed financing would probably result from some other structural problem such as the position of the company within the market or internal problems, rather than the standards."

3. "The economic and competitive effects of achieving that average fuel economy level will vary from manufacturer to manufacturer."

General agreement on this point was given by eight commentors.

Chrysler agreed and cited conclusions from TSC and Harbridge House reports. AM indicated there would be a struggle to increase mixes of cars sold and that some companies could be hurt. Ford agreed but also stated that differental standards are not a desirable remedy. DOE stated that if AFE standards will tend to lessen competition, NHTSA should examine other alternatives than applying different standards to individual manufacturers. DOE suggested use of the Section 508 (b), remission of civil penalties, as a "relief valve."

4. "Beyond 1985, average fuel economy levels in excess of 27.5 mpg are technologically possible."

R-R disagrees and states that luxury and comfort would be reduced too far for its customers. Renault simply opposes higher standards. GM agrees but suggests that increases in FE beyond 1985 be made at a slow pace. Chrysler agrees but stated this is not a technical question but an economic one. Ford states the conclusion is misleading because the real question is not technical feasibility but instead is, "will nearly everyone be willing to drive a subcompact?"

C. SUMMARY OF RESPONSES TO ISSUES

In connection with NHTSA's interest in the effects of the average fuel economy concept and with the four tentative conclusions addressed in Section B, above, NHTSA invited comments on issues surrounding the following four topics:

(1) The program's impact on small full-line manufacturers.

(2) The program's impact on limited-line manufacturers.

(3) The program's impact on very small manufacturers.

(4) (The potential for) improving fuel economy after 1985.

In general, the issues surrounding these topics relate to competition, equity, technological innovation, capital investment, etc. It is recommended that the reader consult Appendix B for the complete presentation of each of these issues.

Summary of Comments on Issue 1—The Programs Impact on Small Full-Line Manufacturer's

Chrysler identified itself as a small full-line manufacturer and expressed the desire for an adjustment in fuel economy standards which would allow it to retain its "traditional market share." It compared its position with GM regarding the ability to raise capital and of the competitive disadvantage created by existing regulations.

Ford and GM objected to the NHTSA suggestion that small full-line manufacturers should get treatment different from other full-line manufacturers. Ford claimed differential standards would be inequitable, odious, and unfortunate. Ford further contended that differential standards would penalize efficient manufacturers and would introduce "political processes into an arena that ought to be governed by the logic of the marketplace" and concluded without any equivocation that it is against differential standards for small full-line manufacturers. GM also stated that DOT should not suggest new legislation which would "significantly alter our free market economy" and which would not be fair, equitable, or in keeping with our traditional principles. GM also said this type of standard setting would penalize foresight, efficiency and success. The DOE and CAS were against the idea of separate standards. DOE opposed the application on the "lowest common denominator principle" in setting overall standards and suggested that companies who received civil penalties can seek relief in a remission hearing as provided in the statute. Similarly, CAS asked that the question be left for a remission hearing.

Summary of Comments on Issue 2—The Program's Impacts on Limited-Line Manufacturers

Eight commenters believed that either the Act or the regulations should be changed to assist limited-line manufacturers. Five of the seven are "limited-line" manufacturers, and made the following suggestions:

IH—The Notice cited only foreign manufacturers of passenger automobiles. The same consideration should be given to domestic light truck manufacturers.

AM—Change the Act or regulations for the same reasons of inequity that were found for small full-line manufacturers.

VOLVO—Report the problems of limited-line manufacturers to Congress and find a solution to the problem.

BMW—Change the Act to grant relief for those with a small percentage of U.S. total sales i.e. less than one-half percent.

DBAG—Amend the Act to give relief by first defining a limited-line manufacturer (LLM) and then by making a judgment of eligibility for relief based on whether a particular LLM had taken all reasonable steps to achieve the goals of the Act.

The DAA and AIADA recommended complete exemption for limited-line manufacturers, the AIADA requesting that low volume exemptions extend up to 100,000 U.S. sales annually rather than the 10,000 worldwide sales now in force.

Those opposed to assistance to limited-line manufacturers were Ford, GM, DOE and Chrysler. The same Ford and GM arguments against differential treatment for small full-line manufacturers apply to limited-line manufacturers. In addition, both manufacturers expressed negative effects a change would have on the U.S. international economic posture.

DOE stated limited-line manufacturers should not need or want lower standards for three reasons:

1. They must be competitive with others in Corporate Average Fuel Economy (CAFE).

2. They have good technology.

3. They can use diesels.

Chrysler stated that differential treatment of limited-line manufacturers by the Act is not in the best interest of the transportation industry, balance of trade, U.S. employment and the national economy.

Comments on the impact of the Act or impact of changes to the Act might have on limited-line manufacturers were widely varied. AIADA noted the very small amounts of fuel that may be saved through these manufacturers. Renault noted that manufacturers who were technologically ahead in meeting safety standards had a head-start in meeting fuel economy schedules. Volvo indicated the Act could operate "in restraint of trade." BMW claimed that 25 percent of its R&D budget now committed to fuel economy would increase to 40 percent by 1985. IHC asked for 1981 light truck standards to be "extended" to 1985 to allow these firms sufficient lead time to implement technical changes. BL stated that the capital expenditures for higher fuel economy for foreign firms could only be amortized over its U. S. sales, not its entire fleet, thus placing foreign manufacturers at a competitive disadvantage.

As "captive imports" are gradually separated from domestic AFE computation, VW will be in a unique positon of having to separate its high mpg Rabbit, made in Pennsylvania, from its heavier Audi's and Dashers. In order to eliminate competitive this disadvantage to VW (believed to be unforeseen by Congress) VW suggests that the statute be amended such that if a comparison of a manufacturer's AFE shows his domestic fleet having a higher mpg than his total fleet, then the AFE used for the enforcement of the standard would be the total fleet AFE. This would encourage foreign firms to build their high mpg cars in the U.S. and create U.S. jobs.

Summary of Comments on Issue 3—The Program's Impact on Very Small Manufacturer's

Five comments were received on this issue. The DAA suggested a total exemption with reliance on diesels to achieve high fuel economy. Rolls-Royce stated that the present system is equitable enough but the administrative burden would be lessened by extending exemptions to 1985 instead of considering them on a yearly basis. Chrysler requested that exemptions not be allowed since, in a small way, they hurt domestic sales. Ford did not oppose exemptions for the very small manufacturers but vigorously opposed changing the eligibility criterion above 10,000 per year. The C.A.S. opposes exemptions for expensive luxury cars but approves exemptions for inexpensive cars. C.A.S. points out that by following its suggestions, NHTSA would save much time and effort since denying petitions does not entail the administrative burden of granting them. C.A.S. proposed NHTSA use remission of civil penalties as a method of assistance to those companies who might have financial difficulties in payment of a penalty.

Summary of Comments on Issue 4—Improving AFE After 1985 and into the 1990's

Ten commenters provided opinions on the fuel economy of automobiles beyond 1985. Two were other public agencies and each expressed their desire for higher standards in the future than the 27.5 mpg established for MY 1985 automobiles. These agencies are joined in this regard by two others commentors, the C.A.S. and Mr. Scarnecchia. DOE asked for quick settlement of the question about the permissible use of diesels in the future so that manufacturers could enjoy the longest lead time to increase mpg after 1985 as possible. DOE felt that a 5-10 mpg improvement by 1990 was possible with the use of diesels. The New York DOT generally supported higher standards after 1985 and specifically wished to include standards compliance on a state by state basis (fuel economy of total automobiles sold in each state should meet the established average standard). The New York DOT warned of offsetting effects of increased light truck purchases. C.A.S. expressed their support for higher standards but gave no time table for this action. Mr. Scarnecchia expected his engine (a gyro-reciprocating engine) would average 60-65 mpg in a 1800-2200 pound car for the 1980's and 90's and exceed present emissions standards.

The manufacturers who responded opposed higher standards or at least, warned about the high risk resulting from such standards with the commensurate low benefits which would result. Renault was against higher standards and cited restriction of consumer choice beyond the 27.5 mpg point. Ford and Chrysler stated the costs would be very high and public acceptance of such vehicles is unknown.

GM offered a plan which had the 1985 standards at 26.0 mpg and which increased them to 27.5 by 0.5 mpg per year. This slow pace was presented for NHTSA to study and analyze. GM also indicated that any faster pace to higher mpg would be a high risk to the industry's manufacturers. IH asked for sufficient time before 1985 to be able to introduce fuel economy improvements into the light truck fleet in order to gradually improve fuel economy, most of which would take place after 1985. BMW stated it was too early to project fuel economy in the 1990's.

Other Issues and Opinions

In addition to responses to the tentative conclusions reached by NHTSA and the issues identified, commentors took the opportunity to express additional opinions or concerns. Several of these expressions are summarized as follows:

(1) Mr. Rivkin cited findings that the great majority of air pollutants were naturally caused and not a result of automobile engines. He wished to rescind emission controls and thereby gain fuel economy.

(2) The DAA urged tax incentives for use of diesels and the purchase by GSA of a diesel passenger car fleet. This would, said DAA, allow the use of today's large cars, and any safety hazards from increased small car use would be reduced.

(3) Rolls-Royce, British Leyland, BMW and Mercedes-Benz included withdrawal from the U.S. market as a probable choice of action in the face of stiff mpg standards, especially if diesels are not allowed.

(4) Mercedes-Benz stated that a merger with a firm which made very high mpg cars, so as to mathematically reach a higher CAFE, was rejected as not being truly saving of fuel or within their corporate aims.

(5) DOE and the Center for Auto Safety made comments on the growing disparity between the EPA mpg figures and that attained by most drivers, and stated this issue should be fully explored.

(6) Many manufactures showed special concern over customers reaction and preference, and cited the high risks attendant on this aspect of future change to performance and service. Among those commentors was BMW with a market survey report and also, generally, the comments of GM, Chrysler, Rolls-Royce, IH, AM, Ford and Renault.

(7) No Japanese manufacturers submitted comments.

APPENDIX B

DEPARTMENT OF TRANSPORTATION

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

[Docket No. FE 78-02; Notice 1]

AUTOMOTIVE FUEL ECONOMY PROGRAM REPORT TO CONGRESS

Request for Public Comments

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Request for public comments.

SUMMARY: Title V of the Motor Vehicle Information and Cost Savings Act, as amended, requires this agency to submit a comprehensive report on its automotive fuel economy program to Congress by January 15, 1979. This notice invites public comment to assist the agency in preparing that report.

DATE: Comments must be received on or before December 8, 1978.

ADDRESS: Comments should refer to the docket number and must be submitted in writing to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, S.W., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. William Devereaux, Office of Automotive Fuel Economy, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590 (202-755-9384).

SUPPLEMENTARY INFORMATION: The Federal automotive fuel economy program was initiated by Congress in December 1975 with the passage of the Energy Policy and Conservation Act. The passage of this legislation was in response to the national concern with the depletable nature and uncertain availability of most of the energy upon which this country depends for its economic and social well-being. It also reflected the need to implement a national program for conserving energy. The adverse effects of the gasoline shortages of the winter of 1973-1974, the inflationary effect of rising fuel costs on almost all goods and services, and this country's increasing dependence upon foreign petroleum sources dramatized that need.

The significance of petroleum for this country was further demonstrated in 1975 by the fact that 46 percent of its annual energy needs were met by petroleum. Over half of the petroleum was used for transportation. Highway transportation accounted for 46 percent of all petroleum consumed. These figures are essentially the same today.

Title III of the Energy Policy and Conservation Act added a new Title V to the Motor Vehicle Information and Cost Savings Act (the Act), 15 U.S.C. 2001 *et seq.* The Act provides for the establishment of average fuel economy standards applicable to the manufacturers of passenger automobiles beginning with the 1978 model year and light trucks and vans beginning with the 1979 model year.

The average fuel economy standards do not require that individual vehicles achieve a particular level of fuel economy. Instead,

JAN 29 1979 UMI

V 4 4 / 2 0 J A 2 9 7 9 UMI

they require that the fleet or corporate average of a manufacturer achieve the levels in the standards. Thus, a manufacturer may produce vehicles with fuel economy less than that specified for a particular year as long as it produces a sufficient number with fuel economy above the standard so that the average of all of its vehicles for that year is equal to or greater than the standard. The rationale for Congress' specifying average standards instead of the minimum performance standards used in most regulatory programs was in part to give the manufacturers flexibility in devising their compliance strategies. Specification of average standards was also intended to enable the agency to affect model mix in setting fuel economy standards while avoiding any undue limitation of consumer choice as to vehicle capacity and performance.

Section 502 of the Act establishes passenger automobile standards of 18 mpg, 19 mpg, and 20 mpg for model years 1978–1980, respectively, and 27.5 mpg for model year 1985 and thereafter. The earlier standards were largely based on the 1974 study by the Department of Transportation and Environmental Protection Agency on the potential for improving automotive fuel economy. Pursuant to a Congressional directive to set maximum feasible standards for model years 1981–1984 that result in steady progress toward the 1985 standard, the Department set standards of 22 mpg, 24 mpg, 26 mpg, and 27 mpg for model years 1981–1984, respectively. Section 502 provides that in determining maximum feasible levels of fuel economy the agency is to consider technological feasibility, economic practicability, the effects of Federal vehicle emissions, safety, damageability and noise standards on fuel economy, and the national need to conserve energy. The agency is authorized to modify the standard of 27.5 mpg for model year 1985 and thereafter if it finds that the maximum feasible standard is higher or lower than that level. As to light trucks and vans, the agency has thus far set fuel economy standards for 1979–1981 vehicles in those categories.

Not later than January 15 of each year, the agency is required to provide Congress with a report reviewing the fuel economy standards. The annual report due January 15, 1979, is a special report in that it is required to include a comprehensive analysis of the entire fuel economy program. The 1979 report must assess the ability of the vehicle manufacturers to comply with the standard of 27.5 mpg for 1985 passenger automobiles. It must also transmit any proposals it has for legislative amendments to improve the fuel economy program.

The purpose of this notice is to invite public comment on the subject of the 1979 report to aid the agency in making recommendations to the Congress. The agency is vitally interested in improving its ability to achieve the goals of the automotive fuel economy program while minimizing the burdens and giving appropriate consideration to the possible economic and other implications of significant increases in automotive industry investment. The agency is examining such matters as the degree of success of the fuel economy program in conserving petroleum to date, the future contributions which the program can make to energy conservation, and the past and possible future impacts of the program on the automotive industry, the consumer, and the national economy.

The issues of primary interest to the agency are the fuel economy levels achievable in 1985 and thereafter and the economic consequences of applying a single average fuel economy standard to all manufacturers. The agency has determined that this application of average standards has the potential for affecting the various different size manufacturers in disparate and possibly unintended ways. These differing impacts could affect the rate and degree of future progress of the automotive fuel economy program and the costs of that progress.

The 1979 report will not set forth any final conclusions about the passenger automobile fuel economy standard levels for 1985. The agency could reach those conclusions only after making detailed analyses of the plans and capabilities of the manufacturers and making judgments about the complex technological, economic, and other issues in the context of a rulemaking proceeding. However, based upon the agency's analysis to date of the significant body of information provided over the past three years by the manufacturers and other members of the public and generated by the agency's own research, the agency is prepared to make the following four tentative conclusions.

1. The technology is available that will enable manufacturers to achieve an average fuel economy of 27.5 mpg by 1985 without reducing vehicle interior space or significantly affecting performance and without significantly changing the mix of size classes.

2. The significant changes in automotive design needed to achieve 27.5 mpg by 1985 will require increases in automotive industry investment above traditional levels, although such investments, for the industry as a whole are economically practicable and yield cost-effective improvements in fuel economy.

3. The economic and competitive effects of achieving that average fuel economy level will vary from manufacturer to manufacturer.

4. Beyond 1985, average fuel economy levels in excess of 27.5 mpg are technologically possible.

In connection with the agency's interest in the effects of the average fuel economy concept and with these tentative conclusions, the agency invites comments on the four issues below relating to competition, equity, technological innovation, and other matters.

I. The Program's Impact on Small Fuel Line Manufacturers

The large full line manufacturers are better able than the small full line manufacturers to generate internally the capital necessary to comply with the 1985 standard. These small full line manufacturers are at a competitive disadvantage since they are more likely to need to raise capital externally in the high cost money market. The highly concentrated nature of the automotive industry in this country increases the significance of this situation. Are these problems and their effect on future fuel economy standards sufficiently significant that the Act should be modified to accommodate the small full line manufacturers by treating them differently from the full line ones? Is it more equitable to require these small full line manufacturers to meet the same standards as the full line manufacturers or to require them to make the same degree of effort relative to their capacities as those full line manufacturers? If modification should be made, what type is most desirable? What impact would such modification have on the future benefits, costs, and other impacts of the fuel economy program?

II. The Program's Impact on Limited Line Manufacturers

Although many foreign manufacturers produce small passenger automobiles that are very fuel efficient, there are some limited line foreign manufacturers that have traditionally built slightly larger, less fuel efficient passenger automobiles. These limited line manufacturers, which include Saab, Mercedes Benz, Volvo, Peugeot, and BMW, typically import relatively small numbers of these vehicles. While the agency is prepared to conclude tentatively that they can meet the 1985 standard of 27.5 mpg, some of the major changes that they must make for that purpose may not be deemed by those manufacturers to be either justifiable solely to enable their vehicles to be marketed in this country or consistent with the preferences of the segment of the market in this country to which they have traditionally attempted to appeal. At some point, not necessarily before or during 1985, the effect of the fuel economy standards could be to cause these manufacturers to withdraw from the United States market or to necessitate their changing their vehicle line significantly. In the interest of preventing further concentration of the automotive industry and of preserving the presence in this country of manufacturers which in some cases have contributed valuable research and innovations in safety and other areas, should the statute be modified to accommodate them by treating them differently from other manufacturers? Is it more equitable to require these limited line manufacturers to meet the same standards as the other manufacturers or to require them to make the same degree of effort relative to their capabilities as those other manufacturers? If modification should be made, what type is most desirable? What impact would such modification have on the future benefits, costs, and other impacts of the fuel economy program?

III. The Program's Impact on Very Small Manufacturers

The Act permits low volume manufacturers (under 10,000 passenger automobiles produced annually worldwide) to apply for an exemption from the generally applicable fuel economy standards and meet lower, alternative standards. While setting alternative standards for exempted manufacturers instead of granting them complete exemptions seems equitable, it results in very small fuel savings due to the almost miniscule combined total production of the low volume manufacturers. Does equity require the continued setting of those standards given such small savings? Is the setting of alternative standards a sufficiently productive activity to warrant continued expenditure of Federal resources for that purpose and the imposition of significant administrative burdens on the low volume manufacturers? Conversely, some commenters in rulemaking proceedings to exempt certain low volume manufacturers have suggested that the agency use its discretionary authority to require those low volume manufacturers selling very expensive vehicles to meet the generally applicable fuel economy standards. How should such low volume manufacturers be treated under the fuel economy program?

IV. Improving Fuel Economy After 1985

Based upon the information available to NHTSA, the technology is already available to achieve the 1985 statutory standard of 27.5 mpg. It is also clear that there are no technological impediments to further significant fuel economy improvements in the years after 1985. What is not yet clear, however, is precisely what measures will be necessary to achieve these further gains, at that pace they can reasonably be implemented, what they will cost, and what their impact will be upon the vehicle manufacturers and suppliers. The agency is seeking public comment on these questions and, in their light, on the nature and timing of regulatory actions appropriate through the mid-1990's.

NHTSA also seeks public comment about what other governmental actions should be undertaken to ensure that new technoogy becomes available to permit continuing significant fuel economy improvements into the 1990's.

Interested persons are invited to submit comments on the issues raised by this notice. It is requested but not required that 10 copies be submitted.

All comments must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information should be submitted to the Chief Counsel, NHTSA, at the address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. Any claim of confidentiality must be supported by a statement demonstrating that the information falls within 5 U.S.C. section 552(b)(4), and that disclosure of the information would result in significant competitive damage; specifying the period during which the information must be withheld to avoid that damage; and showing that earlier disclosure would result in that damage. In addition, the commenter or, in the case of a corporation, a responsible corporate official authorized to speak for the corporation must certify in writing that each item for which confidential treatment is requested is in fact confidential within the meaning of section 552(b)(4), and that a diligent search has been conducted by the commenter or its employees to assure that none of the specified items has previously been disclosed or otherwise become available to the public.

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comment filed after the closing date will also be considered. However, the agency's ability to consider late comments will be severely limited by the deadline for submitting the 1979 report.

Issued on November 20, 1978.

Michael M. Finkelstein,
Associate Administrator for Rulemaking.

DEPARTMENT OF THE TREASURY

Fiscal Service

[Dept. Circ. 570, 1978, Rev., Supp. No. 9]

SURETY COMPANIES ACCEPTABLE ON FEDERAL BONDS: CHANGES IN STATES OF INCORPORATION

On December 31, 1978, Hudson Insurance Company, a New York corporation, and Skandia America Reinsurance Corporation, a New York corporation, changed their States of incorporation from New York to Delaware. The companies were last listed as an acceptable surety on Federal bonds at 43 FR 28697 and 43 FR 28702 respectively, June 30, 1978.

A certificate of authority as an acceptable surety on Federal bonds is hereby issued under Sections 6 to 13 of Title 6 of the United States Code, to Hudson Insurance Company and Skandia America Reinsurance Corporation incorporated in the State of Delaware. The new certificates replace the companies' former Treasury certificates, effective December 31, 1978. An underwriting limitation of $817,000 and $4,534,000 has been established for Hudson Insurance Company and Skandia America Reinsuance Corporation, respectively. The underwriting limitations are the same as were established as of July 1, 1978, under the certificates issued to the companies in their previous States of incorporation.

Federal bond-approving officers need take no action with respect to bonds accepted prior or subsequent to the changes in the companies' states of incorporation. They may, however, annotate their reference copies of Treasury Circular 570, 1978 Revision at pages 28697 and 28702 to reflect the changes.

Certificates of authority expire on June 30, each year, unless renewed prior to that date or sooner revoked. The certificates are subject to subsequent annual renewals as long as the companies remain qualified (31 CFR, Part 223). A list of qualified companies is published annually as of July 1, in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Copies of the circular, when issued, may be obtained from the Audit Staff, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226.

Dated: January 22, 1979.

D. A. Pagliai,
Commissioner, Bureau of Government Financial Operations.

[Supplement to Dpt. Circular, Public Debt Series—No. 1-79]

Office of the Secretary

TREASURY NOTES OF SERIES P-1981

Interest Rate

January 24, 1979.

The Secretary announced on January 23, 1979, that the interest rate on the notes designated Series P-1981, described in Department Circular—Public Debt Series—No. 1-79, dated January 18, 1979, will be 9¾ percent.

Interest on the notes will be payable at the rate of 9¾ percent per annum.

SUPPLEMENTARY STATEMENT: The announcement set forth above does not meet the Department's criteria for significant regulations and, accordingly, may be published without compliance with the Departmental procedures applicable to such regulations.

PAUL H. TAYLOR,
Fiscal Assistant Secretary.

CLASS LIFE ASSET DEPRECIATION RANGE SYSTEM

Study of Assets Used To Manufacture Rubber Products and Finished Plastics Products

The Office of Industrial Economics (OIE), of the Office of the Secretary of the Treasury, has initiated a study of guideline depreciation periods and repair allowance percentages for assets used in the manufacture of rubber products and finished plastics products currently covered by asset guideline Titles 30.1, 30.11, 30.2, and 30.21 [Revenue Procedure 77-10, I.R.B. 1977-12 (3/21/77)], under the Class Life Asset Depreciation Range System (Secs. 167(m) and 263(e)), Internal Revenue Code of 1954.

All persons interested in this study may submit comments in writing to OIE. Persons who are interested in submitting relevant information are invited to attend a meeting in Washington, D.C., on February 8, 1979, at which information needs and procedures for obtaining and analyzing the requisite information will be discussed. Agenda for the meeting, exact time and place, and background material may be obtained by writing to OIE.

All communications concerning this study should be addressed to: Office of Industrial Economics, Project 30.1 and 30.2, P.O. Box 28018, Washington, D.C. 20005.

Dated: January 24, 1979.

Approved by:

KARL RUHE,
Director, Office of Industrial Economics.

INTERSTATE COMMERCE COMMISSION

[Notice No. 16]

ASSIGNMENT OF HEARINGS

JANUARY 24, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 143993 (Sub-4F), Black Hills Trucking, Inc., now assigned for continued hearing March 27, 1979 (4 days), at Casper, Wyoming and will be held at Ramada Inn 123 West E St., and will be continued on April 2, 1979 (2 weeks) at Denver, Colorado and will be held at Executive Plaza, 1405 Curtis St. I & S 8863, Switching and Minimum Carload Charges Houston, Texas now being assigned March 13, 1979, (9 days), at Houston, Texas, in a hearing room to be later designated.

MC 23618 (Sub-34F), McAllister Trucking Company, A Cor-DBA Matco, now assigned for hearing on March 13, 1979, (1 day), at Dallas, Texas, in a hearing room to be later designated.

MC 61403 (Sub-256F), The Mason and Dixon Tank Lines, Inc., now assigned for hearing on March 14, 1979, (3 days), at Dallas, Texas, in a hearing room to be later designated.

37064, OKC Corporation V. Missouri-Kansas Texas Railroad, Company, ETAL, now assigned for hearing on March 19, 1979, (2 days), at Dallas, Texas, in a hearing room to be later designated.

MC 42000 (Sub-6), Texas Interstate Motor Express, Inc., now assigned for hearing on March 21, 1979, (3 days), at Dallas, Texas, in a hearing room to be later designated.

MC 119619 (Sub-126F), Distributors, Service Co., now assigned continued hearing February 27, 1979, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 9325 (Sub-75F), K Lines, Inc., now assigned March 14, 1979, at Portland, Oregon, is postponed to March 22, 1979, (2 days), at Portland, Oregon and continued to March 26, 1979, (3 days), at San Francisco, Calif., hearing rooms to be designated later.

H. G. HOMME, Jr.,
Secretary.

[Notice No. 12]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JANUARY 18, 1979.

IMPORTANT NOTICE: The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

NOTE.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

MOTOR CARRIERS OF PROPERTY

MC 808 (Sub-54TA), filed October 25, 1978, and published in the FEDERAL REGISTER issue of December 5, 1978, and republished as corrected this issue. Applicant: ANCHOR MOTOR FREIGHT, INC. 21111 Chagrin Boulevard, P.O. Box 22005, Cleveland, OH 44122. Representative: J. A. Kundtz, 1100 National City Bank Building, Cleveland, OH 44114. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Motor vehicles*, from Linden, NJ to points in AZ, AR, CA, CO, ID, IA, KS, LA, MN, MS, MO, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA, WI, and WY, under a continuing contract or contracts with General Motors Corporation, for 180 days. SUPPORTING SHIPPER(S): General Motors Corporation, 20007 Van Dyke Avenue, Warren, WI 48090. SEND PROTESTS TO: Mary Wehner, ICC, 731 Federal Building, 1240 East Ninth Street, Cleveland, OH 44199. The purpose of this republication is to show NE in lieu of ME as previously published.

MC 25798 (Sub-351 TA), filed December 26, 1978. Applicant: CLAY HYDER TRUCKING LINES, INC., P.O. Box 1186, 502 E. Bridges Avenue, Auburndale, FL 33823. Representative: Tony G. Russell, P.O. Box 1186, Auburndale, FL 33823. *Meat, meat products, meat by-products, and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the Report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, (except hides and commodities in bulk), from the facilities of Iowa Beef Processors, Inc., at Dakota City, NE., and Sioux City, IA., to points in CA., for 180 days. There is no environmental impact involved in this application. An underlying ETA seeks 90 days authority. SUPPORTING SHIPPER(S): Iowa Beef Processors, Inc., P.O. Box 515, Dakota City, NE 68731. SEND PROTESTS TO: Donna M. Jones Transp. Asst., ICC, Monterey Building, Suite 101, 8412, N.W., 53rd Terrace, Miami, FL. 33166.

MC 29934 (Sub-19TA), filed December 18, 1978. Applicant: LOBIONDO BROTHERS MOTOR EXPRESS, INC., P.O. Box 160, Bridgeton, NJ 08302. Representative: Martin Werner, P.O. Box 1409, 167 Fairfield Road, Fairfield, NJ 07006. *Merchandise as dealt in by wholesale, retail, chain grocery and food business houses*, from the plantsite and storage facilities of Ralston-Purina Company at Hampden Township, Cumberland County, PA to points in NY on and south of I-84, and points in NJ, for 180 days. An underlying ETA seeks 90 days authority. SUPPORTING SHIPPER(S): Ralston-Purina Company, Checkerboard Square, St. Louis, MO 63188. SEND PROTESTS TO: John P. Lynn, ICC, 428 East State Street, Room 204, Trenton, NJ 08608.

MC 50069 (Sub-538TA), filed December 18, 1978. Applicant: REFINERS TRANSPORT & TERMINAL CORPORATION, 445 Earlwood Avenue, Oregon, OH 43616. Representative: William P. Fromm (Same as above). *Petroleum products, vehicle body sealers, sound deadening compounds and accoustical control items* in bulk, in tank vehicles, from Warren County, MS to points in the US except AK and HI, for 180 days. Restricted to shipments originating at the facilities of Quaker State Oil Refining Corp. located in Warren County, MS. SUPPORTING SHIPPER(S): Quaker State Oil Refining Corp., P.O Box 989, Oil City, PA 16301. SEND PROTESTS TO: ICC, 313 Federal Office Building, 234 Summit Street, Toledo, OH 43604.

MC 83217 (Sub-77TA), filed December 15, 1978. Applicant: DAKOTA EXPRESS, INC., 550 East 5th Street South, South St. Paul, MN 55075. Representative: K. O. Petrick, 550 East 5th Street South, South St. Paul, MN 55075. *Meats, meat products, meat by-products and articles distributed by meat packinghouses, as described in Sections A and C of Appendix 1 to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 290 and 766 (except commodities in bulk and hides)*, from the facilities of Iowa Beef Processors, Dakota City, NE and Sioux City, IA to points in MI, OH, PA, NY, CT, MA, RI, DE, MD, DC, NJ, NH, VT, ME, WV and VA. Restricted to traffic originating at the facilities of Iowa Beef Processors, Inc., Dakota City, NE and Sioux City, IA and destined to the points in the named states or in foreign commerce, for 180 days. An underlying ETA seeks 90 days authority. SUPPORTING SHIPPER(S): Iowa Beef Processors, Inc., Dakota City, NE 68731. SEND PROTESTS TO: Delores A. Poe, Trans. Asst., I.C.C., 414 Federal Bldg. & U.S. Courthouse, 110 South 4th Street, Minneapolis, MN 55401.

MC 106037 (Sub-5TA), filed November 21, 1978, and published in the FEDERAL REGISTER issue of January 10, 1978, and republished as corrected this issue. Applicant: ROADWAY TRANSPORT LIMITED, 25 Selfield Road, Rexdale, Ontario, Canada M9W 1E8. Representative: Robert G. Gawley, P.O. Box 184, Buffalo, NY 14221. *Trucks and buses and parts and accessories thereof*, moving at the same time with the vehicles of which they are a part and on which they are to be installed in initial and secondary movements in driveway and truckaway service, from ports of entry on the International Boundary line between United States and Canada located on the Detroit River to Willow run, MI, on traffic having a prior movement in foreign commerce, for 180 days. An underlying ETA seeks 90 days authority. SUPPORTING SHIPPER(S): General Motors of Canada Limited, Oshawa, Ontario L1G 1K7. SEND PROTESTS TO: ICC, 910 Federal Building, 111 West Huron Street, St. Buffalo, NY 14202. The purpose of this republication is to show the complete scope of the application as previously omitted.

MC 107541 (Sub-54TA), filed December 12, 1978. Applicant: WASHINGTON-OREGON LUMBER FREIGHTERS, INC., 12925 N.E. Rockwell Drive, Vancouver, WA 98665. Representative: Edward A. Francom (same as above). Authority sought to operate as a *common carrier*, by motor vehicle over regular routes, transporting: (1) *Roofing materials*, (2) *pipe, cement and asbestos combined or plastic pipe*, and (3) *plastic pipe*, (1) from Pittsburg, CA to points in Benton, Deschutes, Lane, Linn, Marion, Polk, Yamhill, Clackamas, Washington, and Multnomah Counties, OR; and Clark, Cowlitz, Whatcom, Skagit, Chelan, Snohomish, King, Pierce, Thurston, Grant, Lincoln, Spokane, Yakima, Benton, Franklin and Walla Walla Counties, WA, (2) from Stockton, CA to points in Deschutes, Crook, Jefferson, Lane, Benton, Linn, Marion, Polk, Clackamas, Yamhill, Washington, Multnomah, and Umatilla Counties, OR; and Clark, Cowlitz, Whatcom, Skagit, Chelan, Snohomish, King, Pierce, Thurston, Yakima, Benton, Franklin, Walla Walla, Grant, Lincoln an Spokane Counties, WA, and (3) from McNary, OR to points in Sacramento, San Joaquin, Contra Costa, Alameda, Santa Clara, San Mateo, San Francisco, San Bernardino, Los Angeles, Orange, and Riverside Counties, CA, for 180 days. An underlying ETA seeks 90 days authority. SUPPORTING SHIPPER(S): Johns-Manville Sales Corporation, 2600 Campus Drive, San Mateo CA 94403. SEND PROTESTS TO: R. V. DuBay, ICC, 114 Pioneer Courthouse, Portland, OR 97204.

MC 108341 (Sub-128TA), filed December 6, 1978. Applicant: MOSS TRUCKING COMPANY, INC., P.O. Box 26125, Charlotte, NC 28213. Representative: Francis J. Ortman, Wisconsin Avenue, Suite 605. *Zinc, zinc alloy and zinc products* from the facilities of Jersey Miniere Zinc Company, Montgomery County, TN, to points in AL, GA, SC, NC, VA, MD, DE, DC, NJ, PA, NY, MA, CT, and RI, for 180 days. SUPPORTING SHIPPER(S) King's Department Stores, Inc., 150 California Street, Newton, MA 02158. SEND PROTESTS TO: D. S. TERRELL PRINCE, 800 Brair Creek Rd—Rm CC516 Mart Office Building, Charlotte, NC 28205.

MC 109124 (Sub-57TA), filed December 27, 1978. Applicant: SENTLE TRUCKING CORPORATION, P.O. Box 7850, Toledo, OH 43619. Representative: H. David McKnight (same address as applicant). *Iron and steel*

V 44 / 20 JA 29 79 UMI

V 44/20 JA 29 79 UMI

articles, from the facilities of Jones & Laughlin Steel Corp., located at Cleveland, OH, to points in Illinois, Indiana, Michigan and PA, for 180 days. An underlying ETA seeks up to 90 days authority. SUPPORTING SHIPPER(S): Jones & Laughlin Steel Corp., Room 121, 1600 West Carson Street, Pittsburgh, PA 15263. SEND PROTESTS TO: ICC, Room 313 Federal Office Building, 234 Summit Street, Toledo, OH 43604.

MC 109584 (Sub-186TA), filed December 6, 1978. Applicant: ARIZONA PACIFIC TANK LINES, P.O. Box 7240, Denver, CO 80207. Representative: Rick Barker (same as above). *Inedible animal fats and vegetable oils*, in bulk, in tank vehicles, from Albuquerque and Clovis, NM to points in AZ an CA, for 180 days. Applicant has also filed an underlying *ETA* seeking up to 90 days of operating authority. SUPPORTING SHIPPER(S): Valley Rendering Company, Inc., P.O. Box 1444, Clovis, NM 88101. SEND PROTESTS TO: D/S Roger L. Buchanan, ICC, 721 19th Street, 492 U.S. Customs House, Denver, CO 80202.

MC 109818 (Sub-38TA), filed December 14, 1978. Applicant: WENGER TRUCK LINE, INC., P.O. Box 3427, Davenport, IA 52804. Representative: Larry D. Knox, 600 Hubbell Bldg., Des Moines, IA 50309. *Meat, meat products, meat by-products, and articles distributed by meat packing houses* (except hides and commodities in bulk), from the facilities of Geo A. Hormel & Co. at Fremont, NE to Denver, CO, for 180 days. An underlying ETA seeks 90 days authority. SUPPORTING SHIPPERS(S): Geo A. Hormel & Co., P.O. Box 800, Austin, NM 55912. SEND PROTESTS TO: Herbert W. Allen, I.C.C., 518 Federal Bldg., Des Moines, IA 50309.

MC 111812 (Sub-605TA), filed December 27, 1978. Applicant: MIDWEST COAST TRANSPORT, INC., P.O. Box 1233, Sioux Falls, SD 57101. Representative: Lamoyne Brandsma, P.O. Box 1233, Sioux Falls, SD 57101. Part I—*Petroleum, petroleum products, vehicle body sealer and/or sound deadener compounds*, (except in bulk, in tank vehicles), and filters from points in Warren County, MS to points in CO, CT, DE, FL, GA, IA, IL, KS, ME, MD, MA MN, MO, NC, NE, NH, ND, NJ, NY, SC, SD, VT and WI; and Part II—*Petroleum, petroleum products, vehicle body sealer and/or sound deadener compounds, filters, materials, supplies and equipment* as are used in the manufacture, sale and distribution of the commodities named in Part I above, (except in bulk, in tank vehicles) from points in IL, NY, OH and SC to points in Warren County, MS. Restricted in Parts I and II above to shipments originating at or destined to the facilities of Quaker State Oil Refining Corporation located in Warren County, MS. For 180 days. Supporting shipper: Quaker State Oil Refining Corporation, P.O. Box 989, Oil City, PA 16301. Send protests to: Mr. James L. Hammond, District Supervisor, Bureau of Operatings & Compliance, Interstate Commerce Commission, Room 455, Federal Building, Pierre, South Dakota 57501.

MC 112713 (Sub-234TA), filed December 26, 1978. Applicant: YELLOW FREIGHT SYSTEM, INC., P.O. Box 7270, 10990 Roe Avenue, Shawnee Mission, KS 66207. Representative: John M. Records (same address as applicant). *Chemicals*, in vehicles equipped with mechanical refrigeration, From Winchester, VA, to points in Arizona, California and CO, for 180 days. An underlying ETA seeks to 90 days authority. SUPPORTING SHIPPER(S): J. T. Baker Chemical Co., 3085 Shawnee Drive, Winchester, VA 22601. SEND PROTESTS TO: John V. Barry DS, ICC, 600 Federal Building, 911 Walnut Street, Kansas City, MO 64106.

MC 113434 (Sub-120TA), filed December 19, 1978. Applicant: GRABELL TRUCK LINE, INC., A-5253 144th Avenue, Holland, MI 49423. Representative: Ms. Wilhelmina Boersma, 1600 First Federal Building, Detroit, MI 48226. *Vinegar*, in bulk, in tank vehicles, from the facilities of Heinz U.S.A. at Holland, MI to the facilities of Heinz, U.S.A. at Winchester, VA, for 180 days. An underlying ETA seeks 90 days authority. SUPPORTING SHIPPER(S): Heinz U.S.A. Division of H. J. Heinz Company, P.O. Box 57, Pittsburgh, PA 15230. SEND PROTESTS TO: C. R. Flemming, ICC, 225 Federal Building, Lansing, MI 48933.

[Notice No. 11]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JANUARY 17, 1979.

IMPORTANT NOTICE:

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

NOTE: All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

MOTOR CARRIERS OF PROPERTY

MC 6741 (Sub-9TA), filed December 7, 1978. Applicant: F. S. WILLEY CO., INC., d/b/a Willey's Express, 28 Center Street, Laconia, NH 03246. Representative: Frank M. [Notice No. 152]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the

V 4 4 / 2 0 J A 2 9 7 9 UMI

quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include request for oral hearing, must be filed with the Commission within 30-days after the date of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representatives(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

MC-FC-77919, filed November 1, 1978. Transferee: WALKUP DRAYAGE AND WAREHOUSE CO., a Corporation, 11th and Pine Street, P.O. Box 24463, Oakland, CA 94623. Transferor: D'Onofrio Drayage, Inc., 1404 Franklin Street #318, Oakland, CA 94612. Representative: Michael S. Rubin, Attorney at Law, 256 Montgomery Street, San Francisco, CA 94104. Authority sought for purchase by transferee of the operating rights set forth in Certificate of Registration No. MC-99286 (Sub-No. 2), issued October 23, 1974, to transferor evidencing a right to engage in transportation in interstate commerce as described in Decision No. 82048, dated October 30, 1973, issued by the Public Utilities Commission of California. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

MC-FC-77931, filed November 14, 1978. Transferee: EDEN VAN LINES, INC., 375 E. Railroad Avenue, Liberal, KS 67901. Transferor: Davis Van & Storage, Inc. 10208 W. 96th Terr., Overland Park, KS 66214. Representative: Larry E. Gregg, Attorney at Law, 641 Harrison Street, Topeka, KS 66603. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate No. MC-92082 (Sub-No. 1), issued October 2, 1959, as follows: Petroleum, petroleum products, in containers, agricultural machines, filling station equipment and supplies, from Garden City, KS, and points within 50 miles thereof, to points in Colorado on and east of U.S. Hwy. 85; malt beverages, from points in Colorado on and east of U.S. Hwy. 85, to Garden City, KS, and points within 50 miles thereof; household goods and livestock, between Garden City, KS, and points within 50 miles thereof, on the one hand, and, on the other points in Colorado on and east of U.S. Highway 85, household goods, between points in that part of Kansas on and west of U.S. Hwy. 183, on the one hand, and, on the other, points in Colorado, Nebraska, Oklahoma, and Texas (except Garden City, KS, and points within 50 miles thereof, and points in that of Colorado on and east of U.S. Hwy. 85); emigrant movables and household goods, between Great Bend, KS, and points within 25 miles of Great Bend, on the one hand, and, on the other, points in Colorado, Missouri, and Oklahoma; and machinery, materials, supplies, and equipment, incidental to, or used in, the construction of, development, operation and maintenance of facilities for the discovery, development, and production of natural gas and petroleum, between points in Kansas. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

MC-FC-77949, filed December 8, 1978. Transferee: THE FILM TRANSIT COMPANY, a Corporation, 2011 West 50th Street, Cleveland, OH 44102. Transferor: Film and Package Delivery, Inc., 1555 East 40th Street, Cleveland, OH 44103. Representative: James Duvall, Attorney at Law, 220 West Bridge Street, Dublin, OH 43017. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate of Registration No. MC-120290 (Sub-No. 1), issued September 29, 1972, evidencing a right to engage in transportation in interstate commerce as described in that portion of Certificate No. 3409-R, as was embraced in predecessor's certificate of registration, transferrd and reissued March 15, 1972, by the Public Utilities Commission of Ohio. Transferee presently holds authority from this Commission under Certificate of Registration No. MC-97684 (Sub-No. 1), and does not seek temporary authority under Section 210a(b).

MC-FC-77973, Filed December 20, 1978. Transferee: JON W. McCARTER, McCarter Transit, 2589 Darlington Road, Beaver Falls, PA 15010. Transferor: Beaver Valley Motor Coach Company, a Corporation, Box 238, New Brighton, PA 15066. Represntative: John A. Pillar, Attorney for Transferee, 1500 Bank Tower, 307 Fourth Avenue, Pittsburgh, PA 15222. Samuel P. Delisi, Attorney for Transferor, 1500 Bank Tower, 307 Fourth Avenue, Pittsburgh, PA 15222. Authority sought to puchase by transferee of the operating rights of transferor as set forth in Certificates Nos. MC-117173 and MC-117173 Subs-No. 1 and 2, issued August 19, 1958, April 26, 1961, and May 17, 1962, respectively as follows: Passengers and their baggage, and express and newspapers in the same vehicle with passengers, over regular routes, between Sewickley, PA and Negley, OH, serving all intermediate points, between East Livepool, OH and Rochester, PA, serving all intermediate points, and between Sewickley, PA and Pittsburgh, PA, serving all intermediate points; and passengers and their baggage, in the same vehicle with passengers, in round trip special and charter operations, beginning and ending at points in Beaver County, PA and extending to points in the United States including Alaska, but excluding Hawaii. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under Section 210a(b).

[M-191 Amdt. 2, Jan. 23, 1979]

NOTICE OF ADDITION OF ITEM TO THE JANUARY 24, 1979 MEETING AGENDA

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., January 24, 1979.

PLACE: Room 1027, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUBJECT: 3a. Delegation of authority to the Director, Bureau of International Aviation to permit him to grant or deny applications under § 416(b) for exemptions from § 402 where the course of action is clear under current Board policies. (OGC)

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: This item would allow the Director, BIA, to grant exemptions from § 402 when the course of action is clear under current Board policies. The staff work on the delegation had proceeded on the assumption that there would be a February 1, 1979 Board meeting which would consider the recommended delegation. Staff resources which would otherwise process pending exemption applications were allocated on the assumption that the recommended delegation would be discussed and approved on February 1, 1979. On January 22, 1979, the staff working on the delegation learned that there would be no scheduled Board meeting between January 24, 1979 and February 7, 1979. Staff work on the delegation is now completed but the staff work necessary to process pending applications via Board order, as opposed to delegation, has not begun. Accordingly, the following Members have voted that agency business requires the addition of this Item to the January 24, 1979 agenda and that no earlier announcement of this addition was possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

2

FEDERAL COMMUNICATIONS COMMISSION.

TIME AND DATE: 9:30 a.m., Wednesday, January 31, 1979.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Open Commission Meeting.

Agenda, Item No., and Subject

General—1—Revocation of type approvals for five models of FM wireless microphones.
General—2—Establishing date for filing waiver of FCC divestiture requirement for monopoly newspaper-broadcast combinations.
General—3—Amendments of Parts 2, 81, 83 and 91—to provide frequencies, standards and procedures for on-board communications in the Industrial and Maritime Mobile Services.
General—4—Amendment of Parts 81 and 83 to provide for the use of single sideband emission A3J (suppressed carrier) on the maritime mobile radiotelephone frequency 2182 kHz. (Gen Docket No. 78-208).
General—5—Amendment of Part 81 of the rules to require applicants for public coast stations to meet certain financial qualifications.
General—6—Fee Refund Program—$20 and below.
General—7—Report and Order regarding Phase I of the Fee Refund Program.
General—8—Application of Ex Parte Rules to declaratory ruling request of McGraw-Hill Broadcasting regarding acquisition of McGraw-Hill, Inc., by American Express Company.
General—9—Commission briefing on Freedom of Information Act request covering internal documents involving Common Carrier regulation from 1950-1970.
Common Carrier—1—Transportation Microwave Corporation's request for an extension of the waiver of Sections 2.106, 21.120 and 21.701 of the Commission's Rules and Regulations.
Common Carrier—2—Western Union International Tariff for Partial Month's Service.
Common Carrier—3—ITT World Communications Inc. tariff revisions to establish rates and regulations for telex service between ITT gateway telex subscribers and Mexico.
Cable Television—1—Petitions for Reconsideration of Commission's decision in *Arlington Telecommunications Corp.*, FCC 76-781, filed by National Association of Broadcasters, et al.
Cable Television—2—Petition for Reconsideration filed by Citizens Committee for Expansion of Commercial Television to the State of Delaware and Application for Review filed by WBOC-TV, Inc., WBOC-TV, Salisbury, Maryland.
Cable Television—3—Petition for waiver filed by Global Cable TV, which proposes to operate a cable television system serving the Village of Lancaster, New York.
Assignment and Transfer—1—Application to assign the license of FM station KFMR, Fremont, California from Alameda Broadcasting, Inc. to Robert L. Williams, Inc. and James E. Coyle, d/b/a Spanish Metro, (BALH-2721), et al.
Complaints and Compliance—1—Application for Review filed by William A. Albaugh of the Broadcast Bureau's ruling denying his Fairness Doctrine complaint against WETA-TV, Washington, D.C.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from the FCC Public Information Office, telephone number (202) 632-7260.

Issued: January 24, 1979.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[10 CFR PARTS 504, 506, and 507]

[Docket No. ERA-R-78-19]

HEARINGS ON PROPOSED RULES TO IMPLEMENT THE POWERPLANT AND INDUSTRIAL FUEL USE ACT OF 1978.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Public Hearings on New and Existing Facilities.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby announces a series of public hearings on its proposed rules for implementation of the Powerplant and Industrial Fuel Use Act of 1978 (FUA). Public Law 95-620 concerning existing facilities. These public hearings are being combined with those concerning new facilities, notice of which was previously published in the January 18, 1979 FEDERAL REGISTER (44 FR 3721). Procedures governing the conduct of these hearings are presented with this Notice. Proposed rules concerning existing facilities are being published concurrently with this Notice. Notice of public hearings on the Draft Environmental Impact Statement concerning implementation of FUA was published in the January 9, 1979 FEDERAL REGISTER (44 FR 2004).

DATES: Public hearings will be held on February 7, 1979, and if required, on February 8, 1979, in Boston, Massachusetts; February 14, 1979, and if required, February 15, 1979 in Salt Lake City, Utah; February 21, 1979, and if required, February 22, 1979 in Tampa, Florida; and March 1, 1979, and if required, March 2, 1979 in Lexington, Kentucky. All hearings will begin at 9:30 a.m. Written comments on existing facilities are due by March 26, 1979, 4:30. p.m. and on new facilities by March 2, 1979, 4:30 p.m. Requests to speak are due by 4:30 p.m. on the following dates: February 5, 1979 for the Boston hearing; February 7, 1979 for the Salt Lake City hearing; February 14, 1979 for the Tampa hearing and February 21, 1979 for the Lexington hearing.

ADDRESSES: Send all written comments to: Department of Energy, Public Hearing Management, Room 2313, 2000 M Street, N.W., Washington, D.C. 20461, Docket No. ERA-R-78-19. Where possible, comments on separate issues should be clearly identified to allow efficient review and consideration.

City	Hearing Date	Location	Requests To Speak
Boston, Mass	Feb. 7	Shawmut Bank Bldg., Conf. Rm. 8th Fl., 1 Federal Street, Boston, Mass.	Dept. of Energy, 150 Causeway Street, Room 700, Boston, Mass., (617) 223-5257
Salt Lake City, Utah	Feb. 14	Salt Palace, 100 S.W. Temple, Room 128, Salt Lake City, Utah.	Dept. of Energy, 1075 S. Yokon Street, P.O. Box 26247, Belmar Branch, Lakewood, Colorado, (303) 234-2420
Tampa, Fla	Feb. 21	Sheraton Tampa Motor Hotel, Ballroom, 500 E. Cass Street, Tampa, Fla.	Dept. of Energy, 1655 Peachtree, St. N, Atlanta, Ga. (404) 257-2051
Lexington, Ky	Mar. 1	Hyatt Regency, Washington Room, 400 W. Pine Street, Lexington, Kentucky.	Dept. of Energy, 1655 Peachtree, St. N, Atlanta, Ga., (404) 257-2051

FOR FURTHER INFORMATION CONTACT:

William L. Webb (Office of Public Information), Economic Regulatory Administration, Department of Energy, Room B-110, 2000 M Street, N.W., Washington, D. C. 20461, (202) 634-2170.

John L. Gurney (Regulations and Emergency Planning), Economic Regulatory Administration, Department of Energy, Room 2130, 2000 M Steeet, N.W., Washington, D. C. 20462, (202) 632-6690.

Robert Davies (Fuels Regulation-Program Office), Economic Regulatory Administration, Department of Energy, Room 7202, 2000 M Street, N.W., Washington, D. C. 20261, (202) 254-3910.

James H. Heffernan (Office of General Counsel), Department of Energy, Room 6144, 12th & Pennsylvania Avenue, N.W., Washington, D. C. 20461, (202) 633-9296.

SUPPLEMENTARY INFORMATION: On November 9, 1978, FUA issued proposed rules for implementation of FUA pertaining to new facilities (November 17, 1978, 43 FR 53974). Concurrently with this Notice ERA is issuing proposed rules for implementation of FUA pertaining to existing facilities. Because of the interrelationship and similarity of the two subjects, ERA has decided to hold one group of public hearings for both new and existing facilities.

FUA prohibits or restricts the use of petroleum and natural gas by existing electric powerplants and allows ERA to issue rules and orders prohibiting or restricing the use of petroleum and natural gas by certain existing electric powerplants and major fuel burning installations. The proposed rules establish procedures and criteria by which users may petition for exemption from the prohibitions of the Act. The rules also establish a requirement for a Fuels Decision Report which must be submitted as part of any petition for exemption.

PUBLIC HEARINGS:

1. *Procedure for Request to Make Oral Presentation.*

The times and places for the hearings are indicated in the "Dates" and "Addresses" sections of this Notice. If necessary to present all testimony, a hearing will be continued to 9:30 a.m. of the next business day following the first day of the hearing.

Interested persons who would like to participate in any hearing should contact the appropriate Regional Office of DOE as listed above in the "ADDRESSES" section of this Notice. A request to participate in any hearing shall be in writing and signed by the person making the request. Please provide a phone number where we may contact you through the day before the hearing.

Participants should bring 50 copies of their testimony and each exhibit to be presented to ERA with them on the day of the hearing. We will notify each person selected to be heard before 4:30 p.m., February 6, 1979 for the Boston hearing; February 12, 1979 for the Salt Lake City hearing; February 14, 1979 for the Tampa hearing; and February 23, 1979 for the Lexington hearing.

2. *Conduct of the Hearings.* We reserve the right to select the persons to be heard at the hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An ERA official will be designated to preside at each of the hearings. These will not be judicial-type hearings. Questions may be asked only by those conducting the hearing. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

You may submit questions to be asked of any person making a statement at either of the hearings to the addresses indicated above for requests to speak before 4:30 p.m. of the day before the hearing. If you wish to have a question asked at a hearing, you may submit the question, in writing to the presiding officer. The ERA or, if the question is submitted at a hearing, the presiding officer will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer. The question will be asked of the witness by the presiding officer.

Any further procedural rules needed for the proper conduct of a hearing will be announced by the presiding officer.

Transcripts of the hearings will be made and the entire record of each of the hearings, including the transcripts, will be retained by the ERA and made available for inspection at the DOE Freedom of Information Office, Room GA-152, James Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. You may purchase a copy of the transcript of a hearing from the reporter.

(Department of Energy Organization Act, Pub. L. 95-91); Powerplant and Industrial Fuel Use Act, Pub. L. 95-620)

Issued in Washington, D.C., January 23, 1979.

HAZEL R. ROLLINS,
Deputy Administrator,
Economic Regulatory Administration.

[Docket No. ERA-R-78-19]

POWERPLANT AND INDUSTRIAL FUEL USE ACT (EXISTING FACILITIES)

Proposed Implementation Rules

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is proposing rules to implement certain provisions of the Powerplant and Industrial Fuel Use Act of 1978 (FUA) which prohibit or restrict the use of petroleum and natural gas by certain existing electric powerplants and allows ERA to issue rules and orders prohibiting or restricting the use of petroleum and natural gas by certain existing electric powerplants and major fuel burning installations. FUA will become generally effective on May 6, 1979, one hundred and eighty days after the date of enactment, but DOE may adopt regulations to implement FUA at any time. These proposed rules establish procedures and criteria by which ERA will issue rules and orders prohibiting or restricting the use of petroleum and natural gas, and by which users may petition for exemption from the prohibitions of the Act and from prohibitory rules and orders issued by ERA. Further, these proposed rules solicit additional comment on certain issues, and amend certain rules contained in the Notice of Proposed Rulemaking published in the FEDERAL REGISTER on November 17, 1978 (43 FR 53974).

DATES: Comments by March 26, 1979, 4:30 p.m.; Hearing dates: To be announced.

ADDRESSES: All comments to: Public Hearing Management, Docket No. ERA-R-78-19 Department of Energy, Room 2313, 2000 M Street, N.W., Washington, D.C. 20461. Hearing locations: To be announced.

TEXT OF PROPOSED RULES
APPENDIX—FERC Notice of Proposed Rulemaking (Determination of Powerplant Design Capacity)

I. BACKGROUND

(See prior FEDERAL REGISTER Notice, 43 FR 53974, November 17, 1978).

II. COVERAGE OF FUA

The prohibitions and exemptions provided for in FUA apply to four major categories of users: new powerplants, new installations, existing powerplants, and existing installations. ERA will therefore organize its rules to include in four separate Parts all applicable rules relating to the prohibitions and exemptions for each user category. Additionally, Part 500 sets forth General Policy and Definitions; Part 501 (Administrative Procedures and Sanctions) sets forth various procedural provisions; Part 502 (Fuels Decision Report) identifies certain requirements which must be included in petitions for exemption; Part 507 (Fuel Classification and Reporting Requirements) sets forth definitions of and reporting requirements for "petroleum" and "nautral gas"; and Part 508 (Special Rule for Temporary Public Interest Exemption) identifies near-term measures to encourage the use of natural gas in place of petroleum.

FUA addresses the major user categories as follows:

A. NEW POWERPLANTS (PART 503)

See Notice of Proposed Rulemaking published in the FEDERAL REGISTER November 17, 1978 (43 FR 53974).

JAN 29 1979 UMI

V 4 4 / 2 0 J A 2 9 7 9 UMI

B. EXISTING ELECTRIC POWERPLANTS (PART 504)

(1) Existing electric powerplants, which used an alternate fuel as a primary energy source at any time during calendar year 1977, may not use petroleum as a primary energy source in excess of that amount used during 1977 unless a permit to increase such use has been obtained from ERA.

(2) An existing powerplant may not use natural gas as a primary energy source unless the powerplant used natural gas as a primary energy source at any time during calendar year 1977. In such an instance, the powerplant shall not increase its proportional use of natural gas above the average yearly proportion of natural gas used during the calendar years 1974 through 1976 or during the first two years of its operation, if it began operations on or after January 1, 1974. In addition, an existing powerplant is prohibited from using natural gas as a primary energy source on or after January 1, 1990 unless a System Compliance Plan has been approved or an exemption granted by ERA.

ERA published, on January 5, 1979, (44 FR 1694) a proposed rule (Part 508) which provides for a special temporary public interest exemption to the statutory prohibitions against increased natural gas use by existing powerplants.

(3) We may also prohibit, by rule or order, an existing powerplant from using natural gas and/or petroleum as a primary energy source provided that we find that the powerplant has or had the technical capability to use an alternate fuel as a primary energy source, that it could have such capability without substantial physical modification or substantial reduction in its rated capacity, and that it is financially feasible to use an alternate fuel. In instances where we find that the use of a mixture of petroleum or natural gas and an alternate fuel as a primary energy source is technically and financially feasible, we are also authorized to prohibit a powerplant from using amounts of petroleum or natural gas in excess of the minimum percentage needed to maintain reliability of operation and fuel efficiency in such mixture.

(4) As in the case of a new powerplant, we may grant a temporary or permanent exemption from the prohibitions, whether imposed by statute, rule, or order, if you demonstrate that certain physical, economic, environmental or legal factors preclude compliance as indicated in Part 504 of these proposed rules.

C. NEW INSTALLATIONS (PART 505)

See Notice of Proposed Rulemaking published in the FEDERAL REGISTER November 17, 1978 (43 FR 53974).

D. EXISTING INSTALLATIONS (PART 506)

(1) We may prohibit, by rule or order, an existing installation from using petroleum or natural gas as a primary energy source provided that we find that the installation has or had the technical capability of using an alternate fuel as a primary energy source, that it could have such capability without substantial physical modification or substantial reduction in its rated capacity, and that it is financially feasible to use an alternate fuel. In instances where we find that the use of a mixture of petroleum or natural gas and an alternate fuel is technically and financially feasible, we are also authorized to prohibit an installation from using amounts of petroleum or natural gas in excess of the minimum percentage needed to maintain reliability of operation and fuel efficiency in such mixture.

(2) As in the case of a new installation, we may grant a temporary or permanent exemption from the prohibition, whether imposed by rule or order, if you demonstrate that certain physical, economic, environmental or legal factors preclude compliance as indicated in Part 506 of these rules.

III. OTHER RELATED ACTIONS

A. FORMS

We will publish proposed forms in the FEDERAL REGISTER and solicit public comments at a later date for new facility exemptions and requirements. We may also publish proposed forms and solicit public comments at a later date for existing facility exemptions and requirements.

B. GUIDELINES

From time to time, ERA may develop, as necessary, formal guidelines in support of regulations promulgated under FUA, and may publish them in the FEDERAL REGISTER for public review and comment.

C. DETERMINATION OF POWERPLANT DESIGN CAPACITY

Pursuant to Section 103(a)(18)(D) of the Act, the Federal Energy Regulatory Commission has issued proposed rules under which a powerplant's design capacity may be determined. These proposed rules were issued December 29, 1978 (Docket No. RM79-10).

The proposed rules establish guidelines for determining the design capacity of the four different types of generating units: steam-electric generators, combustion turbines, combined cycle units and internal combustion engines. For your convenience, a copy of the proposed rule is attached as an appendix to these proposed rules.

IV. SPECIFIC COMMENTS REQUESTED

We have issued these proposed rules to focus public attention and discussion on the provisions of FUA relating to existing facilities, and to expedite implementation of this program. In some instances, we have proposed alternatives for your consideration. In all cases, we solicit your comments on any issue before we reach a final decision on these regulations, not only on the specific issues, but on the alternate proposals we enumerate below as well.

The Notice of Proposed Rulemaking published in the FEDERAL REGISTER November 17, 1978 (43 FR 53974) relating to new facilities contained Parts 500, 501, 502, 503, and 505 of the proposed rules to implement the Powerplant and Industrial Fuel Use Act. Part 500 (Policy and Definitions), Part 501 (Administrative Procedures and Sanctions), and Part 502 (Fuels Decision Report) apply to these proposed rules as well as those published on November 17, 1978. We recommend that you review the November 17, 1978, notice concurrently with this one. This preamble addresses certain issues for existing facilities, new facilities, and both new and existing facilities.

A. EXISTING FACILITIES

1. *Use of Natural Gas by Existing Powerplants and Installations* (Parts 500 and 508). We propose to amend § 500.1 (General Policy) appearing in the FEDERAL REGISTER November 17, 1978, (43 FR 53981) to add a statement on the use of natural gas (including propane) by certain existing electric powerplants and installations.

We favor the use of renewable energy sources, coal, uranium and other alternate fuels wherever possible. To the extent that the near-term choice for certain existing facilities is limited to petroleum or natural gas, we generally prefer the use of natural gas and propane over middle distillates, kerosene-base jet fuels and imported residual fuel oils.

We propose to reflect this policy in implementing Title III and Section 401, Title IV, of the Act with respect to installations and powerplants.

We have published, on January 5, 1979, (44 FR 1694), a proposed rule (Part 508) which provides a special temporary public interest exemption to the statutory ban on increased natural gas use by existing powerplants.

Under Section 401 of the Act, we have the discretion to prohibit the use of natural gas in existing (non-MFBI) petroleum-capable boilers used for space heating. To avoid stimulating increased use of petroleum, we do not plan to prohibit the use of natural gas in these boilers.

These policies further the national strategic objective to reduce our dependence on foreign oil supplies as well as encouraging more vigorous interfuel competition between oil and gas and reducing our overall level of oil imports. We will monitor the continued availability of natural gas and propane and amend these policies as changing circumstances may require.

2. *Pre-Order Conference* (§ 501.33). We will generally convene a conference pursuant to § 501.33 prior to issuance of a proposed prohibition order to an existing facility. Such a conference, which shall be convened at the discretion of ERA, would primarily for the exchange of views and information to assist ERA in determining whether a prohibition order proceeding should be initiated.

3. *Fuels Decision Report* (Part 502). We are proposing that only petitioners for exemptions from the statutory prohibitions on existing powerplants and from final prohibition orders for existing powerplants and installations be required to submit a Fuels Decision Report as part of their petition for exemption. Petitioners requesting exemptions from proposed prohibition orders would not be required to submit a Fuels Decision Report, but would be required to satisfy all applicable evidentiary requirements for the exemption requested in their written submission to ERA. The proposed regulations pertaining to the Fuels Decision Report (Part 502) appear in the FEDERAL REGISTER Notice of November 17, 1978 (43 FR 53974).

4. *Coverage of Prohibitions* (Parts 504 and 506). Parts 504 and 506, as proposed, cover statutory prohibitions against the increased use of petroleum by existing powerplants (Section 405 of the Act), prohibitions against and restrictions upon the use of natural gas by existing powerplants (Section 301 of the Act), and prohibitions against the use of petroleum or natural gas by order to existing powerplants and installations issued on a case-by-case basis (Section 303(a) of the Act). These proposed regulations do not address prohibitions applicable to categories of facilities (Section 303(b) of the Act) which may be adopted by subsequent rules.

5. *Increased Petroleum Use in Existing Powerplants* (§ 504.1). Under the authority provided in Section 405 of the Act, we propose to prohibit the increased use of petroleum in any existing powerplant which used an alternate fuel as a primary energy source during calendar year 1977, unless we grant a permit.

A permit for increased use shall not be granted unless you demonstrate all of the following: (i) the unavailability of alternate fuel (including electricity) and natural gas (including propane), (ii) certification by the Administrator of EPA, or an appropriate State agency, that without the permission to use petroleum rather than an alternate fuel (including electricity) and natural gas (including propane) the powerplant will be unable to comply with requirements of the Clean Air Act, (iii) a good faith effort to minimize the quantity and the duration of the need for increased use of petroleum, and (iv) certification by the appropriate State regulatory authority that the increased use of petroleum by the powerplant is necessary to prevent impairment of reliability of service in your electric region (after considering the availability of power from contiguous systems, power pools and other sources).

We have also proposed that the applicant for this permit prepare a Fuels Decision Report. This Fuels Decision Report would provide a demonstration of the applicant's good faith efforts to comply with the prohibition by minimizing the quantity and duration of petroleum need through use of alternate fuels (including electricity), mixtures, conservation efforts and natural gas (including propane). We encourage EPA or the relevant State agency to review this Fuels Decision Report as part of the applicant's good faith effort to minimize petroleum use. We invite comments on this proposal.

6. *ERA Findings for Issuing Orders Prohibiting Natural Gas and Petroleum* (Parts 504 and 506). Prior to issuing a final order prohibiting a powerplant or installation from burning petroleum or natural gas as a primary energy source, we must find that: the unit is or previously was technically capable of burning an alternate fuel; the unit can burn that fuel without a substantial physical modification to, or derating of, the unit; and it is financially feasible to use an alternate fuel.

In making our technical capability finding, we propose to assume that units are capable not only of burning the fuels for which they were specifically designed, but that certain units are also technically capable of burning selected alternate fuels which were not included in the purchaser's design specifications. For example, units capable of burning natural gas are also technically capable of burning other gaseous fuels such as gas derived from coal. Similarly, units constructed as to be capable of burning petroleum are also inherently capable of burning alcohol from coal.

In assessing whether a "substantial physical modification" would occur as a result of converting to an alternate fuel, we propose to consider the conversion feasible if the unit has the requisite furnace configuration and tube spacing. Adjustments required to install pollution control equipment such as precipitators or scrubbers generally will not be viewed as substantial modifications to the unit.

We propose that a derating of less than 25 percent of a unit's design capacity will not be considered "substantial." These proposed regulations stipulate that any reduction in useful capacity resulting from the addition of pollution control equipment to the unit will not be included in computing the level of derating. However, where alternate sources of energy are available to operate pollution control equipment required for a particular unit, ERA may consider the cost of using such alternate energy in its cost calculation.

The "financial feasibility" criteria are composed of both a unit-specific evaluation identical to the "substantially exceeds" cost calculation test and an assessment of the affected firm's capability to raise the necessary capital to finance the conversion.

7. *System Compliance Option* (§ 504.4). We are publishing the proposed rules on the System Compliance Option as a section under Part 504 of these proposed rules rather than as a separate Part 507 as stated in the FEDERAL REGISTER Notice of November 17, 1978. The System Compliance Option provides the opportunity for utilities to comply with the prohibitions contained in FUA on a system-wide basis rather than on a individual powerplant basis. We have proposed that utilities agree to implement fuel conservation measures to reduce their overall natural gas and petroleum use as a condition for approval of their system compliance plan. We particularly solicit your comments on the type of conservation measures which could be effected, their relationship to other provisions of the new national energy legislation, and on other terms and conditions which would fulfill the objectives of FUA. We also solicit information on whether the System Compliance Option is a viable mechanism for compliance, on how many utilities are likely to select this option, and on the costs, problems, and benefits associated with the acceptance of a system compliance plan.

Please note that under FUA subsection 501(b) you must submit proposed system plans to ERA before January 1, 1980.

8. *Cost Calculations* (Parts 504 and 506). The cost calculations for existing powerplants and installations are performed in much the same way as for new units. The exceptions are noted below.

(a) *Capital Outlays.* We propose that capital outlays for existing units will be calculated over the *remaining* useful life of the unit.

(b) *Capacity Factor.* We propose that the annual capacity factor be the average capacity factor for the last

V 4 4 / 2 0 J A 2 9 7 9 UMI

five years of operation or the life to date of the existing unit whichever is shorter. For existing powerplants, we are considering an alternate approach which permits the petitioner to rebut this five year average annual capacity factor assumption by considering the impact of changes in the use of other existing powerplants in his electric region.

To rebut this five year average capacity factor (FYACF) assumption, you would have to demonstrate that, over the remaining useful life of the powerplant under consideration, it would operate at an average annual capacity factor significantly different from the five year average capacity factor. Your projected average annual capacity factor for this powerplant would have to exceed or fall short of FYACF by at least ten (10) percent to constitute a significant difference. You would have to calculate the annual capacity factor for the powerplant under consideration on the basis that the powerplant would be economically dispatched with all other powerplants in your electric region, as if that electric region were one large utility.

We are also considering evaluating the economic dispatch on an area larger than the electric region. The electric regions proposed by ERA were designated in the regulations published on November 17, 1978, governing new facilities (43 FR 53987).

We invite your comments on the administrative and the technical feasibility of, as well as necessity for, this alternate approach. Comments on other alternative approaches which would address the impact of altered dispatch ordering on the cost of the existing powerplant under consideration are encouraged. We also invite comment on whether the average annual capacity factor for the powerplant under consideration should be a simple average of the yearly annual capacity factors or an average weighted by the annual discount factors used to compute cost.

You should note that electricity is defined by FUA as an "alternate fuel" and should be taken into account in your evaluation.

B. NEW AND EXISTING FACILITIES

1. *Mandatory Versus Discretionary Exemptions* (§ 500.1). We propose to amend § 500.1 (General Policy) appearing in the FEDERAL REGISTER November 17, 1978, (43 FR 53974) to clarify the difference between mandatory and discretionary exemptions. A list of mandatory exemptions and a list of discretionary exemptions appear in this amendment. Mandatory exemptions will be granted upon a satisfactory showing that you may have met the required evidentiary burden. We may grant discretionary exemptions if you have met the required evidentiary burden and we have decided that granting an exemption would be consistent with the Act, with national energy policy, and in the public interest.

2. *Alternate Fuel Definition* (§ 500.2(a)(7)). (a) *Steam.* We are considering adding "steam" to the list of energy sources constituting alternate fuels. Alternatively, we are evaluating the merits of adding steam to the list only if the steam is derived from alternate fuels or from an approved cogenerating facility. Comments are invited.

(b) *Petroleum Related Resources.* We are considering whether indigenous, petroleum-related resources *which would otherwise remain unexploited* should be classified as "alternate fuels" as a means of increasing our national energy supplies. In this regard, the National Petroleum Refiners Association (NPRA) has recommended that oil from heavy oil sands and tar sands be designated an alternate fuel. Similarly, the California Energy Commission has suggested classifying extremely low-gravity crude oil as an alternate fuel. We request comments on (i) whether ERA should classify these crude oils as an alternate fuel only where they could not otherwise be produced; (ii) if so, how this could be determined; (iii) if we should consider API gravity as a relevant factor, what would be an appropriate cutoff for the measure of gravity and whether we should consider other specifications besides gravity, (iv) how should we make allowances for low-gravity crude oil which is produced or transported with other lighter crudes; (v) whether the Act permits general designation of these petroleum related fuels as "alternate fuels" or whether we must evaluate each fuel at individual locations under the "commercially unmarketable" and other provisions of the "petroleum" definition (Part 507).

Alternatively, we could define these petroleum related fuels as "petroleum", but provide special treatment for mixtures of alternate fuel with these petroleum related fuels. Sections 212(d) and 312(d) of the Act provide for permanent exemptions for mixtures containing alternate fuels and less than a certain percentage of petroleum. In order to encourage the use of heavy oil sands, tar sands and extremely low gravity crude oil, we could approve mixtures containing alternate fuels and at least ninety percent (90 percent) heavy oil sands, tar sands or extremely low gravity crude oils. We request comments on the technical merits and likely impact of this proposal and what mixture percentage should be specified for heavy oil sands, tar sands and extremely low gravity crude oils in powerplants and installations.

3. *Definition and Minimum Size of Units within Aggregation* (§ 500.2(a)(51) and (52)). Section 103(a)(7)(A) and 103(a)(10)(A) of FUA define electric powerplants and major fuel-burning installations in terms of a single unit which by design is capable of a fuel heat input rate of 100 million Btu's per hour or greater, or in terms of two or more units located at the same site which in the aggregate are by design capable of a fuel heat input rate of 250 million Btu's per hour or greater.

In applying the prohibitions and exemptions under FUA, the emphasis is on the unit. However, for purposes of aggregating units at the same site to determine whether such units are subject to the provisions of the Act, FUA employs a site test. There may be several units at a site which individually are under the 100 million Btu's per hour threshold, but when considered together meet the site aggregation test of 250 million Btu's per hour. Each of the units contributing to the aggregation would then be subject to the pertinent provisions of the Act.

Thus, for example, where each of the existing units at a site are smaller than 100 million Btu's per hour and when aggregated do not equal or exceed 250 million Btu's per hour, the units would not be subject to FUA at that time. If a new unit is constructed or acquired at such site and the contribution of the new unit causes the aggregation threshold to be reached, all of the units contributing to the aggregation would then be subject to the Act.

In instances where all units at the same site are new units (for purposes of FUA, all units for which construction or acquisition began on or after April 20, 1977 are presumed to be new) and are not individually large enough to meet the 100 million Btu's per hour test, such units may become subject to the provisions of FUA pertaining to new units whenever they collectively reach the 250 million Btu's per hour threshold.

As a result of this threshold having been reached, all these new units would either have to be retrofitted or cease operation unless the prohibitions of the Act could be complied with.

For purposes of aggregation, DOE earlier proposed to exclude any unit with a design capacity to consume any fuel, less than 50 million Btu's per hour. ERA is withdrawing this earlier proposed aggregation minimum because of subsequent information indicating that units smaller than 50 million Btu's per hour in capacity can be constructed or modified to utilize an alternate fuel in a technically and financially feasible manner. ERA invites comment covering whether a lower aggregation cut-off should be specified or, in the alternative, whether an unreasonableness standard should be employed for purposes of aggregation on a case-by-case basis.

To determine whether units are at the same site for purposes of aggregation, we propose that units which are located within 10 miles of each other, and are owned, operated or controlled by a single firm are presumed to be located at the same site. Furthermore, units located within ten miles of each other and providing output to more than one company are presumed to be located at the same site.

We specifically solicit comments on the above proposals, particularly with respect to the petroleum and natural gas savings which would result and the statutory language and legislative history of FUA.

4. *Internal Combustion Generating Units* (§ 500.2(a)(52)). Section 103(a) of FUA defines the term electric powerplant as "any stationary electric generating unit, consisting of a boiler, a gas turbine, or a combined cycle unit, *which produces electric power for purposes of sale or exchange* (emphasis added) * * *." Under Section 103(a) of FUA, the term MFBI is defined as a "stationary unit consisting of a boiler, gas turbine unit, combined cycle unit, or *internal combustion engine* (emphasis added) * * * (which does) not include any electric powerplant."

In the proposed rules on new facilities published on November 17, 1978, § 500.2 (a), we propose to define a major fuel burning installation (MFBI) as a "stationary unit consisting of a boiler, combustion turbine unit, combined cycle unit, or internal combustion engine, including an internal combustion engine used for generation of electricity * * *."

That regulatory definition was proposed to correct the omission of an internal combustion engine from the statutory definition of an electric powerplant. ERA believes this omission was inadvertent. There does not appear to be any legislative history to explain that omission. ERA believes that the fact of production of electric power for sale or exchange is the controlling factor in the definition of this category of unit, rather than the fact that the term "internal combustion engine" was omitted in the statutory definition of an electric powerplant.

ERA is now considering three alternatives. First, ERA is considering retaining the November 17, 1978 proposal. Second, ERA is considering an alternate definition of electric powerplant which would include an internal combustion engine. For purposes of this alternative, the phrase "a unit which produces electric power for the purpose of sale or exchange" would be given considerable weight, and the phrase "consisting of a boiler, gas turbine, or a combined cycle unit", would be regarded as simply illustrative of the types of units which can produce electricity for sale or exchange and not as an exhaustive list of the possible types of such units. The third alternative is for ERA to withdraw the November 17, 1978 proposal and not to define such internal combustion engines as either powerplants or MFBI's but, instead, to rely on legislative clarification and amendment of the statutory definition of electric powerplant so as to include the term "internal combustion engine"

We welcome comments on each of these alternatives.

5. *Definition of Primary Energy Source* (§500.2(a)(66)). The FEDERAL REGISTER inadvertently did not publish the correct definition of Primary Energy Source. Moreover, the Delaware Solid Waste Authority has suggested expansion of our definition of Primary Energy Source as reflected in (iii) below. We now propose the definition to read:

"Primary Energy Source" means the fuel or fuels used for normal operation by any existing or new electric powerplant or major fuel burning installation, except—

(i) Minimum amounts of fuel required for unit ignition, startup, testing, flame stabilization and control use;

(ii) Minimum amounts of fuel required to alleviate or prevent unanticipated equipment outages and emergencies directly affecting health, safety or welfare which would result from electric power outages; and

(iii) In the case of solid waste and resource recovery facilities, minimum amounts of fuel required for control use including fuels used in secondary boilers during scheduled maintenance and equipment outages.

6. *Filing Fees* (§ 501.20). The Department of Energy (DOE) has earlier proposed to require the payment of certain filing fees as a prerequisite to the submission of petitions for exemption (42 FR 53989, November 17, 1978). Under Title V of the Independent Offices Appropriation Act (IOAA) (31 U.S.C. 483(a)), collection of fees is authorized for administrative processing and review related to regulatory programs such as that established under FUA. Fees are authorized by the IOAA where an agency issues permits or exemptions to identifiable recipients. The proceeds of the fees are paid to the Treasury of the United States and cannot be used by the DOE. The IOAA authorizes collection of reasonable fees by a regulatory agency for specific administrative and processing expenses incurred by that agency in connection with receiving and reviewing petitions for permits or exemptions, where the permits or exemptions would result in direct value or special benefit to an identifiable recipient, such as a petitioner for an exemption from the prohibitions of FUA.

7. *"Substantially Exceeds" Index* (Parts 503, 504, 505 and 506). We propose to designate a specific index as the decision point for the substantially exceeds test. The specific ratio selected as the index will probably be between 1.3 and 1.8, but a higher index may be selected. We are using an index of 1.5 in these proposed regulations for illustrative purposes. We intend to review the index periodically. We invite comments on the magnitude of the index. We further invite comments on whether the same "substantially exceeds" index should be used throughout the regulations. Should the same index be used for new and existing facilities? Should the same index be used for different types of facilities (e.g., combustion turbines, base loaded boiler powerplants)? Should the same index be used for statutory prohibitions and prohibitions by order? Should the same index be used for facilities proposing the use natural gas as for those proposing to use petroleum? Should the same index be used for a temporary exemption as for a permanent exemption? Should the same index be used for general requirements (e.g., alternative power supply) as for exemptions?

8. *No Alternative Power Supply* (§ 503.7 and § 504.13). We are proposing to require that, as part of the demonstration that no alternative power supply exists, a utility demonstrate that the incremental amount of electricity required cannot be obtained from the existing system through improved performance of existing facilities, system conservation measures, utility assisted end use conservation measures (including reduction in demand through utility purchases of insulation for customers), and load management techniques. This treatment was suggested, in part, by the Environmental Defense Fund. We solicit comments on this proposal, and on the manner in which a utility might make such a demonstration.

In order to be consistent with the calculation of cost, we are revising the procedures to evaluate alternative supply of power through amendments to § 503.7. These amendments specify that the cost of purchased power be calculated as a total cost, not a cost per kilowatt hour as previously specified. In addition, these amendments specify that you must evaluate purchasing electricity until an alternate fuel-fired plant can be operational, as well as separately evaluating both purchasing electricity and operating an alternate fuel fired plant.

We solicit comments on whether alternative power supplies should be cal-

V 4 4 / 2 0
J A 2 9 ' 7 9
UMI

culated on a total cost or cost per kilowatt hour basis.

9. *Fuel Classification and Reporting Requirements* (Part 507). (a) *Restructuring of Natural Gas and Petroleum. Definitions.*

In the FEDERAL REGISTER of November 17, 1978 (43 FR 53987), we defined the terms "natural gas" and "petroleum" in § 500.2(d) and (e), respectively. In this notice, we have established a separate Part 507, entitled Fuel Classification and Reporting Requirements which contains and amends these definitions. Proposed changes to these definitions are identified in (i) and (ii) below.

(i) *Natural Gas Definition.* In the proposed rules for new facilities published on November 17, 1978, we proposed to define the term "natural gas" (§ 500.2(d)) to exclude natural gas produced by the user from a well acquired by the user prior to July 18, 1977, the maximum efficient production rate (MEPR) of which is less than 250 million Btu's per day. Such gas would have been defined as an "alternate fuel". Natural gas produced from wells with a MEPR of less than 250 million Btu's per day which were acquired on or after July 18, 1977, would be defined as "natural gas" rather than as an alternate fuel. The purpose of the proposed definition was to preclude users from escaping the statutory prohibitions on natural gas use simply by purchasing wells which meet the MEPR criteria. We also stated in the preamble that we were evaluating the merit of limiting the amount of natural gas burned from such wells acquired prior to July 18, 1977.

After reviewing the legislative history, we have decided to replace these definitions. We now propose to place no restrictions upon the acquisition of these wells or upon the use by producers of natural gas produced therefrom. We do propose, however, to institute an annual reporting requirement of consumption by large utility users of natural gas produced from these wells, under our authority pursuant to Section 711.

In calculating the MEPR of a well, consistent with Section 103(a)(3)(B)(ii) of FUA, we also propose to include the Btu value of any crude oil, gas condensate, and natural gas liquids which may be produced from the well, in addition to the Btu value of the natural gas.

We have also included occluded methane in coal seams in the definition of unmarketable gas, as proposed by the Governor of West Virginia. We ask comments on this proposal as well as on other types of natural gas substitutes which might be included.

(ii) *Petroleum Definition.* The National Petroleum Refiners Association (NPRA) has suggested that all waste gases, liquids, and solids from refinery or other industrial operations be categorized as "commercially unmarketable" because consumption within the refinery or petrochemical site constitutes the most efficient disposition of these energy sources. Comments are requested on this proposal as well as on the specific definitions proposed in § 507.2(b).

(b) *Reporting Requirements.* We have proposed that users of fuels deemed not to be natural gas and petroleum as defined in Part 507 need only annually report to ERA that they are using such fuels and provide certain information. Since no subsequent certification by ERA would be required, this approach would reduce the administrative burden upon both users and the Government.

We ask comments on whether ERA should reserve the authority to determine at a later date that such fuels should not be excluded from the definitions of natural gas or petroleum, based on the evidence submitted by users. Alternatively, ERA could require users to advertise for a specified period of time the availability of such fuels for potential purchase (by users, natural gas pipelines, and distribution companies. If potential purchasers stated a willingness to purchase such fuels, ERA would then determine that they should not be excluded from the definitions of natural gas or petroleum under the Act. In this regard, should we prescribe appropriate procedures in our regulations setting forth a fixed period for users to advertise the availability of such fuels before it is deemed to be unmarketable? If so, should this be done through the states, the ERA the FERC, or some other mechanism?

d. *New Facilities* (Published on November 17, 1978, (43 FR 53974). 1. *Definition of New Electric Powerplant* (§ 500.2(a)(51)(ii)(B)). We propose additional criteria to determine the point at which a previously "existing powerplant" may be designated "new". We feel the addition is necessary to prevent conversion of existing plants (e.g., combustion turbines to combined cycles) which would result in increased petroleum consumption. We propose to accomplish this by revising Section 500.2(a)(51)(ii)(B) to read "(B) which, on a cumulative basis since April 20, 1977, has been reconstructed or refurbished or added to, to the extent that the cost of such reconstructin, refurbishment, or addition equals or exceeds 50 percent of the price of a replacement unit, on a cumulative basis after November 9, 1978, or which changes the thermal cycle of the unit." We solicit comments on this proposed change.

2. *Permanent Fuels Mixtures Exemption* (§ 505.28). ERA invites additional public comments on new MFBI's which plan to use fuel mixtures of less than 25 percent natural gas or petroleum. As written, § 505.28 would require a petitioner to present extensive documentary evidence that he could not utilize less than 25 percent petroleum or natural gas in a mixture with alternate fuels. In light of § 212(d)(2) of FUA, which states that for installations, the Secretary shall not establish a percentage use of petroleum or natural gas less than 25 percent, we invite comments on whether petitioners who propose to construct installations that will consume less than 25 percent petroleum or natural gas in a mixture should be required to comply with only the annual reporting requirement contained in proposed § 505.28(c).

VI. COMMENT PROCEDURES

A. WRITTEN COMMENTS

You are invited to participate in this Rulemaking by submitting data, views or arguments with respect to the issues set forth in this Notice. Comments should be submitted to the address indicated in the "ADDRESSES" section of this Notice and should be identified on the outside envelope and on documents submitted with the designation "Powerplant and Industrial Fuel Use Act" Docket No. ERA-R-78-19. You should submit fifteen copies. Where possible, comments on separate distinct issues should be physically separated and annotated to allow efficient review and consideration. All comments received will be available for public inspection in the DOE Reading Room, GA-152, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. We will consider all comments received by March 2, 1979, 4:30 p.m. regarding the November 17, 1978, Notice and by March 26, 1979, 4:30 p.m. regarding specific issues raised in this Notice.

You should identify separately any information or data you consider to be confidential and file one copy of your submission with the confidential portions deleted. We reserve the right to determine the confidential status of the information or data and to treat it according to our determination.

B. PUBLIC HEARINGS

The time, date and locations for the public hearings are being announced in the FEDERAL REGISTER concurrently with these proposed rules.

A draft regulatory analysis of the proposed regulations, as contemplated by Executive Order No. 12044, was attached as an appendix to the proposed rules published in the FEDERAL REGISTER November 17, 1978 (43 FR 53974, November 17, 1978). Copies may also be obtained from the ERA, 2000 M Street, N.W., Room B-110, Washington, D.C. 20461, (202) 634-2170. In addition, a draft Environmental Impact Statement (EIS) has been prepared pursuant to the National Environmental Policy Act (NEPA) and is available for review in Room B-110, 2000 M Street, N.W., Washington, D.C.

(Department of Energy Organization Act, Public Law 95-91; Powerplant and Industrial Fuel Use Act of 1978, Public Law 95-620; Title V of the Independent Offices Appropriation Act of 1952, 65 Stat. 290, 31 U.S.C. 483(a); Executive Order 12009, 42 FR 46267).

In consideration of the foregoing, it is proposed to make the following amendments to Title 10, Chapter II, Subchapter E of the Code of Federal Regulations as proposed on November 17, 1978, 43 FR 53974, and it is proposed to add new Parts 504, 506 and 507 to Subchapter E, as set forth below.

Issued in Washington, D.C. on January 22, 1979.

DAVID J. BARDIN,
Administrator,
Economic Regulatory
Administration.

SUBCHAPTER E—ALTERNATE FUELS

AMENDMENTS

10 CFR, Chapter II, Subchapter E, as proposed on November 17, 1978, 43 FR 53974, is amended as follows:

1. The citation of authority appearing at page 53980 of the November 17, 1978 FEDERAL REGISTER is amended to read as follows:

(Department of Energy Organization Act, Pub. L. 95-91; Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620; Title V of the Independent Offices Appropriation Act of 1952, 65 Stat. 290, 31 U.S.C. 483(a); Executive Order 12009, 42 FR 46267).

2. The Table of Contents to Subchapter E is amended by deleting § 500.2(d) (Natural Gas) and § 500.2(e) (Petroleum) appearing at page 53980 of the November 17, 1978 FEDERAL REGISTER.

3. The Table of Contents to Subchapter E is amended by deleting Part 507 (System Compliance) appearing at page 53981 of the November 17, 1978 FEDERAL REGISTER.

PART 500—POLICY AND DEFINITIONS

4. Section 500.1 (General policy) appearing at page 53981 of the November 17, 1978 FEDERAL REGISTER is amended by adding new paragraphs (m) and (n) to read as follows:

§ 500.1 General policy.

* * * * * *

(m) *Mandatory and discretionary exemptions.* (1) The following mandatory exemptions will be granted upon a satisfactory showing that the petitioner has met the required evidentiary burden:

(i) *Temporary exemptions for existing units.* (A) Lack of alternate fuel supply;
(B) Site limitations;
(C) Environmental requirements;
(D) Use of synthetic fuels;
(E) Use of innovative technologies;
(F) Units to be retired;
(G) Peakload powerplants; and
(H) Reliability of service.

(ii) *Temporary exemptions for new units.* (A) Lack of alternate fuel supply;
(B) Site limitations;
(C) Environmental requirements; and
(D) Use of synthetic fuels.

(iii) *Permanent exemptions for existing units.* (A) Lack of alternate fuel supply;
(B) Site limitations;
(C) Environmental requirements;
(D) Fuel mixtures;
(E) Emergency purposes;
(F) Peakload powerplants;
(G) Powerplants with design capacity of less than 250 million Btu's;
(H) Use of LNG;
(I) Installations served by certain international pipelines; and
(J) Product or process requirements.

(iv) *Permanent exemptions for new units.* (A) Lack of alternate fuel supply;
(B) Site limitations;
(C) Environmental requirements;
(D) Fuel mixtures;
(E) Emergency purposes;
(F) Peakload powerplants;
(G) Product or process requirements; and
(H) Lack of adequate capital.

(2) The exemptions listed below are discretionary and ERA may grant such exemptions if the petitioner meets the required evidentiary burden and ERA decides that it would be consistent with the Act, with national energy policy, and in the public interest to do so.

(i) *Temporary exemptions for existing units.* (A) Public interest.

(ii) *Temporary exemptions for new units.* (A) Public interest; and
(B) Use of petroleum by installation with design capacities of less than 300 million Btu's.

(iii) *Permanent exemption for existing units.* (A) State or local requirements;
(B) Cogeneration;
(C) Intermediate load powerplants; and
(D) Scheduled equipment outages.

(iv) *Permanent exemptions for new units.* (A) State or local requirements;
(B) Cogeneration;
(C) Reliability of service powerplants;
(D) Intermediate load powerplants; and
(E) Scheduled equipment outages.

(n) *Use of natural gas by existing powerplants and installations.* National energy policy favors the use of renewable energy sources, coal, uranium and other alternate fuels wherever possible. To the extent that the near-term choice for certain existing facilities is limited to petroleum or natural gas, we generally prefer the use of natural gas and propane over middle distillates, kerosene-base jet fuels and imported residual fuel oils. This policy furthers our national strategic objective to reduce our dependence on foreign oil supplies as well as encouraging more vigorous interfuel competition between oil and gas and reducing our overall level of oil imports. We will reflect this policy in implementing Title III and Title IV of the Act. Specifically, under Section 401 of the Act, we have the discretion to prohibit the use of natural gas in existing (non-MFBI) petroleum-capable boilers used for space heating. In order to avoid stimulating increased use of petroleum, we do not plan to prohibit the use of natural gas in these boilers.

PART 501—ADMINISTRATIVE PROCEDURES AND SANCTIONS

[See 43 FR 53988, November 17, 1978]

PART 502—FUELS DECISION REPORT

[See 43 FR 54001, November 17, 1978]

PART 503—NEW ELECTRIC POWERPLANTS

5. Section 503.7 (No alternative power supply—permanent exemptions) appearing at page 54022 of the November 17, 1978 FEDERAL REGISTER is amended to read as follows:

§ 503.7 No alternative power supply—permanent exemptions.

(a) *Application.* Section 212 of the Act provides for a permanent exemption for lack of alternate fuel supply, site limitations, environmental requirements, inability to obtain adequate capital, State or local requirements, fuel mixtures, emergency purposes, reliability of service, or intermediate load. To qualify for one of these exemptions, you must demonstrate to the satisfaction of ERA that, despite diligent good faith efforts, there is no alternative supply of electric power which is available within a reasonable distance at a reasonable cost without impairing short-run or long-run reliability of service which you could obtain. ERA assumes that you will be unable to demonstrate that there is no alternative supply of electric power if the expected date of plant operation is more than 10 years from the date you apply for an exemption. For proposed

V 44 / 20 JA 29 79 J UMI

plants expected to be operational within 10 years from the date you submit your petition, you must demonstrate to the satisfaction of ERA all of the following.

(1) You cannot purchase electricity from another utility at a cost which does not substantially exceed the cost of your proposed plant using imported petroleum. You may include transmission costs to your service area in your cost calculation. ERA will consider any source of electricity which does not substantially exceed the cost of your proposed plant using imported petroleum to be within a reasonable distance and at a reasonable cost. For this subpart the cost index will be the same as that used in the cost calculation. (§ 503.5).

(2) You cannot construct and operate an alternate fuel fired plant either within or outside your service area at a cost which does not substantially exceed the cost of using imported petroleum. See § 503.5 for instructions on calculations of cost. You may include transmission costs for power delivery to your service area.

(3) You cannot purchase electricity and construct and operate an alternate fuel fired plant at a cost which does not substantially exceed the cost of your proposed plant using imported petroleum. ERA will consider any combination of purchased electricity and an alternate fuel fired plant that costs less than (1.5) times the cost of your proposed plant using imported petroleum to be at a reasonable cost. For this subpart the cost index will be the same as that used in the cost calculation. (§ 503.5).

(4) You cannot meet load requirements with existing facilities by improving the performance of existing facilities, employing system conservation measures, assisting end use customers to conserve electricity, and implementing load management techniques.

(b) *Evidence.* You must include in your Fuels Decision Report the following substantial evidence to corroborate the above requirements:

(1) A detailed description of your methodology to calculate the cost for purchased electricity and the cost for your proposed plant as required in paragraph (a)(1) of this section;

(2) A detailed description of your methodology to calculate the cost for purchased electricity and an alternate fuel fired plant, and your proposed plant as required in paragraph (a)(3) of this section;

(3) Identification and explanation of all figures used in your calculation supporting paragraphs (a)(1) and (a)(3) of this section;

(4) A description of your efforts to purchase electricity;

(5) All data required by § 503.5 (cost calculation) supporting paragraph (a)(2) of this section;

(6) A detailed description of each of the methods your considered as required by paragraph (a)(4) of this section together with an estimate of the cost of implementing each of the methods; and

(7) An estimate of the kilowatt hour savings or additional kilowatt hour potential, as applicable, for each of the methods you considered as required by paragraph (a)(4) of this section.

10 CFR, Chapter II, Subchapter E, as proposed on November 17, 1978, 43 FR 53974, is amended by adding Parts 504, 506 and 507 to read as follows:

PART 504—EXISTING ELECTRIC POWERPLANTS

Subpart A—Restriction on the Use of Petroleum

Sec.

504.1 Prohibition against the increased use of petroleum.

Subpart B—Prohibitions and Systems Compliance Option

504.2 Purpose and scope.
504.3 Statutory prohibitions.
504.4 Electric utility system compliance option.
504.5 Prohibitions by order (case-by-case).

Subpart C—General Requirements for Exemptions

504.10 Purpose and scope.
504.11 Fuels Decision Report.
504.12 Cost calculation for existing powerplants.
504.13 No alternative power supply—general requirement for permanent exemptions.
504.14 Use of mixtures—general requirement for temporary exemptions.
504.15 Use of mixtures—general requirement for permanent exemptions.
504.16 Use of fluidized bed combustion not feasible—general requirement for permanent exemptions.
504.17 Terms and conditions; compliance plans.

Subpart D—Temporary Exemptions for Existing Electric Powerplants

504.20 Purpose and scope.
504.21 Lack of alternate fuel supply.
504.22 Site limitations.
504.23 Inability to comply with applicable environmental requirements.
504.24 Future use of synthetic fuels.
504.25 Use of innovative technologies.
504.26 Powerplants: public interest exemption.
504.27 Retirement.
504.28 Temporary exemption for powerplants necessary to maintain reliability of service.
504.29 Peakload powerplants.

Subpart E—Permanent Exemptions for Existing Electric Powerplants

504.30 Purpose and scope.
504.31 Lack of alternate fuel supply.
504.32 Site limitations.
504.33 Inability to comply with applicable environmental requirements.
504.34 State or local requirements.
504.35 Cogeneration.
504.36 Permanent exemption for certain fuel mixtures containing natural gas or petroleum.
504.37 Emergency purposes.
504.38 Peakload powerplants.
504.39 Intermediate load powerplants.
504.40 Use of natural gas by powerplant with capacity of less than 250 million Btu's per hour.
504.41 Use of liquid natural gas.

AUTHORITY: Department of Energy Organization Act, Pub. L. 95-91; Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620; Title V of the Independent Offices Appropriation Act of 1952, 65 Stat. 290, 31 U.S.C. 483(a); Executive Order 12009, 42 FR 46267.

Subpart A—Restriction on the Use of Petroleum

§ 504.1 Prohibition against the increased use of petroleum.

(a) Pursuant to section 405 of the Act, ERA hereby prohibits any existing electric powerplant, which during calendar year 1977 used an alternate fuel as a primary energy source, from using petroleum as a primary energy source in excess of the quantities of petroleum used in the powerplant as a primary energy source during that year unless ERA issues a permit authorizing the increased use of petroleum.

(b) *Eligibility.* ERA shall not issue the permit unless you demonstrate to the satisfaction of ERA all of the following:

(1) You made a good faith effort to obtain an alternate fuel (including electricity) and natural gas;

(2) You made a good faith effort to minimize the quantity and duration of need for increased petroleum as reflected in a Fuels Decision Report;

(3) You supplied a copy of your Fuels Decision Report for review by the Administrator of the Environmental Protection Agency or the appropriate State air pollution control agency;

(4) The Administrator of the Environmental Protection Agency or the appropriate State air pollution control agency certifies to the ERA: you cannot comply with the requirements of the Clean Air Act, including any applicable implementation plan, as defined in 110(d) of the Clean Air Act, without permission to use petroleum rather than an alternate fuel (including electricity) and natural gas (including propane); and

(5) The appropriate State regulatory authority has certified to ERA that the increased use of petroleum by the powerplant is necessary to prevent impairment of reliability of service in your electric region.

(c) *Evidence.* To submit an adequate application to ERA for a permit to increase use of petroleum you must submit a Fuels Decision Report as specified in Part 502 of these regulations. You must include in your Fuels Decision Report evidence that you sought the full range of alternate fuels (including alternate source of power) and natural gas (including propane) which could alleviate conditions in paragraphs (b)(4) and (5) of this section. You also must include in your Fuels Decision Report evidence that you sought to minimize the quantity and duration of increased petroleum use and Certificates from the Administrator of EPA, or the appropriate State air pollution control agency, and the appropriate State regulatory authority as specified in paragraphs (b)(4) and (5) of this section.

(d) ERA shall issue the permit only for the quantity and duration it determines necessary under paragraphs (b)(1), (2), (4), or (5) of this section for the increased use of petroleum.

Subpart B—Prohibitions and Systems Compliance Option

§ 504.2 Purpose and scope.

(a) *Purpose.* This subpart sets forth the statutory prohibitions imposed on existing electric powerplants by the Act and establishes the procedures ERA intends to employ in administering and implementing its authority to prohibit electric powerplants from using petroleum and natural gas. Also set out in this part are the procedures applicable to the systems compliance option.

(b) *Scope.* This subpart applies to all existing electric powerplants. Any person who has any ownership or interest in, or who operates, rents, or leases a powerplant, is subject to the prohibitions of the Act and the penalties as specified by the Act.

§ 504.3 Statutory prohibitions.

(a) Section 301(a)(1) of the Act prohibits the use of natural gas as a primary energy source by any existing electric powerplant on or after January 1, 1990, unless, and to the extent that, the powerplant is granted either a temporary or permanent exemption under this Part of a Systems Compliance Option has been approved.

(b) Section 301(a)(2) of the Act prohibits the use of natural gas as a primary energy source in any existing electric powerplant before January 1, 1990, unless it used natural gas as a primary energy source anytime during calendar year 1977, or unless, and to the extent that, the powerplant is granted either a temporary or permanent exemption under subpart D or E of this part.

(c) Section 301(a)(3) of the Act prohibits the use of natural gas as a primary energy source in any existing electric powerplant, in any calendar year before 1990, in greater proportions than the average yearly proportion of natural gas which:

(1) The powerplant used as a primary energy source in calendar year 1974 through 1976; or

(2) If the powerplant began operations on or after January 1, 1974, the powerplant used as a primary energy source during the first two calendar years of its operation.

(d) Any prohibition against your use of natural gas on of after January 1, 1990 will be stayed while any petition you have filed for an exemption is resolved. The stay will include the time required for judicial review. Your petition for exemption may be filed at any time after May 8, 1979, the effective date of FUA, but it must be filed at least one year before the date the prohibition is first to take effect.

§ 504.4 Electric utility system compliance option.

(a) *General.* Section 501 of the Act provides for an electric utility system compliance option. You will be considered in compliance with any prohibition on existing powerplants relating to the use of natural gas if ERA has approved a system compliance plan for you. No exemption, except an emergency exemption, for use of natural gas will be available for those plants covered by an approved plan.

(b) *Requirements for Approval.* To qualify you must provide the information requested and demonstrate to the satisfaction of ERA your commitment to the terms listed below. Your proposed plan must be submitted before January 1, 1980 and include the following:

(1) Identification of all powerplants owned or operated by you that would or could be subject to prohibitions under Title III (Existing Facilities) relating to the use of natural gas if a plan for you were not approved;

(2) Identification of those plants covered in paragraph (b)(1) of this section that you feel would be entitled to an exemption if a plan were not approved;

(3) A commitment that if a plan is approved you shall not use natural gas or petroleum as a primary energy source in a new baseload powerplant;

(4) A commitment that if a plan is approved you wil not use natural gas on and after January 1, 1990 in excess of (i) 20 percent of your base period usage of natural gas adjusted for emergency or peakload purposes if applicable, or, if lower; (ii) your minimum peakload requirement;

(5) A commitment that if a plan is approved, on or after January 1, 1990 you will not use natural gas in peakload or intermediate load plants identified in paragraph (b)(2) of this section unless it is necessary to prevent impairment of reliability of service;

(6) A commitment that on and after January 1, 2000 you will not use natural gas as a primary energy source unless ERA grants you a temporary extension;

(7) A commitment that upon approval of the system compliance plan you will obtain natural gas used by your system only under the provisions of a contract (i) which you executed prior to November 9, 1978, other than under an extension or renewal of the contract on or after November 9, 1978, or (ii) which you executed prior to November 9, 1978, or an extension or renewal on or after November 9, 1978 but, only if the contract extension or renewal has been approved by ERA;

(8) A 10 year forecast, to be annually revised and extended, which provides support for a conclusion by ERA that the commitments in your system compliance plan will be met. The forecast should include demand for electricity, construction plans and a financial plan.

(9) A plan for use of fuel conservation measures that will minimize your natural gas and petroleum consumption.

(c) *Calculations of 1990 natural gas volumes for § 504.4 (b)(4)(i).* For purposes of this section volumes of natural gas are the sum of the following:

(1) 20 percent of the natural gas used in calendar year 1976 by your powerplants that were placed in service on or before January 1, 1976;

(2) 10 percent of the natural gas used in the first 24 months of service by your powerplants which were placed in service after January 1, 1976 and before May 8, 1979;

(3) Natural gas volumes for emergency purposes consistent with § 504.37 of these regulations if approved by ERA; and

(4) Natural gas volumes for peakload purposes consistent with § 504.38 of these regulations if approved by ERA; and

(5) Natural gas volumes, if approved by ERA, required (i) because of delays which occurred, despite diligent good faith efforts in the construction of powerplants which will use a primary energy source other than natural gas, or (ii) because without increased volumes reliability of service would be impaired.

(d) *Calculation of minimum peakload requierments for § 504.4(b)(4)(ii).* For purposes of this section the minimum peakload requirement is the volume of natural gas required to generate 17.1 percent of the total electricity by your company in 1990.

(e) *Fuel Conservation Measures for § 504.4(b)(9).* Fuel conservation measures include any activity, service, or investment that would result in lower

V 4 4 / 2 0

consumption of natural gas and petroleum as primary energy sources. Such measures include:

(1) End-use conservation measures, which conserve electric energy generated with natural gas and petroleum by reducing the load to be served;

(2) load management measures, which shape the load so that it may be served by other generation facilities which use less natural gas and petroleum or which use natural gas and petroleum more efficiently. Load management measures include, but are not limited to, time-of-use rates and direct control of customer loads; and

(3) Generation efficiency measures, which conserve natural gas and petroleum by increasing the efficiency of the generation process.

(f) *Temporary extension.* ERA may grant a five-year extension with respect to the use of natural gas if you demonstrate that such gas is needed for:

(1) Emergency purposes consistent with § 504.37 of these regulations, or

(2) Peakload purposes consistent with § 504.38 of these regulations.

(g) *Evidence.* To submit an adequate plan for review by ERA you must include in your plan substantial evidence to corroborate the requirements in § 504.4(b) of this section. Evidence shall include the following:

(1) Identification of your affected powerplants;

(2) Ten-year forecasts of your electric demand, construction plans, and financial plans with sufficient detail to conclude that the commitments in your plan will be carried out;

(3) A schedule for an orderly progression to meet the 1995 and 2000 commitments; and

(4) A description of contracts with appropriate state regulatory authorities regarding the commitments contained in your plan.

(5) A description of the fuel conservation measures planned or of such alternative measures as may be indicated, including:

(i) The amount of natural gas and petroleum likely to be consumed;

(ii) The specific end-loads to be served by the system; and

(iii) A description of the proposed fuel conservation measures including their practicability, effectiveness, cost, anticipated savings, and implementation steps.

(h) *Reporting.* You must annually update the information contained in your plan, including progress on implementing your proposed conservation measures.

(i) *Terms and conditions.* ERA will condition approval of your system compliance plan on such terms and conditions as we determine to be appropriate, including the use of effective fuel conservation measures which are practicable and consistent with the purposes of the Act.

(j) *Plan revision revocation.* (1) A system compliance plan may be revised or modified for substantially changed circumstances supported by clear and convincing evidence.

(2) A revision to a system compliance plan may be proposed by you or by ERA on its own motion. No proposed revision will be effective without your approval and the approval of ERA.

(3) ERA may revoke a system compliance plan after notice to you and an opportunity for an informal hearing of its intention to revoke based upon a finding by ERA that the system compliance plan is no longer consistent with the purposes of the Act.

(k) *Waiver of certain prohibitions.* Section 216 of the National Energy Conservation Policy Act (NECPA) (Pub. L. 95-619) prohibits utilities from supplying, installing or financing certain end-use conservation measures. Petitions for system compliance plans that propose fuel conservation measures prohibited by NECPA prohibition should include a specific request that the NECPA prohibition be waived by the Secretary.

§ 504.5 Prohibitions by order (case-by-case).

(a) ERA may prohibit, by order, the use of natural gas or petroleum as a primary energy source in an existing electric powerplant if ERA finds that:

(1) The powerplant has, or previously had, the technical capability to use alternate fuel as a primary energy source;

(2) The powerplant presently has this technical capability or could acquire the technical capability without:

(i) A substantial physical modification of the unit; or

(ii) A substantial reduction in the rated capacity of the unit; and

(3) It is financially feasible for the powerplant to use an alternate fuel as its primary energy source.

(b) ERA must make a proposed finding regarding the technical capability of a unit to use alternate fuel as identified in paragraph (a)(1) of this section prior to the date of publication of the notice of the proposed prohibition. ERA will publish this finding in the FEDERAL REGISTER along with the notice of the proposed prohibition.

(c) Your powerplant shall be considered technically capable of using alternate fuel as its primary energy source if:

(1) The powerplant was designed so as to be capable of using a specific alternate fuel as primary energy source, with or without modification of the unit; or

(2) ERA determines that the powerplant is capable of using an alternate fuel as its primary energy source even though the unit was not spcifically designed for that alternate fuel.

(d) Your powerplant does not require substantial physical modification if it has the requisite furnace configuration and the requisite tube spacing to burn an alternate fuel.

(e) No substantial reduction in the rated capacity of the unit will be presumed to occur if the derating does not exceed 25 percent. ERA will not consider the loss of design capacity caused by the use of pollution control equipment.

(f) It is financially feasible for your powerplant to use an alternate fuel as its primary energy source if:

(1) The cost of using an alternate fuel does not substantially exceed the cost of using imported petroleum, as determined by utilizing the cost calculation described in § 504.12 of these regulations; and

(2) You have the ability to raise the capital necessary to convert the unit to burn an alternate fuel as its primary energy source.

(g) If ERA finds that it is technically and financially feasible for your powerplant to use a mixture of petroleum or natural gas and alternate fuel as its primary energy source, ERA may prohibit you, by order, from using petroleum or natural gas in amounts exceeding the minimum amount necessary to maintain the reliability of your operation consistent with maintaining reasonable fuel efficiency of the mixture.

(h) ERA may not issue a final order to your powerplant if you demonstrate by written submission that your facility would be eligible for an exemption under the criteria set out in this part for any applicable exemption, or if you have demonstrated to the satisfaction of ERA that the required findings stated in paragraph (a) of this section cannot be made. However, if your powerplant would be eligible only for a temporary exemption, ERA may issue you a final order that will take effect at the expiration of the temporary exemption.

(i) ERA may not issue a final order, under this section to your powerplant unless prior to issuance of the order there has been published in the FEDERAL REGISTER a notice of the proposed order. This notice shall provide a period of no less than 49 days in which interested persons may file written data, views and arguments and also provide an opportunity for interested persons to request a public hearing on the proposed order. It is during this public comment period that the recipient is given the opportunity to challenge the findings ERA must make prior to issuance of a final order and/or to demonstrate that the installation is eligible for an exemption.

[6450-01-C]

EQ 1 $$R = \frac{\text{COST (ALTERNATE)}}{\text{COST (OIL)}}$$

(ii) Calculate the cost of using an alternate fuel and imported petroleum with equation 2.

EQ 2 $$\text{COST} = I + \frac{OM_1 + FL_1}{(1+K)^1} + \frac{OM_2 + FL_2}{(1+K)^2} + \ldots + \frac{OM_N + FL_N}{(1+K)^N} - \frac{S_P}{(1+K)^P}$$ 1/

(iii) Calculate investment (I), operations and maintenance (OM), and fuel (FL) for equation 2 using equations 3, 4, and 5.

EQ 3 $$I = I_o + \frac{I_1}{(1+K)^1} + \frac{I_2}{(1+K)^2} + \ldots + \frac{I_N}{(1+K)^N}$$

EQ 4 $$OM = 8760 \times ACF \times O \times C$$

EQ 5 $$FL = 8760 \times ACF \times C \times f \times H$$

(5) The terms in equations 1 through 5 are defined as follows:

1/ The electric power industry is a regulated industry. Its profits depend upon its regulators as well as its costs. Since there are many regulatory bodies, which do not always act the same way, we decided not to be concerned with the profits, per se, but only with the costs to society of producing electricity. The income taxes paid by the utilities are transfer payments, from a societal point of view, and therefore are not included in the calculation.

JAN 29 1979 UMI

V 4 4 / 2 0 J A 2 9 7 9 J

(j) If ERA cannot issue your powerplant a final order because your facility is eligible for a permanent exemption, or if the effective date of the order is delayed during the period that a temporary exemption is in effect, ERA will take the necessary action to assure that you comply with the terms and conditions of the order granting the exemption.

(k) ERA may not issue your powerplant an order under this section if your powerplant has been identified as a member of a category subject to a final rule at the time of an issuance of the proposed order.

Subpart C—General Requirements for Exemptions

§ 504.10 Purpose and scope.

This subpart establishes the general requirements necessary to qualify for either a temporary or permanent exemption under this Part and sets out the methodology for calculating the cost of using an alternate fuel and the cost of using imported petroleum.

§ 504.11 Fuels decision report.

(a) Before ERA will accept a petition for either a temporary or permanent exemption from a final prohibition order issued under this Part, you must include as part of your petition a Fuels Decision Report as described in Part 502. The Fuels Decision Report shall contain the analysis and documentation of the evidence required in support of your exemption request.

(b) If you are requesting a temporary or permanent exemption from a proposed prohibition order issued under this part, you are not required to submit a Fuels Decision Report as part of your written submission. Your submission must include, however, all of the evidence required by the applicable section of the regulations pertaining to the exemption.

§ 504.12. Cost calculations for existing powerplants.

(a) *General.* (1) If you are requesting an exemption for an existing powerplant on the basis that the cost of using an alternate fuel as a primary energy source or the cost of using an alternate power supply substantially exceeds the cost of using imported petroleum, you must use the comparative cost test provided in this section.

(2) The cost of using an alternate fuel in lieu of imported petroleum as a primary energy source, or the cost to use an alternate power supply will be deemed to be substantially in excess of the cost to use imported petroleum were the ratio of the former to the latter is greater than the index sex periodically ERA. Initially, ERA sets the index at (1.5). ERA will revise the index from time to time after public notice and an opportunity to comment. Revisions shall become effective for all ERA decisions after final publication.

(3) The cost test takes into consideration capital outlays, operation and maintenance expenses, and delivered fuel expenditures. There are two comparative cost tests—a General Cost Test and a Special Cost Test. You must demonstrate eligibility for a permanent exemption on the basis that the cost of using alternate fuel as a primary energy source substantially exceeds the cost of using imported petroleum. You must use the procedures specified in the General Cost Test (Section b). You must demonstrate eligibility for a temporary exemption using the procedure specified in the General Cost Test (Section b) or the Special Cost Test (Section c).

(4) The General Cost Test differs from the Special Cost Test with respect to the time period over which costs are calculated. When using the General Cost Test, the cost must be computed for the remaining useful life of the powerplant. When using the Special Cost Test, the cost is computed only for the term of the exemption.

(b) *Cost calculation—general cost test.* (1) You may be eligible for a permanent exemption if you demonstrate that the cost of using an alternate fuel starting with each successive year within the first ten years of the exemption will always substantially exceed the cost of using imported petroleum in the powerplant from the time the exemption becomes effective until the end of the powerplant's useful life. You will have to show that the cost of using an alternate fuel starting in each of the first ten years of this exemption and using oil or natural gas until the start of using an alternate fuel, substantially exceeds the cost of using only imported petroleum. In the case where you are comparing the costs of using an alternate power supply, you need only compare the cost of using the alternate power supply from the time the exemption becomes effective until the end of the useful life of the powerplant to the cost of using imported petroleum in the proposed powerplant over the same time period. If the costs of the former substantially exceeds the latter, you may be eligible for a permanent exemption.

(2) ERA will not grant a permanent exemption if a temporary exemption solves the cost problem within ERA's definition. Therefore, if the cost computed with successive starting dates for alternate fuel use (for the first 10 years of the exemption) does not always substantially exceed the cost of using imported petroleum, you would only be eligible for a temporary exemption. The length of the temporary exemption would be the minimum period where the costs of using alternate fuel always substantially exceeds the cost of using imported petroleum. For example, if you can burn coal, but the coal will not be available from a bona fide supplier for 2 years, ERA may grant a temporary exemption and allow the burning of natural gas based on an acceptable certification of the schedule of delivery of coal.

(3) For the General Coal Test, ERA defines cost as the sum of the annual outlays for capital, operations and maintenance and delivered fuel, discounted to the present.

(4) To conduct the test, you must use the equations that follow:

(i) Calculate the ratio (R) of the cost of using an alternate fuel to the cost of using imported petroleum with equation 1.

[6450-01-M]

R—The ratio of the cost of using an alternate fuel to the cost of using imported petroleum.

COST—The total discounted cost in dollars, of constructing and operating the plant for the remaining useful life of the powerplant.

I—Discounted total net capital outlay in dollars, excluding investment tax credits and "Advances in Aid of Construction" (as per FERC system of accounts). May include investment in additional transmission facilities to deliver power to your service area. (ERA will not consider investment tax credits for oil or gas fired powerplants.)

I_o—Net capital outlay in dollars up to the time the exemption becomes effective.

I_1-I_n—Yearly new capital outlay from first year of the exemption through the remaining life of the plant.

OM—Annual cost in dollars of operating and maintaining the unit starting when the exemption becomes effective. May include expenditures for wheeling power to your service area.

S_p—Salvage value of equipment rendered unless by changing the fuel from oil or natural gas to alternate fuel in year p.

ACF—Annual capacity factor of the plant expressed as a fraction (see Section d).

O—Operations and maintenance in dollars per Kwh at the annual capacity factor ($/Kwh).

C—Design capacity of the plant in KW.

FL—Annual delivered fuel expenditures in dollars starting when the exemption becomes effective.

F—Delivered fuel expenditures to the plant expressed in dollars per Btu.

H—Heat input rate for the plant in Btu per KWH.

P—Year fuel is changed from oil or natural gas to alternate fuel.

K—The real cost of capital expressed as a fraction (see Section d).

N—The remaining useful life of the powerplant (see Section d).

8760—The number of hours in a year.

(6) Fuel transportation costs are part of delivered fuel expenditures except where you must acquire capital equipment to deliver the fuel. The capital outlays for this equipment are included in the capital outlay terms. The operations and maintenance costs of this equipment are included in the operations and maintenance terms. Similarly, the cost of delivering power to your service area should be included in the operations and maintenance costs unless you must construct transmission facilities in which case you may include these expenditures in the capital outlay term.

(7) The step by step procedure that follows shows the comparison that you must make. It outlines the equipment and fuel comparisons as well as the time comparisons. If you are using the test to demonstrate eligibility for a lack of alternate fuel supply exemption begin with step (i). If you are using the test to demonstrate that there is no alternate supply of power, use only steps (ii), (iv), (v) and (vi).

(i) Compute the cost (COST) of using an alternate fuel or alternate power supply with equation (2).

(ii) Compute the cost (COST) of using an alternate fuel with equation (2) assuming an alternate fuel is not used as the primary energy source until the end of the first year of the exemption and that oil or natural gas is used for the first year of the exemption. Capital investment, operating and maintenance and fuel expenditures should reflect postponed use of alternate fuel (e.g., installation of scrubber when used).

(iii) Successively compute the cost (COST) of using an alternate fuel with equation (2) assuming alternate fuel is postponed until the end of the second through tenth year of the exemption (and oil or natural gas is used in the years preceding alternate fuel use).

(iv) Compute the cost (COST) of using oil or natural gas with equation (2).

(v) If you are comparing the use of an alternate power supply with the use of imported petroleum, compute the ratio of the cost of using the alternate power supply to the cost of using oil or natural gas. Otherwise, compute the ratios (R) of the cost of using an alternate fuel at the beginning of the exemption, and successively at the end of the first through tenth year of the exemption to the cost of using oil or natural gas from the start of the exemption throughout the remaining useful life of the powerplant with equation (1).

(vi) If all the ratios (R) are greater than, for illustrative purposes, 1.5 (an index to be set periodically by ERA), your exemption would be granted. If one or more of the ratios (R) is equal to or less than 1.5 and a series of ratios (R), starting with the case where alternate fuel is used for the start of operation, are all greater than 1.5, a temporary exemption would be granted for the minimum period in which the cost of starting to use alternate fuel, deferred year by year, always exceeds 1.5.

(8) The following table shows the hypothetical results of four sets of calculations.

HYPOTHETICAL RESULTS OF FOUR SETS OF CALCULATIONS

Year in Which Alternate Fuel Use Commences	Case I	Case II	Case III	Case IV
At Start of Exemption	1.7	.17	1.7	1.3
1	1.7	.17	1.7	1.3
2	1.7	.17	1.7	1.3
3	1.4	.17	1.7	1.3
4	1.4	.17	1.4	1.3
5	1.4	.17	1.4	1.0
6	1.4	.17	1.2	1.0
7	1.4	.17	1.2	1.0
8	1.5	.17	1.2	1.0
9	1.6	.17	1.2	1.0
10	1.7	.17	1.2	1.0

The results of the above table shows that: a two year temporary exemption would be granted in Case I, a permanent exemption would be granted in Case II, a three year temporary exemption would be granted in case III, and no exemption would be granted in Case IV.

(c) *Cost calculations—special cost test.* (1) You may be eligible for a temporary exemption if you demonstrate that the cost of using an alternate fuel will substantially exceed the cost of using imported petroleum over the period of the proposed exemption. The period of the exemption cannot exceed ten years. You will have to show that the cost of using an alternate fuel substantially exceeds the cost of using imported petroleum for the first year of the exemption, the first two years of the exemption, and each successive year of the exemption, up to the period of the proposed exemption.

(2) The factors included in the computation are (i) the operations and maintenance and the delivered fuel expenditures incurred during the proposed exemption, and (ii) the capital outlays associated with the exemption.

(3) To conduct the test, you must use the equations that follow.

UMI

[6450-01-C]

$$\text{EQ 6} \quad R = \frac{\text{COST (ALTERNATE)}}{\text{COST (OIL)}}$$

(ii) Calculate the cost using equation 7

$$\text{EQ 7} \quad \text{Cost} = I + \frac{OM_1 + FL_1}{(1+k)^1} + \frac{OM_2 + FL_2}{(1+k)^2} + \ldots + \frac{OM_p + FL_p}{(1+k)^p} - \frac{Sp}{(1+k)^p}$$

(iii) Calculate investment (I), operations and maintenance (OM), and fuel (FL) for equation 7 using equations 8, 9, and 10.

$$\text{EQ 8} \quad I = I_o + \frac{I_1}{(1+k)^1} + \frac{I_2}{(1+k)^2} + \ldots + \frac{I_p}{(1+k)^p}$$

$$\text{EQ 9} \quad OM = 8760 \times ACF \times O \times C$$

$$\text{EQ 10} \quad FL = 8760 \times ACF \times C \times f \times H$$

[6450-01-M]

(4) The terms in equations 6 through 10 are defined as follows:

R—The ratio of the cost of using an alternate fuel to the cost of using imported petroleum.

COST—The total discounted cost in dollars, associated with the exemption, of constructing and operating the powerplant.

I—Discounted total net capital outlay in dollars excluding investment tax credits and "Advance in Aid of Construction" (as per FERC system of accounts) until the end of the proposed exemption. The investment in the basic powerplant (that which would be required if a change in the primary energy source where not being proposed) itself is not included in this comparison. (ERA will not consider investment tax credits for oil or gas fired powerplants.)

I_o—Net capital outlay in dollars up to the time the exemption is effective.

I_1—I_p—Yearly net capital outlay from the first year of this exemption until the change to alternate fuel.

OM—Annual Cost in Dollars of operating and maintaining the powerplant during the exemption.

S_p—Salvage value of equipment rendered useless by changing from oil or natural gas to alternate fuel in year, P.

ACF—Annual capacity factor of the powerplant expressed as a fraction (see Section d).

O—Operations and maintenance costs in dollars per kWh at the annual capacity factor ($/kWh).

C—Design capacity of the plant in kW.

FL—Annual delivered fuel expenditure in dollars during the exemption.

f—Delivered fuel expenditure to the plant expressed in dollars per Btu (see Section d).

H—Heat input rate for the plant in Btu per kWh.

K—The real cost of capital expressed as a fraction (see Section d).

P—The period of the proposed exemption.

8760—The number of hours in a year.

(5) The step by step procedure that follows shows the comparisons you must make.

(i) Compute the cost (COST) of using an alternate fuel assuming the length of the proposed exemption is one year with equation 7.

(ii) Compute the cost (COST) of using oil or natural gas valued at imported petroleum prices assuming the length of the proposed exemption is one year with equation 7.

(iii) Compute the ratio (R) of the cost of using an alternate fuel for the first year to the cost of using imported petroleum for the first year with equation 6.

(iv) Repeat the calculations made in (i), (ii), and (iii) above assuming the length of the proposed exemption is two years, three years, and so on, up to the period of the proposed exemption.

(v) A temporary exemption would be granted where one or more of the successive ratios (r) are greater than, for illustrative purposes, 1.5 (the index to be established by ERA).

(d) *Information on parameters used in the calculation.* (1) All estimated expenditures, except natural gas, and petroleum products, shall be expressed in real (uninflated) terms using the prices in effect at the time the petition is submitted.

(2) The delivered price of oil or natural gas to be used in the cost calculation must reflect the price of imported oil. The imported petroleum price is reflected in th cost calculation in the following way:

$$PFE = \frac{PICO}{PCCO} \times PF$$

where

PICO=Price of imported crude oil. The most recent refiner acquisition cost of imported crude oil as reported in the FEDERAL REGISTER monthly notice for the DOE Domestic Crude Oil Allocation (Entitlements) Program.

PCCO=Price of composite crude oil. The mnost recent weighted average cost of total reported crude oil receipts as reported in the FEDERAL REGISTER notice for the DOE Entitlements Programs.

PF=Price of your fuel. The most recent actual weighted average cost of your fuel oil (other than gas). Alternatively, if no purchases of fuel oil occurred, or you used natural gas during this month, you should use a simple average of the industrial price of fuel oil (capable of being burned in your facility) sold in your area by at least three suppliers. For proposed natural gas users, you shall use the price of No. 2 distillate fuel oil in this calculation.

PFE=Price of fuel for equation. The cost of oil for use in equation 1.

(3) For existing powerplants, the annual capacity factor shall be assumed to be the average capacity factor for the last five years or the life of the powerplant if the powerplant is less than five years old.

(4) The remaining useful life of a coal, nuclear, oil or natural gas fired powerplant will be 35 years minus the number of years of operation prior to the time effective date of the exemption. You may rebut this presumption with suitable engineering evidence.

(5) The cost of capital for electric utilities is 3.5 percent per year in real terms.

(b) All estimated expenditures will be computed in accordance with generally accepted accounted principles.

(e) *Evidence supporting the comparative cost test.* All petitions for exemption requiring the use of the comparative cost test shall include, but not be limited to, the following information:

(1) A detailed accounting of all capital outlays including a description of all major construction and equipment. All critical assumptions should be stated and sufficient data should be included to support your estimates.

(2) A detailed accounting of all operations and maintenance expenditures including a description of all major elements. All critical assumptions should be stated and sufficient data included to support your estimates.

(3) A detailed accounting of all delivered fuel expenditures including transportation. All critical assumptions should be stated and sufficient data included to support your estimates. The fuel characteristics for each alternate fuel should be included.

(4) If you assume that the remaining useful life of the existing powerplant is less than 35 years, minus the number of years of operation before the effective date of this exemption, all critical assumptions should be stated and sufficient data included to support that position.

(5) The powerplant design capacity and the heat input rate, for each fuel considered.

(f) *Example of calculations.* (1) You are considering converting a powerplant from oil to coal. In this particular situation, the delivered cost of coal is much greater for the first three years after the proposed conversion than it will be in later years because of a transportation problem. Do you qualify for an exemption? If so, is it permanent or temporary?

(2) To determine if you qualify for a permanent exemption, you would have to use the General Cost Test and compute the ratios of the cost to use 1) coal for the remaining useful life of the powerplant after the effective date of the exemption, 2) imported petroleum for the first year of the exemption and coal for the remainder of the useful life of the powerplant, 3) imported petroleum for the first two years of the exemption and coal for the remainder of the useful life of the powerplant * * *, and 11) imported petroleum for the first 10 years of the exemption and coal for the remainder of the useful life of the powerplant to the cost of using imported petroleum for the remaining useful life of the

V 44/20 JA 29 79 UMI

V 4 4 / 2 0 J A 2 9 7 9 UMI

powerplant after the effective date of the exemption.

(3) All eleven ratios would have to be higher than 1.5 (index to be established by ERA) to qualify for a permanent exemption. However, if a series of successive ratios, starting with the case where alternate fuel is used from the start of the exemption, are all greater than 1.5, you would be eligible for a temporary exemption up to the last year the ratio is greater than 1.5.

(4) In this example, we will only compute the ratios of (i) the cost to use coal for the remaining useful life of the powerplant after the effective date of the exemption and (ii) the cost of using imported petroleum for the first three years of the exemption and coal for the remainder of the useful life of the powerplant, to the cost of using imported petroleum for the remaining useful life of the powerplant, after the effective date of the exemption.

(5) To determine if you qualify for a temporary exemption if you have not already done so with the General Cost Test, you would have to use the Special Cost Test and compute the ratios of the cost to use coal in the powerplant to the cost of using imported petroleum in the powerplant for one, two, and three years after the effective date of the exemption. All three ratios would have to be higher than 1.5 in order to qualify for a three year temporary exemption. In this example, we will only compute the ratio of the cost of using coal to the cost of using imported petroleum for the first three years after the effective date of the exemption.

(6) *Parameters.* A set of hypothetical parameters are given below:

(i) Powerplant conversion to coal without changing capacity or remaining useful life.

Net capital outlay (without scrubber) to convert the powerplant to burn coal—$15,460,000.
Salvage value of equipment rendered useless by shifting from oil to coal—$3,860,000.
Net capital outlay for scrubber—$22,500,000.
Operations and maintenance costs per KWH to burn coal—$0.0025/KWH.

Existing oil burning powerplant.

Operations and maintenance cost per KWH—$0.0015/KWH.
Remaining useful life (after exemption becomes effective)—25 years.
Capacity—250,000 KW.

(iii) Fuel.

Delivered price of oil—$2.52/1,000,000 BTU.
Heat rate of oil—10,000 BTU/KWH.
Delivered price of coal for the first three years after the proposed exemption—$4.28/1,000,000 BTU.
Delivered price of coal for the fourth through twenty-fifth year after the proposed conversion—$1.35/1,000,000 BTU.
Heat rate for coal—10,000 BTU/KWH.

(7) *Analysis.* (i) The annual fuel and operations and maintenance expenditures are developed below.

Delivered coal expenditures for the first three years after the proposed conversion.

FL = 8760 × ACF × C × f × H = 8760 hr/yr × 0.7x 250,000 KW $4.28/1,000,000 BTU × 10,000 BTU/KWH = $65,610,000/yr.

Delivered coal expenditures for the fourth through twenty-fifth years after the proposed conversion.

FL = 8760 × ACF × C × f × H = 8760 hr/yr × 0.7 × 250,000 KW × $1.35/1,000,000 BTU × 10,000 BUT/KWH = $20,700,000/yr.

Delivered oil expenditures.

FL = 8760 × ACF × C × f × H = 8760 h/yr × 0.7x × 250,000 KW × $2.52/1,000,000 BTU × 10,000 BTU/KWH = $38,630,000/yr.

Operations and maintenance expenditures to burn coal.

OM = 8760 × ACF × O × C = 8760 h/yr × 0.7 × $0.0025/KWH × 250,000 KW = $3,833,000/yr.

Operations and maintenance expenditures to burn oil.

OM = 8760 × ACF × O × C = 8760 hr/yr × × 0.7 $0.0015/KWH × 250,000 KWH = $2,300,000.

(ii) *General cost test.* The relevant cash flows are shown in the following table for the three cases in which computations are being made.

CASH FLOWS FOR GENERAL COST TEST ($ IN THOUSANDS)

Type of cash flow	Year(s)	Case 1—Coal over remaining useful life of powerplant	Case 2—Imported petroleum for first 3 years and coal thereafter	Case 3—Imported petroleum over the remaining life of the powerplant
Investment	0	$15,460+$22,500	0	0
Investment	3	0	$22,500+$15,460	0
Salvage	0	$3,860	0	0
Salvage	3	0	$3,860	0
Operation and Maintenance	1, 2, 3	$3,833/yr.	$2,300/yr.	$2,300/yr.
Operation and Maintenance	4, —, 25	$3,833/yr.	$3,833/yr.	$2,300/yr.
Fuel	1, 2, 3	$65,610	$38,630/yr.	$38,630/yr.
Fuel	4, —, 25	$20,700/yr.	$20,700/yr.	$38,630/yr.

[6450-01-C]

The following computations are in thousands of dollars.

Case 1. Cost of using coal over the remaining useful life of the powerplant from the start of the exemption.

$$I = I_o + \frac{I_1}{(1+K)^1} + \frac{I_2}{(1+K)^2} + \ldots + \frac{I_N}{(1+K)^N},$$

$$= (15{,}460 + 22{,}500) + \frac{0}{(1.035)^1} + \frac{0}{(1.035)^1} + \ldots + \frac{0}{(1.035)^{25}}$$

$$= 37{,}960$$

$$COST = I + \frac{OM_1 + FL_1}{(1+K)^1} + \frac{OM_2 + FL_2}{(1+K)^2} + \ldots + \frac{OM_N + FL_N}{(1+K)^N} - \frac{S_p}{(1+K)^p}$$

$$= 37{,}960 + \frac{3{,}833 + 65{,}610}{(1.035)^1} + \frac{3{,}833 + 65{,}610}{(1.035)^2} + \frac{3{,}833 + 65{,}610}{(1.035)^3} + \frac{3{,}833 + 20{,}700}{(1.035)^4} + \ldots + \frac{3{,}833 + 20{,}700}{(1.035)^{25}} - \frac{3860}{(1.035)^0}$$

$$564{,}300$$

V 4 4 / 2 0

Case 2. Cost of using imported petroleum for the first three years of the exemption and coal thereafter.

$$I = \underset{0}{I} + \frac{\underset{1}{I}}{(1+K)^1} + \frac{\underset{2}{I}}{(1+K)^2} + \ldots + \frac{\underset{N}{I}}{(1+K)^N}$$

$$= 0 + \frac{(22,500 + 15,460)}{(1.035)^3}$$

$$+ \$34,240$$

$$COST = I + \frac{\underset{1}{OM} + \underset{1}{FL}}{(1+K)^1} + \frac{\underset{2}{OM} + \underset{2}{FL}}{(1+K)^2} + \ldots + \frac{\underset{N}{OM} + \underset{N}{FL}}{(1+K)^N} - \frac{\underset{p}{S}}{(1+K)^p}$$

$$= 34,240 + \frac{2,300 + 38,630}{(1,035)^1} + \frac{2,300 + 38,630}{(1,035)^2} + \frac{2,300 + 38,630}{(1,035)^3}$$

$$+ \frac{3,833 + 20,700}{(1.035)^4} + \ldots + \frac{3,833 + 20,700}{(1.035)^{25}} - \frac{3,860}{(1.035)^3}$$

$$= 481,000$$

Case 3. Cost of using imported petroleum over the remaining life of the powerplant starting with the effective date of the exemption.

$$I = \underset{0}{I} + \frac{\underset{1}{I}}{(1+K)^1} + \frac{\underset{2}{I}}{(1+K)^2} + \ldots + \frac{\underset{N}{I}}{(1+K)^N}$$

$$= 0 + \frac{0}{(1.035)^1} + \frac{0}{(1.035)^2} + \ldots + \frac{0}{(1.035)^{25}}$$

$$= 0$$

$$COST = I + \frac{\underset{1}{OM} + \underset{1}{FL}}{(1+K)^1} + \frac{\underset{2}{OM} + \underset{2}{FL}}{(1+K)^2} + \ldots +$$

$$+ \frac{\underset{N}{OM} + \underset{N}{FL}}{(1+K)^N} - \frac{\underset{p}{S}}{(1+K)^p}$$

$$= 0 + \frac{2,300 + 38,630}{(1.035)^1} + \frac{2,300 + 38,630}{(1.035)^2} + \ldots + \frac{2,300 + 38,630 + 0}{(1.035)^{25}}$$

$$= 674,600$$

Computation of ratios.

$$R = \frac{COST\ (COAL\ \text{throughout remaining life})}{COST\ (OIL)}$$

$$= \frac{564,300}{674,600} = 0.84$$

$$R = \frac{COST\ (OIL\ \text{first three years, coal thereafter})}{COST\ (OIL)}$$

$$= \frac{481,000}{674,600} = 0.91$$

JA 29 79 UMI

Conclusion. Since the ratios are less than 1.5, you would not qualify for a permanent or temporary exemption, using the general cost test.

(iii) *Special cost test.* The relevant cash flows are shown in the following table for the two cases in which computations are being made.

The following computations are in tnousands of dollars.

Case 1. Cost of using coal from the start of the exemption

$$I = I_o + \frac{I_1}{(1+K)^1} + \frac{I_2}{(1+K)^2} + \cdots \frac{I_p}{(1+K)^p}$$

$$= (15,460 + 22,500) + \frac{0}{(1.035)^1} + \frac{0}{(1.035)^2} \cdots + \frac{0}{(1.035)^3}$$

$$= 37,960$$

$$COST = I + \frac{OM_1 + FL_1}{(1+K)^1} + \frac{OM_2 + FL_2}{(1+K)^2} + \cdots + \frac{OM_p + FL_p}{(1+K)^p} - \frac{S_p}{(1+K)^p}$$

$$= + \frac{3,833 + 65,610}{(1.035)^1} + \frac{3,833 + 65,610}{(1.035)^2} + \frac{3,833 + 65,610}{(1.035)^3} - \frac{3,860}{(1.035)^0}$$

$$= 228,652$$

Case 2. Cost of using imported petroleum for the first three years of the exemption (and coal thereafter)

$$I = I_o + \frac{I_1}{(1+K)^1} + \frac{I_2}{(1+K)^2} + \cdots + \frac{I_p}{(1+K)^n}$$

$$= 0 + \frac{(22,500 + 15,460)}{(1.035)^3}$$

$$= 34,240$$

$$COST = I + \frac{OM_1 + FL_1}{(1+K)^1} + \frac{OM_2 + FL_2}{(1+K)^2} + \cdots + \frac{OM_p + FL_p}{(1+K)^p} - \frac{Sp}{(1+K)^p}$$

$$= 34,240 + \frac{2,300 + 38,630}{(1.035)^1} + \frac{2,300 + 38,630}{(1.035)^2} + \frac{2,300 + 38,630}{(1.035)^3} - \frac{3860}{(1.035)^3}$$

$$= 145,400$$

Computation of ratio.

$$R = \frac{\text{COST (COAL FOR PERIOD OF EXEMPTION)}}{\text{COST (OIL FOR PERIOD OF EXEMPTION)}}$$

$$= \frac{228,652}{145,400} = 1.57$$

Conclusion. If ERA had set the index at 1.5, you would be granted a temporary exemption.

V 4 4 / 2 0 J A 2 9 7 9 UMI

V 4 4 / 2 0 J A 2 9 7 9 UMI

[6450-01-M]

CASH FLOW FOR SPECIAL COST TEST (IN THOUSANDS)

Type of Cash Flow	Year(s)	Case 1.—Coal Over Remaining Useful Life of Powerplant	Case 2.—Petroleum for First 3 Yrs and Coal Thereafter
Investment	0	$15,460+$22,500	0
Investment	3	0	$22,500+15,460
Salvage	0	$3,860	0
Salvage	3	0	$3,860
Operation and Maintenance	1, 2, 3	$3,833/yr.	$2,300/yr
Fuel	1, 2, 3	$65,610/yr.	$38,630/yr.

§ 504.13 No alternative power supply—General requirement for permanent exemptions.

(a) *Application.* Section 312 of the Act provides for a permanent exemption for State or local requirements and intermediate load. To qualify for one of these exemptions, you must demonstrate to the satisfaction of ERA that despite diligent good faith efforts, there is no alternative supply of electric power which is available within a reasonable distance at a reasonable cost without impairing short-run or long-run reliability of service which you could obtain. You must demonstrate to the satisfaction of ERA all of the following.

(1) You cannot purchase electricity from another utility at a cost which does not substantially exceed the cost of your existing plant using imported petroleum. You may include transmission costs to your service area in your cost calculation. ERA will consider any source of electricity which does not substantially exceed the cost of your existing plant using imported petroleum to be within a reasonable distance and at a reasonable cost. (For this subpart the cost factor will be the same as that used in the cost calculation.)

(2) You cannot construct and operate an alternate fuel fired plant either within or outside your service at a cost which does not substantially exceed the cost of using imported petroleum. See § 504.12 for instructions on calculations of cost. You may include transmission costs for power delivery to your service area.

(3) You cannot purchase electricity and construct and operate and alternate fuel fired plant at a cost which does not substantially exceed the cost of your existing plant using imported petroleum. ERA will consider any combination of purchased electricity and alternate fuel fired plant that costs less than 1.5 times the cost of your existing plant using imported petroleum to be at a reasonable cost. (For this subpart the cost factor will be the same as that used in the cost calculation.)

(4) You cannot meet load requirements with existing facilities by improving the performance of existing facilities, employing system conservation measures, assisting end use customers to conserve electricity, and implementing load management techniques.

(b) *Evidence.* You must provide the following substantial evidence to corroborate the above requirements:

(1) A detailed description of your methodology to calculate the cost of purchased electricity and the cost for your existing plant as required in paragraph (a)(1) of this section;

(2) A detailed description of your methodology to calculate the cost for purchased electricity and an alternate fuel fired plant, and your proposed plant as required in paragraph (a)(3) of this section;

(3) Identification and explanation of all figures used in your calculations supporting paragraphs (a)(1) and (a)(3) of this section;

(4) A description of your efforts to purchase electricity;

(5) All data required by § 504.12 (Cost Calculation) supporting paragraph (a)(2) of this section;

(6) A detailed description of each of the methods you considered as required by paragraph (a)(4) of this section together with an estimate of the cost of implementing each of their methods; and

(7) An estimate of the kilowatt hour saving or additional kilowatt hour potential, as applicable, for each of the methods you considered as required by paragraph (a)(4) of this section.

§ 504.14. Use of mixtures—General requirement for temporary exemptions.

(a) ERA will not consider a petition for any temporary exemption under Section 311 of the Act to be complete, adequate, or acceptable for filing unless you demonstrate to the satisfaction of ERA in your Fuels Decision Report whether or not the use of a mixture of natural gas or petroleum and an adequate fuel is economically and technically feasible during the period of the proposed exemption.

(b) If ERA determines that use of a particular fuel mixture is technically or economically feasible during the period of the proposed exemption, ERA will condition the granting of any temporary exemption under this Part upon the use of that mixture during the period of the temporary exemption.

§ 504.15 Use of mixtures—General requirement for permanent exemptions.

(a) *Application.* ERA will not consider a petition for any of the following exemptions provided for in Section 312 of the Act (lack of alternate fuel supply, site limitations, environmental requirements, State or local requirements, cogeneration, emergency purposes, intermediate load or use of natural gas in small powerplants) to be complete, adequate, or acceptable for filing unless you demonstrate to the satisfaction of ERA in your Fuels Decision Report that you have considered the use of a mixture(s) for which an exemption under § 504.36 (Fuel Mixtures) of these regulations would be available.

(b) *Demonstration.* EPA will not grant any of the exemptions listed in paragraph (a) of this section unless you demonstrate that use of such a mixture(s) is not economically or technically feasible in the unit for which you are requesting an exemption. To make such a demonstration you must show in your Fuels Decision Report to the satisfaction of ERA that:

(1) If use of a mixture(s) were requirecd, you would be eligible for one of the following permanent exemptions provided for in the Act: lack of alternate fuel supply, site limitations, environmental requirements, or State or local requirements; or

(2) The use of a mixture(s) is not technically or econmically feasible in your specific unit due to design or special circumstances as determined by ERA on a case-by-case basis.

§ 504.16 Use of fluidized bed combustion not feasible—General requirement for permanent exemptions.

(a) *Application.* ERA will not consider a petition for one of the following exemptions provided for in Section 312 of the Act (lack of alternate fuel supply, site limitations, environmental requirements, cogeneration, emergency purposes, intermediate load or use of natural gas in small powerplants) to be complete, adequate or acceptable for filing unless you demonstrate to the satisfaction of ERA in your Fuels Decision Report that you have considered the use of a method of fluidized bed combustion of an alternate fuel.

(b) *Finding.* If ERA determines, on a generic basis, that use of a method of fluidized bed combustion is technically and economically feasible, ERA will deny your request for exemption unless you demonstrate to the satisfaction of ERA that:

(1) If use of a method of fluidized bed combustion were required, you would be eligible for one of the following permanent exemptions provided for in Section 312 of the Act: lack of alternate fuel supply, site limitations, environmental requirements, or State or local requirements; or

(2) The use of a method of fluidized bed combustion is not technically or economically feasible in your specific unit due to design or special circumstances as determined by ERA on a case-by-case basis.

§ 504.17 Terms and conditions; compliance plans.

(a) *Terms and conditions generally.* You must comply with the terms and conditions of an exemption granted under the Act by the ERA, including terms and conditions requiring the use of (1) effective fuel conservation measures, and (2) fuel mixtures.

(b) *Compliance plans for temporary exemptions.* (1) A compliance plan certified by the Chief Executive Officer shall accompany a petition for a temporary exemption. The compliance plan shall include at least the following:

(i) A detailed schedule of progressive events and the dates upon which the events are to take place indicating how compliance with the applicable prohibitions of the Act will occur;

(ii) Documentary evidence of binding contracts for fuel or facilities for the production of fuel which would allow for compliance with the applicable prohibitions of the Act;

(iii) Any other documentary evidence which indicates an intention to comply with the applicable prohibitions of the Act; and

(iv) A detailed statement of the manner in which you intend to comply with § 504.14 of these regulations requiring the use of fuel mixtures as a condition to the granting of a temporary exemption where the use of fuel mixtures is technically and economically feasible.

(2) The exemption shall not be effective until the compliance plan is approved by ERA.

(3) *Revisions of compliance plans.* If the petition is granted, you must submit to ERA an updated compliance plan certified by your Chief Executive Officer:

(i) At the end of each 12 month period from the effective date of the exemption;

(ii) Within one month of an alteration of any milestone in the compliance plan, together with the reasons for the alteration and its impact upon the scheduling of all other milestones in the plan; and

(iii) At any time the ERA, in its discretion, determines that a revised compliance plan is necessary to reflect changes in circumstances.

(c) *Enforcement.* An exemption is subject to termination upon the violation of any provision of an exemption or any provision of the pertinent compliance plan.

Subpart D—Temporary Exemptions for Existing Electric Powerplants

§ 504.20 Purpose and scope.

(a) This subpart implements the provisions contained in Section 311 of the Act with regard to temporary exemptions for existing powerplants.

(b) This subpart establishes the criteria and standards which owners or operators of existing powerplants who petition for a temporary exemption must meet to sustain their burden of proof under the Act.

(c) You shall submit all petitions for temporary exemptions for existing powerplants in accordance with the procedures set out in Part 501 of these regulations.

(d) The duration of any temporary exemption granted under this subpart shall be measured from the date that the applicable prohibition would just apply if the exemption had not been granted.

§ 504.21 Lack of alternate fuel supply.

(a) *Eligibility.* Section 311(a)(1) of the Act provides for a temporary exemption due to lack of an alternate fuel supply. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You made a good faith effort to obtain an adequate and reliable supply of an alternate fuel of the quality necessary to conform to th design and operational requirements of the existing powerplant;

(2) For the period of the proposed exemption, the cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source as defined in § 504.12 (cost calculation) of these regulations; and

(3) You will be able to comply with the applicable prohibitions at the end of the proposed exemption period.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A description of the approach and methodology you used to search for and evaluate the use of the alternate fuels you considered;

(2) A description of the detailed design requirements for the existing powerplant (as specified by the purchaser), including capacity, alternate fuel capability, and all other specifications;

(3) A description of the specific fuel characteristics of all the fuels which can be used by the existing powerplant;

(4) Evidence that you sought to obtain the full range of alternate fuels and fuel characteristics which could be used by the existing powerplant, including bid requests, and/or advertisements for supply contracts and all responses thereto, as well as evidence of any other arrangements you attempted to make to secure supplies;

(5) Evidence of the contracts or other arrangements you have made to insure a reliable and adequate supply of an alternate fuel at the end of the proposed exemption; and

(6) All data required by § 504.12 (Cost Calculation) of these regulations necessary for computing the cost calculation formula.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 504.17 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You must submit an updated compliance plan as required by § 504.17 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account any extensions or renewals, may not exceed ten years.

§ 504.22 Site limitations.

(a) *Eligibility.* Section 311(a)(2) of the Act provides for a temporary exemption due to a site limitation. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA, that one or more of the following specific physical limitations relevant to the operation of your powerplant exist which, despite your diligent good faith, cannot be overcome before the end of the proposed exemption period:

(1) Alternate fuels would be inaccessible;

(2) Transportation facilities for alternate fuels would be unavailable;

(3) Adequate facilities for handling, using or storing an alternate fuel would be unavailable;

V 4 4 / 2 0 JA 29 79 UMI

(4) Adequate means for controlling and disposing of wastes would be unavailable;

(5) Adequate and reliable supply of water would be unavailable; or

(6) Other site limitations exist which would not permit the operation of the existing powerplant using an alternate fuel.

(b) *Evidence to be submitted in support of the petition.* To submit an adequate petition for review by ERA, you must include in your petition the following substantial evidence to corroborate the above criteria:

(1) Evidence that the site limitation is a physical limitation, and not a requirement of Federal, state, or local law which could be the basis of an exemption under § 504.34 (State or local requirements);

(2) Evidence that alternative means for overcoming the specific site limitations were considered, with a detailed description of the efforts made to overcome the site limitations set out in your petition;

(3) Evidence of the equipment or space requirements for which the site limitation is claimed; and

(4) Evidence of contracts or other arrangements you have made to insure that the site limitation will be overcome and that you will comply with the applicable prohibitions at the end of the proposed exemption period. Examples of evidence relevant to establishing a site limitation for purposes of a temporary exemption are as follows:

(i) Detailed documentation of impediments, including rights of way problems, site diagrams, maps of the surrounding areas and other items essential to the showing of a site limitation;

(ii) Identification of transportation facilities relevant to the specific site of the powerplant and demonstration why existing transportation facilities cannot be utilized or new facilities constructed;

(iii) Copies of bid requests, and advertisements, and other evidence of general efforts made to secure alternative transportation facilities;

(iv) Identification of potential alternate fuel storage locations within a reasonable geographic area surrounding the powerplant;

(v) Detailed scale site plans of the entire facility which include those areas not directly involved with the specific powerplant;

(vi) A specific listing of all equipment necessary and not currently available to properly handle alternate fuels;

(vii) Copies of bid requests, and advertisements and other evidence of general efforts made to secure alternative fuel storage facilities;

(viii) Copies of quotes from bona fide suppliers, indicating lead times for purchase and installation of required ancillary storage of handling equipment;

(ix) Specific listing of any equipment necessary and not currently available to properly control and dispose of waste;

(x) Identification of potential alternate waste disposal locations within a reasonable geographic area surrounding the powerplant;

(xi) A description of efforts made to secure offsite disposal areas, including the cost of acquisition of the sites, transportation facilities and waste handling costs involved in their use; and

(xii) Copies of bid requests, and advertisements, and other evidence of general efforts made to secure waste control and disposal equipment.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 504.17 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You must submit an updated compliance plan as required by § 504.17 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account any extensions or renewals, may not exceed five years.

§ 504.23 Inability to comply with applicable environmental requirements.

(a) *Eligibility.* Section 311(a)(3) of the Act provides for a temporary exemption due to an inability to comply with applicable environmental requirements. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that despite diligent good faith efforts:

(1) You are unable to comply immediately with the applicable prohibitions imposed by the Act or orders by ERA without violating applicable Federal or State environmental requirements;

(2) You will be able to comply with the applicable prohibitions imposed by the Act or ERA orders by the end of the temporary exemption period.

(b) *Evidence required in support of the petition.* To submit an adequate petition for review by ERA, you must provide in your petition the following substantial evidence to corroborate the above requirements:

(1) A detailed explanation why the facility cannot burn an alternate fuel or comply with the prohibitions of the Act without violating applicable environmental requirements;

(2) Copies of all technical studies that you have relied upon with regard to consideration of alternate fuels, pollution control equipment; variances, State Implementation Plan revisions, and delayed compliance orders;

(3) Copies of requests for bids, all responses received, and contracts signed, if any, for an alternate fuel supply and for the purchase and installation of pollution control equipment; and

(4) Copies of correspondence with the State or EPA concerning variances, State Implementation Plan revisions, delayed compliance orders, solid waste permits or approvals, or modifications to National Pollution Discharge Elimination System (NPDES) permits.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 504.17 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You must submit an updated compliance plan as required by § 504.17 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account extensions or renewals, may not exceed 5 years.

§ 504.24 Future use of synthetic fuels.

(a) *Eligibility.* Section 311(b) of the Act provides for a temporary exemption based upon the future use of synthetic fuels. ERA shall grant you such exemption if you demonstrate to the satisfaction of ERA that:

(1) You will be able to comply with the applicable prohibitions, rule or order by the end of the proposed exemption period by the use of synthetic fuel as a primary energy source in your powerplant;

(2) Your will not be capable of complying with the applicable prohibitions by using an alternate fuel in your powerplant before the end of the proposed exemption period.

(b) *Evidence required in support of a petition.* To submit an adequate petition of review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) Copies of economic and technical feasibility studies pertaining to the adoption of an innovative technology for use of an alternate fuel in your powerplant;

(2) A complete description of the innovative technology you propose to use including explanation of its innovative characteristics, detailed engineering and design specifications, and a description of the specific fuel characteristics of the alternate fuel(s) which can be used with the innovative technology;

(3) Reliable evidence of the financial and contractual commitments you have made to construct or modify, operate and maintain equipment which represents an innovative technology for use of an alternate fuel

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 504.17 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You shall submit an updated compliance plan as required by § 504.17 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption may be granted for a period of up to five years and may be extended for an additional five years, but so extended may not exceed 10 years.

§ 504.25 Use of innovative technologies.

(a) *Eligibility.* Section 311(c) of the Act provides for a temporary exemption based upon the use of innovative technologies. ERA shall grant you an exemption if you demonstrate to the satisfaction of ERA that:

(1) You will be able to comply with the applicable prohibitions, rule or order at the end of the proposed exemption period by adoption of a technology for the use of an alternate fuel which ERA has determined to be an innovative technology.

(2) You will not be capable of complying with the applicable prohibitions by using an alternate fuel in your powerplant before the end of the proposed exemption period.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) Copies of economic and technical feasibility studies pertaining to the adoption of an innovative technology for use of an alternate fuel in your powerplant;

(2) A complete description of the innovative technology you propose to use including explanation of its innovative characteristics, detailed Engineering and design specifications, and a description of the specific fuel characteristics of the alternate fuel(s) which can be used with the innovative technology;

(3) Reliable evidence of the financial and contractual commitments you have made to construct or modify, operate and maintain equipment which represents an innovative technology for use of an alternate fuel and which will be used at the end of the proposed exemption period; and

(4) Copies of bid requests, advertisements, contracts and/or other agreements you have made to insure a reliable and adequate supply of an alternate fuel at the end of the proposed exemption;

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 504.17 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You shall submit an updated compliance plan as required by § 504.17 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption may be granted for a period of up to 5 years and may be extended for an additional 5 years, but so extended may not exceed 10 years.

§ 504.26 Powerplants: public interest exemption.

(a) *Eligibility.* Section 311(e) of the Act provides for a temporary public interest exemption. ERA may grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You are unable to comply with the applicable prohibitions imposed by the Act, or order or rule issued by DOE, except in extraordinary circumstances, during the period for which the exemption is requested, but that you will be capable of complying at the end of the proposed exemption period;

(2) You are not eligible for a temporary exemption based on lack of alternate fuel supply, site limitations, environmental requirements, synthetic fuels, innovative technologies, retirement, peakload, or reliability of service;

(3) The granting of the petition is in accord with the purposes of the Act and is in public interest.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must include in your petition substantial evidence to corroborate the above requirements.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 504.17 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You must submit an updated compliance plan as required by § 504.17 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account extensions or renewals, may not exceed 5 years.

(e) *Special rule for temporary public interest exemption.* Part 508 provides criteria and expedited procedures for you to petition for a temporary public interest exemption from the prohibitions against the use of natural gas contained in section 301(a) (2) and (3) of the Act if you own or operate an existing powerplant which is using a middle distillate as a primary energy source.

§ 504.27 Retirement.

(a) *Eligibility.* Section 311(d) of the Act provides for a temporary exemption for retirement. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) The powerplant will be retired at or before the expiration of this temporary exemption;

(2) You will not be capable of complying with the application prohibitions contained in Title III, Subtitle A of FUA by consuming alternate fuels before retirement of the powerplant.

(b) *Evidence required in support of the petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A detailed engineering analysis explaining why the powerplant cannot use alternate fuels prior to retirement;

(2) Copies of FPC form No. 12 including Schedules A & B, filed by the operating utility during the previous two years;

(3) Copies of reports filed by the operating utility during the two years preceding the petition with its Reliability Council detailing 10 year projections of changes in generating capacity. (These reports are required by FPC Form No. 383-4.);

(4) Any state PUC permits necessary for the retirement of a powerplant; and

(5) Any other documentary evidence which indicates the reasons for retirement and plans for replacement or substitution of the retired powerplant.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You shall submit an updated compliance plan as required by § 504.17 (except § 504.17 (b)(1)(ii)) of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account extensions or renewals, may not exceed 5 years.

(e) *Restriction.* In the event this exemption is granted you will not be eligible for any other exemption under Title III, Subtitle B of the Act.

V 4 4 / 2 0 J A 2 9 7 9 J UMI

§ 504.28 Temporary exemption for powerplants necessary to maintain reliability of service.

(a) *Eligibility.* (1) Section 311(g) of the Act provides for a temporary exemption to maintain reliability of service. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that you are not capable of complying with the applicable prohibitions imposed by the Act or by ERA order without an impairment of reliability of service as measured by the loss of load probability technique described in paragraphs (a)(2) and (a)(3) of this section.

(2) You must calculate reliability of service utilizing the loss of load probability (LOLP) technique. The LOLP must be computed for your electric region for the period of time the plant is unavailable for operation or available at a reduced capacity. It is to be calculated as the sum of either the weekly or the monthly estimates of hourly load/capacity deficits. You may decide whether to perform the calculation using weekly or monthly data. The LOLP calculation must take into consideration equipment forced outage rates, projected customer electrical demand, and generating capacity projections for the electric region, including existing generating capacity, planned generating capacity additions and projected firm bulk electrical purchases and sales, and projected retirements. If necessary, you may also calculate LOLP with modifications to account for transmission constraints, energy shortages, and other factors that are not adequately addressed by adhering to the foregoing specifications.

(3) Reliability of service is impaired if the LOLP at the time the plant is out of service or operates at reduced capacity, including all available emergency reliability connections and other bulk power ties, is greater than one day in five years.

(b) *Evidence supporting the petition.* To submit an adequate petition for review by ERA you must provide the following substantial evidence to corroborate the above requirements:

(1) All data you used in determining the loss of load probability;

(2) An explanation including equations of how you are calculating the loss of load probability; and

(3) A showing that modifications to the plant could not have been scheduled at a different time so that reliability would not be impaired.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 504.17 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You must submit an updated compliance plan as required by § 504.17 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account extensions or renewals, may not exceed ten years, or extend beyond December 31, 1994, in the case of natural gas whichever comes first.

§ 504.29 Peakload powerplants.

(a) *Eligibility.* (1) Section 311(f) of the Act provides for a temporary exemption for peakload powerplants. ERA shall grant you such an exemption if you certify to ERA that the powerplant will be operated solely as a peakload powerplant for the period of the exemption.

(2) Your powerplant is operated solely as a peakload powerplant if the electrical generation of the powerplant in kilowatt hours does not exceed, for any 12-calendar-month period, the powerplant's design capacity multiplied by 1,500 hours.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA your petition must be accompanied by a sworn statement signed by the Chief Executive Officer of the electric utility which will operate the powerplant certifying that the powerplant is to be operated solely as a peakload powerplant. The certification must set forth the design capacity of the powerplant and the maximum allowable generation of the powerplant in kilowatt hours according to the definition of peakload for each 12 months of operation as a peakload powerplant.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 504.17 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You shall submit an updated compliance plan as required by § 504.17 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Liability for operating in excess of exemption.* The operation of a peakload powerplant which has been granted this exemption in excess of that allowed by the exemption shall be subject to penalties under Title VII, Subtitle C of the Act unless the powerplant meets the criteria set forth in section 721(c) of the Act.

(e) *Duration.* This temporary exemption, taking into account extensions or renewals, may not exceed 5 years or in the case of natural gas extend beyond December 31, 1994 whichever comes first.

(f) *Reporting requirement.* If the petition is granted, you must report to ERA, at the end of each 12-month period from the first day of the month following the effective date of the exemption and, if applicable, upon reaching the maximum number of hours of permitted operation within each 12-month period, the name, location, and design capacity of the exempted unit, the number of hours of operation permitted by the exemption, and the number of hours of actual operation.

Subpart E—Permanent Exemptions for Existing Electric Powerplants.

§ 504.30 Purpose and scope.

(a) This subpart implements the provisions contained in Section 312 of the Act with regard to permanent exemptions for existing electric powerplants.

(b) This subpart establishes the criteria and standards which owners or operators of existing powerplants that petition for a permanent exemption must meet to sustain their burden of proof under the Act.

(c) You must submit all petitions for permanent exemptions for existing powerplants in accordance with the procedures set out in Part 501 of these regulations.

§ 504.31 Lack of alternate fuel supply.

(a) *Eligibility.* Section 312(a)(1)(A) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You made a good faith effort to obtain an adequate and reliable supply of an alternate fuel of the quality necessary to conform to design and operational requirements of the existing powerplant; and

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the remaining useful life of the existing powerplant as defined in § 504.12 (Cost Calculation) of these regulations.

(b) *Evidence in support of a petition.* To submit an adequate petition for review by ERA, you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A detailed description of the design requirements for the existing powerplant (as specified by the purchaser), including capacity, alternate fuels capability, and all other pertinent specifications;

(2) A description of the spcific fuel characteristics of all the fuels which can be used by the existing powerplant;

(3) Evidence that you sought the full range of alternate fuels and fuel characteristics which could be used by the existing powerplant, including bid requests and/or advertisements for supply contracts, all proposals and responses thereto, as well as evidence of any other arrangements you attempted to make to secure supplies;

(4) All data required by § 504.12 of these regulations (Cost Calculation) necessary for computing the cost calculation formula; and

(5) A description of the approach and methodoloy you used to search for and evaluate the use of the alternate fuels you considered.

§ 504.32 Site limitations

(a) *Eligibility.* Section 312(a)(1)(B) of the Act provides for a permanent exemption due to a site limitation. ERA shall grant you such an exemption if you demonstrate to the satisfacton of ERA that, despite food faith efforts:

(1) Alternate fuels are inaccessible as a result of a specific physical limitation to the operation of the existing powerplant;

(2) Transportation facilities for alternate fuels would be unavailable;

(3) Adequate facilities for handling, using or storing alternate fuels would be unavailable;

(4) Adequate means for controlling and disposing of wastes would be unavailable;

(5) Adequate and reliable supply of water would be unavailable; or

(6) Other site limitations exist which would not permit the operation of the existing powerplant using an alternate fuel, and these limitations cannot be resonably expected to be overcome within five years after effective date of the prohibition.

(b) *Evidence to be submitted in support of the petition.* To submit an adequate petition for review by ERA, you must include in your petition the following substantial evidence to corroborate the above criteria.

(1) Evidence that the site limitation is a physical limitation, and not a requirement of Federal, State, or local law which could be the basis of an exemption under § 504.34 (State or local requirements);

(2) Evidence that alternative means for overcoming the specific site limitations were sought, with a detailed description of the efforts made to overcome the site limitations set out in your petition; and

(3) Evidence of the equipment or space requirments for which the site limitation is claimed. Examples of evidence relevant to establishing a site limitation for purposes of a permanent exemption are as follows:

(i) Detailed documentation of impediments, including rights of way problems, site diagrams, maps of the surrounding areas and other items essential to the showing of a site limitation;

(ii) Identification of transportation facilities relevant to the geographic site of the powerplant and demonstration why existing transportation facilities cannot be utilized or new facilities constructed;

(iii) Copies of bid requests, advertisements and evidence of general efforts made to secure alternative transportation facilities;

(iv) Identification of potential alternate fuel storage locations within a reasonable geographic surrounding the powerplant;

(v) Detailed scale site plans of the entire facility which include those areas not directly involved with the specific powerplant;

(vi) A specific listing of all equipmpent necessary and not currently available to properly handle alternate fuels;

(vii) Copies of bid requests, and advertisements and evidence of general efforts made to secure alternative fuel storage facilities;

(viii) Copies of quotes from bona fide supplier, indication lead times for purchase and installation or required ancillary storage or handling equipment;

(ix) Specific listing of any equipment necessary and not currently available to properly control and dispose of waste;

(x) Identification of potential alternate waste disposal locations within a reasonable geographic area surrounding the powerplant;

(xi) A description of efforts made to secure off-site disposal area, including the cost of acquisition of the sites, transportation facilities and waste handling costs involved in their use; and

(xii) Copies of bid requests, advertisements, and general efforts made to secure waste control and disposal equipment.

§ 504.33 Inability to comply with applicable environmental requirements.

(a) *Eligibility.* Section 312(a)(1)(C) of the Act provides for a permanent exemption due to the inability to comply with the applicable environmental requirements. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that, despite good faith efforts you cannot burn alternate fuels without violating applicable environmental requirements within five years after the effective date of the prohibition.

(b) *Evidence supporting petition.* To submit an adequate petition for review by ERA, you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A detailed explanation why the facility cannot comply with the prohibitions of the Act within five (5) years without violating applicable environmental requirements;

(2) Copies of all technical studies that you have relied upon with regard to consideration of alternate fuels, pollution control equipment, variances, State Implementation Plan revisions, and delayed compliance orders;

(3) Copies of requests for bids, all responses received, and contracts signed, if any, for an alternate fuel supply and for the purchase and installation of pollution control equipment; and

(4) Copies of correspondence with the State or EPA concerning variances, State Implementation Plan revisions, delayed compliance orders, soiid waste permits or approvals, or modifications to NPDES permits.

(c) *Prepetition actions.* It is recommended that you request a meeting with ERA and EPA or the appropriate State regulatory agency to discuss options for complying with the prohibitions.

§ 504.34 State or local requirements.

(a) *Eligibility.* Section 312(b) of the Act provides for a permanent exemption due to certain State or local requirements. ERA may grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) With respect to the site of the powerplant, the operation of the existing powerplant using an alternate fuel is infeasible because of a state or local requirement;

(2) If such state or local requirement is under a building code or nuisance or zoning law, no other exemption under Title III, Subtitle B of the Act could be granted;

(3) You have, in good faith, attempted unsuccessfully to obtain a waiver or variance from the state or local requirement or have demonstrated why none is available; and

(4) The granting of the exemption would be in the public interest and would be consistent with the purposes of this Act.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA, you must provide the following substantial evidence to corroborate the above requirements:

(1) A copy of the pertinent state or local requirement with its citation and its legislative history;

(2) The identification and location of the administrative body which implements the requirement;

(3) A description of your attempts to obtain a waiver or a variance from the requirement;

(4) A description of any activities you were involved in pertaining to the enactment of the requirement;

(5) A description of equipment, procedures, advance planning time and

V 4 4 / 2 0

costs necessary to comply with the requirement;

(6) A detailed description of why compliance is infeasible;

(7) The impact upon you and/or your local community, if any, should this petition be denied;

(8) An explanation of the reasons why granting this exemption would be in the public interest; and,

(9) An analysis of why you cannot qualify for an exemption under Subtitle B if such state or local requirement is under a building code or nuisance or zoning law.

§ 504.35 Cogeneration.

(a) *Eligibility.* Section 312(c) of the Act provides for a permanent exemption for cogeneration. ERA may grant you such an exemption if you demonstrate to the satisfaction of ERA that you meet at least the following minimum criteria:

(1) You are unable to comply with the applicable prohibitions; and

(2) There are economic and other benefits of cogeneration with petroleum or natural gas, which are unobtainable through the use of an alternate fuel.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) Documentary evidence which demonstrates that you considered the use of alternate fuels, including a description of the fuel alternatives you examined and the factors important in your decision to reject the use of alternate fuels. Such factors would include lack of alternate fuel supply, site limitations, or environmental requirements;

(2) The design specifications of the existing unit;

(3) An engineering description of the system, including existing system output and uses thereof, with sufficient detail to ensure that the unit qualifies as a cogeneration facility;

(4) A detailed economic and engineering analysis demonstrating the benefits of cogenerating with petroleum or natural gas and demonstrating that these benefits are not obtainable through the use of alternate fuels.

(5) A comparison of the total oil and gas consumption by the existing cogeneration facility and the best feasible alternatives, including the effect on oil or gas used by the electric utility or by other affected parties; and

(6) An analysis of the immediate and long-term economic impacts on parties not directly involved with the facility (for example, the other customers of the utility receiving the electricity).

§ 504.36 Permanent exemption for certain fuel mixtures containing natural gas or petroleum.

(a) *Eligibility.* Section 312(d) of the Act provides for a permanent exemption for certain fuel mixtures. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You propose to use a mixture of natural gas or petroleum and an alternate fuel as a primary energy source;

(2) You are not capable of complying with the applicable prohibitions; and

(3) The amount of petroleum or natural gas you propose to use in the mixture will not exceed the minimum percentage of the total Btu heat input needed to maintain operational reliability consistent with maintaining a reasonable level of fuel efficiency.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A complete description of the fuel mixture, component elements of the mixture, and percentage of each component to be utilized;

(2) The design specifications for the unit for which you are requesting an exemption;

(3) An engineering assessment of the proportions of petroleum or natural gas needed to maintain operational reliability and an adequate level of fuel efficiency; and

(4) Documentary evidence which demonstrates that you have considered the use of alternate fuels as a primary energy source. You must include a description of the supply alternatives you considered, the cost and availability of each alternate fuel considered, and the factors important in your decision to reject the use of an alternate fuel as a primary energy source; and

(5) If the amount of natural gas you impose to use in the mixture exceeds the minimum percentage needed to maintain operational reliability and an adequate level of fuel efficiency, documentary evidence which demonstrates that the natural gas will be mixed with synthetic fuels derived from municipal wastes or agricultural wastes and that use of an increased percentage of natural gas would encourage the use of alternate or new technologies which use renewable sources of energy.

(c) *Reporting requirement.* If the exemption is granted, you must submit an annual report to ERA certifying that the affected units have used no more than the percentage of oil or natural gas specified in the exemption order. The certification shall be executed by your Chief Executive Officer.

§ 504.37 Emergency purposes.

(a) *Eligibility.* Section 312(e) of the Act provides for a permanent exemption for emergency purposes. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(a) You are unable to comply with the applicable prohibitions or orders or rules issued by ERA;

(2) You shall operate and maintain the powerplant for emergency purposes only.

(b) *Definition.* For the purposes of this permanent exemption an emergency exists when the operating utility has been required to curtail its industrial customers by 10 percent or more from expected non-interruptible demand.

(c) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must provide substantial evidence to corroborate the above requirements. The evidence submitted must include at a minimum:

(1) A certificate executed by the Chief Executive Officer of the operating utility stating that emergency operation under the provisions of this exemption will occur only when the utility has curtailed industrial customers by 10 percent or more from expected non-interruptible demand; and

(2) Documentary evidence which demonstrates that you considered the use of alternate fuels, including a description of the fuel alternatives you examined and the factors important in your decision to reject the use of alternate fuels. Such factors would include lack of alternate fuel supply, site limitations, environmental requirements, certain State or local requirements, or other reasons which would preclude the use of an alternate fuel.

(d) *Reporting requirement.* At the end of each 12 month period from the effective date of the exemption, you must report to ERA the monthly and annual total generating capacity used and amounts of electricity generated under the provisions of this exemption with a description of the purposes of use.

§ 504.38 Peakload powerplants.

(a) *Eligibility.* (1) Section 312(f) of the Act provides for a permanent exemption for peakload powerplants. ERA shall grant you such an exemption if you demonstrate to ERA that:

(i) The powerplant will be operated solely as a peakload powerplant for the remaining life of the powerplant;

(ii) You are not capable of complying with the applicable prohibitions imposed by the Act or by ERA order without an impairment of reliability of service as measured by the loss of load probability technique described in

JA 29 79 UMI

paragraphs (a)(3), and (a)(4) of this section; and

(iii) Modification of the powerplant to permit compliance with the prohibitions of the Act—

(A) Is technically infeasible; or

(B) Would result in an unreasonable expense as described in the cost calculations portion (see § 504.12) of these regulations.

(2) Your powerplant is operated solely as a peak-load powerplant if the electrical generation of the powerplant in kilowatt hours does not exceed, for any 12-calendar-month period, the powerplant's design capacity multiplied by 1,500 hours.

(3) You must calculate reliability of service utilizing the loss of load probability (LOLP) technique. The LOLP must be computed for your electrical region using the first 12-month period of the proposed exemption. It is to be calculated as the sum of either the weekly or the monthly estimates of hourly load/capacity deficits. You may decide whether to perform the calculation using weekly or monthly data. The LOLP calculation must take into consideration equipment forced outage rates, projected customer electrical demand, and generating capacity projections for the electrical region, including existing generating capacity, planned generating capacity additions and projected retirements. If necessary, you may also calculate LOLP with modifications to account for transmission constraints, energy shortages, and other factors that are not adequately addressed by adhering to the foregoing specifications.

(4) Reliability of service is impaired if the LOLP including all available emergency reliability connections and other bulk power ties, is greater than one day in five years.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must provide the following substantial evidence to corroborate the above requirements:

(1) A sworn statement signed by the Chief Executive Officer of the electric utility which will operate the powerplant certifying that the powerplant is to be operated solely as a peakload powerplant; the certification must set forth the design capacity of the powerplant and the maximum allowable generation of the powerplant in kilowatt hours according to the definition of peakload for each 12 month period of operation as a peakload powerplant;

(2) All data you used in determining the loss of load probability;

(3) An explanation including equations of how you are calculating the loss of load probability;

(c) *Liability for operating in excess of exemption.* The operation of a peak-load powerplant which has been granted this exemption in excess of that allowed by the exemption shall be subject to penalties under Title VII, Subtitle C of the Act unless the powerplant meets the criteria set forth in section 721(c) of the Act.

(d) *Reporting requirement.* If the petition if granted, you must report to ERA, at the end of each 12 month period from the first day of the month following the effective date of the exemption and, if applicable, upon reaching the maximum number of hours of permitted operation within each 12 month period, the name, location, and design capacity of the exempted unit, the number of hours of operation permitted by the exemption, and the number of hours of actual operation.

§ 504.39 Intermediate load powerplants.

(a) *Eligibility.* Section 312(g) of the Act provides for an exemption for use of petroleum as a primary energy source by intermediate load powerplants. ERA may grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) The Administrator of the EPA or the Director of the appropriate State air pollution control agency has certified that the use of any available alternate fuel as a primary energy source will cause or contribute to a concentration, in an air quality control region or any area within such region, of a pollutant for which any national ambient air quality standard is or would be exceeded as described in (c) below:

(2) The intermediate load powerplant operated will replace no more than the equivalent generating capacity of existing units which:

(i) Permanently cease operation within one month of ERA's granting the intermediate load powerplant this exemption;

(ii) Use natural gas or petroleum as a primary energy source;

(iii) Are owned by the same person who is to operate the existing powerplant;

(iv) Are capable of using coal as a primary energy source; and

(v) Would cause or contribute to a pollutant concentration in a manner described in paragraph (a)(1), of this section;

(3) The powerplant is and shall continue to be operated only as an intermediate load powerplant in which the electrical generation, in kilowatt hours, for any 12-calendar-month period, shall not exceed the powerplant's design capacity multiplied by 3,500 hours;

(4) The net heat input rate for the powerplant will be maintained at or less than 9,500 Btu's per kilowatt hour throughout the useful life of the powerplant;

(5) The powerplant has the capability to use a synthetic fuel derived from an alternate fuel as a primary energy source.

(b) *Evidence supporting the petition.* To submit an adequate petition for review by ERA, you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A copy of your application for air quality certification for this unit filed with the EPA or State air pollution control agency, and all supporting documentation filed with or subsequent to the application;

(2) A description of the existing powerplants to be replaced, if any, by the intermediate load powerplant which shall include:

(i) The name and location of each of the existing powerplants;

(ii) The volume of fuel consumed by type for the previous two years by the existing powerplants;

(iii) The corporate ownership of the existing powerplants;

(iv) Evidence that the existing powerplants are capable of using coal; and

(v) The reasons for claiming that the existing powerplants would cause or contribute to a pollutant concentration if they used coal as a primary energy source;

(3) An affidavit executed by the Chief Executive Officer of the electric utility which will operate the powerplant certifying that the powerplant shall be operated at all times in the future only as an intermediate load powerplant. The certification shall set forth the design capacity of the powerplant and the maximum allowable generation of the powerplant in kilowatt hours for its first 12 months of operation from the date the petition for the exemption is filed.

(4) An affidavit executed by the Chief Executive Officer and a qualified engineer of the operating utility of the powerplant which certifies that the powerplant can operate at a heat rate of 9,500 Btu's per kilowatt hour or less throughout the useful life of the powerplant;

(5) An affidavit executed by the Chief Executive Officer and a qualified engineer of the operating utility certifying that the powerplant will meet the synthetic fuels capability requirement described in paragraph (a)(5) of this section. The affidavit must include a description of the specific characteristics that make the intermediate load powerplant capable of using a synthetic fuel; and,

(6) Identification and description with appropriate documentation of the synthetic fuels you have selected and a description of the basis for your

V 4 4 / 2 0 JA 29 79 UMI

decision to select that particular fuel, including any marketing studies, contracts or other documents relating to that selection.

(c) *Air quality certification to the Secretary.* Your petition is not complete unless the Administrator of the Environmental Protection Agency or the Director of the appropriate State air pollution control agency has certified to the Secretary that the use by the powerplant of an alternate fuel as a primary energy source will cause or contribute to a concentration in an air quality control region or any area within the region of a pollutant for which any national ambient air quality standard is or would be exceeded.

The air quality certification shall be an essential part of the ERA administrative record on the petition and the record shall not be complete without it. The certificate shall include at least a specification of each alternate fuel considered by EPA or the appropriate State air pollution control agency in reaching its decision regarding certification.

(d) *Reporting requirements.* If the petition is granted, you must report to ERA, at the end of each 12 month period from the first day of the month following the effective date of the exemption and, if applicable, upon reaching the maximum number of hours of permitted operation within each 12 month period, the name, location and design capacity of the exempt unit, the number of hours of operation permitted by the exemption, the number of hours of actual operation, and efforts taken to seek and obtain a synthetic fuel for use in the powerplants.

(e) *Periodic review.* ERA shall, from time to time, review this exemption and shall terminate it when he finds that there is available a supply of synthetic fuel suitable for use by the exempt powerplant.

(f) *Enforcement.* Violations of the provisions of this exemption shall subject you to the maximum penalties provided for by Part 501, Subpart O of these regulations.

§ 504.40 Use of natural gas by powerplant with capacity of less than 250 million Btu's per hour

(a) *Eligibility.* Section 312(h) of FUA provides for a permanent exemption for the use of natural gas by powerplants with a capacity of 250 million Btu's per hour or less. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) The design capacity of the powerplant for consuming fuel (or mixture thereof) is less than a heat input rate of 250 million Btu's per hour;

(2) The electrical generation of the powerplant in 1976 and 1977 exceeded, in kilowatt hours, the powerplants design capacity multiplied by 3500 hours; and

(3) The powerplant is not capable of burning coal without—

(a) A substantial physical modification of the unit, as determined by the nature of the modifications and the cost calculation formula contained in Section 504.12 of these regulations; or

(b) A derating of greater than 25%.

(b) *Evidence required to support the petition.* To submit an adequate petition for review by ERA, you must include the following substantial evidence to corroborate the above requirements:

(1) The purchaser's design specifications and date of installation for the powerplant;

(2) A detailed history of the fuel consumption of the powerplant for 1976 and 1977 on a monthly basis for each fuel consumed;

(3) An itemized list of the modifications required to burn coal as a primary energy source, the estimated cost for each modification, and the time required to make these modifications, to include copies of all pertinent engineering documents utilized to arrive at these estimates;

(4) A current plot plan of the facility and an additional plot plan indicating the modifications needed to burn coal as a primary energy source;

(5) Comparative costs for burning natural gas as opposed to converting to and burning coal, in accordance with the cost calculations set out in § 504.12; and

(6) The derating factor, if any, anticipated from burning coal as a primary energy source in the unit(s) and a detailed description of the formulas and assumptions used to arrive at that factor.

(c) *Restriction.* (1) This exemption may only apply to the prohibitions under Section 301 of FUA and prohibitions by final rules or orders issued before January 1, 1990;

(2) A petition for this exemption must be submitted to DOE for filing on or before December 31, 1988.

§ 504.41 Use of liquified natural gas.

(a) *Eligibility.* Section 312(i) of the Act provides for a permanent exemption for the use of liquified natural gas (LNG). To qualify you must demonstrate to the satisfaction of ERA that:

(1) The Administrator of the EPA or the appropriate State air pollution control agency has certified that the use of coal or any available coal derived fuel as a primary energy source will cause or contribute to a concentration, in an air quality control region or any area within such region, of a pollutant for which any national ambient air quality standard is or would be exceeded (air quality certification);

(2) The Administrator of the EPA or the appropriate State air pollution control agency has certified that you will be unable to use coal or any available coal derived fuel as a primary energy source without violating applicable environmental requirements (environmental certification); and

(3) The LNG to be used at your powerplant will be produced in a foreign country.

(b) *Evidence required in support of the petition.* To submit an adequate petition for review by ERA you shall include the following substantial evidence to corroborate the above requirements:

(1) Copies of your applications for an air quality certification and an environmental certification filed with the EPA or State air pollution control agency which request certification for coal and all available coal derived fuels, and copies of all supporting documentation filed with or subsequent to the applications; and

(2) The name of the country that will be the source of your LNG, the name of the company that owns the LNG terminal through which your LNG will be imported and the name and location of such terminal, and the name of the company that will be supplying you with LNG.

(c) *Air quality certification to the Secretary.* (1) Your petition is not complete unless the Administrator of the Environmental Protection Agency or the Director of the appropriate State air pollution control agency has certified to the Secretary that the use by the powerplant of an alternate fuel as a primary energy source will cause or contribute to a concentration in an air quality control region or any area within the region of a pollutant for which any national ambient air quality standard is or would be exceeded, and that you will be unable to use coal or a fuel derived from coal without violating applicable environmental requirements.

(2) The air quality certification and the environmental certification shall be an essential part of the ERA administrative record on the petition and the record shall not be completed without it. The certificate shall include at least a specification of each type of coal and fuel derived from coal considered by EPA or the appropriate State air pollution control agency in reaching its decision regarding certification.

(d) *Reporting requirement.* If the petition is granted, your must report to ERA, at the end of each 12 month period from the first day of the month following the effective date of the exemption and, if applicable, upon reaching the maximum number of hours of permitted operation within each 12 month period, the name, location and design capacity of the exempt unit, the number of hours of operation permitted by the exemption, the number of hours of actual operation, and efforts taken to seek and obtain a synthetic fuel for use in the powerplants.

(e) *Periodic review.* ERA shall, from time to time, review this exemption and shall terminate it when he finds that there is available a supply of synthetic fuel suitable for use by the exempt powerplant.

(f) *Enforcement.* Violations of the provisions of this exemption shall subject you to the maximum penalties provided for by Part 501 Subpart O of these regulations.

PART 505—NEW MAJOR FUEL BURNING INSTALLATIONS

[See 43 FR 54030, November 17, 1978]

PART 506—EXISTING MAJOR FUEL BURNING INSTALLATIONS

Subpart A—Prohibitions

Sec.
506.1 Purpose and scope.
506.2 Prohibitions by order (case-by-case).

Subpart B—General Requirements for Exemptions

506.10 Purpose and scope.
506.11 Fuels Decision Report.
506.12 Cost calculation for existing installations.
506.13 Use of mixtures—general requirement for temporary exemptions.
506.14 Use of mixtures—general requirement for permanent exemptions.
506.15 Use of fluidized bed combustion not feasible—general requirement for permanent exemptions.
506.16 Terms and conditions; compliance plans.

Subpart C—Temporary Exemptions for Existing Major Fuel-Burning Installations

506.20 Purpose and scope.
506.21 Lack of alternate fuel supply.
506.22 Site limitations.
506.23 Inability to comply with applicable environmental requirements.
506.24 Future use of synthetic fuels.
506.25 Use of innovative technologies.
506.26 Retirement.
506.27 Public interest exemption.

Subpart D—Permanent Exemptions for Existing MFBI's

506.30 Purpose and scope.
506.31 Lack of alternate fuel supply.
506.32 Site limitations.
506.33 Inability to comply with applicable environmental requirements.
506.34 State or local requirements.
506.35 Cogeneration.
506.36 Permanent exemption for certain fuel mixtures containing natural gas or petroleum.
506.37 Emergency purposes.
506.38 Product/process requirements.
506.39 Scheduled equipment outages.
506.40 Installations served by certain international pipelines.

AUTHORITY: Department of Energy Organization Act, Pub. L. 95-91; Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620; Title V of the Independent Offices Appropriation Act of 1952, 65 Stat. 290, 31 U.S.C. 483(a); Executive Order 12009, 42 FR 46267.

Subpart A—Prohibitions

§ 506.1 Purpose and scope.

(a) *Purpose.* This subpart establishes the procedures ERA intends to employ in administering and implementing its authority to prohibit installations from using petroleum or natural gas.

(b) *Scope.* This subpart applies to all existing major fuel burning installations. Any person who has any ownership or interest in, or who operates, rents or leases an installation, is subject to the prohibitions of the Act and the penalties as specified by the Act.

§ 506.2 Prohibitions by order (case by case).

(a) ERA may prohibit, by order, the use of natural gas or petroleum as a primary energy source in an existing major fuel burning installation if ERA finds that—

(1) The installation has, or previously had, the technical capability to use an alternate fuel as a primary energy source;

(2) The installation has this technical capability or could acquire the technical capability without:

(i) A substantial physical modification of the unit, or

(ii) A substantial reduction in the rated capacity of the unit;

(3) It is financially feasible for the installation to use an alternate fuel as its primary energy source.

(b) ERA must make a proposed finding regarding the technical capability of a unit to use an alternate fuel as identified in paragraph (a)(1) of this section prior to the date of publication of the notice of the proposed prohibition. ERA will publish this finding in the FEDERAL REGISTER along with the notice of the proposed prohibition.

(c) Your installation shall be considered technically capable of using an alternate fuel as its primary energy source if:

(1) The installation was designed so as to be capable of using a specific alternate fuel as the primary energy source, with or without modification; or

(2) ERA determines that the installation is capable of using an alternate fuel as the primary energy source, even though the unit was not specifically designed for that alternate fuel.

(d) Your installation does not require substantial physical modification if it has the requisite furnace configuration and the requisite tube spacing to burn an alternate fuel.

(e) No substantial reduction in the rated capacity of the unit will be presumed to occur if the derating does not exceed 25 percent. ERA will not consider the loss of design capacity caused by the use of pollution control equipment.

(f) It is financially feasible for your installation to use an alternate fuel as its primary energy source if (1) the cost of using an alternate fuel does not substantially exceed the cost of using imported petroleum, as determined by utilizing the cost calculation described in § 506.12 of these regulations; and (2) you have the ability to raise the capital necessary to convert the unit to burn an alternate fuel as its primary energy source.

(g) If ERA finds that it is technically and financially feasible for your installation to use a mixture of petroleum or natural gas and an alternate fuel as its primary energy source, ERA may prohibit you, by order, from using petroleum and natural gas in amounts exceeding the minimum percentage of the total Btu heat input of the primary energy sources necessary to maintain reasonable fuel efficiency of the mixture. The minimum percentage (determined by ERA) may not, however, be less than 25 percent.

(h) ERA may not issue a final order to your installation (covered by this section) if you demonstrate by written submission that your facility would be eligible for an exemption under the criteria set out in this Part for any applicable exemption, or if you have demonstrated to the satisfaction of ERA that the required findings stated in paragraph (a) of this section cannot be made. However, if your installation would be eligible only for a temporary exemption, ERA can issue you a final order that will take effect at such time as the temporary exemption would have expired.

(i) ERA may not issue a final order under this section to your installation unless prior to issuance of the order there has been published in the FEDERAL REGISTER a notice of the proposed order. This notice shall provide a period of no less than 49 days in which interested persons may file written data, views and arguments and also provide an opportunity for interested persons to request a public hearing on the proposed order. It is during this public comment period that the recipient is given the opportunity to challenge the findings ERA must make to issue a final order and/or to demonstrate that the installation is eligible for an exemption.

(j) If ERA cannot issue your installation a final order because your facility is eligible for a permanent exemption,

V 4 4 / 2 0

or if the effective date of this order is delayed during the period that a temporary exemption is in effect, ERA will take the necessary action to assure that you comply with the terms and conditions of the order granting the exemption.

(k) ERA may not issue your installation an order under this section if your installation has been identified as a member of a category subject to a final rule at the time of the issuance of the proposed order.

Subpart B—General Requirements for Exemptions

§ 506.10 Purpose and scope.

This subpart establishes the general requirements necessary to qualify for either a temporary or permanent exemption under this Part and sets out the methodology for calculating the cost of using an alternate fuel and the cost of using imported petroleum.

§ 506.11 Fuels decision report.

(a) Before ERA will accept a petition for either a temporary or permanent exemption from a final prohibition order issued under this Part, you must include as part of your petition a Fuels Decision Report as described in Part 502. The Fuels Decision Report shall contain the analysis and documentation of the evidence required in support of your exemption request.

(b) If you are requesting a temporary or permanent exemption from a proposed prohibition order issued under this Part, you are not required to submit a Fuels Decision Report as part of your written submission. Your submission must include, however, all of the evidence required by the applicable section of the regulations pertaining to the exemption.

§ 506.12 Cost calculation for existing installations.

(a) *General.* (1) If you are requesting an exemption for an existing installation on the basis that the cost of using an alternate fuel as a primary energy source substantially exceeds the cost of using imported petroleum, you must use the comparative cost test provided in this section.

(2) The cost of using an alternate fuel in lieu of imported oil or gas as a primary energy source will be deemed to be substantially in excess of the cost of using imported oil or gas where the ratio of the former to the latter is greater than the index set periodically by ERA. Initially, ERA sets the index at (1.5). ERA will revise the index from time to time after public notice and time to comment. Revisions shall become effective for all ERA decisions after final publication.

(3) The cost test takes into consideration capital outlays, operation, and maintenance expenses, delivered fuel expenditures, and the effect of depreciation and taxes on cash flow. There are two comparative cost tests—a General Cost Test and a Special Cost Test. To demonstrate your eligibility for a permanent exemption on the basis that the cost of using an alternate fuel as a primary energy source substantially exceeds the cost of using imported petroleum, you must use the procedures specified in the General Cost Test (Section b). To demonstrate your eligibility for a temporary exemption, you may use either the procedures specified in the General Cost Test (Section b) or the Special Cost Test (Section c).

(4) The General Cost Test differs from the Special Cost Test with respect to the time period over which costs are calculated. When using the General Cost Test, the cost is computed for the remaining useful life of the installation. When using the Special Cost Test the cost is computed only for the term of the exemption.

(b) *Cost calculation—General cost test.* (1) You may be eligible for a permanent exemption if you demonstrate that the cost of using an alternate fuel starting with each successive year within the first ten years of the exemption will always substantially exceed the cost of using imported petroleum in the unit from the time the exemption becomes effective until the end of the installation's useful life. You will have to show that the cost of using an alternate fuel starting in each of the first ten years of the exemption and using oil or natural gas until the start of using alternate fuel, substantially exceeds the cost of using only imported petroleum.

(2) ERA will not grant a permanent exemption if a temporary exemption solves the cost problem within ERA's definition. Therefore, if the cost computed with successive starting dates for alternate fuel use (for the first ten years of the exemption) does not always substantially exceed the cost of using imported petroleum, you would only be eligible for a temporary exemption. The length of the temporary exemption would be the minimum period within which the cost of using alternate fuel always substantially exceeds the cost of using imported petroleum. For example, if you can burn coal but the coal will not be available from a bona fide supplier for 2 years, ERA may grant a temporary exemption and allow the burning of natural gas based on an acceptable certification of the schedule of delivery of coal.

(3) In the General Cost Test, ERA defines cost as the sum of the annual after-tax cash outlays for capital, operations and maintenance, and delivered fuel, and the effect of depreciation and taxes on cash flow discounted to the present.

(4) To conduct the test, you must use the equations that follow:

[6450-01-C]

(i) Calculate the ratio (R) of the cost of using an alternate fuel to the cost of using imported petroleum with equation 1.

EQ 1 $$R = \frac{\text{COST (ALTERNATE)}}{\text{COST (OIL)}}$$

(ii) Calculate the cost of using an alternate fuel and imported petroleum with equation 2.

EQ 2 $$\text{COST} = I + \frac{(1-t)(OM + FL) - (t)(DPR)}{(1+K)^1}_1 + \frac{(1-t)(OM + FL) - (t)(DPR)}{(1+K)^2}_2 + \ldots + \frac{(1-t)(OM + FL) - (t)(DPR)}{(1+K)^N}_N - \frac{Sp}{(1+K)^P}$$ 1/

(iii) Calculate investment (I), for equation 2 using equation 3.

EQ 3 $$I = I_o + \frac{I_1}{(1+K)^1} + \frac{I_2}{(1+K)^2} + \ldots + \frac{I_N}{(1+K)^N}$$

1/ This definition of cost follows accepted industry practice of basing investment decisions on the after-tax cash flow associated with investment, depreciation and operating expenses.

J A 2 9 7 9 UMI

V 44/20

[6450-01-M]

(5) The terms in equations 1 through 3 are defined as follows:

R—The ratio of the cost of using an alternate fuel to the cost of using imported oil or gas.

COST—The total discounted after-tax cost in dollars of constructing and operating the installation for the remaining useful life of the installation.

I—Discounted total net capital outlay in dollars excluding investment tax credits.

I_o—Net capital outlay in dollars up to the time the exemption becomes effective.

I_1-I_N—Yearly net capital outlays from first year of the exemption through the remaining useful life of the installation.

OM—Annual cost in dollars of operating and maintaining the installation starting when the exemption becomes effective.

t—Federal income tax rate (see Section d).

FL—Annual delivered fuel cost in dollars starting when the exemption becomes effective (see Section d).

P—Year fuel is changed from oil to alternate fuel.

K—The real cost of capital expressed as a fraction (see Section d).

N—The remaining useful life of the installation (see Section d).

DPR—Annual depreciation using the method which depreciates the asset as quickly as allowed by law. Includes all relevant equipment, not just the equipment included in I.

Sp—Salvage value of equipment rendered useless by changing the fuel from oil or natural gas to alternate fuel in year P.

(6) The step by step procedure that follows shows the comparisons that you must make. It outlines the fuel comparisons as well as the time comparisons.

(i) Compute the cost (COST) of using an alternate fuel with equation 2.

(ii) Compute the cost (COST) of using an alternate fuel with equation 2 assuming an alternate fuel is not used as the primary energy source until the end of the first year of the exemption and that oil or natural gas is used for the first year of the exemption. Capital investment, operating and maintenance and fuel expenditures should reflect postponed use of alternate fuel (e.g., installation of scrubber when used).

(iii) Successively compute the cost (COST) of using an alternate fuel with equation 2 assuming use of an alternate fuel is postponed until the end of the second through tenth year of the exemption (and oil or natural gas is used in the years preceding alternate fuel use).

(iv) Compute the cost (COST) of using oil or natural gas with equation 2.

(v) Compute the ratios (R) of the cost of using an alternate fuel at the beginning of the exemption, and successively at the end of the first through tenth year of the exemption to the cost of using oil or natural gas from the start of the exemption throughout the remaining useful life of the installation with equation 1.

(vi) If all the rations (R) are greater than, for illustrative purposes, (1.5) (an index to be set periodically by ERA), your installation would meet the cost criteria for a permanent exemption. If one or more of the ratios (R) are equal to or less than (1.5) and a series of ratios (R) starting with the case where alternate fuel is used from the start of operation, are all greater than (1.5), a temporary exemption would be granted for the minimum period in which the cost of using an alternate fuel, deferred year by year, always exceeds (1.5).

(7) The following table shows the hypothetical results of four sets of calculations.

HYPOTHETICAL RESULTS OF FOUR SETS OF CALCULATIONS

Year in Which Alternate Fuel Use is Commenced	Case I	Case II	Case III	Case IV
At Start of Exemption	1.7	1.7	1.7	1.3
1	1.7	1.7	1.7	1.3
2	1.7	1.7	1.7	1.3
3	1.4	1.7	1.7	1.3
4	1.4	1.7	1.4	1.3
5	1.4	1.7	1.4	1.0
6	1.4	1.7	1.2	1.0
7	1.4	1.7	1.2	1.0
8	1.4	1.7	1.2	1.0
9	1.4	1.7	1.2	1.0
10	1.4	1.7	1.3	1.0

The results of the above table shows that: a two year temporary exemption would be granted in case I, a permanent exemption would be granted in Case II, a three year temporary would be granted in Case III, and no exemption would be granted in Case IV.

(c) *Cost calculation-special cost test.* (1) You may be eligible for a temporary exemption if you demonstrate that the cost of using an alternate fuel will substantially exceed the cost of using imported petroleum over the period of the proposed exemption. The period of the exemption cannot exceed ten years. You will have to show that the cost of using alternate fuel substantially exceeds the cost of using imported petroleum for the first year of the exemption, the first two years of the exemption, and each successive year of the exemption, up to the period of the proposed exemption. ERA will limit the duration of a temporary exemption to the shortest time possible.

(2) The calculation takes into consideration (i) the operations and maintenance and delivered fuel expenditures incurred during the proposed exemption, (ii) the effect of depreciation and taxes on cash flow during the proposed exemption and, (iii) the capital outlays associated with the exemption.

(3) To conduct the test you must use the equations that follow:

[6450-01-C]

(i) Calculate the ratio (R) of the cost of using an alternate fuel to the cost of using imported petroleum with equation 6.

$$\text{EQ 6} \quad R = \frac{\text{COST (ALTERNATE)}}{\text{COST (OIL)}}$$

(ii) Calculate the cost using equation 7.

$$\text{EQ 7} \quad \text{Cost} = I + \frac{(1-t)(OM + FL_1) - (t)(DPR_1)}{(1+K)^1} + \frac{(1-t)(OM + FL_2) - (t)(DPR_2)}{(1+K)^2} + \ldots\ldots\ldots + \frac{(1-t)(OM + FL_p) - (t)(DPR_p)}{(1+K)^p} : - \frac{Sp}{p}$$

(iii) Calculate investment (I) using equation 8.

$$\text{EQ 8} \quad I = I_o + \frac{I_1}{(1+K)^1} + \frac{I_2}{(1+K)^2} + \ldots\ldots\ldots + \frac{I_p}{(1+K)^p}$$

JAN 29 1979 UMI

[6450-01-M]

(4) The terms in equations 6 through 8 are defined as follows:

R—The ratio of the cost of using an alternate fuel to the cost of using imported petroleum.

COST—The total discounted after-tax cost in dollars, associated with the exemption, of constructing and operating the installation.

I—Discounted total net capital outlay in dollars excluding investment tax credit until the end of the proposed exemption. The investment in the basic installation itself (that which would be required if a change in the primary energy source were not being proposed) is not included. (ERA will not consider investment tax credits for oil- and gas-fired installations.)

I_o—Net capital outlay in dollars up to the time the exemption is effective.

I_1-I_p—Yearly net capital outlay from the first year of the exemption until the change to alternate fuel.

OM—Annual cost in dollars of operating and maintaining the installation during the exemption.

Sp—Salvage value of equipment rendered useless by changing from oil or natural gas to alternate fuel in year P.

t—Federal income tax rate (see Section d).

FL—Annual delivered fuel cost in dollars during the exemption (see Section d).

K—The real cost of capital expressed as a fraction (see Section d).

P—The period of the proposed exemption.

DPR—Annual depreciation using the method which depreciates the asset as quickly as allowed by law. Includes all relevant equipment, not just that equipment included in I.

(5) The step by step procedure that follows shows the comparison you must make.

(i) Compute the cost (COST) of using an alternate fuel assuming the length of the proposed exemption is one year with equation 7.

(ii) Compute the cost (COST) of using oil or natural gas valued at imported petroleum prices assuming the length of the proposed exemption is one year with equation 7.

(iii) Compute the ratio (R) of the cost of using an alternate fuel for the first year to the cost of using imported petroleum for the first year with equation 6.

(iv) Repeat the calculation made in (i), (ii), and (iii) above assuming the length of the proposed exemption is two years, three years, four years, and so on, up to the period of the proposed exemption.

(v) A temporary exemption would be granted, where one or more successive ratios (R) are greater than, for illustrative purposes, (1.5) (the index established by ERA).

(d) *Information on parameters used in the calculation.* (1) All estimated expenditures, except natural gas and petroleum products, shall be expressed in real (uninflated) terms using the prices in effect at the time the petition is submitted.

(2) The delivered price of oil or natural gas to be used in the cost calculation must reflect the price of imported oil. The imported petroleum price is reflected in the cost calculation in the following way:

$$PFE = \frac{PICO}{PCCO} \times PF$$

where

PICO=Price of imported crude oil. The most recent refiner acquistion cost of imported crude oil as reported in the FEDERAL REGISTER monthly notice for the DOE Domestic Crude Oil Allocation (Entitlements) Program.

PCCO=Price of composite crude oil. The most recent weighted average cost of total reported crude oil receipts as reported in the FEDERAL REGISTER notice for the DOE Entitlements Program.

PF=Price of your fuel. The most rcent actual weighted average cost of your fuel oil (other than natural gas). Alternatively, if no purchases of fuel oil occurred, or you used natural gas during that month, you should use a simple average of the industrial price of fuel oil (capable of being burned in your facility) sold in your area by at least three suppliers.

For proposed natural gas users, you shall use the price of No. 2 distillate fuel oil in this calculation.

PFE=Price of fuel for equation. The cost of oil for use in equation 1.

(3) For existing installations, the annual capacity factor shall be assumed to be the average capacity factor for the last five years or the life of the installation, if the installation is less than five years old. You may rebut this presumption with suitable engineering evidence.

(4) The remaining useful life of major fuel burning installations shall be 40 years minus the number of years of operation before the effective date of the exemption. You may rebut this presumption with suitable engineering evidence.

(5) The cost of capital for major fuel burning installations is 7.0 percent per year in real terms.

(6) The Federal income tax rate is 46 percent.

(7) All estimated expenditures will be computed in accordance with generally accepted accounting principles.

(e) *Evidence supporting the comparative cost test.* All petitions for exemption requiring the use of the comparative cost test shall include, but not be liminted to, the following information:

(1) A detailed accounting of all capital outlays including a description of all major construction and equipment. All critical assumptions should be stated and sufficient data should be included to support your estimates.

(2) A detailed accounting of all operations and maintenance expenditures including a description of all major elements. All critical assumptions should be stated and sufficient data included to support your estimates.

(3) A detailed accounting of all delivered fuel expenditures including transportation. All critical assumptions should be stated and sufficient data included to support your estimates. The fuel characteristics for each alternate fuel should be included.

(4) If you assume that the remaining useful life of the installation is less than 40 years minus the number of years of operation before the effective date of the exemption, all critical assumptions and sufficient data to support that position.

(5) A detailed accounting of the depreciation which should include the depreciable base and its tax life. All critical assumptions should be stated and sufficient data included to support your estimates.

(f) *Example of calculations.* (1) You are considering converting a major fuel burning installation from oil to coal. In this particular situation, the delivered cost of coal is much greater for the first three years after the proposed conversion than it will be in the later years because of a transportation problem. Do you qualify for an exemption? If so, is it permanent or temporary?

(2) To determine if you qualify for a permanent exemption, you would have to use the General Cost Test and compute the ratios of the cost to use 1) coal for the remaining useful life of the installation after the effective date of the exemption; 2) imported petroleum for the first year of the exemption and coal for the remainder of the useful life of the installation; 3) imported pertroleum for the first two years of the exemption and coal for the remainder of the useful life of the installation, * * * ; and 11) imported petroleum for the first ten years of the exemption and coal for the remainder of the useful life of the installation to the cost of using imported petroleum for the remaining useful life of the installation after the effective date of the exemption.

(3) All eleven ratios would have to be higher than (1.5) (assumed index established by ERA) to qualify for a permanent exemption. However, if a series of successive ratios, starting with the case where alternate fuel is used from the start of the exemption, are all greater than (1.5), you would be eligible for a temporary exemption up to the last year the ratio is greater than (1.5).

(4) In this example, we will only compute the ratios of (i) the cost to use coal for the remaining useful life of the installation after the effective date of the exemption and (ii) the cost to use imported petroleum for the first three years of the exemption and coal for the remainder of the useful life of the installation, to the cost of using imported petroleum for the remaining useful life of the installation after the effective date of the exemption.

(5) To determine if you qualify for a temporary exemption, if you have not already done so with the General Cost Test, you would have to use the Special Cost Test and compute the ratios of the cost to use coal in the installation to the cost to use imported petroleum in the installation for one, two, and three years after the effective date of the exemption. All three ratios would have to be higher than (1.5) in order to qualify for a three-year temporary exemption. In this example, we will only compute the ratio of the cost of using coal to the cost to using imported petroleum for the first three years after the effective date of the exemption.

(6) *Parameters*—a set of hypothetical parameters are given below:

(i) Installation conversion to coal without changing capacity or remaining useful life:

Net capital outlay (without scrubber) to convert the installation to burn coal.—$890,000.
Salvage value of equipment rendered useless by shifting from oil to coal.—223,000.
Net capital outlay for scrubber.—2,575,000.
Operations and maintenance costs per year to burn coal.—858,000.

(ii) Existing oil burning installation.

Book value of installation.—2,668,000.
Operations and maintenance cost per year.—258,000.
Remaining useful life (after exemption becomes effective).—30 years.

(iii) Fuel.

Annual cost to burn imported oil.—2,163,000.
Annual cost to burn coal for the first three years of after the proposed conversion.—3,447,000.
Annual cost to burn coal for the fourth through thirtieth year after the proposed conversion.—1,159,000.

(7) *Analysis.* (1) *General cost test.* The relevant cash flows are shown in the following table for the three cases in which computations are being made.

CASH FLOWS FOR GENERAL COST TEST IN (IN THOUSANDS)

Type of cash flow	Year(s) flow occurs	Case 1—Coal over remaining useful life of installation	Case 2—Imported Petroleum for first 3 years and Coal Thereafter	Case 3—Imported petroleum over the remaining life of the installation
Investment	0	$890+$2,575	0	0
Investment	3	0	$890+2,575	0
Salvage	0	223	0	0
Salvage	3	0	$223	0
Operation & Maintenance	1, 2, 3	$858/yr.	$258/yr.	$258/yr.
Operation & Maintenance	4, —, 30	$858/yr.	$858/yr.	$258/yr.
Fuel	1, 2, 3	$3,477/yr.	$2,163/yr.	$2,163/yr.
Fuel	4, —, 30	$1,159/yr.	$1,159/yr.	$2,163/yr.
Effect of Taxes and Depreciation	1, —, 30	(1)	(1)	(1)

[1] Depreciation is greater of double declining balance or straight line over remaining period. For the purposes of this example all equipment is depreciated in the same way.

V 44 20 JA 29 79 UMI

[6450-01-C]

The following computations are in thousands of dollars.

Case 1. Cost of using coal over the remaining life of the powerplant from the start of the exemption.

$$I = I_o + \frac{I_1}{(1+K)^1} + \frac{I_2}{(1+K)^2} + \ldots + \frac{I_N}{(1+K)^N}$$

$$= (890 + 2,575)\left[\frac{0}{(1.07)^1} + \frac{0}{(1.07)^2} + \ldots + \frac{0}{(1.07)^{30}}\right]$$

$$= \$3,465$$

$$COST = I + \frac{(1-t)(OM_1 + FL_1) - (t)(DPR_1)}{(1+K)^1}$$

$$+ \frac{(1-t)(OM_2 + FL_2) - (t)(DPR_2)}{(1+K)^2} + \ldots$$

$$+ \frac{(1-t)(OM_N + FL_N) - (t)(DPR_N)}{(1+K)^N} - \frac{S_p}{(1+K)^p}$$

$$COST = 3,465 + \frac{(1-0.46)(858 + 3477) - 0.46 \times DPR_1}{(1.07)^1}$$

$$+ \frac{(1-0.46)(858 + 3477) - 0.46 \times DPR_2}{(1.07)^2}$$

$$+ \frac{(1-0.46)(858 + 3477) - 0.46 \times DPR_3}{(1.07)^3}$$

$$+ \frac{(1-0.46)(858 + 1159) - 0.46 \times DPR_4}{(1.07)^4}$$

$$+ \ldots + \frac{(1-0.46)(858 + 1159) - 0.46 \times DPR_{30}}{(1.07)^{30}}$$

$$- \frac{223}{(1.07)^0}$$

$$= 18,623$$

Case 2. Cost of using imported petroleum for the first three years of the exemption and coal thereafter.

$$I = I + \frac{I_1}{(1+k)^1} + \frac{I_2}{(1+k)^2} + \ldots + \frac{I_N}{(1+K)^N}$$

$$= 0 + \frac{(2,575 + 890)}{(1.07)^3}$$

$$= 2,828$$

$$COST = I + \frac{(1-t)(OM_1 + FL_1) - (t)(DPR_1)}{(1+k)^1}$$

$$+ \frac{(1-t)(OM_2 + FL_2) - (t)(DPR_2)}{(1+k)^2} + \ldots$$

$$= 15,605$$

Computation of ratios.

$$R = \frac{\text{COST (COAL THROUGHOUT LIFE)}}{\text{COST (OIL)}}$$

$$+ \frac{18,623}{15,605} = 1.19$$

$$R = \frac{\text{COST (OIL FIRST THREE YEARS, COAL THEREAFTER)}}{\text{COST (OIL)}}$$

$$= \frac{15,426}{15,605} = 0.99$$

Conclusion. Since the assumed index is (1.5), you would not qualif for a permanent exemption, or a temporary exemption using the General Cost Test.

(ii) Special Cost Test. The relevant cash flows are shown in the following tables for the two cases in which computations are being made.

CASH FLOW FOR SPECIAL COST TEST (IN THOUSANDS)

Type of Cash Flow	Year(s)	Case 1 Coal Over Remaining Useful Life of Installation	Case 2 Imported Petroleum First 3 Yrs. & Coal Thereafter
Investment	0	$890 + 2,575	0
Investment	3	0	$890 + $2,575
Salvage	0	223	
Salvage	3	0	$223
Operation & Maintenance	1, 2, 3	$ 858/yr.	$258/yr.
Fuel	1, 2, 3	$3,477/yr.	$2,163/yr.
Effects of Taxes and Depreciation	1, 2, 3	Depreciation is greater of double declining balance or straight line over remaining period. For the purposes of this example, all equipment is depreciated depreciated in the same way.	

V 4 4 / 2 0 J A 2 9 7 9 UMI

The following computations are in thousands of dollars.

Case 1. Cost of using coal from the start of the exemption

$$I = I_o + \frac{I_1}{(1+k)^1} + \frac{I_2}{(1+k)^2} + \ldots + \frac{I_p}{(1+k)^p}$$

$$= (890 + 2,575) + \frac{0}{(1.07)^1} + \frac{0}{(1.07)^2} + \frac{0}{(1.07)^3}$$

$$= 3,465$$

$$COST = I + \frac{(1-t)(OM_1 + FL_1) - t.DPR_1}{(1+k)^1} + \frac{(1-t)(OM_2 + FL_2) - t.DPR_2}{(1+k)^2} + \ldots + \frac{(1-t)(OM_p + FL_p) - t.DPR_p}{(1+k)^p} - \frac{S_p}{(1+k)^p}$$

$$COST = 3,465 + \frac{(1-0.46)(858 + 3,477) - 0.46 \times DPR_1}{(1.07)^1} + \frac{(1-0.46)(858 + 3,477) - 0.46 \times DPR_2}{(1.07)^2} + \frac{(1-0.46)(858 + 3,477) - 0.46 \times DPR_3}{(1.07)^3} - \frac{223}{(1.07)^0}$$

$$= \$8,922$$

Case 2. Cost of using imported petroleum for the first three years of the exemption (and coal thereafter)

$$I = I_o + \frac{I_1}{(1+k)^1} + \frac{I_2}{(1+k)^2} + \ldots + \frac{I_p}{(1+k)^p}$$

$$= 0 + \frac{(2,575 + 890)}{(1.07)^3}$$

$$= \$2,828$$

$$COST = I + \frac{(1-t)(OM_1 + FL_1) - t.DPR_1}{(1+k)^1} + \frac{(1-t)(OM_2 + FL_2) - t.DPR_2}{(1+k)^2} + \ldots + \frac{(1-t)(OM_p + FL_p) - t.DPR_p}{(1+k)^p} - \frac{S_p}{(1+k)^p}$$

$$COST = \$2,828 + \frac{(1-0.46)(258 + 2,163) - 0.46 \times DPR_1}{(1.07)^1} + \frac{(1-0.46)(258 + 2,163) - 0.46 \times DPR_2}{(1.07)^2} + \frac{(1-0.46)(258 + 2,163) - 0.46 \times DPR_3}{(1.07)^3} - \frac{223}{(1.07)^3}$$

$$= 5,460$$

Computation or ratio.

$$R = \frac{\text{COST (COAL FOR PERIOD OR EXEMPTION)}}{\text{COST (OIL FOR PERIOD OF EXEMPTION)}}$$

$$\frac{8,922}{5,460} = 1.63$$

Conclusion. If ERA had set the index at 1.5, you would be granted a temporary exemption.

V 44/20 JA 29 79 UMI

V 4 4 / 2 0 J A 2 9 7 9 UMI

[6450-01-M]

§ 506.13 Use of mixtures—general requirement for temporary exemption.

(a) ERA will not consider a petition for a temporary exemption under Section 311 of the Act to be complete, adequate or acceptable for filing unless you demonstrate, to the satisfaction of the ERA in your petition, whether or not the use of a mixture of natural gas or petroleum and an alternate fuel is economically and technically feasible during the period of the proposed exemption.

(b) If ERA determines that the use of a particular fuel mixture is technically and economically feasible during the period of the proposed exemption, ERA will condition the granting of any temporary exemption under this Part upon the use of that mixture during the period of the temporary exemption.

§ 506.14 Use of mixtures—general requirement for permanent exemption.

(a) *Application.* ERA will not consider a petition for any of the following exemptions provided for in Section 312 of the Act (lack of alternate fuel supply, site limitations environmental requirements, State or local requirements, cogeneration, emergency purposes, product/process requirements, or scheduled equipment outages) to be complete, adequate, or acceptable for filing unless you demonstrate to the satisfaction of ERA in your petition that you have considered the use of a mixture(s) for which an exemption under § 506.36 (Fuel Mixtures) of these regulations would be available.

(b) *Demonstration.* ERA will not grant any of the exemptions listed in subsection (2) unless you demonstrate that use of such a mixture(s) is not economically or technically feasible in the unit for which you are requesting an exemption. To make such a demonstration, you must show in your petition to the satisfaction of ERA that:

(1) If use of a mixture(s) were required, you would be eligible for one of the following permanent exemptions provided for in the Act: lack of alternate fuel supply, site limitations, environmental requirements, or state or local requirements; or

(2) The use of a mixture(s) is not technically or economically feasible in your specific unit due to design or special circumstances as determined by ERA on a case-by-case basis.

§ 506.15 Use of fluidized bed combustion not feasible-general requirement for permanent exemption.

(a) *Application.* ERA will not consider a petition for one of the following permanent exemptions provided for in Section 312 of the Act (lack of alternative fuel supply, site limitations, environmental requirements, state or local requirements, cogeneration, emergency, product/process, or equipment outages), to be complete, adequate or acceptable for filing unless you demonstrate in your petition to the satisfaction of ERA that you have considered the use of a method of fluidized bed combustion of an alternate fuel.

(b) *Finding.* If ERA determines, on a generic basis, that use of a method of fluidized bed combustion is economically and technically feasible, ERA will deny your request for exemption unless you demonstrate to the satisfaction of ERA that:

(1) If use of a method of fluidized bed combustion, were required, you would be eligible for one of the following permanent exemption provided for in Section 312 of the Act: lack of alternate fuel supply, site limitations, environmental requirements, or state and local requirements; or

(2) The use of a method of fluidized bed combustion is not technically or economically feasible in your specific unit due to design or special circumstances as determined by ERA on a case-by-case basis.

§ 506.16 Terms and conditions; compliance plans.

(a) *Terms and conditions generally.* You must comply with the terms and conditions of an exemption granted under the Act by the ERA, including terms and conditions requiring the use of (1) effective fuel conservation measures and (2) fuel mixtures.

(b) *Compliance plans for temporary exemptions.*

(1) A compliance plan certified by your Chief Executive Officer must accompany a petition for a temporary exemption. The compliance plan shall include at least the following:

(i) A detailed schedule of progressive events and the dates upon which the events are to take place indicating how you will comply with the applicable prohibitions of the Act;

(ii) Documentary evidence of binding contracts for fuel or facilities for the production of fuel which you require to comply with the applicable prohibitions of the Act;

(iii) Any other documentary evidence which indicates your intention to comply with the applicable prohibitions of the Act; and

(iv) A detailed statement of the manner in which you intend to comply with § 506.13 of these regulations requiring the use of fuel mixtures as a condition to the granting of a temporary exemption where the use of fuel mixtures is technically and economically feasible.

(2) The exemption shall not be effective until the compliance plan is approved by ERA.

(3) Revisions of Compliance Plans. If the petitions is granted, you must submit to ERA an updated compliance plan certified by your Chief Executive Officer:

(i) At the end of each 12 month period from the effective date of the exemption;

(ii) Within one month of an alteration of any milestone in the compliance plan, together with the reasons for the alteration and its impact upon the scheduling of all other milestones in the plan; and

(iii) At any time the ERA, in its discretion, determines that a revised compliance plan is necessary to reflect changes in circumstances.

(c) *Enforcement.* Any exemption is subject to termination upon the violation of any provision of the exemption or any provision of the pertinent compliance plan.

Subpart C—Temporary Exemptions for Existing Major Fuel Burning Installations

§ 506.20 Purpose and scope.

(a) This subpart implements the provisions contained in Section 311 of the Act with regard to temporary exemptions for existing installations.

(b) This subpart establishes the criteria and standards which owners or operators of existing installations who petition for a temporary exemption must meet to sustain their burden of proof under the Act.

(c) You must submit all petitions for temporary exemptions for existing installations in accordance with the procedures set out in Part 501 of these regulations.

(d) The duration of any temporary exemption granted under this subpart shall be measured from the date that the applicable prohibition would first apply if the exemption had not been granted.

§ 506.21 Lack of alternate fuel supply.

(a) *Eligibility.* Section 311(a)(1) of the Act provides for a temporary exemption due to lack of an alternate fuel supply. ERA shall grant such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You made a good faith effort to obtain an adequate and reliable supply of an alternate fuel of the quality necessary to conform to the design and operational requirements of the existing installation;

(2) For the period of the proposed exemption, the cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source as defined in § 506.12 (Cost Calculation) of these regulations; and

(3) You will be able to comply with the applicable prohibitions, rule or order at the end of the proposed exemption period.

(b) *Evidence required in support of a petition.* In order to submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A description of the approach and methodology you used to search for an evaluate the use of the alternate fuels you considered.

(2) A description of the detailed design requirements for the existing installation including capacity, alternate fuel capability, and all other specifications;

(3) A description of the specific fuel characteristics of all the fuels which can be used by the existing installation;

(4) Evidence that you sought to obtain the full range of alternate fuels and fuel characteristics which could be used by the existing installation, including bid requests and/or advertisements for supply contracts and all response thereto, as well as evidence of any other arrangements you attempted to make to secure supplies;

(5) Evidence of the contracts or other arrangements you have made to insure a reliable and adequate supply of an alternate fuel at the end of the proposed exemption; and

(6) All data required by § 506.12 (Cost Calculation) of these regulations necessary for computing the cost calculation formula.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 506.16 of these regulations simultaneously with submission of your petition in order to satisfy ERA requirements for petition adequacy. You must submit an updated compliance plan as required by § 506.16 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account any extensions or renewals, may not exceed 10 years.

§ 506.22 Site limitations.

(a) *Eligibility.* Section 311(a)(2) of the Act provides for a temporary exemption due to a site limitation. ERA shall grant you such an exemption if you demonstrate, to the satisfaction of the ERA, that one or more of the following specific physical limitations relevant to the operation of your installation exist which, despite your diligent good faith efforts, cannot be overcome before the end of the proposed exemption period.

(1) Alternate fuels would be inaccessible as a result of a specific physical limitation relevant to the operation of the existing installation;

(2) Transportation facilities for alternate fuels would be unavailable;

(3) Adequate facilities for handling, using or storing an alternate fuel would be unavailable;

(4) Adequate means for controlling and disposing of wastes would be unavailable;

(5) Adequate and reliable supply of water would be unavailable; or

(6) Other site limitations exist which would not permit the operation of the existing installation using an alternate fuel.

(b) *Evidence required in support of the petition.* To submit an adequate petition for review by ERA, you must include in your petition the following substantial evidence to corroborate the above criteria:

(1) Evidence that the site limitation is a physical limitation, and not a requirement of a Federal, State, or local law which could be the basis of an exemption under Section 506.34 (State or local requirements);

(2) Evidence that alternative means for overcoming the specific site limitations were considered, with a detailed description of the efforts made to overcome the site limitations set out in your petition;

(3) Evidence of the equipment or space requirements for which the site limitation is claimed.

(4) Evidence of the contracts or other arrangements you have made to insure that the site limitation will be overcome and that you will comply with the applicable prohibitions at the end of the proposed exemption period. Examples of evidence relevant to establishing a site limitation for purposes of a temporary exemption are as follows:

(i) Detailed documentation of impediments, including rights of way problems, site diagrams, maps of the surrounding areas and other items essential to the showing of a site limitation;

(ii) Identification of transportation facilities relevant to the specific site of the installation and a demonstration why existing transportation facilities cannot be utilized or new facilities constructed;

(iii) Copies of bid requests, advertisements and other evidence of general efforts made to secure alternate transportation facilities;

(iv) Identification of potential fuel storage locations within a reasonable geographic area surrounding the existing installation;

(v) Detailed scale site plans of the entire facility which include those areas not directly involved with the specific installation;

(vi) A specific listing of all equipment necessary and not currently available to properly handle alternate fuel;

(vii) Copies of bid requests, advertisements and other evidence of general efforts made to secure alternative fuel storage facilities;

(viii) Copies of quotes from bona fide suppliers, indicating lead times for purchase and installation of required ancillary storage or handling equipment;

(ix) Specific listing of any equipment necessary and not currently available to properly control and dispose of waste;

(x) Identification of potential alternate waste disposal locations within a reasonable geographic area surrounding the existing installation;

(xi) A description of efforts made to secure offsite disposal areas, including the cost of acquisition of the sites, transportation facilities and waste handling costs involved in their use; and

(xii) Copies of bid requests, advertisements, and other evidence of general efforts made to secure waste control and disposal equipment.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 506.16 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You must submit an updated compliance plan as required by § 506.16 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account any extensions and renewals, may not exceed five years.

§ 506.23 Inability to comply with applicable environmental requirements.

(a) *Eligibility.* Section 311(a)(3) of the Act provides for a temporary exemption due to an inability to comply with applicable environmental requirements. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that despite diligent good faith efforts:

(1) You are unable to comply with rules or orders of ERA without violating applicable Federal or state environmental requirements; and

(2) You will be able to comply with rules or orders of ERA by the end of the temporary exemption period.

(b) *Evidence required in support of the petition.* To submit an adequate petition for review by ERA, you must provide the following substantial evidence to corroborate the above requirements:

(1) A detailed explanation why the facility cannot immediately burn an alternate fuel without violating applicable environmental requirements;

(2) Copies of all technical studies that you have relied upon with regard

V 4 4 / 2 0 J A 2 9 7 9 UMI

to consideration of alternate fuels, pollution control equipment, variances, State Implemenation Plan revisions, and delayed compliance orders;

(3) Copies of requests for bids, responses received, and contracts signed, if any, for an alternate fuel supply and for the purchase and installation of pollution control equipment; and

(4) Copies of correspondence with the State or EPA concerning variances, State Implementation Plan revisions, delayed compliance orders, solid waste permits or approvals, or modifications to National Pollution Disposal Elimination System permits.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 506.16 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You must submit an updated compliance plan as required by § 506.16 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption taking into account extensions and renewals, may not exceed 5 years.

§ 506.24 Future use of synthetic fuels.

(a) *Eligibility.* Section 311(b) of the Act provides for a temporary exemption based upon the future use of synthetic fuels. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You will be able to comply with the applicable rule or orders at the end of the proposed exemption period by the use of synthetic fuel as a primary energy source in your installation; and

(2) That you will not be capable of complying with the applicable rule or orders by using an alternate fuel in your installation before the end of the proposed exemption period.

(b) *Evidence required in support of the petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) Copies of economic and technical feasibility studies pertaining to the use of synthetic fuels by your installation;

(2) Reliable evidence of the financial commitments you have made to construct, operate and maintain equipment which will use synthetic fuel as the primary energy source at the end of the proposed exemption period,

(3) Copies of bid request, advertisements, contracts and/or other agreements relating to the production, purchase, and transportation of synthetic fuel; and

(4) Information with regard to permits that may be required by Federal or State Agencies for the operation of an installation using synthetic fuels.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accord with Section 314 of the Act and § 506.16 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You shall submit an updated compliance plan as required by § 506.16 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption may be granted for a period of up to five years and may be extended for an additional five years, but so extended may not exceed ten years.

§ 506.25 Use of innovative technologies.

(a) *Eligibility.* Section 311(c) of the Act provides for a temporary exemption based on the use of innovation technologies. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You will be able to comply with the applicable rule or order at the end of the proposed exemption period by adoption of a technology for the use of an alternate fuel which ERA has determined to be an innovative technology;

(2) You will not be capable of complying with the applicable rule or order before the end of the proposed exemption period.

(b) *Evidence required in support of the petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements.

(1) Copies of economic and technical feasibility studies pertaining to adoption of an innovative technology for use of an alternate fuel in your installation;

(2) A complete description of the innovative technology you propose to use including explanation of its innovative characteristics, detailed design and engineering specifications, and a description of the fuel characteristic of the alternate fuels which can be used with the innovative technology;

(3) Reliable evidence of the financial and contractual commitments you have made to construct or modify, operate, and maintain equipment which represents an innovative technology for the use of alternate fuel and which will be used at the end of the proposed exemption period; and

(4) Copies of bid requests, advertisements contracts, and/or other arrangements you have made to insure a reliable and adequate supply of an alternate fuel at the end of the proposed exemption.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 506.16 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You shall submit an updated compliance plan as required by § 506.16 of these regulations and as required by the terms and conditions of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption may be granted for a period of up to 5 years and may be extended for an additional 5 years, but so extended may not exceed 10 years.

§ 506.26 Retirement.

(a) *Eligibility.* Section 311(d) of the Act provides for a temporary exemption for retirement. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) The installation will be retired at the expiration of this temporary exemption;

(2) You will not be capable of complying with the applicable prohibitions contained in Title III, Subtitle A of the FUA by consuming coal or other alternate fuels before retirement of the installation.

(b) *Evidence required in support of the petition.* To submit an adequate petition sufficient for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A detailed engineering analysis explaining why the installation cannot use alternate fuels prior to retirement;

(2) Any other documentary evidence which indicates the reasons for retirement and plans for replacement or substitution of the retired installation;

(c) *Compliance plan.* You must submit to ERA a compliance plan in accord with Section 314 of the Act simultaneously with submission of the petition to satisfy ERA requirements for petition adequacy. The petitioner shall submit an updated compliance plan as required by § 506.16 except § 506.16(b)(1)(ii) these regulations and by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account extensions and renewals, may not exceed 5 years.

(e) *Restriction.* In the event this exemption is granted you will not be eligible for any other exemption under Title III, Subtitle B of the Act.

§ 506.27 Public interest exemption.

(a) *Eligibility.* Section 311(c) of the Act provides for a temporary public interest exemption. ERA may grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You are unable to comply with the applicable rule or orders, except in extraordinary circumstances, during the period for which the exemption is requested, but that you will be capable of complying at the end of the proposed exemption period;

(2) You are not eligible for a temporary exemption based on lack of alternate fuel supply, site limitations, environmental requirements, synthetic fuels, innovative technologies, or retirement; and

(3) The granting of the exemption request is in accord with the purposes of the Act and is in the public interest.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must include in your petition substantial evidence to corroborate the above requirements.

(c) *Compliance plan.* You must submit to ERA a compliance plan in accordance with Section 314 of the Act and § 506.16 of these regulations simultaneously with submission of your petition to satisfy ERA requirements for petition adequacy. You must submit an updated compliance plan as required by § 506.16 of these regulations and as required by the terms of any order granting an exemption under this subpart.

(d) *Duration.* This temporary exemption, taking into account extensions and renewals, may not exceed 5 years.

Subpart D—Permanent Exemptions for Existing MFBI's

§ 506.30 Purpose and scope.

(a) This subpart implements the provisions contained in Section 312 of the Act with regard to permanent exemptions for existing major fuel burning installations.

(b) This subpart establishes the criteria and standards which owners or operators of existing installations who petition for a permanent exemption must meet to sustain their burden of proof under the Act.

(c) You must submit all petitions for permanent exemptions for existing installations in accordance with the procedures set out in Part 501 of these regulations.

§ 506.31 Lack of alternate fuel supply.

(a) *Eligibility.* Section 312(a)(1)(A) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported oil. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You made a good faith effort to obtain an adequate and reliable supply of an alternate fuel of the quality necessary to conform to design and operational requirements of the existing installation; and

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source, as defined in § 506.12 (Cost Calculation) of these regulations during the remaining useful life of the existing installation.

(b) *Evidence in support of a petition.* In order to submit an adequate petition for review by ERA, you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A description of the detailed design requirements for the existing installation, including capacity, alternate fuels capability, and all other pertinent specifications;

(2) A description of the specific fuel characteristics of all the fuels which can be used by the existing installations.

(3) Evidence that you sought the full range of alternate fuels and fuel characteristics which could be used by the existing installation, including bid requests, and/or advertisements for supply contracts, all responses you received, as well as evidence of any other arrangements you attempted to make to secure supplies;

(4) All data required by § 506.12 of these regulations (Cost Calculation) necessary for computing the cost calculation formula; and

(5) A description of the approach and methodology you used to search for and evaluate the use of the alternate fuel you considered.

§ 506.32 Site limitations.

(a) *Eligibility.* Section 312 (a)(1)(B) of the Act provides for a permanent exemption due to a site limitation. ERA shall grant you such an exemption if you demonstrate to the satisfaction of the ERA that, despite good faith efforts:

(1) Alternate fuels would be inaccessible as a result of a specific physical limitation to the operation of the existing installation;

(2) Transportation facilities for alternate fuels would be unavailable;

(3) Adequate facilities for handling, using or storing alternate fuels would be unavailable;

(4) Adequate means for controlling and disposing of wastes would be unavailable;

(5) Adequate and reliable supply of water would be unavailable; or

(6) Other site limitations exists which would not permit the operation of the existing installation using an alternate fuel and that these limitations cannot be reasonably expected to be overcome within five years after the application for exemption from the rule or order is filed.

(b) *Evidence required in support of the petition.* In order to submit an adequate petition for review by ERA, you must include in your petition the following substantial evidence to corroborate the above criteria:

(1) Evidence that the site limitation is a physical limitation, and not a requirement of a Federal, State, or local law which could be the basis of an exemption under § 506.34 (State or local requirements);

(2) Evidence that alternate means for overcoming the specific site limitation were sought, with a detailed description of the efforts made to overcome the site limitation set out in your petition; and

(3) Evidence of the equipment or space requirements for which the site limitation is claimed. Examples of evidence relevant to establishing a site limitation for purposes of a permanent exemption are as follows:

(A) Detailed documentation of impediments, including rights of way problems, site diagrams, maps of the surrounding areas and other items essential to the showing of a site limitation;

(B) Identification of transporation facilities relevant to the geographic site of the installation and demonstration showing why existing transportation facilities cannot be utilized or new facilities constructed;

(C) Copies of bid requests, advertisements and evidence of other general efforts made to secure alternative transportation facilities;

(D) Identification of potential alternate fuel storage locations within a reasonable geographic area surrounding the installation;

(E) Detailed scale site plans of the entire facility which include those areas not directly involved with the specific installation;

(F) A specific listing of all equipment necessary and not currently available to properly handle alternate fuels;

(G) Copies of bid requests, advertisements and evidence of other general efforts made to secure alternate storage facilities;

(H) Copies of quotes from bona fide suppliers, indicating lead times for purchase and installation for required ancillary storage or handling equipment;

(I) Specific listing of any equipment necessary and not currently available to properly control and dispose of waste;

(J) Identification of potential alternate waste disposal locations within a reasonable geographic area surrounding the installation;

(K) A description of efforts made to secure off site disposal area transpor-

V 44 / 20 JA 29 79 UMI

tation facilities and waste handling costs involved in their use; and

(L) Copies of bid requests, advertisements, and evidence of other general efforts made to secure waste control and disposal equipment.

§ 506.33 Inability to comply with applicable environmental requirements.

(a) *Eligibility.* Section 312(a)(1)(C) of the Act provides for a permanent exemption due to inability to comply with applicable environmental requirements. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that, despite good faith efforts, you cannot burn alternate fuels without violating applicable environmental requirements within five years after the application for exemption is filed.

(b) *Evidence supporting petition.* To submit an adequate petition for review by ERA, you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A detailed explanation why the facility cannot comply with the prohibition of the Act within five years without violating applicable environmental requirements;

(2) Copies of all technical studies that you have relied upon with regard to consideration of alternate fuels, pollution control equipment, variances, State Implementation Plan revisions, and delayed compliance orders;

(3) Copies of requests for bids, responses received, and contracts signed, if any, for an alternate fuel supply and for the purchase and installation of pollution control equipment; and

(4) Copies of correspondence with the State or EPA concerning variance, State Implementation Plan revisions, delayed compliance orders, solid waste permits or approvals, or modifications to NPDES permits.

(c) *Prepetition actions.* It is recommended that you request a meeting with ERA nad EPA or the appropriate State regulatory agency to discuss options for complying with the prohibitions.

§ 506.34 State or local requirements.

(a) *Eligibility.* Section 312(b) of the Act provides for an exemption due to certain State or Local requirements. ERA may grant you such an exemption if you demonstrate to the satisfaction of the ERA that:

(1) With respect to the site of the installation the operation of the installation using an alternate fuel is infeasible because of a State or Local requirement;

(2) If such State or local requirement is under a building code or nuisance or zoning law, no other exemption under Title III, Subtitle B of the Act could be granted;

(3) You have, in good faith, attempted unsuccessfully to obtain a waiver or a variance from the State and local requirement or have demonstrated why none is available; and

(4) The granting of the exemption would be in the public interest and would be consistent with the purposes of the Act.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA, you must provide the following substantial evidence to corroborate the above requirements:

(1) A copy of the pertinent State or local requirement with its citation and its legislative history;

(2) The identification and location of the administrative body which implements the requirements;

(3) A description of your attempts to obtain a waiver or a variance from the requirements;

(4) A description of any activities you were involved in pertaining to the enactment of the requirements;

(5) A description of equiment, procedures, advance planning time and costs necessary to comply with the requirements;

(6) A detailed description of why compliance is infeasible;

(7) The impact upon you and/or your local community, if any, should your petition be denied;

(8) An explanation of the reasons why granting this exemption would be in the public interest; and

(9) An analysis of why you cannot qualify for an exemption under Title III, Subtitle B if such State or local requirement is under a building code, nuisance or zoning law.

§ 506.35 Cogeneration.

(a) *Eligibility.* Section 312(c) of the Act provides for a permanent exemption for cogeneration. ERA may grant you such an exemption if you demonstrate to the satisfaction of ERA at least the following minimum criteria:

(1) You are unable to comply with the applicable rule or order;

(2) That there are economic and other benefits of cogeneration with petroleum or natural gas which are unobtainable through the use of an alternate fuel.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) Documentary evidence which demonstrates that you considered the use of alternate fuels, including a description of the fuel alternatives you examined and the factors important in your decision to reject the use of alternate fuels. Such factors would include lack of alternate fuel supply, site limitations, or environmental requirements;

(2) Design specifications for the existing unit;

(3) An engineering description of the system, including existing system output and uses thereof, with sufficient detail to insure that the unit qualifies as a cogeneration facility;

(4) A detailed economic and engineering analysis demonstrating the benefits of cogeneration with petroleum or natural gas and demonstrating that these benefits are not obtainable through the use of alternate fuels;

(5) A comparison of the total oil and gas consumption by the existing cogeneration facility and the best feasible alternative, including the effect on oil or gas used by the installation or by other affected parties; and

(6) An analysis of the immediate and long-term economic impacts on parties not directly involved with the facility.

§ 506.36 Permanent exemption for certain fuel mixtures containing natural gas or petroleum.

(a) *Eligibility.* Section 312(d) of the Act provides for a permanent exemption for certain fuel mixtures. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You propose to use a mixture of natural gas or petroleum and an alternate fuel as a primary energy source;

(2) You are not capable of complying with the applicable prohibitions; and

(3) The amount of petroleum or natural gas you propose to use in the mixture will not exceed the minimum percentage of the total Btu heat input of the primary energy sources of the installation needed to maintain operational reliability consistent with maintaining a reasonable level of fuel efficiency.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A complete description of the fuel mixture, component elements of the mixture, and percentage of each component to be utilized;

(2) The design specifications for the unit for which you are requesting an exemption.

(3) An engineering assessment of the proportions of petroleum or natural gas needed to maintain operational reliability and an adequate level of fuel efficiency; and

(4) Documentary evidence which demonstrates that you have considered the use of alternate fuels as a primary energy source. You must include a description of the supply alternatives you considered, the cost and availability of each alternate fuel considered, and the factors important in your decision to reject the use of an alternate fuel as a primary energy source.

(c) *Reporting requirement.* If the exemption is granted, you must submit an annual report to ERA certifying that the affected units have used no more than the percentage of oil or natural gas specified in the exemption order. The certification shall be executed by your Chief Executive Officer.

§ 506.37 Emergency purposes.

(a) *Eligibility.* Section 312(e) of the Act provides for a permanent exemption for emergency purposes. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You are unable to comply with the applicable prohibitions;

(2) You will operate and maintain the installation for emergency purposes only.

(b) *Definition.* For the purposes of this permanent exemption, an emergency exists when operation is necessary for (1) plant protection, or (2) the preservation of human health, including services to hospitals, public transportation facilities, sanitation, water supply and pumping, or other essential services. Secondary services which support essential services are excluded.

(c) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must provide the following substantial evidence to corroborate the above requirements:

(1) Certification executed by the Chief Executive Officer stating that emergency operation under the provisions of this exemption will occur only when plant protection or the preservation of human health is required;

(2) Documentary evidence which demonstrates that you considered the use of alternate fuels, including a description of the alternate fuels you examined and the factors important in your decision to reject the use of alternate fuels. Such factors would include lack of alternate fuel supply, site limitations, environmental requirements, certain State or local requirements, or other reasons which would preclude the use of an alternate fuel;

(3) An estimate of the emergency generating capacity required for the first three 12 month periods of exempt operation to be used for plant protection and for preservation of human health;

(4) A list of specific uses described by the terms plant protection and preservation of human health, as provided in subparagraph (b) above;

(5) The total emergency generating capacity for which exemption is requested; and

(6) Identification and description of previous exemptions, if any, granted under the provisions of this subsection.

(d) *Reporting requirement.* At the end of each 12 month period from the effective date of the exemption you must report to ERA the monthly and annual total generating capacity used and amounts generated under the provisions of this exemption with a description of the purposes of use.

§ 506.38 Product or process requirements.

ERA has made a preliminary determination that this exemption (Section 311(k) of the Act) applies solely to certain nonboiler categories. The Act provides ERA with the discretionary authority to promulgate rules prohibiting oil and natural gas use by these categories of non-boilers. ERA does not intend to issue rules pertaining to those categorical prohibitions at this time. Therefore, we do not intend to issue at this time regulations governing the eligibility and evidence requirements for granting this exemption.

§ 506.39 Scheduled equipment outages.

(a) *Eligibility.* Section 312(1) of the Act provides for a permanent exemption to meet scheduled equipment outages. ERA may grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) You are unable to comply with the applicable rule or order;

(2) Your routine maintenance schedule does not permit continuing operation unless ERA grants this exemption and the reasons why; and

(3) The pertinent unit will be used only during those periods when other units are not in operation for reason of scheduled outages.

(b) *Evidence required in support of a petition.* To submit an adequate petition for review by ERA you must include in your petition the following substantial evidence to corroborate the above requirements:

(1) A schedule of operations for the pertinent unit estimating the number of hours per year and fuel consumption for projected use during the next 12 months of operation;

(2) A description of the maintenance schedule for all units located at the facility specifically identifying those units at the facility which will be out of service for scheduled maintenance at times when the unit for which the exemption is requested, is operating; and

(3) Documentary evidence which demonstrates that you considered the use of alternate fuels, including a description of the alternate fuels you examined and the factors important in your decision to reject the use of alternate fuels. Such factors would include lack of alternate fuels supply, site limitations, environmental requirements, or certain State or local requirements.

(c) *Reporting requirements.* ERA will rely upon the schedule of operation of the unit submitted with the petition as the permanent schedule for exempt use. You must notify ERA in advance of any changes to this schedule.

§ 506.40 Installations served by certain international pipelines.

(a) *Eligibility.* Section 312(j) of the Act provides for a permanent exemption for the use of natural gas by installations served by certain international pipelines. ERA shall grant you such an exemption if you demonstrate to the satisfaction of ERA that:

(1) Your primary source of natural gas is under a contract with a pipeline between the United States and Canada;

(2) The contract was signed before April 21, 1977;

(3) The natural gas would revert to Canada if you are not granted an exemption;

(4) The pipeline serves high priority users;

(5) You would suffer substantial financial penalty if the contract were concelled and there is no available relief from the penalty; and

(6) The revenues from the transportation and sale of natural gas under your contract are essential to the economic vitality of the pipeline.

(b) For purposes of this section the term "high priority user" means any residential user of natural gas or any commercial user whose consumption of natural gas on a peak day is less than 50 MCF.

(c) *Evidence required in support of the petition.* To submit an adequate petition for review by ERA you must provide the following substantial evidence to corroborate the above requirements.

(1) A copy of your contract with international pipeline with the applicable sections underlined;

(2) A certification from the natural gas supplier of the pipeline that the natural gas would revert to Canada upon cancellation of the contract;

(3) A certification by the pipeline that it serves high priority users and a description of those users;

(4) An explanation of the substantial financial penalty that would be incurred;

(5) An explanation of why *force majeure* would not apply to the contract cancellation;

V 4 4 / 2 0

(6) A description of your attempt to transfer your contract as described in Section 731 of the Act; and,

(7) A decision from the Federal Energy Regulatory Commission that the revenues from the transportation and sale of natural gas under your contract are essential to the economic vitality of the pipeline.

PART 507—FUEL CLASSIFICATION AND REPORTING REQUIREMENTS

Sec.

507.1 Purpose and scope.
507.2 Definition of fuels.
507.3 Exclusions from the definition of natural gas.
507.4 Exclusion from the definition of petroleum.
507.5 Reporting requirements of powerplants using natural gas from small wells.
507.6 Reporting requirements on use of commercially unmarketable natural gas.
507.7 Reporting on use of commercially unmarketable by-products of refinery operations

AUTHORITY: Department of Energy Organization Act, Pub. L. 95-91; Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620; Title V of the Independent Offices Appropriation Act of 1952, 65 Stat. 290, 31 U.S.C. 483(a); Executive Order 12009, 42 FR 46267.

§ 507.1 Purpose and scope.

(a) *Purpose.* This subpart excludes certain gaseous and liquid from the terms "natural gas" and "petroleum" for the purposes of the Act and requires reporting by certain users of such excluded fuels.

(b) *Scope.* This subpart applies to use of such excluded fuels in all new and existing electric powerplants and major fuel burning installations.

§ 507.2 Definition of fuels.

(a) Natural gas means any fuel consisting in whole or in part of natural gas; liquid petroleum gas; synthetic gas derived from petroleum or natural gas liquids; or any mixture of natural gas and synthetic gas, except as designated in § 507.3(f) of this part. Natural gas does not include any of the fuels excluded by § 507.3.

(b) Petroleum means crude oil and products derived from crude oil. Petroleum does not include any of the fuels excluded by § 507.4.

§ 507.3 Exclusions from the definition of natural gas.

(a) Natural gas does not include gas specifically designated as an alternate fuel in these regulations § 500.2(a)(7)).

(b) Natural gas does not include that which is commercially unmarketable, by reason of quality, quantity or distance from existing transportation networks. Gas is commercially marketable unless:

(1) No interstate pipeline, intrastate pipeline or local gas distribution company has made a bona fide offer to purchase such gas; and

(2) The gas is transported from the well to the user's powerplant or installation by a direct pipeline performing only that function.

(c) Natural gas does not include that produced by the user from a well, the maximum efficient production rate of which is less than 250 million Btu's per day. For purposes of this subparagraph—

(1) "produced by the user" means

(i) All gas produced by the well, where such gas is delivered for use in the user's facility through a gas delivery, gathering or transportation system which could not deliver such gas to any other market, or

(ii) Only that amount which represents the user's net working (mineral) interest in the gas produced from such wells, where such gas is delivered for use in the user's facility through a gas delivery, gathering or transportation system which would deliver such gas to any other market.

(2) "maximum efficient production rate" (MEPR) means that rate at which production of natural gas and oil may be sustained without damage to the reservoir or the rate which may be sustained without damage to the ultimate recovery of oil or gas through the well. The MEPR must include the Btu value of any crude oil, gas condensate, and natural gas liquids which may be prduced from the well, in addition to that of the natural gas.

(d) Natural gas does not include occluded methane in coal seams;

(e) Natural gas does not include synthetic gas derived from an alternate fuel which is not mixed with natural gas;

(f) Natural gas does not include mixtures of natural gas and synthetic gas derived from alternate fuels for which the person proposing to use the gas certifies to ERA that:

(1) He owns, or is entitled to receive at the point of manufacture, synthetic gas derived from alternate fuels;

(2) The Btu content of such synthetic gas is equal to or greater than the Btu content of the natural gas to be covered by this subsection, plus the approximate Btu content of any natural gas consumed or lost in transportation;

(3) He delivers or arranges for the delivery of, such synthetic gas to a pipeline or pipelines which by transport or displacement are capable of delivering such synthetic gas, mixed with natural gas, to facilities owned by the user; and

(4) All necessary permits, licenses, or approvals from appropriate Federal, State and local agencies (including Indian tribes) have been obtained for construction and operation of the facilities for the manufacture of the synthetic gas involved, except that for purposes of the prohibition under Section 201 (2) of the Act against powerplants being constructed without the capability of using coal or the construction of synthetic gas facilities shall be required under this subparagraph to be certified and documented.

§ 507.4 Exclusion from the definition of petroleum

Petroleum does not include:

(a) Petroleum products specifically designated as alternate fuels in these regulations (§ 500.2(a)(7));

(b) Synthetic gas derived from crude oil and its derivatives;

(c) Liquid petroleum gas;

(d) Petroleum coke or waste gases from non-refinery industrial operations; and

(e) Liquid, solid, or gaseous by-products of refinery operations which are commericallly unmarketable by reason of—

(1) Quality, where the by-products, including components such as butane and propane which can be extracted from the by-products, could not—

(i) Reasonably be expected to be used in non-refinery operations; and

(ii) Be produced and distributed at a price which would provide adequate revenue to pay the operating expenses of this production and distribution; or

(2) Quantity, where—

(i) Insufficient or sporadic quantities of the by-product, including components such as butane and propane which can be extracted from the by-products, are produced to maintain an adequate and reliable supply to a potential user; and

(ii) No dependable market exists for these by-products, or components of the by-products, which can support a price which will provide adequate revenue to pay the operating expenses of the production and distribution of the by-product or its components.

§ 507.5 Reporting requirements of powerplants using natural gas from small wells.

If you own or operate a powerplant which uses or intends to use more than 4.0 billion Btu's per day of natural gas produced from wells with a maximum efficient production rate of less than 250 million Btu's per day (§ 507.3(c), you must report to ERA by January 30, 1980, and annually thereafter:

(a) Facilities using such gas;

(b) Yearly quantities and the Btu value of such gas used in each such facility;

(c) The number, location and total daily production of all such wells which were acquired prior to November 9, 1978; and

(d) the number, location and total daily production of all such wells which were acquired on or after November 9, 1978.

§ 507.6 Reporting requirements on use of commercially unmarketable natural gas.

(a) If you use or intend to use natural gas which you consider to be commercially unmarketable (§ 507.3(b)), you must file a report to ERA by January 30, 1980, and annually thereafter, the following:

(1) The facilities which are burning such gas;

(2) Yearly quantities and the Btu value of such gas used in each such facility;

(3) The number and location of each well producing gas burned in each such facility;

(4) The quantity of gas produced from each such well over the past twelve months and the MEPR of each such well;

(5) A production of the total quantity of such gas you intend to use from such wells over the next twelve months; and

(6) Certification by the Chief Executive Officer that the gas is transported from the well to the facility site by a direct pipeline serving only the single site.

§ 507.7 Reporting on use of commercially unmarketable by-products of refinery operations.

(a) If you use or intend to use gaseous or liquid by-products of refinery operations which you consider to be commercially unmarketable (§ 507.4), you must file a report with ERA by January 30, 1980, and annually thereafter including the following:

(1) The facilities which are burning such by-products;

(2) A description of the gaseous or liquid by-products, including the components of those by-products which could physically be extracted, notwithstanding the fact that you may not own the equipment necessary to perform this extraction;

(3) Monthly production levels of these by-products and their components; and

PART 508—SPECIAL RULE FOR TEMPORARY PUBLIC INTEREST EXEMPTION

[See 44 FR 1694, January 5, 1979]

APPENDIX

FEDERAL ENERGY REGULATORY COMMISSION

[18 CFR Part 285]

[Docket No. RM79-10]

Determination of Powerplant Design Capacity; Notice of Proposed Rulemaking

DECEMBER 29, 1979.

Section 103(a)(18)(D) of the Powerplant and Industrial Fuel Use Act of 1978 (Act) Pub. L. 95-1749, requires the Federal energy Regulatory Commission (Commission) to promulgate rules under which a powerplant's design capacity may be determined. The determination of a powerplant's design capacity is necessary because it is an element of each of the statutory definitions of the terms "peakload powerplant", "intermediate load powerplant", and "base load powerplant" as provided in section 103(a)(18) of the Act. The definitions of those terms will be used to determine the applicability of certain temporary and permanent exemptions from sections 201 and 202 of the Act, which proscribe the use of natural gas or petroleum as a primary energy source in new electric powerplants, under sections 212(g) and 212(h). The definitions are also to be used to determine the applicability of certain temporary and permanent exemptions from sections 301 and 302 of the Act, relating to existing electric powerplants, under sections 311(f), 312(f), and 312(g) of the Act. Finally, determinations regarding design capacity are necessary under section 501 of the act, Electric Utility System Compliance Option, in order to determine if existing electric utilities are in compliance with Title III of the Act.

Discussion

The Commission proposes that the rules contained herein be used to determine a powerplant's design capacity. There are a number of powerplant capacity ratings used by the electric power industry. However, these are used principally for operational purposes, reflecting seasonal weather conditions, degradation of a powerplant, or other factors, and may be substantially different from a powerplant's design capacity. The Commission has established criteria that the design rating should be (1) determinable unequivocably from the manufacturer's data and ordinarily not change during a powerplant's physical life, unless there is substantial modification of the unit; (2) a familiar and recognizable quantity throughout the electric power industry; and (3) a published value readily available to any party interested in obtaining it. These criteria and the proposed rules evolving therefrom were developed in consultation with the Staff of the Secretary of Energy. The proposed rules are summarized below:

(1) The design capacity of a steam-electric generating unit shall be its maximum generator nameplate rating which has been reported to the Energy Information Administration on EIA Form (formerly FPC Form 12).

(2) The design capacity of a combustion turbine shall be its peak load rating as defined by both the American National Standards Institute (ANSI) and by the International Standards Organization (ISO). This peak load rating, which applies to units operating for peaking service with a maximum of 2,000 hours per year operation, is based on an ambient temperature of 59 degrees Fahrenheit (15 degrees Celcius) and a pressure of 14.696 psia (sea level). This should be the capacity rating reported to the Energy Information Administration on EIA Form (formerly FPC Form 12). If those reported ratings are based on different conditions, they will be adjusted to ISO standard conditions for the purposes of the Powerplant and Industrial Fuel Use Act.

(3) The design capacity of a combined cycle unit shall be the sum of its combustion turbine peak load rating, based on ANSI/ISO standard conditions, and the maxim um generator nameplate rating of the steam turbine portion of the unit.

(4) The design capacity of an internal combustion engine shall be the capacity rating which has been reported to the Energy Information Administration on EIA Form —— (formerly FPC Form 12).

The Commission solicits comments from interested parties concerning how well the proposed rules support the criteria established by the Commission. Also, the Commission is interested in any problems or concerns regarding the applicability of the proposed rules in meeting the requirements of the Act.

Public Comment Procedures

Interested persons may participate in this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 30, 1979. Each person submitting a comment should include his name and address, identify the notice (Docket No. RM79-10), and give reasons for any recommendations. An original and 14 conformed copies should be filed with the Secretary of the Commission. Comments should indicate the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. Written comments will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426, during regular business hours.

(Department of Energy Organization Act, P.L. 95-91, E.O. 12009, 42 F.R. 46267, Powerplant and Industrial Fuel Use Act of 1978, P.L. 95-1749)

In consideration of the foregoing, the Commission proposes to amend Chapter I of Title 18, Code of Federal Regulations, as set forth below.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

Chapter I of Title 18 is amended by adding a new Subchapter J to read as follows:

SUBCHAPTER J—REGULATIONS UNDER THE POWERPLANT AND INDUSTRIAL FUEL USE ACT OF 1978

PART 285—RULES GENERALLY APPLICABLE TO POWERPLANT AND INDUSTRIAL USE

§ 285.101 *Determination of powerplant design capacity.* For purposes of this subchapter, a powerplant's design capacity shall be determined as follows:

(a) *Steam-electric generating unit.* The design capacity of a steam-electric generating unit shall be taken as the maximum generator nameplate rating which has been reported to the Energy Information Administration on EIA Form —— (formerly FPC Form 12).

(b) *Combustion turbine.* The design capacity of a combustion turbine shall be taken as its peak load rating as defined by both the American National Standards Institute

JA 29 79
UMI

(ANSI) and by the International Standards Organization (ISO). This peak load rating, which applies to units operating for peaking service with a maximum of 2,000 hours per year operation, is based on an ambient temperature of 59 degrees Fahrenheit (15 degrees Celcius) and a pressure of 14.696 psia (sea level). If capacity ratings as reported to Energy Information Administration on EIA Form —— (formerly FPA Form 12) are based on different conditions, these reported ratings will be adjusted to ISO standard conditions.

(c) *Combined cycle unit.* The design capacity of a combined cycle unit shall be taken as the sum of its combustion turbine peak load rating, based on ANSI/ISO standard conditions, and the maximum generator nameplate rating of the steam turbine portion of the unit.

(d) *Internal combustion engine.* The design capacity of an internal combustion engine shall be taken as the capacity rating which has been reported to the Energy Information Administration on EIA Form —— (formerly FPC Form 12).

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—OFFICE OF PERSONNEL MANAGEMENT

PART 351—REDUCTION IN FORCE

Retention Preference

AGENCY: Office of Personnel Management.

ACTION: Interim regulation with comments invited for consideration in final rulemaking.

SUMMARY: These amendments provide that a preference eligible employee with a service-connected disability of 30 percent or more is entitled (1) to be retained over other preference eligible employees in the determination of retention standing, and (2) to receive a specific notice, with a right of review by the Office, if an agency finds that the employee is not able to fulfill the physical requirements of a position to which he/she would otherwise have been assigned under part 351. The changes are required by Sections 307 (e) and (g) of Pub. L. 95-454 (The Civil Service Reform Act of 1978).

DATES: Effective Date: January 11, 1979, and until final regulations are issued. Comment Date: Written comments will be considered if received no later than April 2, 1979.

ADDRESS: Send written comments to Ted Dow or Thomas A. Glennon, Office of Personnel Management, 1900 E Street, N.W. Washington, D.C. 20415, (202) 632-5623.

FOR FURTHER INFORMATION CONTACT:

Ted Dow or Thomas A. Glennon, Office of Personnel Management 1900 E Street, N.W. Washington, D.C. 20415, (202) 632-5623.

SUPPLEMENTARY INFORMATION: Pursuant to section 533(d)(3) of title 5, U.S.C., the Director finds that good cause exists for making this amendment effective in less than 30 days, in order to provide continuity of operations and to give immediate and timely effect to the appropriate provisions of the Civil Service Reform Act of 1978.

The following specific changes are made in Part 351:

(1) A new Subpart A is added to the regulations, consisting of the statutory requirements for retention preference, as found in Subchapter I of Chapter 35 of title 5, United States Code.

(2) An original § 351.201(g) is included to explain that an employeee in the Senior Executive Service is not covered by Part 351.

(3) Section 351.501(a)(2) is amended to include new retention subgroup AD.

(4) Section 351.501(a)(3) is amended to clarify how employees are ranked within a subgroup.

(5) Section 351.501(e) is amended to delete the definition of employees included in subgroup A, and to incorporate the definition of employees included in new retention subgroup AD.

(6) Section 351.501(f) includes the definition of employees included in subgroup A; this definition was formerly incorporated in § 351.501(e).

(7) Section 351.501(g) includes the definition of employees included in subgroup B; this definition was fromerly incorporated in § 351.501(f).

(8) An original § 351.701(d) is included to cover the right of certain disabled preference eligible employees to receive a notice from the employing agency if it finds that the employee is unable to fulfill the physical requirements of a position which would have otherwise been offered to the employee under part 351.

(9) Section 351.705(a)(3) is amended to permit an agency, at its discretion, to adopt administrative assignment provisions permitting an employee in subgroup III-AD to displace an employee in subgroups III-A or III-B, or an employee in subgroup III-A to displace an an employee in subgroup III-B.

Accordingly 5 CFR Part 351 is amended as follows: (1) by adding a new Subpart A as follows:

PART 351—REDUCTION IN FORCE

Subpart A—Statutory Requirements

Sec.
351.101 Statutory requirements

AUTHORITY: 5 U.S.C. 1302, 3502.

Subpart A—Statutory Requirements

§ 351.101 Statutory requirements.

This subpart sets forth for the benefit of the user the statutory requirments governing retention preference in reduction in force:

§ 3501. Definitions; application.

(a) For the purpose of this subchapter, except section 3504—

(1) "active service" has the meaning given it by section 101 of title 37;

(2) "a retired member of a uniformed service" means a member or former member of a uniformed service who is entitled, under statute, to retired, retirement, or retainer pay on account of his service as such a member; and

(3) a preference elegible employee who is a retired member of a uniformed service is considered a preference elegible only if—

(A) his retirement was based on disability—

(i) resulting from injury or disease received in line of duty as a direct result of armed conflict; or

(ii) caused by an instrumentality of war and incurred in the line of duty during a period of war as defined by sections 101 and 301 of title 38;

(B) his service does not include twenty or more years of full-time active service, regardless of when performed by not including periods of active duty for training; or

(C) on November 30, 1964, he was employed in a position to which this subchapter applies and thereafter he continued to be so employed without a break in service of more than 30 days.

(b) Except as otherwise provided by this subsection and section 3504 of this title, this subchapter applies to each employee in or under an Executive agency. This subchapter does not apply to an employee whose appointment is required by Congress to be confirmed by, or made with the advice and consent of, the Senate, or to a member of the Senior Executitve Service. (Pub. L. 89-554, Sept. 6, 1966, 80 Stat. 428, amended Pub. L. 94-183, § 2(8), Dec. 31, 1975, 89 Stat. 1057, amended Pub. L. 95-454, § 404(a), Oct. 13, 1978, 92 Stat. 1165.

§ 3502. Order of retention.

(a) The Office of Personnel Management shall prescribe regulations for the release of competing employees in a reduction in force which give due effect to—

(1) tenure of employment;

(2) military preference, subject to section 3501(a)(3) of this title;

(3) length of service; and

(4) efficiency or performance ratings.

In computing length of service, a competing employee—

(A) who is not a retired member of a uniformed service is entitled to credit for the

V 4 4 / 2 1

J A 3 0 7 9

UMI

total length of time in active service in the armed forces;

(B) who is a retired member of a uniformed service is entitled to credit for—

(i) the length of time in active service in the armed forces during a war, or in a campaign or expedition for which a campaign badge has been authorized; or

(ii) the total length of time in active service in the armed forces if he is included under section 3501(a)(3) (A), (B), or (C) of this title; and

(C) who is an employee in or under the Department of Agriculture is entitled to credit for service rendered as an employee of a county committee established pursuant to section 590h(b) of title 16, or of a committee or an association of producers described in section 610(b) of title 7.

(b) A preference eligible described in section 2108(3)(C) of this title who has a compensable service-connected disability of 30 percent or more and whose performance has not been rated unacceptable under a performance appraisal system implemented under chapter 43 of this title is entitled to be retained in preference to other preference eligibles.

(c) An employee who is entitled to retention preference and whose performance has not been rated unacceptable under a performance appraisal system implemented under chapter 43 of this title is entitled to be retained in preference to other competing employees. (Pub. L. 89-554, Sept. 6, 1966, 80 Stat. 428, amended Pub. L. 90-367, § 3, June 29, 1968, 82 Stat. 278; Pub. L. 90-623, § 1(23), Oct. 22, 1968, 82 Stat. 1313, amended Pub. L. 95-454, § 307(e), Oct. 13, 1978, 92 Stat. 1149.)

§ 3503. Transfer of functions.

(a) When a function is transferred from one agency to another, each competing employee employed in the function shall be transferred to the receiving agency for employment in a position for which he is qualified before the receiving agency may make an appointment from another source to that position.

(b) When one agency is replaced by another, each competing employee employed in the agency to be replaced shall be transferred to the replacing agency for employment in a position for which he is qualified before the replacing agency may make an appointment from another source to that position. (Pub. L. 89-554, Sept. 6, 1966, 80 Stat. 429, amended Pub. L. 95-454, § 307(f), Oct. 13, 1978, 92 Stat. 1149.

§ 3504. Preference eligibles; retention; physical qualifications; waiver.

(a) In determining qualifications of a preference eligible for retention in a position in the competitive service, an Executive agency, or the government of the District of Columbia, the Office of Personnel Management or other examining agency shall waive—

(1) requirements as to age, height, and weight, unless the requirement is essential to the performance of the duties of the position; and

(2) physical requirements if, in the opinion of the Office or other examining agency, after considering the recommendation of an accredited physician, the preference eligible is physically able to perform efficiently the duties of the position.

(b) If an examining agency determines that, on the basis of evidence before it, a preference eligible under section 2108(3)(C) of this title who has a compensable service-connected disability of 30 percent or more is not able to fulfill the physical requirements of the position, the examining agency shall notify the Office of the determination and, at the same time, the examining agency shall notify the preference eligible of the reasons for the determination and of the right to respond, within 15 days of the date of the notification, to the Office. The Office shall require a demonstration by the appointing authority that the notification was timely sent to the preference eligible's last known address and shall, before the selection of any other person for the position, make a final determination on the physical ability of the preference eligible to perform the duties of the position, taking into account any additional information provided in any such response. When the Office has completed its review of the proposed disqualification on the basis of physical disability, it shall send its findings to the appointing authority and the preference eligible. The appointing authority shall comply with the findings of the Office. The functions of the Office under this subsection may not be delegated. (Pub. L. 89-554, Sept. 6, 1966, 80 Stat. 429, amended Pub. L. 95-454, § 307(g), Oct. 13, 1978, 92 Stat. 1149.)

(2) In § 351.201, paragraph (g) is added. As amended, § 351.201 reads as follows:

§ 351.201 Use of regulations.

(a) Each agency shall follow this part when it releases a competing employee from his/her competitive level by separation, demotion, furlough for more than 30 days, or reassignment requiring displacement, when the release is required because of lack of work, shortage of funds, reorganization, reclassification due to change in duties, or the exercise of reemployment rights or restoration rights.

(b) This part does not require an agency to fill a vacant position. However, when an agency, in its discretion, chooses to fill a vacancy by an employee who has been reached for release from his/her competitive level for one of the reasons named in paragraph (a) of this section, this part shall be followed.

(c) This part does not apply to the change of an employee from regular to substitute in the same pay level in the Post Office Department field service.

(d) An agency authorized to administer alien employee programs under section 444 of the Foreign Service Act of 1946, as amended (22 U.S.C. 889), may include special plans for reduction in force in its alien employee programs. In these special plans an agency may give effect to the labor laws and practices of the locality of employment by supplementing the selection factors in Subparts D and E of this part to the extent consistent with the public interest. Subpart I of this part does not apply to actions taken under the special plans authorized by this paragraph.

(e) This part does not apply to the termination of a temporary promotion or to the return of an employee to the position from which he/she was temporarily promoted or his/her reassignment or demotion to a different position that is not at a lower grade or level than the position from which he/she was temporarily promoted.

(f) This part does not apply to the release from his/her competitive level of a National Guard technician under section 709 of title 32, United States Code.

(g) This part does not apply to an employee in the Senior Executive Service.

(3) In § 351.501, paragraph (a) (2), (3), (e), (f), and (g) are amended. As amended, § 351.501 reads as follows:

§ 351.501 Tenure groups and subgroups—competitive service.

(a) Each agency shall classify the competing employees on a retention register who occupy positions in the competitive service in the following groups and subgroups on the basis of tenure of employment and veteran preference. The descending order of retention standing:

(1) By groups is group I, group II, group III;

(2) Within each group is subgroup AD, subgroup A, subgroup B;

(3) Within each subgroup persons are ranked beginning with the earliest service date.

(b) Group I includes each career employee who is not serving a probationary period. A career employee in an obligated position is in group I only when competing for positions at and below the grade in which he/she last served on a permanent basis.

(c) Group II includes each employee serving a probationary period, each career-conditional employee, and each career employee in an obligated position.

(d) Group III includes each indefinite employee, each employee serving under a temporary appointment pending establishment of register, each employee in status quo, and each employee serving under other nonstatus nontemporary appointment.

(e) Subgroup AD includes each preference eligible employee who has a compensable service-connected disability of 30 percent or more.

(f) Subgroup A includes each preference eligible employee not included in subgroup AD.

(g) Subgroup B includes each nonpreference eligible employee.

(4) In § 351.701 paragraph (d) is added. As amended, § 351.701 reads as follows:

§ 351.701 Qualifications for assignment.

(a) Except as provided in § 351.702, an employee is qualified for assignment under § 351.603 if the employee:

(1) Meets the Office standards and requirements for the position, including any minimum educational requirement;

(2) Is physically qualified for the duties of the position;

(3) Meets any special qualifying condition which the Office has approved for the position; and

(4) Has the capacity, adaptability, and any special skills needed to satisfactorily perform the duties and responsibilities of the position without undue interruption to the activity.

(b) An agency may not consider the sex of an employee as a factor in determining the employee's qualification for a position, except when the position is one for which restriction of certification of eligibles by sex is found justified by the Office.

(c) An employee who is carried on leave of absence because of a compensable injury and is released from his/her competitive level may not be denied an assignment right solely because the employee is not physically qualified for the duties of the position when the physical disqualification resulted from the compensable injury. Such an employee must be afforded appropriate assignment rights subject to his/her recovery as provided by 5 U.S.C. 8151 and Part 353 of this chapter.

(d) If an agency determines that, on the basis of evidence before it, a preference eligible employee who has a compensable service-connected disability of 30 percent or more is not able to fulfill the physical requirements of a position to which the employee would otherwise have been assigned under this Part, the agency must notify the Office of this determination. At the same time, the agency must notify the employee of the reasons for the determination and of the right to respond, within fifteen days of the notification, to the Office, which will require the agency to demonstrate that the notification was timely sent to the employee's last known address. The Office should make a final determination concerning the physical ability of the employee to perform the duties of the position; This determination must be made before the agency may select any other person for the position. When the Office has completed its review of the proposed disqualification on the basis of physical disability, it must send its finding to both the agency and the employee. The agency must comply with the findings of the Office. The functions of the Office under this paragraph may not be delegated to an agency.

(5) In § 351.705 paragraph (a)(3) is amended. The section reads as follows:

§ 351.705 Administrative assignment.

(a) An agency may, in its discretion, adopt provisions which:

(1) Provide for assignments across competitive areas;

(2) Permit a competing employee to displace an employee with lower retention standing in the same subgroup when it cannot make an equally reasonable assignment by displacing an employee in a lower subgroup;

(3) Permit an employee in subgroup III–AD to displace an employee in subgroup III–A or III–B, or permit an employee in subgroup III–A to displace an employee in subgroup III–B; or

(4) Provide competing employees in the excepted service with assignment rights similar to those in § 351.703 and in paragraphs (a) (1), (2), and (3) of this paragraph.

(b) Provisions adopted by an agency under paragraph (a) of this section:

(1) Shall be consistent with this part;

(2) Shall be uniformly and consistently applied in any one reduction in force;

(3) May not provide for the assignment of a less-than-full-time employee to a full-time position;

(4) May not provide for the assignment of an employee in a competitive position to a position in the excepted service; and

(5) May not provide for the assignment of an excepted employee to a position in the competitive service.

(5 U.S.C. 1302, 3502.)

OFFICE OF PERSONNEL MANAGEMENT,
JAMES C. SPRY,
Special Assistant to the Director.

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 2; Docket No. AO-71-A71]

PART 1002—MILK IN THE NEW YORK-NEW JERSEY MARKETING AREA

Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action amends the order based on industry proposals considered at a public hearing held in February 1976. More than the required two-thirds of the dairy farmers who voted in a referendum approved the order as amended.

The amended order changes the procedure for classifying unaccounted for

V 4 4 / 2 1

disappearances (shrinkage) of milk in a handler's operations. Under the change, shrinkage will be classified on essentially the same basis as now provided under most other Federal milk orders. This action will improve slightly the ability of handlers regulated under this order to compete for fluid milk sales with handlers regulated under other nearby Federal milk marketing orders.

EFFECTIVE DATE: March 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Richard A. Glandt, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, 202-447-4829.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing—Issued January 9, 1976; published January 14, 1976 (41 FR 2092).

Extension of Time for Filing Briefs—Issued April 15, 1976; published April 21, 1976 (41 FR 16660).

Recommended Decision (Partial)—Issued April 5, 1977; published April 11, 1977 (42 FR 18950).

Extension of Time for Filing Exceptions to the Recommended Decision (Partial)—Issued May 6, 1977; published May 11, 1977 (42 FR 23841).

Final Decision (Partial)—Issued August 12, 1977; published August 17, 1977 (42 FR 41582).

Order Amending Order—Issued September 27, 1977; published September 30, 1977 (42 FR 52379).

Recommended Decision—Issued October 5, 1978; published October 11, 1978 (43 FR 46853).

Final Decision—Issued December 5, 1978; published December 11, 1978 (43 FR 57914).

FINDINGS AND DETERMINATIONS

The following findings and determinations supplement those that were made when the order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth below.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the New York-New Jersey marketing area.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Sec. 8c (9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the marketing area.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the New York-New Jersey marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

1. Section 1002.41 is revised to read as follows:

§ 1002.41 Classes of utilization.

Subject to the conditions set forth in §§ 1002.42 through 1002.46, the classes of utilization shall be as follows:

(a) Class I-A milk shall be all skim milk and butterfat:

(1) Disposed of as a fluid milk product:

(i) Inside the marketing area;

(ii) As route disposition in an other order marketing area;

(iii) To an other order plant and assigned under such other order to Class I;

(iv) In packaged form to an other order plant if such product is not defined as a fluid milk product under such other order; and

(v) To a partially regulated plant under an other order and there applied as an offset to Class I sales in any other order market;

(2) Contained in inventory of packaged fluid milk products on hand at the end of the month except as provided in paragraph (c)(3) of this section;

(3) In shrinkage assigned to Class I-A pursuant to paragraph (d) of this section; and

(4) Not specifically accounted for as Class I-B or Class II milk.

(b) Class I-B milk shall be all skim milk and butterfat:

(1) Disposed of as a fluid milk product outside the marketing area, except as provided in paragraphs (a)(1) (ii) through (v) and (c) (3), (4) and (5) of this section; and

(2) In shrinkage assigned to Class I-B pursuant to paragraph (d) of this section.

(c) Class II milk shall be all skim milk and butterfat:

(1) Disposed of in any product other than a fluid milk product;

(2) Disposed of as a fluid milk product in bulk to any establishment (other than a plant defined in § 1002.8) at which food products are processed and packed and at which establishment there is no disposition of fluid milk products other than those received in consumer packages for consumption on the premises;

(3) Contained in inventory of fluid milk products in bulk which are on hand at the end of the month, and also with respect to any plant not defined in § 1002.8 (b) or (d) in inventory of fluid milk products in packaged form;

(4) Disposed of as a packaged fluid milk product to an other order plant and assigned under such other order as a fluid milk product to Class II;

(5) Disposed of in bulk as a fluid milk product to an other order plant and assigned to Class II under such other order;

(6) In skim milk represented by the nonfat solids added to a fluid milk product for fortification which is in excess of the volume included within the fluid milk product definition pursuant to § 1002.15;

(7) Contained in fluid milk products that are disposed of for animal feed;

(8) Contained in fluid milk products that are dumped, if the market administrator is notified in advance and is given the opportunity to verify such disposition;

(9) Contained in fluid milk products that are destroyed or lost by a handler in a vehicular accident, flood, fire, or in a similar occurrence beyond his control, to the extent that the quantities destroyed or lost can be verified from records satisfactory to the market administrator;

(10) In shrinkage of skim milk and butterfat, respectively, at a plant that is allocated pursuant to § 1002.42 to the receipts specified in § 1002.42(b)(1), but not to exceed the following:

(i) Two percent of the skim milk and butterfat, respectively, in pool milk received from producers;

(ii) Plus 2.0 percent of the skim milk and butterfat, respectively, in milk received from pool units;

(iii) Plus 2.0 percent of the skim milk and butterfat, respectively, in milk received from units other than pool units, exclusive of the quantity for which Class II utilization was requested by the handler;

(iv) Plus 1.5 percent of the skim milk and butterfat, respectively, in receipts of fluid milk products in bulk from other pool plants;

(v) Plus 1.5 percent of the skim milk and butterfat, respectively, in receipts of fluid milk products in bulk from an other order plant, exclusive of the quantity for which Class II utilization was requested by the operators of both plants;

(vi) Plus 1.5 percent of the skim milk and butterfat, respectively, in receipts of fluid milk products in bulk from plants other than those defined in § 1002.8 (b) or (d), exclusive of the quantity for which Class II utilization was requested by the handler; and

(vii) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (c)(10) (i) through (vi) of this section;

(11) In shrinkage of skim milk and butterfat, respectively, at a plant that is allocated pursuant to § 1002.42 to the receipts specified in § 1002.42(b)(2).

(d) Shrinkage in excess of the amounts assigned to Class II pursuant to paragraph (c) (10) and (11) of this section shall be assigned pro rata to Class I-A and Class I-B in accordance with the respective volumes of skim milk and butterfat actually accounted for in each such class.

2. Section § 1002.42 is revised to read as follows:

§ 1002.42 Shrinkage.

Shrinkage shall be allocated to a handler's receipts at each plant as follows:

(a) Compute the total shrinkage of skim milk and butterfat, respectively, at each plant.

(b) Shrinkage of skim milk and butterfat, respectively, shall be prorated between the respective quantities of skim milk and butterfat:

(1) In receipts described in § 1002.41(c)(10); and

(2) In other source milk not specified in § 1002.41(c)(10) which was received in bulk fluid form.

3. In § 1002.45(a), new subparagraphs (1-a) and (7-a) are added to read as follows:

§ 1002.45 Allocation of skim milk and butterfat classified.

* * * * * * *

(a) * * *

(1-a) Subtract from the total pounds of skim milk in Class II the pounds of skim milk classified as Class II pursuant to § 1002.41(c)(10);

* * * * * * *

(7-a) Add to the remaining pounds of skim milk in Class II the pounds subtracted pursuant to paragraph (a) (1-a) of this section;

* * * * * * *

(Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674))

Effective date: March 1, 1979.

Signed at Washington, D.C., on January 25, 1979.

P. R. "BOBBY" SMITH,
Assistant Secretary for Marketing Services.

[Milk Order No. 126; Docket No. AO-231-A46]

PART 1126—MILK IN THE TEXAS MARKETING AREA

Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action provides for changes in the present order provisions based on industry proposals considered at a public hearing held June 13-14, 1978. The amendments would modify the basis on which a person may qualify as a "producer-handler" under the order. They also would allow handlers to divert milk between pool distributing plants and would modify the payment requirements of the order. The amendments are necessary to reflect current marketing conditions and to insure orderly marketing in the area.

EFFECTIVE DATE: MARCH 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-4824.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued May 26, 1978, published June 1, 1978 (43 FR 23725). Suspension Order: Issued June 22, 1978, published June 27, 1978 (43 FR 27776). Partial Recommended Decision: Issued August 4, 1978, published August 8, 1978 (43 FR 35047). Partial Final Decision: Issued September 1, 1978, published September 8, 1978 (43 FR 40030). Final Order: Issued September 26, 1978, published September 29, 1978 (43 FR 44824). Recommended Decision: Issued October 11, 1978, published October 16, 1978 (43 FR 47584). Final Decision: Issued December 18, 1978, published December 28, 1978 (43 FR 60573).

FINDINGS AND DETERMINATIONS

The findings and determinations set forth below are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the Texas order and of the previously issued amendments to it. All of the previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Texas marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of

JA 30 79 UMI

V 4 4 / 2 1

feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Determination.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Sec. 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Texas marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

1. Section 1126.10(c) is revised as follows:

§ 1126.10 Producer-handler.

* * * * *

(c) Whose receipts of fluid milk products (including such products which he obtains at a location other than his processing plant for distribution on his routes) during the month from pool plants do not exceed the lesser of 5 percent of his Class I disposition during the month or 10,000 pounds;

* * * * *

2. Section 1126.13(d) is revised as follows:

§ 1126.13 Producer milk.

* * * * *

(d) Diverted from a pool plant described in § 1126.7(a) for the account of the handler operating such plant to another pool plant, except that milk diverted to a plant operated by a cooperative association may not be milk of the cooperative association's members. Milk so diverted shall be priced at the plant to which diverted; or

* * * * *

3. Section 1126.73(g)(1) is revised as follows:

§ 1126.73 Payments to producers and to cooperative associations.

* * * * *

(g) * * *

(1) On or before the 26th day of each month, an amount determined by multiplying such receipts during the first 18 days of the month by the Class III price for the preceeding month. If the handler so elects, such price may be adjusted by the butterfat differential specified in § 1126.74 for the preceding month; and

* * * * *

(Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674))

Effective date: March 1, 1979.

Signed at Washington, D.C., on January 25, 1979.

P. R. "BOBBY" SMITH,
Assistant Secretary for Marketing Services.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 73—SCABIES IN CATTLE

Areas Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final Rule.

SUMMARY: The purpose of these amendments is to quarantine portions of Tulare County, a portion of Fresno County, a portion of Kern County, and additional portions of San Luis Obispo County in California; and portions of Nowata County in Oklahoma because of the existence of cattle scabies. Psoroptic cattle scabies was confirmed from specimens collected from cattle in these areas by the Veterinary Services Laboratories in Ames, Iowa. Therefore, in order to prevent the dissemination of cattle scabies it is necessary to quarantine the infested areas.

EFFECTIVE DATE: January 24, 1979.

FOR FUTHER INFORMATION CONTACT:

Dr. Glen O. Schubert, Chief Staff Veterinarian, Sheep, Goat, Equine, and Ectoparasites Staff, USDA, APHIS, VS, Federal Building, Room 737, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8322.

SUPPLEMENTARY INFORMATION: These amendments quarantine portions of Tulare County, a portion of Fresno County, a portion of Kern County, and additional portions of San Luis Obispo County in California; and portions of Nowata County in Oklahoma because of the existence of cattle scabies. The restrictions pertaining to the interstate movement of cattle from quarantined areas as contained in 9 CFR Part 73, as amended, will apply to the areas quarantined.

Accordingly, Part 73, Title 9, Code of Federal Regulations, as amended, restricting the interstate movement of cattle because of scabies, is hereby amended as follows:

1. In § 73.1a, in paragraph (c) relating to the State of California, new paragraphs (c)(6), (c)(7), (c)(8), and (c)(9) are added, and new paragraph (h) relating to the State of Oklahoma is added as set forth below.

§ 73.1a Notice of quarantine.

* * * * *

(c) * * *

(6) The premises of Montgomery Gill, Strathmore, Tulare County, California, comprised of:

(i) *Premises No. 1.* Secs. 16, 17, 18, 19, 20, 21, and 30, T. 20 S., R. 28 E.; secs. 13, 24, and 25, T. 20 S., R. 27 E.; and,

(ii) *Premises No. 2.* Secs. 5, 6, 7, 8, 17, and 18, T. 21 S., R. 28 E.

(7) The premises of Fresno Ag-Recycler, Firebaugh, Fresno County, California, Section 11, T. 13 S., R. 14 E.

(8) The premises of Richard Rudnick, Onyx, Kern County, California, Section 4, T. 26 S., R. 35 E.

(9) The premises of J. R. Davis, Atascadero, San Luis Obispo County, California, comprised of:

(i) *Home premises.* SE¼ of sec. 33, T. 27 S., R. 12 E.; and

(ii) *Paradise Valley premises.* Secs. 18 and 19, T. 28 S., R. 12 E.; secs. 13 and 14, T. 28 S., R. 11 E.

* * * * *

(h) Notice is hereby given that cattle in a certain portion of the State of Oklahoma are affected with scabies, a contagious, infectious, and communicable disease; and, therefore, the following area in such State is hereby quarantined because of said disease:

The premises of the Halsell Ranch, Lenapah, Nowata County, Oklahoma, Sections 31, 34, 35, and 36, T. 28 N., R. 17 E.; E½ sec. 5, E½ sec. 8, sec. 17, and 20, T. 27 N., R. 16 E.; secs. 1, 2, 3, 4, 9, 10, 11, 12, 14, 15, 16, 21, 22, 34, 35, and 36, SW¼ sec. 6, NW¼ sec. 13, N½ sec. 28, T. 27 N., R. 17 E.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111-113, 115, 117, 120, 121, 123-126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

These amendments impose certain further restrictions necessary to prevent the interstate spread of cattle scabies and must be made effective immediately to accomplish their purpose in the public interest. It does not appear that public participation in this rulemaking proceeding would make additional relevant informtion available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable and contrary to the public interest, and good cause is found for making the amendments effective before March 1, 1979.

Done at Washington, D.C., this 24th day of January 1979.

NOTE.—This final rulemaking is being published under emergency procedures as authorized by E.O. 12044 and Secretary's Memorandum 1955. It has been determined by J. K. Atwell, Assistant Deputy Administrator, Animal Health Programs, APHIS, VS, USDA, that the possibility of the spread of cattle scabies into other States or Territories of the United States is severe enough to constitute an emergency which warrants the publication of this quarantine without waiting for public comment. These amendments to the regulations covering cattle scabies will be scheduled for review under provisions of E.O. 12044 and Secretary's Memorandum 1955. The review will include preparation of an Impact Analysis Statement which will be available from Program Services Staff, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782. 301-436-8695.

M. T. GOFF,
Acting Deputy Administrator, Veterinary Services.

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

[No. 79-64]

PART 544—CHARTER AND BYLAWS

Bylaws Regarding Age Limitations on Directors and Officers

JANUARY 24, 1979.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final Rule.

SUMMARY: The 1978 amendments to the Age Discrimination in Employment Act upped the permissible mandatory retirement age from 65 to 70 for all employees and certain officers of Federal savings and loan associations. This rule conforms optional Federal association bylaws to statutory changes, which became effective January 1, 1979. Permissible mandatory retirement age of directors is also raised to 70 in keeping with the spirit of the law.

EFFECTIVE DATE: January 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Harry W. Quillian, Associate General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Telephone number (202) 377-6440.

SUPPLEMENTARY INFORMATION: Pub. L. 95-256, approved April 6, 1978, amended sections of the Age Discrimination in Employment Act of 1976 (ADEA) which affect hiring and retirement policies of Federally-chartered savings and loan associations, and other institutions, which employ 20 or more people. Effective January 1, 1979, Federal associations may not refuse employment to an applicant on the basis of any age between 40 and 70 years. Also, employees may not be involuntarily retired before age 70, except for certain executives. The ADEA permits mandatory retirement at age 65 of persons who (1) have been employed in bona fide executive or high policy-making positions for at least two years immediately preceding retirement, and who (2) upon retirement will be immediately entitled to nonforfeitable annual retirement benefits of $27,000 or more, More detailed information on this exempted category will be provided by the United States Department of Labor. Interested persons may wish to comment on the Labor Department proposal which appeared in the FEDERAL REGISTER on December 12, 1978 (43 FR 58148); the comment period closes February 12, 1979. The Department also published a document regarding employee benefit plans on September 22, 1978 (43 FR 43264).

Federal associations which have adopted Bank Board approved optional bylaws regarding age limitations on employment and retirement of directors and officers (12 CFR 544.6(h) and (i)) may adopt the revised optional bylaws which reflect ADEA changes. Other alternatives are to prepare new bylaws in these categories for Bank Board approval, or to rescind existing optional bylaws without replacing them.

EXPLANATION OF AMENDMENTS: Present paragraphs (h) and (i) of § 544.6 are among Bank Board approved optional bylaws which Federal associations may adopt. Under present optional bylaws (h) and (i), no person may be employed or continue as an officer or director of a Federal association if he or she is over the age chosen by that association, which age may range from 65 to 70. Mandatory retirement age is the same.

As revised to conform to ADEA, paragraphs (h) and (i) set these permissible employment and mandatory retirement age limits at 70, or above, according to the association's policy. Exceptions for mandatory retirement at age 65 of certain executives in accordance with ADEA is also covered. Federal associations which adopt

JA 30 79 UMI

V 4 4 / 2 1 J A 3 0 7 9 UMI

these revised bylaws must be guided by the Labor Department's interpretation of executives who qualify under the exception, and should therefore refer to that Department's proposal noted above and any final action based on it.

The Bank Board finds that (1) notice and public procedure are unnecessary under 5 U.S.C. 553(b) and 12 CFR 508.11 for these amendments because their immediate adoption to reflect the new statutory amendments discussed above is in the public interest, and (2) publication of the amendments for the 30-day notice period specified in 5 U.S.C. 553(d) and 12 CFR 508.14 prior to their effective date is unnecessary for the same reason.

Accordingly, 12 CFR Part 544 of the Rules and Regulations for the Federal Savings and Loan System are hereby amended by revising § 544.6 (h) and (i) to read as set forth below, effective January 31, 1979.

§ 544.6 Amendment to bylaws.

* * * * *

(h) *Age limitation on directors.* No person (fill in any age 70 or above) years of age shall be eligible for election, reelection, appointment or reappointment to the board of directors of the association. No director shall serve as such beyond the annual meeting of the association immediately following his or her becoming (fill in age used above), except that a director serving on (fill in bylaw adoption date) may complete his or her term as director. This age limitation does not apply to an advisory director.

(i) *Age limitation on officers.* No person (fill in any age 70 or above) years of age shall be eligible for election, reelection, appointment or reappointment as a officer of the association. No officer shall serve beyond the annual meeting of the association immediately following his or her becoming (fill in age used above) except that an officer serving on (fill in bylaw adoption date) may complete his or her term. However, an officer shall, at the option of the board of directors, retire at age 65 if he or she has served in an executive or high policy-making post for at least two years imediately prior to retirement, and is immediately entitled to nonforfeitable annual retirement benefits of at least $27,000.

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464. Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., 1071.)

By the Federal Home Loan Bank Board.

J. J. FINN,
Secretary.

CHAPTER VII—NATIONAL CREDIT UNION ADMINISTRATION

PART 701—ORGANIZATION AND OPERATIONS OF FEDERAL CREDIT UNIONS

Final Rule—Refund of Interest

AGENCY: National Credit Union Administration.

ACTION: Final Rule.

SUMMARY: This rule provides Federal credit unions the option to authorize refunds of interest that vary according to different classes of loans.

EFFECTIVE DATE: Immediately effective January 30, 1979.

ADDRESS: National Credit Union Administration, 2025 M Street, N.W., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT:

Robert M. Fenner, Assistant General Counsel, Office of General Counsel, at the above address. Telephone: (202) 632-4870.

SUPPLEMENTARY INFORMATION: On January 3, 1979, the Administration published a proposed amendment (44 FR 895) to its rule on interest refunds (12 CFR 701.24) that would provide Federal credit unions the option to vary interest refunds according to certain classes of loans, and to exclude from a refund any class of loans that has not made a significant contribution to the earnings making the refund possible. Previously, the rule had required that any refund be given to all members who paid interest, and that the amount of each member's refund be determined by the application of a uniform percentage to the amount of interest paid.

Twelve sets of written comments were submitted on the proposal; two from credit union trade associations and ten from individual credit unions. All commentors supported the proposal, some suggesting minor changes. Upon evaluation of the comments, and after further staff review, the amendment is being made final with certain changes as explained below.

SUMMARY OF COMMENTS

Classes of Loans. Section 701.24(b) of the amendment allows the board of directors of a Federal credit union to vary the percentage of an interest refund according to different classifications of loans, such classifications to be established using the criteria of 12 CFR 701.21-1(c): Type of line of credit or loan plan, purpose of the loan and type or value of security in relation to the amount of the loan. (Section 701.21-1(c) is the Administration's regulation providing that interest rates charged on loans may vary according to these same criteria.)

Some commentors suggested that the authority to vary the refund percentage should not be limited to these criteria, but rather, that a more relaxed standard, such as a "reasonable basis for the classification," be imposed. Considering, however, that the legislative history of the interest refund authority indicates it is intended as a "readjustment of the interest rate" (S. Rep. No. 394, 83d Cong., 1st Sess. 1 (1953)), the Administration believes the criteria for allowing varying rates of refund should be consistent with those for varying the interest rate charged. (This is not to say that the board must, in authorizing a varying refund, use the same actual classifications set forth in their loan policy, but only that the same criteria set forth in § 701.21-1(c) be used.)

One commentor suggested that the minutes of the board of directors' meeting reflect the reasoning behind any decision to vary interest refunds. The Administration believes it will be good policy for a board to document its reasons in this fashion, thus making its decision accountable to the members. A new § 701.24(d) has been added accordingly. (Because of this and another addition discussed below, § 701.24(c)-(e) of the proposal have been redesignated as § 701.24(e)-(g), respectively.)

Another commentor questioned whether a board of directors would remain free to declare a uniform refund. It is the Administration's intent only to provide varying refunds as an optional method. Thus, a board of directors may still choose to authorize a strictly uniform refund (same percentage applied to all loans), or the board may choose to authorize a uniform refund subject to exclusion of one or more classes of loans as discussed below.

Excluding classes of Loans. Section 701.24(b) of the proposed amendment would allow the board to exclude any "class" of loans from an interest refund if it determined those loans had not made a significant contribution to the earnings that made the refund possible. The word "classification" has been used in the final rule, for purposes of consistency and in order to clarify that the § 701.21-1(c) criteria apply in defining any group of loans that will be excluded from a refund (subject to the following exception).

The commentors were nearly unanimous in suggesting that, in addition to excluding unprofitable "classifications" of loans from an interest refund, the board be given the discretion to exclude delinquent loans. Some commentors suggested that the regulations specify the degree of delinquency necessary to warrant exclusion. The Administration agrees that it may be appropriate under certain conditions to exclude delinquent loans. First, consistent with the Administration's requirements for reporting delinquent loans, a loan should be excluded only if it is two months or more delinquent. Subject to that minimum standard, the board of directors should make its own good faith determination as to the degree of delinquency beyond which loans have not made a sufficient contribution to earnings to warrant a refund.

The provisions with respect to excluding loans have been revised to reflect these determinations, and in the interest of clarity they have been segregated from the provisions concerning varying the rate of refund and are set forth in the final rule as § 701.24(c).

Three commentors suggested that the board of directors be permitted to exclude classes of loans for reasons other than that of an insignificant contribution to earnings. The Administration believes, however, that this requirement should be retained in as much as Congress has indicated its intent that the refund authority be used to benefit those borrowers who made the refund possible. *See,* S. Rep. No. 394, 83d Cong., 1st Sess. 2 (1953). In this regard, it is not the administration's intent to require detailed cost accounting procedures, but rather only a good faith determination based on a review of the expense and income data available under the credit union's existing accounting procedures.

Reestablishing terminated Accounts. Section 701.24(e) of the rule (§ 701.24(c) in the proposal) provides that, when authorizing an interest refund for a current dividend period, the board may also authorize a refund for any previously omitted dividend period during the calendar year. Two commentors suggested that in authorizing a refund for a previously omitted period, the board not be required to reestablish accounts of persons who were members as of the close of that period but have since terminated their membership. Although the Administration recognizes the administrative burden of this requirement, it is constrained from relaxing it, in that the statutory interest refund authority entitles "* * * members of record at the close of business on the last day of [the] dividend period * * *" to share in the refund for that period (12 U.S.C. 1761b).

IMMEDIATE EFFECTIVE DATE

The amendments are being made immediately effective in order that they may be used by Federal credit unions in their December 31, 1978, refunds (which will in most cases be authorized no later than January 31, 1979).

LAWRENCE CONNELL,
Administrator.

JANUARY 25, 1979.

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and sec. 209, 84 Stat. 1104 (12 U.S.C. 1789))

Accordingly, 12 CFR 701.24 is revised to read as follows:

§ 701.24 Refund of interest.

(a) The board of directors of a Federal credit union may authorize an interest refund to members who paid interest to the credit union during any dividend period and who are members of record at the close of business on the last day of such dividend period.

(b) The amount of interest refund to each member shall be determined as a percentage of the interest paid by the member. Such percentage may vary according to reasonable classifications of loans. Distinctions among classifications shall be based upon one or more of the criteria set forth in 12 CFR 701.21-1(c).

(c) Based upon a determination that such loans have not made a significant contribution to the earnings that make the refund possible, the board of directors may exclude from an interest refund (1) any classification of loans determined in accordance with paragraph (b) of this section, and (2) all loans delinquent at least two months, or all loans delinquent for such greater period as is determined by the board.

(d) The board of directors minutes shall document the reasons for any decision to vary interest refund rates or exclude certain loans from a refund.

(e) The board of directors may authorize an interest refund for a dividend period only during such time as it may declare a dividend. However, if in a given calendar year a credit union has dividend periods more frequent than annual and an interest refund was not authorized for one or more dividend periods, the board, during the time permitted for the declaration of the current dividend, may authorize an interest refund for the current dividend period and for any one or more of the omitted dividend periods.

(f) The board of directors shall not authorize an interest refund for any dividend period unless dividends have been declared and paid on share accounts.

(g) An interest refund shall be recorded on the books of the credit union as a reduction of interest income.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. 9045]

The Raymond Lee Organization, Inc., Et Al.

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: This order, among other things, requires a New York City idea promotion company and two individual parties to cease misrepresenting the nature and value of their services; their qualifications and ability to refine and successfully promote inventions, ideas, and products; and the probability of financial gain to their clients. The firm is further required to include specified statements in promotional literature and contracts which cite the number of recent customers who achieved financial success through the firm's efforts; disclose that additional costs may be incurred; and advise potential purchasers that the company makes no evaluations as to the patentability and marketability of submissions. Additionally, the order requires the firm to provide purchasers with a ten-day cooling-off period in which to cancel their contracts and receive full refunds.

DATES: Complaint issued July 15, 1975. Final order issued November 1, 1978.[1]

FOR FURTHER INFORMATION CONTACT:

Harriet Guber Mulhern, Attorney, New York Regional Office, Federal Trade Commission, 2243-EB Federal Building, 26 Federal Plaza, New York, N.Y. 10007. (212) 264-1232.

SUPPLEMENTARY INFORMATION: In the Matter of The Raymond Lee Organization, Inc., a corporation, Raymond Lee, individually and as an officer of said corporation, and Lawrence Peska, individually and as a former officer of said corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart-Advertising Falsely or Misleadingly: § 13.15 Business status, advantages or connections; 13.15-5 Advertising and promotional

(Sec. 6, 38 Stat. 721; (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended; (15 U.S.C. 45))

The Final Order, including further order requiring report of compliance therewith, is as follows:

FINAL ORDER

This matter having been heard by the Commission upon the appeal of respondents from the initial decision, and upon briefs and oral argument in support thereof and opposition thereto, and the Commission, for the reasons stated in the accompanying opinion, having determined to deny the appeal of respondents and sustain the initial decision with certain modifications:

It is ordered, That the initial decision of the administrative law judge, pages 1-156, be adopted as the Findings of Fact and Conclusions of Law of the Commission, except to the extent inconsistent with, modified or otherwise indicated in the accompanying Opinion.

Other Findings of Fact and Conclusions of Law of the Commission are contained in the accompanying Opinion.

It is further ordered, That the following Order to Cease and Desist be, and it hereby is, entered:

ORDER

I

It is ordered, That The Raymond Lee Organization, Inc., a corporation, its successors and assigns, Raymond Lee, individually and as an officer of said corporation, Lawrence Peska, individually and as a former officer of said corporation, and respondents' officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, with the exception of those offering patent and trademark services to attorneys and registered patent agents only, in connection with the advertising, offering for sale or sale of services relating to the introduction, promotion, development, licensing, marketing or sale of ideas or inventions to industry, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or indirectly, that any of respondents, or their officers, agents, representatives or employees, are registered patent attorneys or patent agents, or are licensed, recognized or qualified to prepare, file, amend or prosecute patent applications before the United States Patent and Trademark Office, or before any patent offices located in foreign countries, unless such is a fact.

2. Representing, directly or indirectly, that respondents provide potential purchasers of their services with an evaluation or appraisal of the patentability, merit or marketability of their inventions or ideas, unless respondents provide fair, competent, and objective evaluations or appraisals of such inventions or ideas.

3. Representing, directly or indirectly, that corporations or other business organizations are seeking inventions, new products or new product ideas through respondents, or that respondents have any special access to such corporations or other business organizations, unless respondents are regularly retained by corporations or other businesses to find new product ideas. Where respondents represent that they have access to, or are retained by, specific corporations or business organizations, respondents must in fact be retained by those corporations or organizations.

4. Representing, directly or indirectly, that any person, firm, organization, governmental agency or official has endorsed, used, or has used and been satisfied with respondents' services, unless such is a fact and such person, firm, organization, governmental agency or official has given prior written consent for such representation.

5. Misrepresenting any material aspect of respondents' services or business practices.

II

It is further ordered, That respondents cease and desist from:

1. Representing, directly or indirectly, that respondents will develop or refine inventions or ideas for new products submitted to them by their customers, unless respondents disclose in conjunction with and adjacent to such representations the following statement:

Our role in the development of your idea or invention is limited solely to the preparation of illustrations and drawings.

Such statement shall be made in a clear and conspicuous manner in print at least as large as the print containing the representation; or in the broadcast media, the statement shall be read at a rate of speed at least as slow as the slowest part of the advertisement.

2. Representing, directly or indirectly, that respondents introduce, promote or negotiate with manufacturers regarding clients' ideas or inventions, unless respondents disclose in conjunction with and adjacent to such representations the statement set forth in paragraph 5 below.

3. Making, directly or indirectly, any earnings or success claims for respondents' clients generally, or for any specific client, unless respondents disclose in conjunction with and adjacent to such representations the statement set forth in paragraph 5 below.

4. Representing, directly or indirectly, that potential purchasers of respondents' services may or will receive financial gain from an idea or invention, unless respondents disclose in conjunction with and adjacent to such representations the statement set forth in paragraph 5 below.

5. Failing to disclose the following statement as required by paragraphs 2, 3, and 4:

"In (*date*), we sold our complete service to (*total number*) customers. Of these, (*number*) received more money from our services than they paid us."

Such statement shall be made in a clear and conspicuous manner in print at least as large as the print containing the representation; or in broadcast media, the statement shall be read at a rate of speed at least as slow as the slowest part of the advertisement; and the following definitions shall apply:

(a) "Total number" includes all clients who contracted for respondents' services during any three of the five calendar years preceding the calendar year in which the representation is made: *Provided*, That clients who contracted only for preliminary product research need not be included. All numbers shall be stated in Arabic numerals.

(b) "Date" shall be the three calendar years selected for purposes of (a) above.

III

It is further ordered, That respondents shall include the disclosure statement set forth in Appendix A at least once in pamphlets, brochures, and other promotional literature, excluding media advertisements:

1. This disclosure shall be made in a clear and conspicuous manner,

(a) In print at least as large as the largest print in the promotional literature other than respondents' name, but in no case smaller than 10 point boldface type;

(b) Set off by a black or colored border that contains only the disclosure statement; and

2. For purposes of the disclosure statement depicted in Appendix A, the following definitions shall apply:

(a) "Total number" includes all clients who contracted for respondents' services during any three of the five calendar years preceding the calendar year in which the promotional literature is distributed; provided that clients who contracted only for preliminary product research need not be included. All numbers shall be stated in Arabic numerals.

(b) "Date" shall be the years selected for purposes of (a) above.

3. If respondents provide fair, competent, and objective evaluations or appraisals, they may omit from the disclosure statement the following language: "We do not evaluate the merits of your idea or tell you whether it can be patented or marketed."

IV

It is further ordered, That respondents shall:

1. Furnish a retainable duplicate copy of the Appendix A disclosure statement with each research agreement, development and marketing contract or other client service contract. Such disclosure statement shall be set forth either on the contract itself or in a separate document that contains no other information and that is attached to and easily detachable from the contract.

2. Have each prospective purchaser of respondents' services acknowledge in writing on the contract or on the separate disclosure document, as appropriate, the receipt of the disclosure statement in Appendix A.

V

It is further ordered, That respondents shall furnish the notice of cancellation set forth in Appendix B to each purchaser of respondents' services, including purchasers of preliminary product research agreements, development and marketing contracts or other client service contracts: *Provided*, That such notices need not be furnished and such rights do not apply when all contact between respondents and a prospective purchaser prior to execution of any such agreement or contract is by mail and/or telephone.

1. The notice of cancellation shall be made in the following manner,

(a) The notice of cancellation form shall be furnished in duplicate, attached to the contract and easily detachable.

(b) The notice shall be in at least 10 point boldface type with a heading in 16 point extra-boldface type.

2. Within ten (10) days after receipt of a signed notice of cancellation, respondents shall refund all monies that have been paid to respondents pursuant to the cancelled transaction.

VI

It is further ordered, That respondents shall maintain the following records for a three-year period and make them available for examination and copying by a duly authorized representative of the Federal Trade Commission, upon reasonable notice, during normal business hours:

1. A copy of each advertisement, each radio script, and each television script and film published or disseminated by respondents.

2. Records disclosing the date or dates each advertisement, script or film was published or disseminated.

3. The name and address of each publication or broadcast media disseminating each advertisement, script or film.

4. A copy of each brochure, flyer or other type of promotional literature published or disseminated by respondents.

5. Copies of signed disclosure statements made pursuant to Part IV of this order.

6. Copies of signed notices of cancellation made pursuant to Part V of this order.

7. Copies of all product research agreements, development and marketing contracts, and other client service contracts.

VII

It is further ordered, That respondents shall:

1. Forthwith deliver a copy of this Order, incorporating its provisions, to all present and future salespersons or other persons engaged in the sale of respondents' services and secure from each such salesperson or other person a signed statement acknowledging receipt of a copy of this Order and their written agreement to adhere thereto.

2. Notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation that may affect compliance obligations arising out of this Order.

3. Promptly notify the Commission for a period of ten (10) years of the discontinuance of any business, occupation or employment concerned with the introduction, promotion development, licensing, marketing or sale of ideas or inventions and of the affiliation with any other such business, occupation or employment. Such notice shall include a description of respondents' ownership, duties and responsibilities in any other such business, occupation or employment. The expiration of this paragraph shall not affect any other obligations arising under this Order.

VIII

It is further ordered, That each individual respondent and every firm, partnership, association, corporation or other business entity that each individual respondent controls or manages, and which offers, or purports to offer, any service or program to assist a customer in making money do forthwith cease and desist from:

1. Misrepresenting, directly or indirectly, the nature or value of such service or program.

2. Misrepresenting, directly or indirectly, the earnings potential of a customer who purchases or uses such service or program.

3. Representing, directly or indirectly, that any person, firm, organization,

V 4 4 / 2 1

governmental agency or official has endorsed, used, or has used and been satisfied with such service or program, unless such is a fact and such person, firm, organization, governmental agency or official has given prior written consent for such representation.

4. Otherwise misrepresenting any material aspect of respondents' service, program or business practices.

IX

It is further ordered, That nothing herein shall relieve respondents of any obligations respecting contracts required by federal law or the law of the state in which the contract is made. When such obligations are inconsistent with any provision of this Order, respondents shall notify the Commission of such inconsistency and request advice as to compliance herewith.

X

It is further ordered, That respondents shall, within sixty (60) days after entry of this Order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this Order.

By the Commission. Commissioner Pitofsky did not participate in consideration of this matter.

APPENDIX A

NOTICE

You should be aware that

- we do not evaluate the merits of your idea or tell you whether it can be patented or marketed;
- in (*date*), we sold our complete service to (*total no.*) customers. Of these, (*no.*) received more money from our services than they paid us;
- in addition to the money you pay us, you may have to pay attorneys' fees, Patent Office fees, and other charges in connection with our program. Ask us for complete price information.

APPENDIX B

NOTICE OF CANCELLATION

If you change your mind, you can cancel this contract within 10 business days after you signed it. If you mailed us the contract, you can cancel it within 10 business days after you put the contract in the mail.

There will be no penalty or obligation if you cancel. Within 10 days after we get your notice, we'll return any money you paid us under this contract.

To cancel this contract, sign and date this notice, or send a letter or telegram of your own telling us you want to cancel. Mail it or give it to us by midnight of the tenth business day after the contract was signed, or after you mailed the contract to us.

Send the notice, letter or telegram to:

name of seller _____

address _____

I hereby cancel this contract.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL ENERGY REGULATORY COMMISSION, DEPARTMENT OF ENERGY

[Docket Nos. RM79-3, RM79-4]

PUBLICATION OF PRESCRIBED MAXIMUM LAWFUL PRICES UNDER THE NATURAL GAS POLICY ACT OF 1978 AND AMENDMENTS TO REGULATIONS RELATING TO MINIMUM RATE GAS

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final Rule.

SUMMARY: Notice is hereby given that the Federal Energy Regulatory Commission is publishing maximum lawful prices and inflation adjustment factors for February, March and April 1979 and is amending its regulations regarding pricing and filing requirements for minimum rate gas. The price of such gas is to be stated in terms of Mcf's rather than MMBtu's. Collection of such price is subject to the blanket affidavit filing requirements for producers.

DATES: *Effective Date:* January 25, 1979.

Comments: Written comments by March 1, 1979.

ADDRESS: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT:

Romulo L. Diaz, Jr., Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol St., NE., Washington, D.C. 20426 (202) 275-3771.

Howard Kilchrist, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol St., NE., Washington, D.C. 20426 (202) 275-4539.

AMENDMENTS TO REGULATIONS

Issued January 25, 1979.

Publication of Prescribed Maximum Lawful Prices Under the Natural Gas Policy Act of 1978 and Amendments to Regulations Relating to Minimum Rate Gas, Docket No. RM79-3, Docket No. RM79-4.

A. BACKGROUND

On December 1, 1978, the Federal Energy Regulatory Commission (Commission) issued Interim Regulations (43 FR 56448, December 1, 1978), implementing the Natural Gas Policy Act of 1978 (NGPA), Pub. L. No. 95-621, 92 Stat. 3350. Sections 271.101(a), 271.202, 271.302, 271.402(a), 271.602, 271.702, 271.802, 271.902 and 273.201(a)(1) of the interim regulations set forth the maximum lawful prices per MMBtu for deliveries made in December 1978 and January 1979. Section 271.102(c) sets forth the monthly inflation adjustment factors. Section 101(b)(6) of the NGPA requires that the Commission compute and make available maximum lawful prices and inflation adjustments at least five days before the beginning of any month for which such figures apply. Pursuant to that mandate, the Commission hereby amends its interim regulations implementing the NGPA to add to the existing price tables, prices and inflation adjustments for the months of February, March, and April 1979.

The Commission has received many comments through its written comment procedures, toll-free telephone inquiry line, and NGPA Implementation Seminars regarding pricing and filing requirements relating to minimum rate gas as defined in § 271.402(b)(a) of the interim regulations. Prices applicable to minimum rate gas were included in §§ 271.101(a) and 271.402(a) which set forth maximum ceiling prices prescribed under sections 104 and 106(a) of the NGPA for natural gas committed or dedicated to interstate commerce as of November 8, 1978. Final regulations issued by the Commission on November 17, 1978 (43 FR 55756, November 29, 1978), and amended by the Commission on December 28, 1978 (44 FR 1100, January 4, 1979) established filing requirements for collection of those prices. In response to comments received on pricing and filing, the Commission has decided to amend these regulations to restate the price for minimum rate gas and to insure that collection of that price is subject to the mandatory blanket affidavit filing requirements imposed in § 154.94(h).

B. SUMMARY OF AMENDED REGULATIONS

The interim regulations are being modified to include the maximum lawful prices and inflation adjustments for February, March, and April 1979. The subparts of Part 271 of Subchapter H of the interim regulations so affected, and the types of natural gas to which these subparts apply, are as follows: Subpart A—Summary. Tables and Caculations (§§ 271.101(a) and 271.102(c)); Subpart B—New Natural Gas and Certain Natural Gas Produced from the Outer Continental Shelf (§ 271.202); Subpart C—New, Onshore Production Wells (§ 271.302); Subpart D—Natural Gas Committed or Dedicated to Interstate Commerce (§ 271.402(a)); Subpart F—Intrastate Rollover Contracts (§ 271.602); Subpart G—High-Cost Natural Gas (§ 271.702); Subpart H—Stripper Well Natural Gas (§ 271.802); and Subpart I—Other Categories of Natural Gas (§ 271.902). Further, Part 273 of Subchapter H is amended by adding the maximum lawful prices for February, March, and April 1979 to Subpart B—Interim Collection Authority (§ 273.201(a)(1)).

The interim regulations are also being amended to express the price for minimum rate gas in terms of Mcf's rather than MMBtu's. This modification is necessary because the April 20, 1977, minimum rate of 18.0 cents per Mcf established in § 2.56b(b) of this chapter is not subject to an adjustment for Btu content, unlike the other maximum lawful prices set forth in the tables in §§ 271.101(a) and 271.402(a). In order to correctly state the price for minimum rate gas, we shall remove the category "Minimum rate gas" from the tables in §§ 271.101(a) and 271.402(a) which list the maximum lawful prices for gas subject to the provisions of sections 104 and 106(a) of the NGPA and do so in terms of MMBtu's. A separate paragraph (c)(4) has been added to § 271.402 to indicate the price per Mcf to be charged under the NGPA for minimum rate gas in December 1978, and in January, February, March, and April 1979.[1]

A conforming amendment relating to minimum rate gas is required in § 154.94(h) of the final regulations setting forth the filing requirements for producers qualifying for a maximum lawful price under section 104(b)(1)(A) or 106(a) of the NGPA. Under § 154.94(h)(1), a producer is required to file a blanket affidavit under which he may collect the applicable maximum lawful price where he has established qualification for a base rate under the Natural Gas Act. One of the prerequisites for establishment of such base rate, as set forth in § 154.94(h)(2)(ii), is that the collection of the base rate be permissible under the applicable sales contract. However, application of this rule would exclude minimum rate gas from the blanket affidavit procedures because minimum rate gas is permitted to be sold at a rate in excess of the applicable sales contract rate. In order to make it clear that the blanket affidavit filing procedure applies to minimum rate gas, we shall amend § 154.94(h)(2)(ii) to provide an exception to the requirement that the collection of the base rate be permissible under the applicable sales contract, for minimum rate gas. Affidavits previously submitted which reflect the "Applicable NGPA Rate" for minimum rate gas in terms of a price per MMBtu need not be amended to reflect that such rate is a price per Mcf. The Commission will consider such previously submitted affidavits to conform with the amendments adopted herein.

[1] For consistency with other NGPA prices, a producer may convert the price per Mcf to an MMBtu equivalent, if necessary.

C. COMMENT PROCEDURES

Although these amendments to the regulations are being issued effective immediately, interested persons are invited to submit written comments, data, views, or arguments with respect to this action. An original and 14 copies should be filed with the Secretary of the Commission. All comments received prior to March 1, 1979, will be considered by the Commission, and if appropriate, further revisions will be made. All written submissions will be placed in the Commission's public files and will be available for public inspection in the Commission's Office of Public Information, 825 North Capitol Street, N.E., Washington, D.C. 20426, during regular business hours. Comments should be submitted to the FERC, 825 North Capitol Street, N.E., Washington, D.C. 20426 and should reference Docket Nos. RM79-3 and RM79-4.

D. EFFECTIVE DATE

The Commission is making these amendments effective upon the date of issuance of this order upon a finding that good cause exists to proceed without compliance with the notice, public procedure and effective date provisions of 5 U.S.C. 553. The NGPA requires that maximum lawful prices and inflation adjustments be made available at least five days before the beginning of the month to which they apply. Unless amendments regarding minimum rate gas are made effective immediately, and prior to the termination of the 60-day period for comments on the interim regulations, producers (most of whom bill in January for deliveries made in December) may bill and file incorrectly for minimum rate gas. Thus good cause exists to make all of these amendments effective upon issuance of this order.

(Natural Gas Act, as amended, (15 U.S.C. 717 *et seq.*), Energy Supply and Environmental Coordination Act, (15 U.S.C. 791, *et seq.*), Federal Energy Administration Act, (15 U.S.C. 761, *et seq.*), Natural Gas Policy Act of 1978, Pub. L. 95-621, 92 Stat. 3350, Department of Energy Organization Act, Pub. L. 95-91, E. O. 12009, 42 F.R. 46267).)

In consideration of the foregoing, Part 154 of Subchapter E and Parts 271 and 273 of Subchapter H, Chapter I, Title 18, Code of Federal Regulations, are amended as set forth below, effective immediately.

By the Commission.

KENNETH F. PLUMB,
Secretary.

SUBCHAPTER E—REGULATIONS UNDER NATURAL GAS ACT

PART 154—RATE SCHEDULES AND TARIFFS

§ 154.94 [Amended]

1. Section 154.94 is amended in paragraph (h)(2)(ii) by inserting at the beginning of subclause (C) the phrase, "except in the case of minimum rate gas (as defined in § 271.402(b)(9) of this chapter),".

SUBCHAPTER H—REGULATION OF NATURAL GAS SALES UNDER THE NATURAL GAS POLICY ACT OF 1978

PART 271—CEILING PRICES

§ 271.101 [Amended]

2. Section 271.101(a) is amended by revising Tables I and II to read as follows:

JA 30 79 UMI

V 4 4 / 2 1

[6450-01-C]

Table I - Summary of certain gas ceiling prices.

(Prices in $/MMBtu)

Subpart of Part 271	NGPA Section	Category of Gas	Maximum Lawful Price for Deliveries made in:				
			Dec. 1978	Jan. 1979	Feb. 1979	Mar. 1979	Apr. 1979
B	102	New Natural Gas, Certain OCS Gas	$2.078	$2.096	$2.116	$2.136	$2.156
C	103	New, Onshore Production Wells	1.969	1.980	1.993	2.006	2.019

March	1.00667
April	1.00667

4. Section 271.202 is amended to read as follows:

§ 271.202 Maximum lawful price.

The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

If delivery occurs in the calendar month of:	*The maximum lawful price is:*
December 1978	$2.078
January 1979	2.096
February 1979	2.116
March 1979	2.136
April 1979	2.156

5. Section 271.302 is amended to read as follows:

§ 271.302 Maximum lawful price.

The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

If delivery occurs in the calendar month of:	*The maximum lawful price is:*
December 1978	$1.969
January 1979	1.980
February 1979	1.993
March 1979	2.006
April 1979	2.019

6. Section 271.402 is amended in paragraph (a) to read as follows:

§ 271.402 Maximum lawful prices.

(a) *Ceiling prices.* Unless a different rate is applicable under paragraph (c) of the section, the maximum lawful price for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

NGPA Section	Category of Natural Gas	Type of Sale or Contract	Maximum Lawful Price per MMBtu for Deliveries Made in: Dec. 1978	Jan. 1979	Feb. 1979	Mar. 1979	Apr. 1979
104	Post-1974 gas	All producers	$1.630	$1.639	$1.650	$1.661	$1.672
	1973-1974 Biennium gas	Small producer	1.379	1.387	1.396	1.405	1.414
		Large producer	1.058	1.064	1.071	1.078	1.085
106(a)	Interstate Rollover gas	Small producer	0.702	0.715	0.715	0.715	0.715
		Large producer	0.603	0.607	0.611	0.615	0.619
104	Replacement contract gas or re-completion gas	Small producer	0.771	0.775	0.780	0.785	0.790
		Large producer	0.593	0.596	0.600	0.604	0.608
	Flowing gas	Small producer	0.393	0.395	0.398	0.401	0.404
		Large producer	0.332	0.334	0.336	0.338	0.340
	Certain Permian Basin gas	Small producer	0.462	0.465	0.468	0.471	0.474
		Large producer	0.405	0.407	0.410	0.413	0.416

		Large producer	0.393	0.395	0.398	0.401	0.404
	Certain Appalachian Basin gas	North subarea contracts dated after 10-7-69	0.368	0.370	0.372	0.374	0.376
		Other Contracts	0.344	0.346	0.348	0.350	0.352

§ 271.402 [Amended]

7. Section 271.402 is amended in the last line of paragraph (b)(9) by striking out "(a)" and inserting in lieu thereof, "(c)".

8. Section 271.402 is amended in paragraph (c)(1) by deleting "2.56(h)", and inserting in lieu thereof, "2.56b(h)"; in paragraph (c)(2) by deleting "(d)(1)", and inserting in lieu thereof, "(c)(1)" and in paragraph (c)(3) by deleting "(d)(1), or (d)(2)", and inserting in lieu thereof, "(c)(1), or (c)(2)".

9. Section 271.402 is amended in paragraph (c) by adding a new subparagraph (4) to read as follows:

§ 271.402 Maximum lawful prices.

• • • • • •

(c) *Applicable higher rates.* • • •

(4) Notwithstanding § 270.101(b), the minimum rate for minimum rate gas (at 14.73 psia and 60°F) is the amount determined in the following table:

If delivery occurs in the calendar month of:	*The rate per Mcf for minimum rate gas is:*
December 1978	$0.203
January 1979	0.204
February 1979	0.205
March 1979	0.206
April 1979	0.207

10. Section 271.602 is amended to read as follows:

§ 271.602 Maximum lawful price.

(a) The maximum lawful price for a first sale of natural gas under an intrastate roll- over contract to which section 106(b)(1) of the NGPA applies shall be the higher of:

(1) (i) The maximum lawful price paid under the expired contract, per MMBtu, in the case of the month in which the effective date of such rollover contract occurs; and

(ii) In the case of any month thereafter, the maximum lawful price, per MMBtu, prescribed under this paragraph for the preceding month adjusted for inflation in accordance with § 271.102; or

(2) The amount determined under the following table:

If delivery occurs in the calendar month of:	*The maximum lawful price is:*
December 1978	$1.121
January 1979	1.128
February 1979	1.136
March 1979	1.144
April 1979	1.152

(b) The maximum lawful price, per MMBtu, for natural gas to which section 106(b)(2) of the NGPA (relating to certain State or Indian natural gas production interests) applies shall be the amount determined in accordance with the following table in lieu of the amount determined under the table under paragraph (a)(2) of this section:

If delivery occurs in the calendar month of:	*The maximum lawful price is:*
December 1978	$2.078
January 1979	2.096
February 1979	2.116
March 1979	2.136
April 1979	2.156

11. Section 271.702 is amended to read as follows:

§ 271.702 Maximum lawful price.

The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

If delivery occurs in the calendar month of:	*The maximum lawful price is:*
December 1978	$2.078
January 1979	2.096
February 1979	2.116
March 1979	2.136
April 1979	2.156

12. Section 271.802 is amended to read as follows:

§ 271.802 Maximum lawful price.

The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

If delivery occurs in the calendar month of:	*The maximum lawful price is:*
December 1978	$2.224
January 1979	2.243
February 1979	2.264
March 1979	2.285
April 1979	2.306

13. Section 271.902 is amended to read as follows:

§ 271.902 Maximum lawful price.

The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

If delivery occurs in the calendar month of:	*The maximum lawful price is:*
December 1978	$1.630
January 1979	1.639
February 1979	1.650
March 1979	1.661
April 1979	1.672

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER D—DRUGS FOR HUMAN USE

[Docket No. 78N-0341]

ANTIBIOTIC DRUGS

Combination Otic Solutions and Suspensions

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document revokes the provisions for certification or release of certain combination otic solutions and suspensions. The products are regarded as lacking substantial evidence of effectiveness.

DATES: Effective Monday, March 12, 1979; objections and requests for hearing by March 1, 1979.

ADDRESS: Objections and requests for hearing to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

William R. Durbin, Jr., Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER notices cited below, the Food and Drug Administration (FDA) classified certain combination otic solutions and suspensions as possibly effective or lacking substantial evidence of effectiveness for their labeled indications.

In accordance with provisions in a notice published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623), the products were allowed to remain on the market based upon medically justified need, pending reevaluation of the published classification or completion of scientific studies to determine their effectiveness under the Drug Efficacy Study Implementation (DESI) program.

One sponsor, Burroughs Wellcome & Co., Inc., submitted testimonial letters concerning Aerosporin Otic Solution and Lidosporin Otic Solution. The

PART 273—COLLECTION AUTHORITY; REFUNDS

14. Section 273.201(a)(1) is amended to read as follows:

§ 273.201 Transitional rule for certain new wells.

(a) *General rule.* (1) The price determined under the following table may be charged and collected for any first sale of natural gas from a new well to which this section applies:

J A 3 0 7 9 UMI

V 4 4 / 2 1

submissions provided no evidence that adequate and well-controlled studies, as required by §§ 300.50 and 314.111(a)(5)(ii) (21 CFR 300.50 and 314.111(a)(5)(ii)), had been conducted. Isolated case reports, random experience, and reports lacking the details that permit scientific evaluation cannot be considered (see § 314.111(a)(5)(ii)(c)). The submissions therefore did not support the efficacy of the firm's products.

Because no other person has submitted data or protocols or has conducted additional clinical studies on the drug products described below, the drugs are now reclassified as lacking substantial evidence of effectiveness. The temporary exemption granted by the December 14, 1972 notice, as it pertains to these drugs, is revoked in a notice appearing elsewhere in this issue of the FEDERAL REGISTER.

All of these products are antibiotic drugs subject to the provisions of section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357). If a certification regulation exists for a product listed below, the applicable regulation is cited. Products without a regulation citation have been released pending a final determination as to their effectiveness.

1. DESI 8426, published October 23, 1971 (36 FR 20546):

New Drug Application (NDA) 60-756; Aerosporin Otic Solution containing polymyxin B sulfate, acetic acid, and propylene glycol; Burroughs Wellcome & Co., Inc., 3030 Cornwallis Rd., Research Tringle Park, NC 27709 (21 CFR 448.430).

2. DESI 8674, published June 29, 1972 (37 FR 12855):

NDA 50-208; Neomycin-Polymyxin Otic with Hydrocortisone and Diperodon containing neomycin sulfate, polymyxin B sulfate, hydrocortisone, and diperodon hydrochloride; Kasco Laboratories, Inc., Cantiague Rd., Hicksville, NY 11802.

NDA 50-224; Neo-Polycin Otic Suspension containing neomycin sulfate, polymyxin B sulfate, and dyclonine hydrochloride; Dow Pharmaceuticals, Division Dow Chemical Co., P.O. Box 68511, Indianapolis, IN 46268.

NDA 50-225; Neo-Polycin HC Otic Suspension containing neomycin sulfate, polymyxin B sulfate, dyclonine hydrochloride, and hydrocortisone acetate; Dow Pharmaceuticals.

NDA 60-080; Auracort Otic Solution containing neomycin sulfate, polymyxin B sulfate, pramoxine hydrochloride, and hydrocortisone; Philips Roxane Laboratories, Division of Philips Roxane, Inc., 330 Oak St., P.O. Box 1738, Columbus, OH 43216.

NDA's 60-787, 61-669; Bro-Parin Sterile Otic Suspension containing polymyxin B sulfate, neomycin sulfate, sodium heparin, and hydrocortisone; Riker Laboratories, Inc., Subsidiary 3M Co., 19901 Nordhoff St., Northridge, CA 91324 (21 CFR 444.442c).

NDA 60-927; Florotic Otic Suspension containing nystatin, neomycin sulfate, polymyxin B sulfate, and fludrocortisone acetate; E.R. Squibb & Sons, Inc., P.O. Box 400, Princeton, NJ 08540 (21 CFR 449.450).

3. DESI 50171, published August 19, 1971 (36 FR 16129):

NDA 50-171; Lidosporin Otic Solution containing polymyxin B sulfate, lidocaine hydrochloride, and propylene glycol; Burroughs Wellcome & Co., Inc.

4. DESI 50205, published August 19, 1971 (36 FR 16130):

NDA 50-205; that part pertaining to Chloromycetin Otic containing chloramphenicol and benzocaine; Parke, Davis & Co., GPO Box 118, Joseph Campau at the River, Detroit, MI 48232 (21 CFR 455.410).

5. Two other products, not reviewed by the National Academy of Sciences-National Research Council, are identical or similar to a product named above and have been released pending a final efficacy determination. These drugs are also considered lacking substantial evidence of effectiveness for their labeled indications and are affected by this notice:

a. Otoreid-HC (NDA-60-688), containing neomycin sulfate, polymyxin B sulfate, diperodon, and hydrocortisone, Reid-Provident Laboratories, Inc., 25 Fifth St. NW., Atlanta, GA 30308; and

b. Otocort (NDA 60-730), containing neomycin sulfate, polymyxin B sulfate, hydrocortisone, and dibucaine hydrochloride, Lemmon Pharmacal Co., P.O. Box 30, Sellersville, PA 18960.

The combination of neomycin-polymyxin (neomycin sulfate and polymyxin B sulfate), which also was named in the December 14, 1972 notice, has never been approved for marketing.

In addition to the drugs named above, some of the DESI notices applied to other preparations not included in this notice. They have been either reclassified as effective or withdrawn from the market.

Accordingly, the Director of the Bureau of Drugs concludes that (1) the antibiotic drug regulations should be amended to revoke provisions for certification of all of the above named drugs that are covered by a certification regulation and (2) no certification regulation should be issued for any product named above or for any identical, similar, or related product, as defined in § 310.6 (21 CFR 310.6), that, in the absence of a certification regulation, has been released pending a final effectiveness determination. The products are no longer eligible for release.

In a continuing effort to maintain regulations that are current, the provisions for certifying chloramphenicol topical are being revoked because no requests for certification of that product have been received.

The Director has determined that this document does not contain an agency action covered by 21 CFR 25.1(b); therefore, consideration by the agency of the need for preparing an environmental impact statement is not required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 502, 507, 52 Stat. 1050-1051 as amended, 59 Stat. 463 as amended (21 U.S.C. 352, 357)) and under authority delegated to the Commissioner (21 CFR 5.1 and redelegated to the Director of the Bureau of Drugs (21 CFR 5.78), Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

PART 444—OLIGOSACCHARIDE ANTIBIOTIC DRUGS

§ 444.442c [Revoked]

1. In Part 444 by revoking § 444.442c *Neomycin sulfate-polymyxin B sulfate-hydrocortisone otic suspension; neomycin sulfate-polymyxin B sulfate-hydrocortisone-sodium heparin otic suspension* and marking it "Reserved."

PART 448—PEPTIDE ANTIBIOTIC DRUGS

2. In Part 448 by revising § 448.430 to read as follows:

§ 448.430 Polymyxin B sulfate-hydrocortisone otic solution.

(a) *Requirements for certification—*(1) *Standards of identity, strength, quality, and purity.* Polymyxin B sulfate-hydrocortisone otic solution contains in each milliliter 10,000 units of polymyxin B and 5 milligrams of hydrocortisone in a suitable and harmless vehicle. Its polymyxin B sulfate content is satisfactory if it contains not less than 90 percent and not more than 130 percent of the number of units of polymyxin B that it is represented to contain. It is sterile. Its pH is not less than 5.0 and not more than 7.0. The polymyxin B sulfate used conforms to the standards prescribed by § 448.30(a)(1), except safety.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 432.5 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 431.1 of this chapter, each such request shall contain the following:

(i) Results of tests and assays on—

(*a*) The polymyxin B sulfate used in making the batch for potency, loss on drying, pH, and identity; and

(*b*) The batch for potency, sterility, and pH.

(ii) Samples required:

(*a*) The polymyxin B sulfate used in making the batch: 10 packages, each containing approximately 300 milligrams.

(*b*) The batch:

(*1*) For all tests except sterility: A minimum of 5 immediate containers.

(*2*) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filling operation.

(b) *Tests and methods of assay—*(1) *Potency.* Proceed as directed in § 436.105 of this chapter, preparing the sample for assay as follows: Dilute an accurately measured representative portion of the sample (usually 1.0 milliliter) with 10 percent potassium phosphate buffer, pH 6.0 (solution 6), to obtain a stock solution of convenient concentration. Further dilute an aliquot of the stock solution with solution 6 to the reference concentration of 10 units of polymyxin B per milliliter (estimated).

(2) *Sterility.* Proceed as directed in § 436.20 of this chapter, using the method described in paragraph (e)(1) of that section, except if the steroid prevents solubilization, use 0.25 milliliter of the sample in lieu of 1 milliliter and proceed as directed in paragraph (e)(2) of that section.

(3) *pH.* Proceed as directed in § 436.202 of this chapter using the undiluted solution.

JA 30 79 UMI

PART 449—ANTIFUNGAL ANTIBIOTIC DRUGS

§ 449.450 [Revoked]

3. In Part 449 by revoking § 449.450 *Nystatin-neomycin sulfate-polymyxin B sulfate-fludrocortisone acetate for otic solution* and marking Subpart E "Reserved."

PART 455—CERTAIN OTHER ANTIBIOTIC DRUGS

4. Part 455 is amended:

a. By revising § 455.410 to read as follows:

§ 455.410 Chloramphenicol otic.

(a) *Requirements for certification—*(1) *Standards of identity, strength, quality, and purity.* Chloramphenicol otic is a solution of chloramphenicol in a suitable and harmless vehicle. Each milliliter contains 5.0 milligrams of chloramphenicol. Its potency is satisfactory if it is not less than 90 percent and not more than 130 percent of the number of milligrams of chloramphenicol that it is represented to contain. It is sterile. Its moisture content is not more than 2 percent. Its pH is not less than 4 and not more than 8. The chloramphenicol used conforms to the standards prescribed by § 455.10(a)(1), except safety.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 432.5 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 431.1 of this chapter, each such request shall contain the following:

(i) Results of tests and assays on—

(*a*) The chloramphenicol used in making the batch for potency, pH, specific rotation, melting range, absorptivity, and crystallinity; and

(*b*) The batch for potency, sterility, moisture, and pH.

(ii) Samples required:

(*a*) The chloramphenicol used in making the batch: 10 packages, each containing approximately 300 milligrams.

(*b*) The batch:

(*1*) For all tests except sterility: A minimum of 20 immediate containers.

(*2*) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filling operation.

(b) *Tests and methods of assay—*(1) *Potency.* Proceed as directed in § 436.106 of this chapter, preparing the sample for assay as follows: Dilute an accurately measured representative portion of the sample with sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to obtain a stock solution of convenient concentration. Further dilute an aliquot of the stock solution with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(2) *Sterility.* Proceed as directed in § 436.20 of this chapter, using the method described in paragraph (e)(1) of that section.

(3) *Moisture.* Proceed as directed in § 436.201 of this chapter.

(4) *pH.* Proceed as directed in § 436.202 of this chapter, using the sample diluted with an equal volume of distilled water.

§ 455.510b [Reserved]

b. By revoking § 455.510b *Chloramphenicol otic; chloramphenicol topical* and marking it "Reserved."

Any person who will be adversely affected by this order may file objections to it, request a hearing, and show reasonable grounds for the hearing. It is the responsibility of every manufacturer or distributor of an antibiotic drug product to review every antibiotic order published in the FEDERAL REGISTER to determine whether it covers any product that the person manufactures or distributes.

Any person who decides to seek a hearing must file (1) on or before March 1, 1979, a written notice of appearance and request for hearing, and (2) on or before April 2, 1979, the data, information, and analyses on which the person relies to justify a hearing, as specified in § 430.20 (21 CFR 430.20). Any other interested person may submit comments on this order. The procedures and requirements governing this order, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of a hearing are contained in § 430.20. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that no genuine and substantial issue of fact precludes the action taken by this order, or if a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions and denying a hearing.

All submissions under this order must be filed in five copies, identifying the Docket Number appearing in the heading of this order, with the Hearing Clerk, Food and Drug Administration (HFA-305), Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

All submissions under this order, except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk, between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This order will become effective Monday, March 12, 1979. If objections are filed, the effective date will be extended as necessary to rule on them.

(Secs. 502, 507, 52 Stat. 1050-1051 as amended, 59 Stat. 463 as amended (21 U.S.C. 352, 357).)

In accordance with Executive Order 12044, the economic effects of this rule have been carefully analyzed, and it has been determined that the rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: January 19, 1979.

J. RICHARD CROUT,
Director, Bureau of Drugs.

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 510—NEW ANIMAL DRUGS

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Tylosin

AGENCY: Food and Drug Administration.

ACTION: Final Rule.

SUMMARY: The Food and Drug Administration (FDA) amends the regu-

V 4 4 / 2 1

lations to reflect approval of a new animal drug application (NADA) filed by Critic Mills, Inc., providing for the use of a 2-gram-per-pound tylosin premix for making complete swine feeds, and to add Critic Mills, Inc., to the list of approved NADA sponsors.

EFFECTIVE DATE: January 30, 1979.

FOR FURTHER INFORMATION CONTACT:

Jack C. Taylor, Bureau of Veterinary Medicine (HFV-136), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5247.

SUPPLEMENTARY INFORMATION: Critic Mills, Inc., Beardstown, IL 62618, filed an NADA (116-041V) providing for the safe and effective use of a premix containing 2 grams of tylosin (as tylosin phosphate) per pound for making complete swine feeds used to increase rate of weight gain and to improve feed efficiency. Approval of this application relies upon safety and effectiveness data contained in Elanco Product Co.'s approved NADA 12-491V. This approval does not constitute reaffirmation of the referenced NADA, nor does it constitute reaffirmation of the drug's safety and effectiveness. In addition, Critic Mills, Inc., has not previously been included in the regulations under the list of approved sponsors. The regulations are amended to include this firm.

In accordance with the freedom of information regulations and § 514.11(e)(2)(ii) of the animal drug regulations (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFA-305), Room 4-65, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.83), Parts 510 and 558 are amended as follows:

1. In Part 510, § 510.600 is amended by adding a new sponsor alphabetically to paragraph (c)(1) and numerically to paragraph (c)(2) to read as follows:

§ 510.600 Names, addresses, and code number of sponsors of approved applications.

• • • • •

(c) • • •

(1) • • •

Firm name and address	Drug listing No.
• • • • •	
Critic Mills, Inc., Beardstown, IL 62618...	023055
• • • • •	

(2) • • •

Drug listing No.	Firm name and address
• • • • •	
023055....	Critic Mills, Inc., Beardstown, IL 62618.
• • • • •	

2. In Part 558, § 558.625 is amended by adding new paragraph (b)(59) to read as follows:

§ 558.625 Tylosin.

• • • • •

(b) • • •

(59) To 023055: 2 grams per pound; paragraph (f)(1)(vi)(*a*) of this section.

• • • • •

Effective date. This regulation is effective January 30, 1979.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360(b)(i)).)

Dated: January 22, 1979.

LESTER M. CRAWFORD,
Director, Bureau of Veterinary Medicine.

[FR Doc. 79-3028 Filed 1-29-79; 8:45 am]

[4110-03-M]

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Tylosin

AGENCY: Food and Drug Administration.

ACTION: Final Rule.

SUMMARY: The Food and Drug Administration (FDA) amends the regulations to reflect approval of a supplemental new animal drug application (NADA) filed for J. C. Feed Mills, providing for the use of a 10-gram-per-pound tylosin premix for making complete swine feeds.

EFFECTIVE DATE: January 30, 1979.

FOR FURTHER INFORMATION CONTACT:

Jack C. Taylor, Bureau of Veterinary Medicine (HFV-136), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5247.

SUPPLEMENTARY INFORMATION: J. C. Feed Mills, Inc., 1050 Sheffield, P.O. Box 224, Waterloo, IA 50704, is the sponsor of an NADA (98-429V) previously approved for safe and effective use of a 2-gram-per-pound tylosin premix (tylosin as tylosin phosphate) and now additionally approved for safe and effective use of a 10-gram-per-pound tylosin premix. The premix is used to manufacture a complete swine feed, indicated for increased rate of weight gain and improved feed efficiency. Approval of this application relies upon safety and effectiveness data contained in Elanco Products Co.'s approved NADA 12-491V. This approval does not constitute reaffirmation of the referenced NADA or of the drug's safety and effectiveness. The regulations are amended to reflect this approval.

In accordance with the freedom of information regulations and § 514.11(e)(2)(ii) of the animal drug regulations (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFA-305), Room 4-65, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.83), § 558.625 is amended by revising paragraph (b)(35) to read as follows:

§ 558.625 Tylosin.

• • • • •

(b) • • •

(35) To 039741: 2 and 10 grams per pound, paragraph (f)(1)(vi)(*a*) of this section.

• • • • •

Effective Date. This regulation is effective January 30, 1979.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: January 22, 1979.

LESTER M. CRAWFORD,
Director, Bureau of Veterinary Medicine.

Title 32—National Defense

CHAPTER I—OFFICE OF THE SECRETARY

SUBCHAPTER F—TRANSPORTATION

[DoD Directive 3005.7] [1]

PART 177—EMERGENCY REQUIREMENTS, ALLOCATIONS, PRIORITIES, AND PERMITS FOR DOD USE OF DOMESTIC CIVIL TRANSPORTATION

AGENCY: Office of the Secretary of Defense (OSD).

ACTION: Final Rule.

SUMMARY: This rule updates and expands DoD policy on emergency requirements, allocations, priorities, and permits for DoD use of domestic civil transportation covering both peacetime emergency planning and transportation operations during periods of national emergency. This revised rule clarifies assigned responsibilities of DoD components and delineates the interaction between the Departments of Defense and Transportation.

EFFECTIVE DATE: July 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Arden R. Loyd, Office of the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), Washington, D.C. 20301, Telephone 202-697-1903.

SUPPLEMENTARY INFORMATION: This revision supersedes the rule appearing in FR Document 68-10521 (33 FR 12314), August 31, 1968.

Accordingly, 32 CFR Chapter I is amended by a revision of part 177, reading as follows:

PART 177—EMERGENCY REQUIREMENTS, ALLOCATIONS, PRIORITIES, AND PERMITS FOR DOD USE OF DOMESTIC CIVIL TRANSPORTATION

Sec.
177.1 Purpose.
177.2 Applicability and Scope.
177.3 Concept.
177.4 Policy.
177.5 Responsibilities.

AUTHORITY: The provisions of this Part are issued under 5 U.S.C. 301.

§ 177.1 Purpose.

This Part is reissued to update Department of Defense (DoD) policy and guidance concerning emergency requirements, allocations, priorities and permits governing DoD use of civil transportation within the continental United States (CONUS) except that (a) provided by the Civil Reserve Air Fleet (CRAF); (b) involving the Defense Civil Preparedness Agency; and (c) related to civil works projects performed by the Corps of Engineers.

§ 177.2 Applicability and scope.

(a) The provisions of this Part apply to the Office of the Secretary of Defense, the Military Departments, the Organization of the Joint Chiefs of Staff, and the Defense Agencies (hereafter referred to collectively as "DoD Components").

(b) Its provisions cover peacetime emergency planning as well as transportation operations during periods of national emergency.

§ 177.3 Concept.

The Department of Transportation (DoT) provides national emergency civil transportation policies, plans, and procedures. The Department of Defense receives emergency guidance on the use of civil transportation from the (a) Secretary of Transportation, in time of national emergency, and (b) Department of Transportation Emergency Organization (DoT EO) Regional Offices, in case of regional isolation.

§ 177.4 Policy.

(a) DoD transportation plans for and operations during national emergencies will (1) conform to national policies and guidance; and (2) be carried out by DoD organizational elements rather than by a new organizational structure created specifically for that purpose. Actual operations under the provisions of this Part will be effected in the event of an emergency.

(b) Control of transportation and traffic management by the Department of Defense will remain at the national level (see § 177.5(a)), unless conditions of isolation require independent regional action. In this case, regional authorities will assume the responsibility detailed in §177.5(b), and will act in conformance with approved plans implementing this Part.

§ 177.5 Responsibilities.

(a) *National Control.*

(1) *The Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) (ASD(MRA&L))*, will:

(i) Establish in conjunction with the Assistant Secretary of Defense (Program Analysis and Evaluation) priorities within the Department of Defense to conform with national program priorities. These priorities will be coordinated with the Joint Chiefs of Staff (JCS).

(ii) Analyze and validate DoD short-term requirements for civil transportation received from the JCS, and ensure the coordination of the ASD(PA&E) on those requirements affecting DoD strategic mobility.

(iii) Submit requests for civil transportation, and receive alloted capability from the DoT.

(iv) Transmit allocation of civil transportation capability to the JCS, together with guidance on procurement and related comments, and ensure coordination with the ASD(PA&E).

(2) *The Assistant Secretary of Defense (Program Analysis and Evaluation)* will:

(i) Analyze, validate, and submit long-term requirements for civil transportation to the ASD(MRA&L) for subsequent submission to the DoT.

(ii) Coordinate with the DoT and the DoD Components concerned to determine data requirements and develop methods of analysis to accurately project DoD long-term civil transportation requirements.

(3) *The Joint Chiefs of Staff* will (i) review DoD transportation requirements (as submitted by the other DoD Components through the Military Traffic Management Command (MTMC)), and (ii) forward them with appropriate recommendation to the ASD(MRA&L) or ASD(PA&E), as appropriate. Upon receipt of allocations from the ASD(MRA&L), the JCS will determine the relative urgency of the requirements submitted by the DoD Components and suballocate among them in accordance with such determinations.

[1] Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA. 19120. Attention: Code 301.

V 4 4 / 2 1 J A 3 0 7 9 UMI

(4) *The Military Departments and other DoD Components* will:

(i) Develop and submit to the MTMC their requirements for all CONUS movements to be accomplished by civil transportation resources.

(ii) Prescribe their priorities of movement within guidance provided by the ASD(MRA&L) in coordination with the JCS.

(5) *The MTMC* will:

(i) In accordance with DoD Directive 5160.53,[1] "Single Manager Assignment for Military Traffic, Land, Transportation, and Common-User Ocean Terminals," March 24, 1967, manage the movement of passengers and cargo, consistent with established national and DoD Component movement priorities.

(ii) Consolidate, collate, and evaluate requirements from a traffic management standpoint and submit the consolidated transportation requirements with analyses indicating shortages of capability and recommended action to the JCS. After suballocation to the DoD Components by the JCS, MTMC will manage the movement of passengers and cargo in conformance with established allocations and movement priorities in coordination with the DoD Components.

(iii) Administer permits when required for the movement of passengers and cargo, in accordance with national policies and guidance.

(b) *Regional Isolation.* In the event of regional isolation during a national emergency:

(1) *Regional Representatives of DoD Components* will develop and submit their transportation requirements to the MTMC area commander, together with information as to the relative urgency of movement. If communication is not possible with the area commander, such transportation requirements will be submitted direct to the DoD Regional Military Emergency Coordinator at the Regional Preparedness Committee/Regional Resources Advisory Board (RPC/RRAB). The locations and geographical areas of responsibility for these regions are identified in enclosures (3) and (4) of DoD Directive 5030.45,[1] "Department of Defense Representation on Office of Preparedness (OP), GSA, Regional Preparedness Committee," December 14, 1973.

(2) *The MTMC area commanders* will:

(i) Consolidate, collate and evaluate requirements from a traffic management standpoint and submit such requirements, with a request for allocation, to the DoT EO Regional Office.

(ii) Manage the movement of passengers and cargo in accordance with established allocations and DoD Component movement priorities.

(iii) Inform the DoD Regional Military Emergency Coordinator of any deficit in allocations to meet requirements.

(3) *The DoD Regional Military Emergency Coordinator,* as principal DoD representative to the Federal Preparedness Agency Regional Preparedness Committee (or Office of Defense Resources Regional Resources Advisory Board) (DoD Directive 5030.45, [1]) will establish relative priorities of movement for DoD traffic and resolve matters of major policy impact, as required.

(c) *Preallocations.* General responsibilities for the preallocation of civil transport capability are the same as those responsibilities defined for national control in subsection § 177.5(a). A Memorandum of Understanding between the Departments of Defense and Transportation concerning the Defense Emergency Prestocked Bulk Fuel Distribution Plan, provides for preallocation of civil motor carrier tractor-tank trailer capability to support the plan. Specific responsibilities for preallocations to support this plan are defined as follows:

(1) The ASD(MRA&L) will serve as the primary DoD point of contact with the DoT on all matters relating to military requirements and policy coordination.

(2) The Commander, MTMC, will maintain direct liaison with DoT on allocation matters.

(3) The Commander, Defense Fuel Supply Center (DFSC), will:

(i) Maintain the plan; develop and submit requirements through the Defense Logistics Agency (DLA) for civil motor carrier tractor-tank trailer capability to support the plan.

(ii) Release civil carriers tractor-trailer after completing required workload.

(iii) Maintain direct liaison with participating carriers in matters relating to mission planning, control, and operational agreement.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

JANUARY 25, 1979.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

[FRL 1047-8; PP 7E1996/R194]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Aldicarb

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide aldicarb on pecans. The regulation was requested by the Interregional Research Project No. 4. This rule establishes a maximum permissible level for residues of aldicarb on pecans.

EFFECTIVE DATE: Effective on January 30, 1979.

FOR FURTHER INFORMATION CONTACT:

Mrs. Patricia Critchlow, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, SW, Washington, DC (202/755-4851).

SUPPLEMENTARY INFORMATION: On December 8, 1978, the EPA published a notice of proposed rulemaking in the FEDERAL REGISTER (43 FR 57623) in response to a pesticide petition (PP 7E1996) submitted to the Agency by the Interregional Research project No. 4 (IR-4), New Jersey State Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, on behalf of the IR-4 Technical Committee and the Agricultural Experiment Stations of Alabama, Georgia, Mississippi, and South Carolina. This petition proposed that 40 CFR 180.269 be amended by the establishment of a tolerance for combined residues of the insecticide aldicarb (2-methyl - 2 - (methylthio)propionaldehyde *O*-methylcarbamoyl)oxime) and its cholinesterase-inhibiting metabolites 2-methyl-2-(methylsulfinyl)propionaldehyde *O*-(methylcarbamoyl)oxime and 2-methyl-2-(methylsulfonyl) propionaldehyde *O*-(methylcarbamoyl)oxime in or on the raw agricultural commodity pecans at 0.5 part per million (ppm). No comments or requests for referral to an advisory committee were received in response to this notice of proposed rulemaking.

It has been concluded, therefore, that the proposed amendment to 40 CFR 180.269 should be adopted without change, and it has been determined that this regulation will protect the public health.

Any person adversely affected by this regulation may, on or before March 1, 1979, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M-3708, 401 M St., SW, Washington, DC 20460. Such objections should be submitted and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on January 30, 1979, Part 180, Subpart C, § 180.269 is amended by adding a tolerance for residues of aldicarb on pecans at 0.5 ppm as set forth below.

Dated January 25, 1979.

(Sec. 408(e), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)).)

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Part 180, Subpart C, § 180.269 is amended by alphabetically inserting pecans at 0.5 ppm in the table to read as follows:

§ 180.269 Aldicarb; tolerances for residues.

Commodity:	Parts Per million
Pecans	0.5

[FR Doc. 79-3154 Filed 1-29-79; 8:45 am]

[3510-22-M]

Title 50—Wildlife and Fisheries

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 671—TANNER CRAB OFF ALASKA

Early Closure of Portion of Registration Area H (Cook Inlet) to Fishing by U.S. Vessels

AGENCY: National Oceanic and Atmospheric Administration (NOAA)/Commerce.

ACTION: Final Regulation.

SUMMARY: The Director, Alaska Region ("Regional Director"), National Marine Fisheries Service (NMFS) issues a final regulation (Field Order) applicable to fishing by vessels of the United States in the Alaska Tanner crab fishery, in accordance with the fishery management plan (FMP) for Tanner Crab Off Alaska, and the regulations implementing this FMP (50 CFR 671.27(b) (see 43 FR 57419). This Field Order closes the Southern District of the Cook Inlet Registration Area to fishing for Tanner crab by vessels of the United States effective beginning at 11:59 P.M. Pacific Standard Time (PST) on January 26, 1979, rather than on April 30, 1979, as currently provided in 50 CFR 671.26(e)(2)(i). The closure remains in effect until November 1, 1979. Public comments are invited until March 29, 1979.

EFFECTIVE DATES: 11:59 P.M. Pacific Standard Time, January 26, 1979. Public comments are invited until March 29, 1979. Comments may be sent to: Harry L. Rietze, Director, Alaska Region, National Marine Fisheries Service, Juneau, Alaska 99802, Telephone (907) 586-7221.

FOR FURTHER INFORMATION:

Contact Mr. Rietze at the above address.

SUPPLEMENTARY INFORMATION: The FMP for Tanner Crab off Alaska (43 FR 21170) provides for in-season adjustments to season and area openings and closures. The FMP's implementing regulations at 50 CFR Part 671 (43 FR 57149) specify in § 671.27(b) that these decisions shall be made by the Regional Director in accordance with the criteria set out in that section. On October 20, 1978, the Assistant Administrator of Fisheries, NOAA, with the approval of the Administrator, NOAA, delegated to the Regional Director authority to promulgate Field Orders making in-season adjustments.

50 CFR 671.26(e) creates six districts within Registration Area H (Cook Inlet). The districts were created, in part, to prevent overfishing of individual Tanner crab stocks by allowing closure of a particular district when the desired harvest level in that district is reached. The FMP states that there are "three Tanner crab stock units within the Cook Inlet area that are separated geographically". One of these stock units is the Southern, or Kachemak Bay, stock. 50 CFR 671.26(e)(2)(i) currently provides that the season for harvest of Tanner crab by vessels of the United States is December 1 through April 30 in the Southern District "subject to adjustment by the Regional Director pursuant to 671.27." While the overall optimum yield (OY) of 5.3 million pounds for Registration Area H has not yet been reached, the State of Alaska's 1978 Tanner crab index survey indicates that there are 2.4 to 2.5 million pounds of legal male Tanner crab available for harvest in the Southern District. Current catch rate information indicates that that amount of Tanner crab will be harvested by approximately January 27, 1979, earlier than anticipated when 50 CFR 671.26(e)(2)(i) was implemented. In order to prevent overfishing of the Tanner crab stocks in the Southern district of Registration Area H, the Regional Director has determined, in accordance with 50 CFR 671.26(b) and Department Administrative Order 218-7 (43 FR 2083), and following consultation with the Commissioner, Alaska Department of Fish and Game, that an emergency exists and that the Southern District of the Cook Inlet Registration Area should be closed at 11:59 P.M. PST on January 26, 1979 rather than on April 30, 1979.

The Regional Director further finds that, in order to protect the resource, public comment prior to issuance of this Field Order is impracticable and contrary to the public interest. However, public comments on the necessity for, and extent of, this closure will be received by the Regional Director for a period of 60-days after the effective date of the Field Order. (Address: Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802). During this 60 day period, the data and information upon which this decision is based will be available for inspection during business hours at the NMFS, Alaska Regional Office, Federal Building, Room 453, 709 West 9th Street, Juneau, Alaska.

If comments are received during the 60 day period or before the 60-day period expires, if appropriate, the Regional Director shall reconsider the necessity for the closure and, as soon as practicable after that reconsideration, shall publish in the FEDERAL REGISTER either:

(A) A notice of continued effectiveness of the closure; or

V 4 4 / 2 1

(B) A notice to modify or rescind the closure.

An environmental impact statement was prepared for the Tanner Crab off Alaska FMP and is on file with the Environmental Protection Agency.

Signed at Washington, D.C., this the 25th day of January 1979.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

(16 U.S.C. 1801 *et seq.*)

In accordance with 50 CFR 671.27(h), 50 CFR 671.26(e)(2)(i) is amended by *deleting* "April 30" and *substituting* "January 26."

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1079]

[Docket No. AO-295-A33]

MILK IN THE IOWA MARKETING AREA

Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and to Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision recommends changes in the present order provisions based on industry proposals considered at a public hearing held September 20-21, 1978. The recommended amendments would modify the definition of a "handler" and revise the basis for pooling distributing plants and supply plants. The proposed changes are necessary to reflect current marketing conditions and to insure orderly marketing in the area.

DATE: Comments are due on or before February 20, 1979.

ADDRESS: Comments (four copies) should be filed with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-7311.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Hearing: Issued September 5, 1978, published September 8, 1978 (43 FR 40028).

PRELIMINARY STATEMENT

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the Iowa marketing area. This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C. 20250, on or before 20 days after FEDERAL REGISTER publication. The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendments set forth below are based on the record of a public hearing conducted at Urbandale, Iowa, on September 20-21, 1978. Notice of such hearing was issued September 5, 1978 (43 FR 40028).

The material issues on the record of the hearing relate to:

1. Unite pooling of distributing plants.
2. Definition of a pool supply plant.
(a) Shipping percentages.
(b) Unit pooling.
3. Handler definition.
4. Producer definition.
5. Plant location adjustments.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Unit pooling of distributing plants.* The pool distributing plant definition should be changed to provide that a handler who operates two or more distributing plants may combine the plants into a unit for the purpose of meeting the pooling standards of the order.

The order now bases a distributing plant's pooling status on the proportion of its milk receipts that is disposed of as Class I route disposition and the percentage of such receipts that is disposed of in the marketing area.

A cooperative association proposed that unit pooling for distributing plants be provided by the order. Under the proposal, the receipts and dispositions, respectively, of each plant in the unit would be combined to determine wheter the unit as a whole meets the total route disposition requirement for a pool distributing plant. However, each plant in the unit would be required to have 15 percent of its receipts disposed of as route disposition in the marketing area, which is the in-area percentage presently provided by the order. The cooperative proposed that a handler who wants to pool distributing plants on a unit basis should notify the market administrator in writing prior to the first month of unit pooling.

The order changes adopted herein are basically the same as the proponent's proposal.

Proponent operates four distributing plants in the Iowa market at Rock Island, Illinois and at Cedar Rapids, Dubuque, and Waterloo, Iowa. It is the only multi-distributing plant operation in the market.

The normal practice of proponent is to dispatch milk from the farms of its members to the nearest distributing plant. In this way, given loads of milk are assigned to a specific plant for a month. By following this procedure, producers' milk is handled with a minimum of transportation cost.

However, the fluid milk needs of distributing plants can fluctuate substantially within a week, and the objective of assigning milk, as indicated, is not always achieved. A given load of milk may be reassigned to three or more plants during a month to assure that the pooling requirements of the individual plants are met.

The allocation of milk supplies among the distributing plants also is affected by the manufacture of Class II products at the distributing plants, which can affect the proportion of the milk receipts at a distributing plant that is disposed of as route disposition.

The spokesman for proponent emphasized that there is no problem of pooling supplies of member milk on the market in total. He stated that a problem exists in the uneconomic movement of milk and wasted energy that results from moving milk among the four distributing plants to achieve the correct proportion of milk receipts to route disposition at each plant to maintain pool status. In addition, proponent claimed there is a substantial operating expense in tracking the movements of milk to assure the pooling of each distributing plant.

The shifting of loads of producers' milk among the plants of a multi-plant handler can accommodate the pooling of producer milk as it has done hereto-

V 4 4 / 2 1 J A 3 0 7 9 UMI

fore. However, doing so adds to the cost of transporting the milk, increases the cost of recordkeeping, and adds to the cost of auditing the operation. While the practical benefit to producers is the pooling of the milk, such objective can be accommodated more efficiently by the adoption of the proposal to provide unit pooling for distributing plants.

Under the unit pooling provisions provided herein, proponent's four distributing plants could be pooled as a unit, thereby eliminating the inefficient practice of moving milk among distributing plants for pooling purposes.

A further benefit of unit pooling, as indicated by proponent, is that the manufacture of Class II products could be done more efficiently by a multi-plant operator than has been the case. At present, a range of Class II products is processed and packaged at three of proponent's distributing plants. If the cooperative chose, for example, to concentrate the manufacture of cottage cheese at one of the plants, it is not likely under the present pooling standards that the plant could qualify for pooling. The unit pooling of distibuting plants, as provided herein, would provide the possibility for greater Class II product specialization at a single plant without depooling the plant.

To qualify for unit pooling, individual plants would still have to process and package fluid milk products and dispose of at least 15 percent of their receipts as route disposition in the marketing area. Also, a handler would need to notify the market administrator in writing on or before the first day of the month in which plants are to be considered as a unit of his desire for unit pooling. Unit pooling would be continued in each following month without further notification. If plants are to be added to the unit or dropped from it or if the unit is to be discontinued, the handler would need to notify the market administrator in writing on or before the first day of the month in which such change is to be effective.

2. *Definition of pool supply plant.*

(a) *Shipping percentages.* The supply plant shipping percentages should not be increased. Instead, the Director of the Dairy Division should be authorized to increase or decrease the supply plant shipping percentages by up to 10 percentage points as needed to increase shipments to distributing plants for Class I use or to prevent uneconomic shipments for pooling purposes.

The order now provides, in part, that any plant shall be a pool supply plant that is approved by a duly constituted regulatory agency for the handling of Grade A milk and from which during the month the volume of bulk fluid milk products transferred to pool distributing plants during each of the months of September through November is 35 percent or more, and during each of the months of December through August is 20 percent or more, of the total Grade A milk received at the plant from dairy farmers and cooperative associations, including milk diverted from the plant by the plant operator.

A proprietary handler proposed that the shipping percentages be increased to 45 percent for each of the months of September through November, and to 30 percent for each of the remaining months. At the hearing, proponent modified the proposal to provide a shipping percentage of 50 percent for the months of September through November.

As an alternative, proponent proposed that the Director of the Dairy Division be authorized to increase the supply plant shipping percentages by up to 10 percentage points if he finds it necessary to obtain needed shipments. Under the proposal, the shipping percentages so increased could be decreased by the Director but only to the percentages now provided by the order. At the hearing, the handler modified the proposal to provide for a change of up to 15 percentage points during the months of September through November.

The proposal to increase the shipping percentages to a higher fixed level was opposed by another proprietary handler and by four cooperative associations. The alternative proposal was opposed by a proprietary handler and by two cooperative associations.

One cooperative modified the alternative proposal to provide that the Director of the Dairy Division, or the market administrator, be authorized to increase or decrease the shipping percentages from the present level by up to 15 percentage points if he finds such revision is necessary to obtain needed milk shipments for Class I use or to prevent unneeded shipments to distributing plants.

The spokesman for another cooperative said that the association would not oppose a provision to authorize the Director of the Dairy Division to change the shipping percentages temporarily if the change were limited to up to 10 percentage points. Also, any temporary increase in the supply plant shipping percentages should, in his view, be based on a need in the market for Class I milk.

Proponent operates a pool distributing plant at Des Moines, Iowa. About 80 percent of its utilization is Class I and about 20 percent Class II. The plant distributes fluid milk products mainly to stores, schools and other institutions. A minor part of its distribution is on home delivery routes.

Proponent is supplied primarily by four cooperatives, and the milk originates mainly in northeastern Iowa, which is the primary production area for the market. The milk is delivered direct from farms or through pump-over facilities which are not supply plants. The handler receives milk only from members of cooperative associations.

The handler claimed that he was experiencing severe shortages in the milk supply for his plant and that the shortages will be intensified rather than alleviated in the foreseeable future. He stated that the milk utilization data for the market indicate that there are adequate supplies of milk to supply his Class I needs. Nevertheless, he claimed, the reserve supply is not available to proprietary firms.

Proponent stated that nearly 66 percent of the Class I sales of the market are made by cooperative associations that operate pool distributing plants and supply plants. Also, he noted, the reserve supplies for the market are handled by the cooperatives. In these circumstances, proponent claimed, the Department has an obligation to provide order provisions that encourage cooperatives to supply milk to the limited number of proprietary firms on the market.

The handler stated that beginning in July 1978 his firm sought additional milk from some of his suppliers because Class I sales had increased and because one of the suppliers had cut back deliveries somewhat. Most of the suppliers who were asked to increase deliveries did so but not to the full extent desired by proponent. Proponent testified that as a result his plant ran short of milk on one day about a week prior to the hearing and had to cut back processing somewhat.

The proponent also testified that the proportion of milk used in Class I has declined since the Des Moines order was merged into the Iowa order effective May 1, 1977. It was pointed out that in April 1977 the Class I utilization in the Des Moines market was 42 percent, while the Class I utilization in April 1978 under the Iowa order was 38 percent. Proponent observed that the additional milk that has been pooled under the order is being used primarily for Class III use. Proponent claimed that, increasingly, cooperatives are unwilling to interrupt their manufacturing operations to supply milk for Class I use.

Also, proponent stated that the reduced blend prices under the Iowa order that have resulted from the additional milk supplies on the market have made adjoining markets more attractive to producers who traditionally had been affiliated on a direct-ship basis with the regulated markets in Iowa before the several markets were merged under one order. Proponent introduced an exhibit into the record to show that the blend prices of the Iowa market had deteriorated over the past year relative to the Upper Midwest order.

Proponent believes that by increasing the supply plant shipping percentages additional milk will be made available to his pool distributing plant and to other proprietary distributing plants.

A proprietary handler opposed the proposals to increase the supply plant shipping percentages. The spokeswoman for the handler stated that increased shipping percentages would cause uneconomic movements of milk. She claimed that the pool supply plant operated by the handler would then be forced to haul milk solely for qualifying purposes.

A cooperative with a pool supply plant at Pine Island, Minnesota, opposed the proposal to increase the shipping percentages and the alternative proposal to authorize the Director of the Dairy Division to increase them on a temporary basis. The spokesman for the cooperative stated that higher shipping requirements would not make more milk available to Iowa pool distributing plants, as proponent claimed, but actually would cause milk to be disassociated with the market. He claimed that if the cooperative association were to ship milk from its supply plant to proponent's distributing plant as the milk is needed there, the probability is that a substantial proportion of it would be assigned to Class II. The witness indicated that the cooperative's supply plant cannot afford to ship milk to the market for Class II because the order provides for little if any transportation allowance on such shipments. This, coupled with the fact that the transportation rate provided by the order is low in relation to current transportation costs, means that the cooperative would incur a substantial transportation expense for shipments made from its supply plant. It was claimed that higher shipping requirements could result in increased costs to qualify the Pine Island supply plant for pooling, and that this would cause the cooperative to look to alternative markets, such as the Upper Midwest market where very nominal pooling requirements are provided.

The cooperative's spokesman stated further that proponent had asked for an additional supply of milk but that none had been available from the direct-delivered routes with which the association supplies Des Moines handlers. He noted that none of the direct-delivered milk of the cooperative is committed to manufacturing.

Another cooperative association that opposed the proposals introduced an exhibit which showed that suppliers of the Iowa market have supplied all of the Class I needs of the Iowa pool distributing plants. It was the witness' view that this indicates that there is an adequate supply of milk for pool distributing plants.

He reiterated the view of a previous witness that there is no economic incentive to ship milk from a supply plant for Class II use. He testified further that spot shipments of milk normally cost more than milk supplies that are acquired on a regular basis. He attributed proponent's alleged supply problem to proponent's method of operation and to his reluctance to pay prices that are normally associated with erratic demand.

The issue for consideration is whether there is an actual or potential shortage of milk for Class I use at pool distributing plants that requires an increase in the supply plant shipping percentages. Such increase would require that a greater proportion of a supply plant's receipts be shipped to a pool distributing plant to qualify the supply plant for pooling than is now the case.

Data introduced into the record established that suppliers have consistently delivered more than the Class I needs of pool distributing plants. In this connection, the proponent acknowledged that he has had an adequate supply of milk for Class I. The apparent difficulty is that proponent requires a substantial quantity of milk for Class II. While he has obtained a sufficient supply of milk for his total operation (Class I and Class II), he has had to buy some of it from his regular suppliers on a spot basis, which normally is more expensive than a committed supply of milk.

The single, specific instance of a supposed shortage of milk that proponent cited occurred on one day about a week before the hearing. He stated that he had to cut back somewhat on processing of Class II products because he did not have all the milk he needed. He later made up the lost volume on a subsequent day when milk was available.

What is significant is that proponent testified that his objective is to arrange for a basic supply of milk for a year and to make up any additional need that may occur by obtaining additional milk when the need arises. Apparently, on the single day that such additional milk was needed it was not available from suppliers, but was delivered subsequently. This demonstrates not a shortage of milk but rather the consequence of a particular method of operation.

When proponent requests a supply of milk from suppliers, whether it be a regular committed supply or a spot shipment, understandably, he wants it for his total operation, which is about 80 percent Class I and 20 percent Class II. Also, it is apparent from testimony in the record that proponent expects a milk supply for Class II use to be delivered to his plant without any charge for hauling.

The cooperatives from which proponent obtains his supply have not refused to supply him with milk. Only one has reduced deliveries, and proponent indicated that the reduction was minor. Actually, proponent's supplies have increased deliveries to him, but not in the full amount requested. What has occurred is that suppliers are reluctant to ship milk to proponent from supply plants because in doing so the shipments are likely to be allocated to Class II because of proponent's substantial Class II operation. This subjects the supply plant operator to costs he would not incur by manufacturing the milk himself. The order is structured, for economic reasons, to discourage the movement of milk from distant supply plants for Class II (or III) use.

Moreover, direct-ship milk supplies normally are committed in advance. Routes need to be assigned and deliveries scheduled if there is to be an orderly marketing of the milk. Proponent's method of operation, however, results in requests for milk as the need arises. This entails spot shipments of milk, which requires special handling arrangements that make the milk more expensive than supplies that are committed for regular delivery. Proponent has obtained such shipments from his regular suppliers. However, when he buys spot shipments from his regular suppliers, he objects to paying the prices asked because some of the suppliers also are his competitors.

Proponent claimed that he had made extraordinary efforts to acquire adequate supplies. This claim is not persuasive when considered in light of the fact that proponent has not sought a supply of milk from one of the cooperatives in the market that has a substantial portion of the market's reserve supply. Representatives of two cooperatives stated on the record that they were willing to supply milk to proponent for Class I use.

Proponent also claimed that the lower blend prices that have resulted since the merger of several orders in Iowa have made adjoining markets more attractive to producers who traditionally had been affiliated on a direct-ship basis with the individual markets. The record did not substantiate proponent's claim.

In this connection, the final decision of the Iowa order merger stated:

"The Order 63 (Quad Cities-Dubuque) and Order 79 (Des Moines) uniform prices were generally in close alignment with alternative market

V 4 4 1 2 1 J A 3 0 7 9 UMI

uniform prices in common supply areas during 1975. But the Order 70 uniform price and the Order 78 weighted average uniform price have tended to be somewhat higher than the other uniform prices in the Iowa supply area. Consequently, at the outset of the merger of the orders, it can be expected that the uniform price under the Iowa order will be slightly higher than other order uniform prices in the supply area. This will tend to attract additional milk to the pool and thus reduce the uniform price to where it is comparable to alternative market uniform prices." [1]

Statistics and testimony presented at the hearing indicated that additional milk has been attracted to the pool.

Proponent claimed further that the blend prices of the Iowa order have deteriorated over the past year in relation to the Upper Midwest order. Yet, no group of producers has switched from the Iowa order to the Upper Midwest order as one might expect under such conditions. In fact, the operator of a supply plant at Pine Island, Minnesota, which has the Upper Midwest order as an alternative market, has continued the plant's association with the Iowa order and opposes the adoption of provisions that might force the plant to go off the Iowa market.

It is significant that no other proprietary handler testified cercerning a present or potential milk shortage for Iowa pool distributing plants. One proprietary handler specifically denied that such shortage exists or is prospective and opposed proponent's proposal to increase the shipping percentages, or in the alternative, to provide for temporary changes in the percentages.

It must be concluded that neither the market as a whole nor proponent individually has experienced a shortage of milk for Class I use that warrants an increase in the shipping standards for supply plants. We cannot agree with proponent that the Department has an obligation when establishing the pooling provisions of an order to assure individual handlers of a total supply of milk for all uses. The test of order provisions is whether fluid milk distributors are being adequately supplied with milk for Class I use. This objective is being met for the Iowa market as a whole and for proponent individually.

For these reasons, the Iowa order should not be amended to increase, on a permanent basis, the supply plant shipping percentages.

The order should be amended, however, to provide that the Director of the Dairy Division may increase or decrease the supply plant shipping percentages by up to 10 percentage points when needed to increase shipments to distributing plants for Class I use or to prevent uneconomic shipments for pooling purposes. Before making any revision, the Director should investigate the need for revision, either on his own initiative or at the request of interested persons. If the investigation shows that a revision may be appropriate, the Director should issue a notice stating that a temporary revision of the shipping standards is being considered and inviting views of interested persons with respect to the proposed revision.

The record of this hearing suggests the possibility that unforeseen changes could occur in either milk production or in Class I sales that might justify an immediate but temporary change in the supply plant shipping percentages. Under the current order provisions, a change in the shipping percentages can be made only through the hearing process or by suspension.

Changes in the relationship of milk supplies to sales could occur if a supply plant with substantial milk receipts temporarily switched from the Iowa market to some other market. The situation might warrant a temporary increase in the Iowa order shipping percentages. In such case, neither the time-consuming hearing process nor a suspension action would be appropriate. The emergency might come and go before an order amendment could be made by the hearing process. A suspension action would be incapable of increasing shipping standards because such action can be used only to delete existing provisions temporarily. The limited modification of the shipping percentages by the Director of the Dairy Division, as provided herein, would permit such a change to be made. This limited variation of the shipping percentages would provide the adaptation to current conditions which the proponent and supporters of this alternative proposal desire.

One cooperative that opposed the alternative proposal did so on the basis that the hearing process is a better basis for changing the pooling provisions and is practical because marketing conditions do not change that rapidly.

The other cooperative that opposed the alternative proposal at the hearing did so on the basis that any increase in the shipping standards that might result would increase costs for the association in maintaining the pool status of its supply plant. In a post-hearing brief, however, the representative of the cooperative elaborated on its position after evaluating the testimony and evidence in the hearing record concerning the issue. In its brief, the cooperative opposed the alternative proposal on the grounds that: (1) It would put an undue burden of responsibility on the Director of the Dairy Division, (2) the proposal does not provide a means for the Director to make a determination, (3) the hearing process is a better method of deciding shipping requirements, and (4) it would add an unknown factor to the process of supplying milk to the market, thereby creating doubt and uncertainty. The cooperative was particularly concerned about the latter point. It stressed that handlers determine the need for milk supplies prior to the fall months and that cooperatives and supply plants use these determinations to decide on the markets to which they should attach their milk supplies. In the cooperative's view, prior knowledge of shipping requirements is essential to this decision-making process.

These are valid considerations. We cannot agree, however, that the provisions provided herein would put an undue burden of responsibility on the Director of the Dairy Division. Changes in the shipping standards would not be made without a careful review of the marketing conditions involved. In addition, industry and other views would be sought and carefully studied. These procedure should provide a good foundation for any temporary revision of shipping percentages for the Iowa market.

The provisions provided herein detail the steps by which the Director can make a determination concerning a temporary revison of the Iowa supply plant shipping percentages. This should meet one of the concerns expressed by the cooperative association.

We agree that the hearing process is the preferable method of considering changes in the shipping requirements, and this is the method that is followed in considering any amendment to a Federal milk order. It provides the ideal means of public participation in considering what the provisions of a milk order should be. Nevertheless, some flexibility is desirable to deal with possible emergency situations that cannot be resolved, in a timely way, by the hearing process or by suspension procedures.

As indicated, the cooperative emphasized that handlers determine the need for milk supplies prior to the fall months, and that cooperatives and supply plants use these determinations to decide on the markets to which they should attach milk supplies. In the cooperative's view, prior knowledge of shipping requirements is essential to this decision-making process. We cannot see that provisions for a temporary change in the shipping percentages would interfere with the process in any significant way.

[1] Official notice is taken of the Secretary's decision on proposed amendments to the Des Moines, Iowa, and certain other orders that was issued on March 16, 1977 (42 FR 15849-50).

The provisions provided herein reflect the possibility that some unforeseen circumstance might alter the relationship of supplies to sales in such a way that a temporary increase in shipping percentages is necessary to associate adequate supplies of milk with the market for fluid use. Similarly, action might be needed to reduce the percentages temporarily to prevent uneconomic shipments solely for pooling. The provisions provided herein for temporary changes in the shipping percentages will provide a desirable degree of flexibility to augment the pooling provisions for supply plants.

The temporary revision provided herein is limited to a maximum change of 10 percentage points. The handler who proposed the provisions initially modified the proposal at the hearing to provide that the shipping percentage could be changed up to 15 percentage points in the months of September through November. However, no basis was presented for differentiating the provisions on a seasonal basis. An emergency situation could occur at any time of the year and could involve uneconomic shipments of milk as well as the need to have a larger proportion of a supply plant's receipts moved to distributing plants. The changes adopted herein should be appropriate in providing the flexibility that may be needed to assure the maintenance of orderly marketing on a continuing basis.

It is possible that a temporary reduction in the shipping percentage could result in the unintended pooling of a plant that is normally regulated under another order but which also makes shipments to the Iowa market. Unless the plant operator were able to make unforeseen adjustments in his shipping arrangements, it is possible that his normal level of shipments could result in the plant meeting the reduced Iowa shipping standards. This is not conducive to orderly marketing. For this reason, it is provided that no supply plant may qualify as a pool plant due to the temporary reduction in the shipping percentage unless it had been a pool supply plant during each of the immediately preceding 3 months. A supply plant not meeting the 3-month requirement could be pooled only by meeting the regular shipping percentages for the month.

(b) *Unit pooling.* The proposal to confine the unit pooling of supply plants to plants under the control of a single handler should not be adopted.

The order now provides that two or more supply plants operated by the same handler or by one or more cooperative associations may qualify for pooling as a unit if the unit meets the same shipping requirements that are applicable to a single plant.

The proprietary handler who proposed that the supply plan shipping percentages be increased also proposed this proposal as part of a "package" to make more milk available to the distributing plants of proprietary handlers. Proponent pointed out that the supply plant unit pooling provision is presently being used by the two larger cooperatives serving the market, with a plant of each cooperative being included in one unit. The handler testified that the unit pooling provisions should be restricted as proposed because, in his view, the present provisions are not operating as intended. He stated that the purpose of the present provisions was to allow single-plant cooperatives to operate as a unit for pooling purposes. He claimed that the provision is not being used by such cooperatives but by large multi-plant cooperatives. In proponent's view, requiring the plants in a unit to be owned by a single handler offers the potential that more milk would be made available to proprietary distributing plants.

The proposal was opposed by three cooperative associations on the ground that unit pooling represents an efficient method of supplying the market with milk. In the view of the cooperatives' spokesmen, unit pooling has been a successful innovation for the market.

The Iowa order provides year-round shipping requirements for supply plants that vary seasonally. In the fall and winter of 1977, shipments by the one supply plant unit in the market substantially exceeded the shipments that would have been required of single plants in the absence of the unit provision. During the flush production months of 1978, the shipments of one of the plants in the unit declined to about 10 percent of its receipts. If the unit had not been in operation, additional shipments would have been necessary to maintain the pool status of the plant. As it was, the second plant in the unit had sufficient shipments to qualify both plants. This means that a substantial quantity of milk was available to the market when needed, but that uneconomic movements of milk in the flush to qualify the plant singly were not required.

The purpose of the provision is to facilitate the pooling of milk that is associated with the market and to do so by eliminating energy-wasting shipments solely for pooling purposes. Although proponent stated that the purpose of the provision is to allow only single-plant cooperatives to operate as a unit for pooling purposes, this is not the case. Multi-plant cooperatives may have a valid need for using unit pooling and should be able to avail themselves of this pooling arrangement.

No evidence was presented from which it may be concluded that unit pooling of supply plants by two or more cooperatives threatens the availability of an adequate supply of milk for proprietary distributing plants. Proponent testified that in 1977 his firm had no difficulty obtaining all the milk needed for its operations, both Class I and Class II. Although proponent testified that he was having difficulty in 1978 in getting a sufficient supply of milk for his total operation, the record indicates that both the market and proponent are adequately supplied, presently and prospectively, with milk for Class I needs. There is no basis for concluding that the unit pooling provision will adversely affect the availability of an adequate supply of milk for fluid purposes in the Iowa marketing area. For these reasons, the proposal is denied.

The order should not be amended to allow a proprietary handler operating a supply plant to form a supply plant unit with one or more cooperatives. A proposal to do so was made by a trade association of proprietary plants. As originally proposed, the proposal also would have allowed unit pooling for a distributing plant and one or more supply plants. Proponent dropped this aspect of the proposal at the hearing.

The proposal was opposed by three cooperative associations supplying the Iowa market.

While the proposal was sponsored by a trade association of about 30 proprietary plants, only four of the plants are interested in being associated with the Iowa pool by means of the proposed order change. The four plants are in Grant County, Wisconsin, which is in the southwestern part of the State. The plants, which manufacture cheese, are now regulated by the Chicago Regional order.

The witness for proponent stated that in the Grant County area the Iowa blend price is about 20 cents higher than the Chicago blend price. He indicated that the four cheese plant operators experience strong competition from the Iowa market for milk supplies and that they must pay extra money from plant earnings to keep their producers. He stated that the cost of transporting milk from any of the four plants to Iowa distributing plants makes it economically impractical for the cheese plants to ship milk to such distributing plants.

The purpose of the proposal, as stated by proponent, is to enable the plants to associate with the Iowa market through unit pooling. In this way, he said, the plants could share in the Iowa Class I sales and obtain funds from the Iowa pool to pay their Grade A producers the Iowa blend

V 44/21
JA 30 79
UMI

price. In proponent's view, this would enable the plants to retain their Grade A producers in competition with the Iowa market and thereby assure the plants of a continuing supply of milk for cheese manufacture. Proponent's spokesman stated that the plants would be willing to pay a qualifying charge to an Iowa cooperative and ship some Grade A milk (a minimum quantity) to the market for Class I use. He testified that when Grade A producers in the Grant County area associate themselves on a direct-ship basis with the Iowa market they incur transportation costs to get their milk delivered to Iowa pool distributing plants. If proponent's proposal were adopted, the milk of such producers could be pooled under the Iowa order without having to be shipped.

The spokesman for the four plants testified that adoption of the proposal would make additional milk available to the market to supply any Class I shortage and also would provide access to additional manufacturing capacity for reserve milk not needed for fluid use.

It is significant that proponent testified that adoption of the unit pooling proposal by the four proprietary plants would make additional milk available to the Iowa market to supply any shortage of milk for Class I use. The record established that there is no shortage of milk for Class I use in the Iowa market and there is not likely to be in the foreseeable future. Also, there is no basis in the record of this hearing to conclude that the Iowa market is having any problem with the disposition of surplus milk that would require the additional manufacturing capacity that proponent inicated would be a benefit to the market if the proposal were adopted. Adoption of the proposal is not needed for these reasons.

It is observed that the operating function of the four proprietary plants is to manufacture cheese and that the chief interest of the plant operators is to assure a continuing supply of Grade A milk for the plants. Their proposal is aimed at obtaining funds from the Iowa pool to help the plant operators in paying competitive prices to producers in the Grant County, Wisconsin, area to keep them associated with the cheese plants. Any milk that would be supplied to the Iowa fluid market under the scheme would be merely incidental to the plan, and would be the least quantity possible since the primary objective of the plants is to manufacture cheese. From the record it cannot be concluded that the primary function of the plants, or even a minor function, would be to supply the Iowa market with any part of its fluid milk needs.

The unit pooling that is now provided by the order enables cooperative associations that are supplying the fluid milk needs of the market to perform the function more effeciently. Such cooperatives organize the supply of Grade A producers who are associated with the Iowa market and arrange for the necessary transportation. They deliver milk to distributing plants in the quantities agreed upon with the plants and dispose of the milk not needed for fluid use. These marketwide balancing activities are in contrast to the four cheese plants whose function, understandably, is to secure a supply of milk to manufacture their specialty products and to market them effectively.

The present unit pooling provisions of the order also accommodate any proprietary handler whose primary function is to supply the fluid milk needs of the market. In such instance, the handler may unit pool two or more of his supply plants to achieve the same supply efficiencies previously described for cooperative associations.

It is concluded that the present unit pooling provisions of the order are operating effectively, as intended, and that the record of this hearing does not establish the need to revise the provisions as proposed by the four proprietary plants. Accordingly, the proposal is denied.

3. *Handler definition.* Section 1079.9(c) of the handler definition should be revised to include a cooperative association that receives bulk tank milk at a producer's farm for delivery to its *own* pool plant. Also, § 1079.9(b) should be revised to include a cooperative association that diverts milk from its *own* pool plant.

The present handler definition provides in § 1079.9(c) that a cooperative association shall be the handler for milk that it receives for its account from the farm of a producer for delivery to the pool plant of *another* handler in a tank truck owned and operated by, or under the control of, such cooperative. Also, a cooperative association is the handler under § 1079.9(b) for producer milk that it diverts to a nonpool plant from the pool plant of *another* handler. For milk that is received at or diverted from the pool plant of a cooperative association, the order provides that such receipts and diversions shall be reported on an individual plant basis in the same way that proprietary handlers report receipts and diversions for their plants.

A cooperative association that operates four distributing plants and a supply plant that are regulated under the order proposed the adopted changes to simplify its accounting for milk and butterfat. Proponent claimed that these changes would allow it to include on a single report informaton that now must be segregated for inclusion in several reports.

A proprietary handler opposed the proposal to permit a cooperative association to be a handler under § 1079.9(b) for milk that it diverts to a nonpool plant from its own pool plant. The handler opposed the proposal in connection with his general position that the order should make more milk available to proprietary distributing plants.

The order should permit a cooperative association to submit a single report that includes all of its receipts of milk from producers and all of its diverted milk, irrespective of whether the milk is associated with plants of other handlers or the cooperative's own plants. The proponent cooperative association maintains at its headquarters records of its total operations for the market. Such information includes the total pounds and butterfat test of milk received from each producer and data regarding deliveries of such milk to pool plants and diversions to nonpool plants. Since different loads of milk from the same group of producers usually go to several plants during the month (including the cooperative's own pool plants, pool plants of other handlers and nonpool plants), it is necessary for the cooperative to determine which loads of milk were associated with each of its own pool plants, including diversions from such plants to nonpool plants. This information is then reported to each of the cooperative's plants and added to the information contained in the individual plant's report. Specifying that the cooperative association shall be a handler pursuant to § 1079.9(b) and (c) with respect to the quantity of milk received at producers' farms for delivery to its own pool plants or diverted from such plants to nonpool plants would eliminate this extra bookkeeping expense.

The opposition of the proprietary handler to the adoption of the proposal is without merit. The single purpose of the handler in opposing the proposal was to make more milk available to proprietary distributing plants. As indicated in this decision, the pool distributing plants serving the market are presently and prospectively adequately supplied with milk. Accordingly, the basis advanced by proponent for denying the proposal does not provide the ground for doing so.

Making a cooperative association the § 1079.9(c) handler on deliveries of milk to its own distributing plant also is desirable for the purpose of permitting these deliveries to be counted as qualifying shipments for pooling a supply plant of the cooperative. The order now provides that milk that is direct-delivered by a cooperative from farms to the pool plant of another handler may be counted in determining the pool plant status of the cooperative's supply plant. At present, these provisions are suspended through April 1979. The effect of the suspension has been to permit the direct-deliveries by a cooperative from farms to its own distributing plant to be included as a qualifying shipment for pooling a cooperative association's supply plant.

It is appropriate that such deliveries be included as qualifying shipments for pooling a cooperative association's supply plant. Proponent operates a reload station near Davenport, Iowa, a pool supply plant at Dubuque, Iowa, and a pool distributing plant at Rock Island, Illinois. The provisions provided herein will enable the cooperative to ship milk directly from producers' farms to the nearby Rock Island distributing plant and have such deliveries count in qualifying the supply plant at Dubuque. Otherwise, quantities of the milk close to the Rock Island plant would have to be directed elsewhere to provide room at the plant for qualifying shipments from the supply plant. This would entail energy-wasting movements of milk by the cooperative which supplies a substantial proportion of the fluid milk needs of the Iowa market. The provisions provided herein will make these uneconomic shipments of milk unnecessary.

The witness for another cooperative association proposed that diversions by a cooperative association from its own distributing plant not be included in the plant's receipts for purposes of determining its pool plant status. The order now provides that milk diverted by a cooperative association from the distributing plant of another handler not be included in the plant's receipts for purposes of determining the plant's pool plant status. However, when a cooperative association diverts milk from its own distributing plant, the milk is considered as a diversion from the plant and must be accounted for separately from diversions by the cooperative association from other plants.

The witness for the association testified that prior to February 1, 1978, the cooperative association had supplied a proprietary handler's pool distributing plant with its total fluid milk requirements. Milk in excess of the handler's needs was diverted to the cooperative's manufacturing plant as producer milk. At that time none of the diverted milk was included in the handler's receipts for pooling purposes.

On February 1 the cooperative association acquired this distributing plant and now the diversions are included in the plant's receipts. Thus, he stated, the status of pooling the same quantity of milk has changed. Although the total amount of milk diverted by the cooperative is within the diversion limitations that would apply to a § 1079.9(b) handler the cooperative is having difficulty keeping the distributing plant pooled because its diversions cause the plant to fall below the minimum route disposition percentages. The witness claimed that the cooperative could deliver the producer milk to another handler's pool plant and then divert the milk. This, he stated, would be a wasteful exercise.

It is not necessary to include diversions in a plant's receipts when the diverting cooperative operates the plant and exclude such diversions when diverted from another handler's plant. Diversion limitations are set forth in the order that limit the total quantity of producer milk a cooperative association may divert. These provisions effectively limit diversions by a cooperative association to an appropriate level without the necessity of including such diversions as part of the plant's receipts.

4. *Producer definition.* A proposal to amend the "producer" definition of the order should not be adopted.

The producer definition of the order provides that a producer is a dairy farmer who produces Grade A milk and whose milk is received at a pool plant or diverted from a pool plant. The definition excludes a producer-handler and a government institution (such as a university) that produces milk.

A proprietary handler proposed that the definition be amended to exclude a dairy farmer from being an Iowa order producer during the months of January through August if the dairy farmer had been a producer under the St. Louis-Ozarks, Central Illinois, or Southern Illinois orders during the preceding months of September through December. The orders cited provide for seasonal incentive payment plans, which are commonly referred to as "Louisville" plans.

A seasonal incentive payment plan provides that a specified amount of money be withheld from the total pool value in each of several spring months and put into a special fund. In each of several fall months, a proportion of the total amount withheld is paid to producers. The plan is intended to encourage more even production throughout the year.

The proposal was presented by the proprietary handler as part of a package of proposals aimed at making additional supplies of milk available to proprietary distributing plants. In proponent's view, the Iowa market should not absorb seasonal reserve supplies of milk from the three nearby Louisville plan markets. Proponent claimed that this occurs when some of the cooperatives that supply the Iowa market shift producers to those markets in the fall "payout" months and bring them back to the Iowa market for the other months of the year. It was claimed that this shifting of producers tends to lessen the availability of milk supplies in that the Iowa blend prices are depressed "further" during the surplus production months from the influx of producers and during the short production period producers are leaving the market.

Proponent's view is that the proposed change is consistent with the Iowa promulgation decision which established supply plant pooling standards that require continuous association of supply plants with distributing plant outlets. A specific portion of the Iowa final decision previously referred to was quoted as a basis for this view. The quotation is as follows:

"... the pooling standards should require pool milk to be continuously associated with the fluid use outlets as a basis of pooling. Otherwise, excessive supplies of milk could be tied up for manufacturing use at Iowa locations when it is needed for fluid use in Iowa or in more southerly deficit markets. This would tend to force shipment of milk from the more northerly reserve milk supply areas of Minnesota and Wisconsin for bottling use which would entail greater transportation costs.

"Additionally, pooling standards that require continuous association with distributing plant outlets need to be maintained so that the reserve milk supplies in the production area that are pooled on more southerly markets will not be shifted to the Iowa pool during the flush production season. Any such shift of milk supplies seasonally could be accomplished rather easily by handlers who operate pool plants in both markets. Moreover, the seasonal incentive payment plans in the Central Illinois, Southern Illinois, and St. Louis-Ozarks Federal order markets result in seasonal uniform price differences that would encourage such shifts of milk to the Iowa pool in the absence of shipping requirements." [2]

The proposal was opposed by two cooperatives supplying the Iowa market on the ground that the shifting of some producers to other markets in the fall and winter months does not adversely affect the availability of milk to meet the Class I needs of the Iowa market.

It is significant that the supply plant shipping standards of the Iowa order were intended to deal with the above-mentioned circumstances. One of the issues in this proceeding is whether such shipping standards should be increased. The additional issue presented by proponent is

[2] 42 FR 15850

V 4 4 / 2 1

whether the producer definition of the order needs to be amended as an additional means of dealing with the above-mentioned circumstances. In this connection, proponent's statement of the need to adopt the proposal rests on an alleged serious shortage of milk for Class I at the distributing plants of proprietary handlers. This proposed change of proponent is one of several designed to assure greater supplies.

Proponent testified that some producers had been shifted off the Iowa market to the three markets cited in the fall of 1977, and that this had depleted the availability of milk for fluid use in the Iowa market. In September 1977, presumably after the producers had shifted, the Iowa market had a Class I utilization of 50 percent of producer receipts. For the months of October, November, and December, it was 50 percent, 52 percent, and 49 percent, respectively. There is no basis for determining from the record precisely how much the total supply of milk for the Iowa market was depleted by a shift of some producers to other markets. However, it cannot be concluded that whatever shift occurred resulted in a shortage of milk for Class I use.

Proponent pointed particularly to the fact that an Iowa supply plant at Sully, Iowa (relatively close to Des Moines) had been shifted to the St. Louis market in the fall months of 1977. He stated that the producers who supply the plant had previously supplied him with milk. However, the record suggests that this source of supply for proponent's plant was discontinued several years ago when proponent substantially reduced purchases from the cooperative that operates the Sully plant. In any case, at the time of the hearing, the Sully plant was associated with the Iowa market and the operators testified that it had already been decided to keep it associated with the Iowa market.

It was concluded earlier in this decision that there is no shortage of milk for Class I either for the market or for the proponent. As the alleged severe shortage of milk was the chief basis advanced by proponent for adopting the proposal to amend the producer definition, there is no basis for doing so in this record.

The representative of a cooperative testified that in the past his association had shifted some producers from the Iowa market in the fall months to the Central and Southern Illinois markets. The spokesman stated that it had already been decided at the time of the hearing that the quantity of milk involved would not be increased this year.

One of the cooperatives that opposed the proposal is a substantial supplier of milk to the St. Louis-Ozarks market and the Iowa market. A spokesman for the cooperative testified that during the fall and winter months the cooperative supplements the supply for the relatively large St. Louis-Ozarks market with milk from southeastern and eastern Iowa and from Kansas, Wisconsin and Minnesota. This has been a practice for the past 10 years. To require continuous association of the eastern Iowa supply with the Iowa market would mean that milk from the producers involved would have to be received first at the supply plant at Sully, Iowa, which would involve an uneconomic movement of milk in the opposite direction from where the milk is needed as a seasonal supplemental supply.

For this reason the proposal is denied and further, it is not apparent from this record that the proposal is needed as an adjunct to the supply plant pooling provisions of the order, as claimed by proponent. Accordingly, the proposal is denied.

5. *Plant location adjustments.* The proposal to change the pricing zone for Boone and Story Counties, Iowa, from Zone 1 to Zone 2 should not be adopted. The proposed zone change would have reduced the Class I price 7 cents per hundredweight in these two counties.

Two regulated handlers who operate distributing plants at Boone, in Boone County, proposed the change in pricing zones. The witness for the two handlers testified that prior to December 1971, Boone and Story Counties were priced 10 cents below Des Moines. However, at a public hearing held in 1971, a Des Moines handler proposed that this minus location adjustment be removed. The witness claimed that apparently since there was no opposition to the proposal, the minus 10 cents was removed effective December 1, 1971. He contented that there was no economic evidence provided at the 1971 hearing to support the zone change.

The witness testified that the Boone handlers distribute milk only in Boone and Story Counties and that they compete extensively with handlers to the south and north of them. He cited handlers in Des Moines and Marshalltown, Iowa, and Rochester, Minnesota, with whom they compete. He contended that the present pricing structure places the two handlers at a competitive disadvantage with these major competitors.

On the basis of this record, it is concluded that the price in Boone and Story Counties should continue to be the same as the price at Des Moines. The primary contention of the Boone handlers is that the current pricing structure puts them at a competitive disadvantage with plants in Des Moines and Rochester that distribute milk in Boone and Story Counties. With respect to Des Moines handlers, this would not appear to be the case since the Boone and Des Moines handlers have the same Class I price. In addition, the Des Moines handlers bear the cost of transporting the packaged fluid milk products about 40 miles to deliver it to outlets in the Boone-Story area. Proponents' witness acknowledged that it costs more than 7 cents per hundredweight to deliver packaged products that distance.

With respect to the competitive situation with the Rochester plant, it is noted that the cost of transporting packaged fluid milk products is at least 1.5 cents per hundredweight per 10 miles, which is the location adjustment rate provided under the order. Under the Upper Midwest order, the Rochester plant has a Class I differential of $1.12 per hundredweight. Since Rochester is about 200 miles from Boone, the cost of transporting milk from Rochester to Boone is at least 30 cents per hundredweight. Thus, the Rochester plant has an effective Class I differential of $1.42 at Boone compared to a Class I differential of $1.40 under the Iowa order at Boone.

These figures refute proponents' argument that the order prices put Boone at a disadvantage with its competition from Des Moines and Rochester.

The cooperative association that supplies milk to the Boone handlers opposed the proposal. The witness for the cooperative testified that if the Class I differential at Boone were lowered 7 cents, it is questionable whether the Boone handlers could obtain an adequate supply of milk since producers would take a 7-cent reduction in price. He claimed it is unlikely that producers would accept such a decrease in price because producer milk could be shifted from Boone to Des Moines at the same transportation cost. Therefore, even if the order price were reduced, as proposed, in all probability the Boone handlers would still have to pay the same effective price to the cooperative equal to what they are paying now.

At the time the Iowa orders were considered for merger, an identical proposal was presented by proponents, which was denied. Substantially the same arguments were presented at that time as were presented in this proceeding, and no new points were raised for consideration. There is no basis on the current record for adopting the proposal.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

JA 30 79

UMI

General Findings

The following findings and determinations supplement those that were made when the order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they conflict with those set forth below.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Recommended Marketing Agreement and Order Amending the Order

The recommended marketing agreement is not included in this decision because the regulatory provisions of it would be the same as those contained in the order that is proposed to be amended. The following order amending the order, as amended, regulating the handling of milk in the Iowa marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

1. In § 1079.7, paragraph (a)(2) is revised, a new paragraph (a)(3) is added, and paragraph (b) is revised to read as follows:

§ 1079.7 Pool plant.

* * * * *

(a) * * *

(2) Not less than 15 percent of such receipts are disposed of as route disposition (except filled milk) in the marketing area; and

(3) A unit consisting of at least two plants of a handler shall be considered as one distributing plant for the purpose of meeting the requirements of this paragraph if:

(i) Fluid milk products are processed and packaged at each plant;

(ii) Each plant meets the requirements of paragraph (a)(2) of this section; and

(iii) The handler notified the market administrator in writing before the first day of the month that the plants should be considered as a unit. The unit shall continue from month to month thereafter without further notification. To add plants to the unit, to drop them, or to discontinue the unit, the handler shall notify the market administrator in writing on or before the first day of the month such change is to be made.

(b) Any plant (which, if qualified pursuant to this paragraph, shall be known as a "pool supply plant") that is approved by a duly constituted regulatory agency for the handling of Grade A milk and from which during the month the volume of bulk fluid milk products transferred to pool distributing plants during each of the months of September through November is 35 percent or more and during each of the months of December through August is 20 percent or more of the total Grade A milk received at the plant from dairy farmers and handlers described in § 1079.9(c), including milk diverted therefrom by the plant operator pursuant to § 1079.13, subject to the following conditions:

(1) The shipping percentages of this paragraph may be increased or decreased up to 10 percentage points by the Director of the Dairy Division if he finds that such revision is necessary to result in needed shipments to pool distributing plants for Class I use, or to prevent uneconomic shipments, subject to the following conditions:

(i) Before making such a finding, the Director shall investigate the need for revision either on his own initiative or at the request of interested persons. If the investigation shows that a revision of the shipping percentage might be appropriate, he shall issue a notice stating that the revision is being considered and invite data, views, and arguments; and

(ii) No plant may qualify as a pool plant due to a reduction in the shipping percentage pursuant to this subparagraph unless it had been a pool supply plant during each of the immediately preceding three months.

(2) For plants located within the States of Iowa, Minnesota, Wisconsin, or that portion if Illinois north of Interstate 80, the shipping requirements of this paragraph may also be met in the following ways:

(i) A cooperative association that operates a supply plant may include as qualifying shipments its deliveries to pool distributing plants directly from farms of producers pursuant to § 1079.9(c);

(ii) A proprietary handler may include as qualifying shipments milk diverted pursuant to § 1079.13(d) to pool distributing plants;

(iii) The operator of a supply plant may include as qualifying shipments transfers of fluid milk products to distributing plants regulated under other Federal orders, except that credit for such transfers shall be limited to the amount of milk, including milk shipped directly from producers' farms, delivered to pool distributing plants under this order; and

(iv) Two or more supply plants operated by the same handler or by one or more cooperative associations may qualify for pooling as a unit by meeting the applicable percentage requirements of this paragraph in the same manner as a single plant if the handler submits a written request to the market administrator prior to the first day of September requesting that such plants qualify as a unit for the period of September through August of the following year.

The request shall list the plants to be included in the unit in the sequence in which they shall qualify for pool plant status based on the minimum deliveries required. If the deliveries made are insufficient to qualify the entire unit for pooling, the plant last on the list shall be excluded from the unit, followed by the plant next-to-last on the list, and continuing in this sequence until remaining plants on the list have met the minimum shipping requirements. Each plant that qualifies as a pool plant within a unit shall continue each month as a plant in the unit through the following August unless the plant fails subsequently to qualify for pooling or the handler submits a written request to the market administrator prior to the first day of the month that the plant be deleted from the unit or that the unit be discontinued. Any plant that has been so deleted from the unit, or that has failed to qualify in any month, will not be part of the unit for the remaining months through August. No plant may be added in any subsequent month through the following August to a unit that qualifies in September.

* * * * *

V 4 4 / 2 1

2. In § 1079.9, paragraphs (b) and (c) are revised as follows:

§ 1079.9 Handler.

* * * * *

(b) Any cooperative association with respect to milk of a producer that is diverted for the account of the cooperative association from a pool plant in accordance with § 1079.13;

(c) Any cooperative association with respect to milk that it receives for its account from the farm of a producer for delivery to a pool plant in a tank truck owned and operated by, or under the control of, such cooperative association. If the milk is delivered to the pool plant of another handler, the plant operator may be the handler for such milk if both the cooperative association and the operator of the pool plant notify the market administrator prior to the time that such milk is delivered to the pool plant that the plant operator will purchase such milk on the basis of weights determined from its measurements at the farm and butterfat tests determined from farm bulk tank samples. Milk for which the cooperative is the handler pursuant to this paragraph shall be deemed to have been received by the cooperative at the location of the pool plant to which such milk is delivered;

* * * * *

3. In § 1079.42, paragraph (e) is revised as follows:

§ 1079.42 Classification of transfers and diversions.

* * * * *

(e) *Transfers by a handler described in § 1079.9(c) to pool plants.* Skim milk and butterfat transferred in the form of bulk milk by a handler described in § 1079.9(c) to a pool plant shall be classified pursuant to § 1079.44 pro rata with producer milk received at the transferee-handler's plant.

4. In § 1079.60, paragraph (g) is revised as follows:

§ 1079.60 Handler's value of milk for computing uniform price.

* * * * *

(g) Subtract, for a handler described in § 1079.9(c) the amount obtained from multiplying the Class III price for the preceding month by the hundredweight of skim milk and butterfat contained in inventory at the beginning of the month that was delivered to a handler's pool plant during the month.

5. In § 1079.71, paragraph (a)(2)(i) is revised as follows:

§ 1079.71 Payments to the producer-settlement fund.

(a) * * *

(2) * * *

(i) The value at the uniform price, as adjusted pursuant to § 1079.75, of such handler's receipts of producer milk and milk received from a handler described in § 1079.9(c). In the case of a handler described in § 1079.9(c), less the amount due from handlers pursuant to § 1079.73, exclusive of differential butterfat values; and

* * * * *

NOTE.—This recommended decision constitutes the Department's Draft Impact Analysis Statement for this proceeding.

Signed at Washington, D.C., on: January 25, 1979.

JAMES E. SPRINGFIELD,
Acting Deputy Administrator,
Marketing Program Operations.

Animal and Plant Health Inspection Service

[9 CFR Part 91]

ANIMAL EXPORT REGULATIONS

Mexican and Canadian Ports of Embarkation

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the animal export regulations by deleting the provisions relating to certain Mexican and all Canadian border ports of embarkation. These border ports of embarkation no longer appear necessary for the exportation of animals to Mexico and Canada because such countries have ports of entry and require inspection of animals prior to their importation into their respective countries, and this country inspects such animals at their point of origin. This document also proposes to correct oversights and typographical errors which exist in the present animal export regulations. The intended effect of this action is to remove the requirement that animals be exported to Mexico and Canada through specified border ports of embarkation and to correct oversights and errors in the present regulations.

DATE: Comments on or before April 2, 1979.

ADDRESS: Written comments to Deputy Administrator, USDA, APHIS, VS, Room 821, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: Harold A. Waters, USDA, APHIS, VS, Room 826, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8383.

SUPPLEMENTARY INFORMATION: Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that pursuant to (21 U.S.C. 105, 112, 113, 114a, 120, 121, 134b, 134f, 612, 613, 614, 618; 46 U.S.C. 466a, 466b): 37 FR 28464, 28477; 38 FR 19141, the Animal and Plant Health Inspection Service is considering amending Part 91, Title 9, of the Code of Federal Regulations.

It is proposed that § 91.3(a) of the regulations be amended to remove the requirement that animals being exported to Mexico and Canada must be exported through ports of embarkation listed in § 91.3(a) or through ports designated in special cases by the Deputy Administrator. Both Canada and Mexico have inspection stations at their borders with the United States and at all other places at which they will accept shipments of animals. Animals being exported from the United States to Mexico or Canada are inspected by representatives of those respective countries at such inspection stations, and, prior to entry into those countries, the animals must meet the requirements of the respective country. The Department presently inspects such animals at the location from which such animals are originally moved for export. A requirement that such animals must be exported through ports of embarkation listed in § 91.3(a) or through ports designated in special cases by the Deputy Administrator and be inspected again by the Department appears to be a needless duplication of effort.

This proposal would also delete certain Mexican and all Canadian border ports listed in § 91.3(a)(3) and (4). The Canadian ports of embarkation would no longer be necessary since this proposal would remove the requirement that animals being exported to Canada be exported through such ports of embarkation. Ports of embarkation along the Mexican border would no longer be necessary for exports intended for Mexico since this proposal would remove the requirement that animals being exported to Mexico be exported through such ports of embarkation. However, the Mexican border ports of Brownsville, Laredo, Eagle Pass, Del Rio, and El Paso, Texas, would be retained for exports by land intended for countries other than Mexico but transiting Mexico.

Present footnote 3 and references thereto would be deleted. This footnote provides an address at which further information regarding Canadian border ports listed in § 91.3(a)(4) may be obtained. This footnote would no

JAN 30 79 UMI

longer be necessary since this proposal would delete the list of Canadian border ports contained in § 91.3(a)(4).

A new footnote 3 would be added to inform affected persons where they may obtain a list of cooperating State-Federal laboratories.

This proposal would amend § 91.6(a) to exclude animals being exported to Mexico or Canada from the requirement that all animals offered for exportation to any foreign country must be inspected by a Veterinary Services veterinarian at an export inspection facility at a port designated in § 91.3(a), or at a port or inspection facility designated by the Deputy Administrator in a special case under § 91.3(b). This requirement would no longer be necessary since this proposal would remove the requirement that animals being exported to Mexico or Canada be exported through such export inspection facilities. Further, representatives of Mexico and Canada presently inspect animals being exported from the United States into their respective countries.

Present § 91.6(d) states that the requirements of § 91.6(a) and (b) shall not apply in the case of animals offered for exportation to Canada through ports along the United States-Canada land border designated in § 91.3(a)(4) or for exportation to Mexico through ports along the United States-Mexico land border designated in § 91.3(a)(3) if the animals are accompanied by an origin health certificate issued and endorsed in accordance with the requirements of § 91.4(a). Section 91.6(c) would no longer be necessary since this proposal would delete the requirement that animals being exported to Mexico or Canada be exported through ports of embarkation designated in § 91.3(a) or (b). Therefore, it is proposed that § 91.6(d) be deleted.

This proposal would amend § 91.3(c)(1) by requiring that inspection facilities at ports of embarkation designated under § 91.3(a) and (b) have a roof adequate to protect the animals from inclement weather over at least three-fourths of the pens and alleys and over all of the inspection area. The present regulation contains a similar requirement in § 91.3(c)(3). This proposal would delete the reference to roof requirements in § 91.3(c)(3). The Department believes that it is more appropriate to place the roof requirements in § 91.3(c)(1) because this subparagraph contains requirements for floors, fences, gates and other parts of the facility. Further, this proposal would add the requirement that the roof cover the entire inspection area. This additional requirement is believed to be necessary because the animals spend a significant amount of time in the inspection area and a roof over such area is necessary to protect the animals being inspected and the persons conducting such inspection from inclement weather. This will also facilitate the inspections during inclement weather.

The proposal would amend § 91.3(b) to add as a condition for designation as a special port by the Deputy Administrator the requirement that the exporter can show to the satisfaction of the Deputy Administrator that the animals to be exported would suffer undue hardship if they are required to be moved to a port of export listed in § 91.3(a). This requirement would be added as a further justification for designation of special ports as ports of embarkation by the Deputy Administrator and should discourage the unnecessary use of this procedure. The reference to the Bureau of Customs has been changed to Director of Customs because it is the Director and not the Bureau who must concur with the Deputy Administrator. Further, the references to designation of inspection facilities in § 91.3(b) has been deleted since only ports having proper inspection facilities are designated as ports of embarkation.

This proposal would amend § 91.3(c)(3) to require that there be a separate area in each facility available for inspection and identification of the animals. This requirement would be added so that animals to be inspected and identified could be separated from the other animals in the facility and thereby facilitate such inspection and identification. This proposal would also amend § 91.3(c)(3) to require that pens and animal restraining devices sufficient for the inspection and identification of each animal be provided in this area of the facility. Presently, § 91.3(c)(3) specifies that a squeeze chute or similar restraining device and a crowding pen or pens be available for individual animal inspection and identification. As written § 91.3(c)(3) is ineffective because squeeze chutes and crowding pens are not necessary or effective for the inspection and identification of all animals. this proposal would correct this situation by requiring that pens and restraining devices shall be provided which are sufficient for the inspection and identification of each animal.

Section 91.4(a) currently requires that animals intended for exportation to Mexico or Canada be accompanied by an origin health certificate to the port of embarkation. Since this proposal would delete the requirement that animals intended for exportation to Mexico or Canada be exported through ports of embarkation, it is proposed that § 91.4(a) be amended to require that such animals be accompanied by the origin health certificate to the United States border. Other minor editorial changes were made for clarity and ease of reading in § 91.4(a).

It is proposed that § 91.4(b) be amended to exclude animals being exported to Canada or Mexico from the requirement that they be inspected, tested, or treated in the manner prescribed in Part 91 prior to the movement of the export shipment to the export inspection facility. This requirement would no longer be necessary since this proposal would delete the requirement that animals being exported to Mexico or Canada be exported through such export inspection facilities. However, these inspection, testing and treatment requirements would be replaced by requiring that all animals intended for export to Canada or Mexico be inspected, tested, or treated in the manner prescribed in Part 91 prior to the movement of the animals from the State of origin. Certain other amendments would be made for editorial reasons.

It is also proposed that the reference to "§ 91.5(b)(5)" in § 91.4(b) and the reference to "§ 915" in § 91.4(c), typographical errors, be corrected to read "§ 91.5(b)" and "§ 91.5" respectively, as originally intended.

It is also proposed that the last sentence in § 91.4(c) be amended to require that the test for brucellosis be conducted in a cooperating State-Federal laboratory in accordance with the Recommended Brucellosis Eradication Uniform Methods and Rules. the Uniform Methods and Rules allow blood samples to be tested by cooperating State-Federal laboratories or by such persons as may be authorized to conduct the standard agglutination tests or card tests. All samples initially tested at other than a cooperating State-Federal laboratory are required to be submitted and confirmed at the cooperating State-Federal laboratory. Under the present regulations some exporters have exported animals after the standard agglutination test and card tests were run but prior to their confirmation in a cooperating State-Federal laboratory. It was not the intent of this Department that animals be exported prior to confirmation of tests at a cooperating State-Federal laboratory. In order to eliminate this continuing problem, this proposal would amend § 91.4(c) to require that blood samples be tested only in a Cooperating State-Federal laboratory.

It is proposed that § 91.4(d) be amended to use the word "animals" rather than "livestock," since the word "animals" is defined in Part 91 and the word livestock is not. This proposal conforms with what was originally intended.

It is also proposed that § 91.4(d) be amended to strike the words "from the premises of origin to the port of embarkation", because this proposal

V 4 4 / 2 1

would not require animals intended for exportation to Canada or Mexico to be exported through such ports of embarkation.

For this reason it is also proposed that the first sentence in § 91.4(e) be amended to require that animals enroute to Canada or Mexico as well as those enroute to ports of embarkation, can be unloaded only into a facility which shall have been cleaned and disinfected with a disinfectant approved under § 71.10 of this Chapter, under the supervision of an inspector or an accredited veterinarian prior to such unloading.

It is also proposed that § 91.4(e) be amended to apply to animals unloaded for any purpose. As presently written, § 91.4(e) only applies to animals unloaded for feed, water, and/or rest. The Department believes that the purpose for unloading the animals has no bearing on cleaning and disinfecting requirements and therefore proposes to delete the words "for feed, water, and/or rest".

It is proposed that § 91.5(a)(2) be amended to exclude steers and spayed heifers from the brucellosis testing requirements. While steers and spayed heifers over six months of age can contract brucellosis, they do not present a risk of the spread of brucellosis because they are not sexually active animals.

Accordingly, Part 91, Title 9, Code of Federal Regulations, would be amended in the following respects:

1. In § 91.3, the second sentence of paragraph (a), would be amended; (a)(3) would be amended; (a)(4) would be deleted; paragraph (b) would be amended; a sentence would be added to the end of (c)(1), and the first two sentences of (c)(3) would be amended as follows:

§ 91.3 Ports of embarkation and export inspection facilities.

(a) * * * All animals, except animals being exported to Mexico or Canada, shall be exported through said ports or through ports designated in special cases under paragraph (b) of this section:

* * * * *

(3) *Border ports.* Brownsville, Laredo, Eagle pass, Del Rio, and El Paso, Texas.
(4) [Deleted]

* * * * *

(b) In special cases, other ports may be designated as ports of embarkation by the Deputy Administrator, with the concurrence of the Director of Customs, when the exporter can show to the satisfaction of the Deputy Administrator that the animals to be exported would suffer undue hardship if they are required to be moved to a port of embarkation listed in § 91.3(a). Such ports shall be designated only if the inspection facilities are approved as meeting the requirements of paragraph (c) of this section.

* * * * *

(c) * * *

(1) *Materials.* * * * The facility shall have a roof adequate to protect the animals from inclement weather over at least three-fourths of the pens and alleys and over all of the inspection area.

* * * * *

(3) *Inspection implements.* The facility shall have a separate area available for inspection and identification of the animals. Pens and animal restraining devices shall be provided in this area which are sufficient for the inspection and identification of each animal. * * *

2. In § 91.4, paragraphs (a), (b), and (d) are revised. Paragraph (c) is amended by changing the reference to "§ 915" to read "§ 91.5", and the last sentence (including footnote 3) would be amended as set forth below, and in paragraph (e) the first sentence is amended as set forth below:

§ 91.4 General export requirements.

(a) All animals intended for exportation to a foreign country, except animals intended for exportation to Mexico or Canada, shall be accompanied from the State of origin of the export movement to the port of embarkation by an origin health certificate. All animals intended for exportation to Mexico or Canada shall be accompanied from the State of origin of the export movement to the border of the United States by an origin health certificate. The origin health certificates shall certify that the animals were inspected within the 30 days prior to the date of the movement of the animals for export, and were found to be sound, healthy, and free from evidence of communicable disease and exposure thereto. The origin health certificates shall be endorsed by an authorized Veterinary Services veterinarian in the State of origin. The origin health certificates shall individually identify the animals in the shipment as to species, breed, sex, and age, and if applicable shall also show registration name and number, tattoo markings, or other natural or acquired markings.

(b) *Inspection.* All animals in each export shipment, except animals intended for export to Mexico or Canada, shall have been inspected, tested, or treated in the manner prescribed in this Part prior to the movement of the export shipment to the export inspection facility. All animals in each export shipment intended for export to Mexico or Canada shall have been inspected, tested, or treated in the manner prescribed in this Part prior to the movement of the animals from the State of origin. The Deputy Administrator may, upon request of the appropriate animal health official of the country of destination, waive the tuberculosis and brucellosis tests referred to in §§ 91.5(a) (1) and (2), 91.5(b), and 91.5(c) of this Part when he finds such tests are not necessary to prevent the exportation of diseased animals from the United States.

* * * * *

(c) *Testing.* * * * The test for brucellosis shall be conducted in a cooperating State-Federal laboratory [3] in accordance with the Recommended Brucellosis Eradication Uniform Methods and Rules.[1]

(d) *Movement in cleaned and disinfected carriers or containers.* The origin health certificate accompanying animals shall be accompanied by a statement from the issuing accredited veterinarian or inspector that the means of conveyance or container has been cleaned and disinfected since last used for animals with a disinfectant approved under § 71.10 of this Chapter, prior to loading, or that the carrier or container has not previously been used in transporting animals.

(e) *Clean and disinfected facilities for unloading animals.* Animals intended for exportation to Mexico or Canada or en route to a port of embarkation shall be unloaded only into a facility which shall have been cleaned and disinfected with a disinfectant approved under § 71.10 of this Chapter, under the supervision of an inspector or an accredited veterinarian prior to such unloading. * * *

3. Section 91.5(a)(2) would be amended to read:

§ 91.5 Specific export requirements.

(a) * * *

(2) *Brucellosis.* All cattle over six months of age shall be negative to a test for brucellosis conducted as prescribed in "Standard Agglutination Test Procedures for the Diagnosis of Brucellosis" [4] or "Supplemental Test Procedures for the Diagnosis of Brucellosis"; [4] except, that such tests are not required for official vaccinates of dairy breeds under 20 months of age, official vaccinates of beef breeds under 24 months of age, or steers and spayed heifers.

4. Section 91.6(a) would be amended to read as follows, and (d) would be deleted.

---

JAN 30 1979 UMI

§ 91.6 Inspection of animals for export.

(a) All animals offered for exportation to any foreign country, except Mexico or Canada, shall be inspected by a Veterinary Services veterinarian at an export inspection facility at a port designated in § 91.3(a), or at a port or inspection facility designated by the Deputy Administrator in a special case under § 91.3(b).

* * * * *

(d) [Deleted]

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 825, Hyattsville, Maryland, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the FEDERAL REGISTER.

Done at Washington, D.C., this 23rd day of January 1979.

Note.—This proposed rulemaking has been reviewed under the USDA criteria established to implement E.O. 12044, "Improving Government Regulations". While this action has not been designated "significant" under those criteria, an approved Draft Impact Analysis Statement has been prepared and is available from Program Services Staff, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782. 301-436-8695.

M. T. GOFF,
Acting Deputy Administrator, Veterinary Services.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[10 CFR Part 211]

[Docket No. ERA-R-78-3]

SMALL REFINER BIAS

Proposed Amendments to Entitlements Program to Reduce the Level of Benefits Received; Extension of Time to File Written Comments

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of extension of time to file written comments.

SUMMARY: On November 14, 1978, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) issued a notice of proposed rulemaking and public hearing which contained proposed amendments to the entitlements program to reduce the level of benefits available under the small refiner bias (43 FR 54632, November 22, 1978). In that notice, the deadline set for submission of written comments was January 22, 1979. The ERA hereby extends the time for filing written comments on its proposed rulemaking to February 5, 1979.

DATE: The time for filing written comments is extended to February 5, 1979.

FOR FURTHER INFORMATION CONTACT:

Fred Wolgel, Office of General Counsel, Department of Energy, Room 5134, Washington, D.C. 20461, 202-633-8820.

Issued in Washington, D.C., January 24, 1979.

DOUGLAS G. ROBINSON,
Assistant Administrator, Regulations & Emergency Planning, Economic Regulatory Administration.

FEDERAL HOME LOAN BANK BOARD

[12 CFR Part 545]

[No. 79-63]

FEDERAL SAVINGS AND LOAN SYSTEM

Policy on Branching

JANUARY 24, 1979.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Bank Board proposes to remove the 100 mile restriction on branching of Federal savings and loan associations within a state. The Board believes that revoking the 100-mile restriction will enhance consumer services and promote competition.

DATE: Comments must be received by: March 16, 1979.

ADDRESS: Send comments to the Office of the Secretary, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT:

Harry W. Quillian, Asscciate General Counsel, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552 (202-377-6440).

SUPPLEMENTARY INFORMATION: The Federal Home Loan Bank Board's policy on branching of Federal savings and loan associations allows establishment of branch offices or mobile facilities only within 100 miles of the association's home office unless a state policy is less restrictive. Very few states presently restrict branching beyond 100 miles of the association's home office.

Proponents of retention of this restriction have maintained that it protects small state-chartered associations from aggressive competitive pressures. They also maintain that relaxation of the 100-mile restriction for Federal associations would place state associations at a disadvantage because they would continue to be subject to restrictive state banking department policies.

On the other hand, the restriction encumbers the Bank Board's strong pro-branching policy by requiring unequal treatment of branching applications from Federal associations in states with restrictive branching policies.

After careful analysis, the Bank Board has determined that any branch office which meets the criteria for branching should receive due consideration without arbitrary constraints. The Bank Board believes that revoking the 100-mile restriction in § 556.5(b)(3) of the Regulations for the Federal Savings and Loan System (12 CFR 556.5(b)(3)) will enhance consumer services and promote competition.

Accordingly, the Federal Home Loan Bank Board hereby proposes to revoke 12 CFR 556.5(b)(3).

(Sec. 5, 48 Stat. 132, as amended (12 U.S.C. § 1454). Reorg. Plan No. 3 of 1947, 12 FR 4931; 3 CFR 1943-48 Comp., p. 1071.)

By the Federal Home Loan Bank Board.

J. J. FINN,
Secretary.

[No. 79-62]

FEDERAL SAVINGS AND LOAN SYSTEM AND FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Investment in Farmers' Home Administration Rural Housing Program Guaranteed Loans

JANUARY 24, 1979.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed amendments.

SUMMARY: These proposed regulations would authorize Federal savings and loan associations to invest in Farmers' Home Administration Rural Housing Program guaranteed loans on terms acceptable to the guaranteeing agency under certain conditions. The regulations would also authorize Fed-

V 4 4 / 2 1

eral associations and other institutions whose accounts are insured by the Federal Savings and Loan Insurance Corporation to invest in such loans with loan-to-value ratios exceeding 90 percent of value without the usual requirement of private mortgage insurance or special reserves. The Bank Board's present regulations do not permit significant investment in such loans, and the Bank Board believes it would be beneficial both to savings and loan associations and the communities they serve to allow fuller participation in this program.

DATE: Comments must be received by: March 2, 1979.

ADDRESS: Send comments to the Office of the Secretary, Federal Home Loan Bank Board, 1700 G. Street, NW., Washington, D.C. 20552. Comments available for public inspection at this address.

FOR FURTHER INFORMATION, CONTACT:

Harry W. Quillian, Associate General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Telephone number (202) 377-6440.

SUPPLEMENTARY INFORMATION: These amendments would add a new § 545.6-27 to the rules and regulations for the Federal Savings and Loan System (12 CFR Part 545) and revise §§ 545.6-7(b) and 545.8(a)(1)(v). New § 545.6-27 would authorize Federal associations to invest in first-lien loans on residential real estate under the Farmers' Home Administration ("FmHA") Rural Housing Program, subject to specified limitations. These limitations are reflected in a technical revision of § 545.6-7(b) ("Percentage limitations for specific types of loans"). The revision of § 545.8(a)(1)(v) would authorize Federal associations to invest in unsecured loans under the program repayable on terms acceptable to FmHA.

The proposed amendments would also revise §§ 561.15(b), 561.17(a) and 563.9-7(b) of the Rules and Regulations for Insurance of Accounts (12 CFR Parts 561 and 563). The unguaranteed portion of slow loans which are guaranteed under this program would be included as scheduled items (§ 561.15(b)) and as specified assets (561.17(a)). The revision of § 563.9-7(b) excludes secured loans under the program which comply with new § 545.6-27 from the otherwise applicable requirement under § 563.9-7(a) of private mortgage insurance or a specific reserve for loans over 90% of value.

Accordingly, the Bank Board hereby proposes to amend 12 CFR Parts 545, 561, and 563 by adding a new § 545.6-27 and amending §§ 545.6-7(b), 545.8(a)(1)(v), 561.15(b), 561.17(a) and 563.9-7(b), as described below.

§ 545.6-7 [Amended]

1. Amend the second sentence of § 545.6-7(b) by deleting the last "and" and inserting immediately before the period at the end the following: ", and § 545.6-27 (Farmers' Home Administration Rural Housing Program guaranteed loans)".

2. Add new § 545.6-27 as follows:

§ 545.6-27 Farmers' Home Administration Rural Housing Program guaranteed loans.

(a) A Federal association may invest in first-lien loans on residential real estate in its regular lending area guaranteed under the Farmers' Home Administration (FmHA) Rural Housing Program without regard to the loan-to-value-ratio, stated-maturity, and private-mortgage-insurance-or-reserve requirements of this part: *Provided*, (1) At least 80 percent of the principal amount and accrued interest of each loan is guaranteed by FmHA under the program; (2) the loan terms are acceptable to FmHA; and (3) such investment will not cuase the aggregate outstanding balance of the non-guaranteed portions of all such loans held by the association to exceed one-half of its net worth.

(b) Federal associations shall maintain records to verify compliance with the requirements for each investment made under paragraph (a) of this section including the loan note guarantee, lender's agreement, and a certification by an officer of the association that the investment limitation has not been exceeded.

§ 545.8 [Amended]

3. Amend the first sentence of § 545.8(a)(1)(v) by inserting immediately before the period at the end the following: "; except that Farmers' Home Administration Rural Housing Program guaranteed loans made pursuant to § 545.6-27 of this part shall be repayable on terms acceptable to the guaranteeing agency."

4. Revise § 561.15(b) to read as follows:

§ 561.15 Scheduled items.

* * * * *

(b) 20 percent of slow loans which are insured or guaranted, or secured by a first lien on low-rent housing; 20 percent of guaranteed obligations upon which one or more interest payments due have not been paid; and 100% of the unguaranteed portion of slow loans which are Farmers' Home Administration Rural Housing Program loans under § 545.6-27 of this chapter.

* * * * *

§ 561.17 [Amended]

5. In § 561.17(a), remove the penultimate "and" and insert immediately before the period at the end the following: ", and less the guaranteed portion of loans which are Farmers' Home Administration Rural Housing Program loans under § 545.6-27 of this chapter.

§ 563.9-7 [Amended]

6. In § 563.9-7(b) insert immediately before the period at the end the following: ", or to investment in Farmers' Home Administration Rural Housing Program guaranteed loans complying with § 545.6-27 of this chapter".

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464. Secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended; 12 U.S.C. 1725, 1726, 1730. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1943-48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

J. J. FINN,
Secretary.

[FR Doc. 79-3105 Filed 1-29-79; 8:45 am]

[7535-01-M]

NATIONAL CREDIT UNION ADMINISTRATION

[12 CFR Part 701]

ORGANIZATION AND OPERATIONS OF FEDERAL CREDIT UNIONS

Amortization and Payment of Loans to Members

AGENCY: National Credit Union Administration.

ACTION: Proposed rule.

SUMMARY: The purpose of this proposed rule is to provide an exception to the provision of 12 CFR 701.21-2. (Amortization and payment of loans to members), which require monthly payments for lines of credit established for members of Federal credit unions. The exception will permit payments on lines of credit at intervals greater than 1 month where appropriate to coincide with the borrower's receipt of income.

DATES: Comments must be received on or before February 24, 1979.

ADDRESS: Send comments to Robert S. Monheit, Senior Attorney, Office of General Counsel, National Credit Union Administration, Room 4202, 2025 M Street, NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT:

Layne L. Bumgardner, Office of Examination and Insurance at the above address. Telephone (202) 254-8760.

SUPPLEMENTAL INFORMATION: 1. On August 4, 1977, the Administration adopted the current provisions in 12 CFR 701.21-2(a) and 12 CFR 701.21-3(b)(2) which require that approved lines of credit to credit union members provide for a monthly payment. At the time of issuing the final regulation the Administration recognized the primary purpose of a line of credit in a Federal credit union as being a vehicle for providing improved delivery of credit for consumer goods and services to credit union members. For this reason, the Administration determined that a line of credit must be repaid on at least a monthly basis.

2. Since the regulations requiring monthly repayment on lines of credit have been in effect, the Administration has received numerous letters objecting to the requirement as overly restrictive in view of the permissive provisions of Pub. L. 95-22. The objections were received from credit unions servicing employee groups whose members were paid or received income on an irregular basis over the course of the year. These credit unions had provided loans to their members with repayment terms which coincided with their members' receipt of income prior to the issuance of the line of credit regulations.

3. In view of the above objections the Administration has reviewed the existing regulation and determined that an exception to the monthly payment requirement on lines of credit is appropriate. The exception only applies to lines of credit which are extended to persons who receive their income at intervals greater than 1 month. Furthermore, the exception for repayment of lines of credit to a corporate central by its member has been removed from §§ 701.21-2(a) and 701.21-3(b)(2) and now appears in § 701.21-2(b)(2).

4. Section 701.21-1(e) has been reworded to require the documentation of the interval at which a borrower receives income in the loan file. This section also has been amended to clearly require that a member's creditworthiness be documented in the loan file. Section 701.21-1(a)(4) defines a "loan file" as a file which includes a borrower's application for a loan or line of credit. Since an application is used to determine creditworthiness of the borrower, the Administration believed that the regulation was sufficiently clear. However, it has come to the Administration's attention that in certain instances credit union officials have interpreted the requirement of including an application in the loan file as not requiring complete documentation of the borrower's creditworthiness on the application.

LAWRENCE CONNEL,
Administrator.

JANUARY 24, 1979.

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and sec. 209, 84 Stat. 1104 (12 U.S.C. 1789))

Accordingly, it is proposed that 12 CFR Part 701 be amended as follows:

§ 701.21-1 [Amended]

1. By rewording § 701.21-1(e) to read as follows:

* * * * *

(e) The loan files of a Federal credit union shall contain evidence of the creditworthiness of the borrower and any endorser, the value of any security provided by a borrower, and the amount of funds and the interval at which the borrower receives funds which are intended to be relied upon for repayment of a loan or line of credit.

2. By deleting the wording "other than a member credit union" in the second sentence of § 701.21-2(a).

3. By adding the following subparagraphs after the end of § 701.21-2(b)(2)(ii):

(b) * * *

(2) * * *

(iii) A line of credit may provide for required payments at intervals of greater than 1 month, but not greater than 12 months, where appropriate to coincide with the member/borrower's receipt of income.

(iv) A line of credit extended by a Corporate Central Federal credit union to its member credit union may provide for required payments at intervals of not greater than 12 months.

4. By deleting the word "monthly" and the wording "(or annual payments in the case of a line of credit extended by a Corporate Central Federal credit union to its member credit unions)" in § 701.21-3(b)(2).

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 102]

[Docket No. 78P-0096]

COMMON OR USUAL NAME FOR NONSTANDARDIZED FOOD

Merluccius Productus

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The agency proposes to establish "Pacific hake" or "North Pacific hake" as the common or usual name for food fish of the species *Merluccius productus* (*M. productus*). This action is prompted by a petition submitted to the Food and Drug Administration (FDA) by the Pacific Coast Task Force for Whiting Nomenclature. The intent of this proposal is to provide for the orderly marketing of food fish of the species *M. productus* under a name that is understood and acceptable to consumers.

DATES: Written comments by April 2, 1979; proposed effective date of the final regulation based on this proposal is the date of publication of the final regulation in the FEDERAL REGISTER.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Howard N. Pippin, Bureau of Foods (HFF-312), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-245-3092.

SUPPLEMENTARY INFORMATION: FDA has received a petition from the Pacific Coast Task Force for Whiting Nomenclature requesting that a common or usual name regulation be established that would permit the fish species *M. productus* to be marketed as "whiting."

FDA has also received correspondence in support of this petition. Copies of the petition and correspondence in support of the petition have been placed on file in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, and may be seen between 9 a.m. and 4 p.m., Monday through Friday.

The petition proposed that Part 102 (21 CFR Part 102) be amended by adding the following new section:

§ 102.2—

The common or usual name of the food fish, genus *Merluccius*, derived from the following species, is as follows:

Scientific name and Common or usual name
Merluccius productus—Whiting, Pacific whiting, North Pacific whiting; Hake, Pacific hake, North Pacific hake.

Technically, the regulatory language proposed by the petition would permit fish of the *M. productus* species to be marketed under any of six different common or usual names. This is clearly an unacceptable approach to establishing a common or usual name regulation because of the confusion, probably not intended by the petitioner,

JAN 30 79
UMI

V 4 4 / 2 1

that this would create for consumers. From the text of the petition, it can be assumed that the intent of the request is to permit *M. productus* to be sold under the common name "whiting." Indeed, all of the petition's arguments are directed at justifying the sale of *M. productus* as "whiting" and not by any other name.

The petition states that historically the name "whiting" was used exclusively for fish of the species *M. bilinearis* and that the name "hake" was used to identify all other *Merluccius* species. The petition also admits that the name most frequently used in the literature in connection with fish of the genus *Merluccius* is "hake."

The petition argues that as the need for additional low-cost fillet blocks for processing into sticks and portions arose, other *Merluccius* species were permitted to be marketed in the United States as "whiting." Accordingly, the petition contends, the name "whiting" is recognized and established as the common name for most *Merluccius* species and, therefore, *M. productus* should be permitted to be marketed under the same name.

The petition further contends that the taxonomic similarities of *M. productus* to other *Merluccius* species that are identified as whiting add support to the practice of using the name "whiting" as the common name to identify the species *M. productus*.

Noting that *M. productus* identified as "whiting" is already imported into this country, the petition presents evidence of the economic benefit to the American fisherman if *M. productus* were allowed to be marketed as "whiting."

FDA recognizes the broad, underlying economic issues involved in this proposal. However, FDA is also concerned that extension of the term "whiting," with or without any modifiers, to *M. productus* may result in consumer deception or confusion.

The agency is aware that *M. productus* is commonly identified as "Pacific hake" or "North Pacific hake" in the fishing trade and in the literature. Furthermore, FDA has no evidence to suggest that *M. productus* is not recognized by consumers as "Pacific hake."

In addition, several articles in the literature indicate that there is a high incidence of abnormally mushy texture in *M. productus* caught off the coasts of Washington and Oregon, and that this texture may adversely affect the acceptability of this fish for food.

Although the name "whiting" has been used to identify fish of certain *Merluccius* species such as *M. hubbsi*, *M. gayi*, and *M. capensis*, it does not follow that *M. productus* should be marketed under the same name if in fact consumers perceive a significant distinction between *M. productus* and other *Merluccius* species.

FDA is concerned that distinction of *M. productus* from other *Merluccius* species is needed because of possible differences in edibility characteristics. FDA is therefore proposing on its own initiative, to establish a common or usual name regulation requiring fish of *M. productus* to be identified as "Pacific hake" or "North Pacific hake" as the common or usual name of this food fish.

Although the agency is proposing "Pacific hake" or "North Pacific hake" as the common or usual name for *M. productus* neither "Pacific whiting" nor "North Pacific whiting" has been ruled out as an acceptable name.

FDA is therefore specifically asking for comment from consumers concerning their understanding of the terms "Pacific hake" and "whiting." Consumers are urged to respond concerning their knowledge of the differences or similarities between the two food fish and whether those differences are sufficient to render it a deceptive practice to permit marketing of *M. productus* under the name "whiting" of "Pacific whiting."

Information not furnished by the petition but used in consideration of the petition is on file in this office of the Hearing Clerk, FDA.

The potential environmental effects of this action have been carefully considered, and the agency has concluded that the action will not significantly affect the quality of the human environment. Under § 25.1(f)(12) (21 CFR 25.1(f)(12)), the agency has determined that this action does not require the preparation of an environmental impact statement and analysis report.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201, 403, 701(a), 52 Stat. 1040–1042 as amended, 1047–1048 as amended, 1055 (21 U.S.C. 321, 343, 371(a))— and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Part 102 be amended by adding new § 102.46 to read as follows:

§ 102.46 Pacific hake.

"Pacific hake," or "North Pacific hake," is the common or usual name of the food fish *Merluccius productus*.

Interested persons may, on or before April 2, 1979 submit to the Hearing Clerk (HFA-350), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: January 26, 1979.

WILLIAM F. RANDOLPH
Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-0223]

ADIPIC ACID

Proposed Affirmation of GRAS Status as a Direct Human Food Ingredient

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to affirm the generally recognized as safe (GRAS) status of adipic acid as a direct human food ingredient. The safety of this ingredient has been evaluated under the agency's comprehensive safety review. The proposal would list the ingredient as a direct food substance affirmed as GRAS.

DATE: Comments by April 2, 1979.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration is conducting a comprehensive safety review of direct and indirect human food ingredients classified as generally recognized as safe (GRAS) or subject to a prior sanction. The Commissioner of Food and Drugs has issued several notices and proposals (see the FEDERAL REGISTER of July 26, 1973 (38 FR 20040)), initiating this review. Under this review, the safety of adipic acid has been evaluated. In accordance with the provisions of § 170.35(21 CFR 170.35), the Commissioner proposes to affirm the GRAS status of this ingredient.

Adipic acid (1, 4-butanedicarboxylic acid or hexanedioic acid) is reported to be a minor constituent of butter. It has also been found in other fats as a product of oxidative rancidity and in beet juice. Adipic acid has the lowest acidity of any of the acids commonly used in foods, and it has appreciable buffering capacity in the range of pH 2.5 to 3.0. Adipic acid is prepared by the nitric acid oxidation of cyclohexanol or cyclohexanone or a mixture of the two.

Under regulations published in the FEDERAL REGISTER of January 31, 1961 (26 FR 938), adipic acid is listed in § 182.1009 (21 CFR 182.1009) as GRAS for use in food as a buffer and neutralizing agent. The Food and Drug Administration also has issued an opinion letter recognizing the GRAS status of sodium adipate as a buffer and neutralizing agent.

Adipic acid has also been regulated for other specific food additive uses by issuance of the following regulations: (1) in § 172.515 (21 CFR 172. 515), as a synthetic flavoring substance and adjuvant; (2) in § 175.105 (21 CFR 175.105), as a component of adhesives; (3) in § 175.300 (21 CFR 175.300), as a component of resinous and polymeric coatings; (4) in § 175.320 (21 CFR 175.320), as a component of resinous and polymeric coatings for polyolefin films; (5) in § 177.1200 (21 CFR 177.1200), as a component of cellophane; (6) in § 177.1680 (21 CFR 177.1680), as a component of polyurethane resins; and (7) in § 177.2420 (21 CFR 177.2420), as a component of cross-linked polyester resins.

A representative cross-section of food manufacturers was surveyed to determine the specific foods in which adipic acid is used and the levels of usage. Information from surveys of consumer consumption was obtained and combined with the manufacturing information to obtain an estimate of consumer exposure to adipic acid. The amount of adipic acid used in food in 1970 was 8.6 million pounds, about 2.5 times the amount used in 1960.

Adipic acid has been the subject of a search of the scientific literature from 1920 to the present. The parameters used in the search were chosen to discover any articles that considered (1) chemical toxicity, (2) occupational hazards, (3) metabolism, (4) reaction products, (5) degradation products, (6) any reported carcinogenicity, teratogenicity, or mutagenicity, (7) dose response, (8) reproductive effects, (9) histology, (10) embryology, (11) behavioral effects, (12) detection, and (13) processing. A total of 66 abstracts was reviewed and 14 particularly pertinent reports have been summarized in a scientific literature review.

The scientific literature review shows, among other studies, the following information as summarized in the report of the Select Committee on GRAS Substances (the Select Committee), selected by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology:

Adipic acid labeled with carbon-14 in the 1- and 2-carbon positions and given by stomach tube (250 mg per kg body weight) to fasted male albino rats was almost completely absorbed and up to 70 percent of the radioactivity was exhaled as carbon dioxide within 24 hours. Tissues of the test animals sacrificed at 24 hours contained very little residual radioactivity. Highest activity appeared in the liver and kidneys. Radioactive metabolic products in the urine were identified as urea, glutamic acid, lactic acid, β-ketoadipic acid and citric acid. Some adipic acid also was excreted in the urine. The presence of β-ketoadipic acid suggested that adipic acid is metabolized by β-oxidation. Other evidence in the support of this mechanism was the appearance of succinic acid in the urine of rats fed carbon-14 labeled adipic acid and injected intraperitoneally with malonic acid to inhibit the oxidation of succinic acid. Evidence that acetate is a metabolite of adipic acid was the presence of labeled acetyl-α-phenyl-α-aminobutyric acid in the urine of rats after feeding α-phenyl-α-aminobutyric acid and carbon-14 labeled adipic acid. However, after feeding labeled carbon dioxide in the form of radioactive sodium bicarbonate some of the same metabolic products were isolated from the urine as were found after feeding labeled adipic acid. This indicates that such metabolic products are not necessarily derived directly from adipic acid but may be biosynthesized via carbon dioxide from adipic acid.

Adult rats given 2.4 g adipic acid per kg body weight by stomach tube each day for four weeks excreted 60 to 70 percent of the dose daily in the urine. Excretion dropped essentially to zero within 24 hours after the last feeding. Whole-body analysis of the rats 72 hours after the last feeding disclosed no accumulation of adipic acid in the body tissues. Whole-body analysis of young, growing rats fed the same level of adipic acid for four weeks gave a similar result.

Urinary excretion by rabbits was determined after administration of adipic acid (2.4 g per kg body weight) by stomach tube on two successive days. Collection and analysis of the urine for six days starting on the day of the first treatment showed that an average of 53 percent of the administered dose was excreted unchanged. Excretion reached a maximum on the second day and dropped to zero on the fifth day. In another study, it was found that an average of 61 percent of sodium adipate (0.23 to 0.74 g per kg) injected subcutaneously into rabbits was excreted unchanged in the urine within 24 hours; some increase in urinary oxalic acid was observed.

In four dogs given subcutaneous injections of 10 g of sodium adipate in doses of 250 mg (135 to 200 mg per kg) twice daily for five days, 50 percent of the compound was isolated from the urine.

Rats apparently do not develop a greater capacity to metabolize adipic acid when it is fed over a long period. Animals previously fed the compound for 20 to 25 weeks and those not previously receiving adipic acid were fed 400 to 800 mg per day (1.3 or 2.7 g per kg) for 14 days. The proportion of adipic acid excreted was about equal for the two groups.

In an investigation by Kabelitz of the effect of the dicarboxylic acids on oxalic acid excretion in human adults, the administration of 50 g (0.84 g per kg body weight) adipic acid by stomach tube caused no increase in the urinary excretion of oxalic acid in the two subjects studied. Addition of 150 g of butter, olive oil, lard or margarine to the standard diet for five days prior to administration of the adipic acid did not affect urinary excretion of oxalic acid. Weitzel administered up to 7.3 g (120 mg per kg) of adipic acid per day to three human subjects and concluded that much of the adipic acid was metabolized in the body. In later experiments he administered several dicarboxylic acids, including adipic acid, to human subjects at levels of 40 to 100 mg per kg daily for periods up to nine days. Over 50 percent of the adipic acid was excreted unchanged in the urine of four subjects. No adverse effects of adipic acid ingestion were reported.

The acute toxicity of adipic acid has been determined for various routes of administration in mice, rats, and rabbits. A value of 1900 mg per kg was established as the LD_{50} following oral administration to 39 adult male albino mice as a 6 percent suspension in 0.5 percent aqueous methyl cellulose. The intravenous injection of a 2 percent aqueous solution at a rate of 0.01 ml per second to 39 mice gave an LD_{50} of 680 mg per kg. The LD_{50} for intraperitoneal administration of adipic acid to mice was 275 mg per kg.

In rats given adipic acid orally, the average lethal dose was between 2.43 and 4.86 g per kg. The lower dose produced stomach distension and diarrhea which lasted about 24 hours. At the higher dose, the animals died 10 to 30 hours after feeding. Two determinations of acute toxicity in rats were reported in a recent study. In each case adipic acid was suspended in 0.85 percent saline and given orally by intubation in male rats of average weight about 250 g. An acute LD_{50} of 940 mg per kg was determined by administration of single doses (100 to 3000 mg per kg) to six groups of five rats each. In a second experiment no signs of toxicity were observed after a single dose of 5 g per kg was given to ten rats indicating an acute LD_{50} greater than 5 g per kg. A subacute LD_{50} (14 days) of 3.61 g per kg was established following administration of daily dosages of 3.30 to 5.60 g per kg for five days to five groups of six rats each and observation for a total period of 14 days.

Administered subcutaneously to rabbits, 1 to 2 g per kg of adipic acid was mildly nephropathic, as indicated by changes in blood composition and decreased output of phenolsulphonthalein. Renal function was recovered completely within 48 hours.

No changes in growth rate or in other outward manifestations as compared to controls were found in 55 female rats (92 g average initial weight) fed up to 40 mg (440 mg per kg) adipic acid daily in their diet for four weeks. Of 69 male rats, initial weight 50 g, fed 200, 400, and 800 mg (4 to 16 g per

JAN 30 1979 UMI

V 4 4 / 2 1

kg) sodium adipate daily for five weeks as a dietary component, only those receiving the highest level exhibited signs of toxicity: depressed growth, severe diarrhea, and unkempt appearance. In another study in the same laboratory, young male and female rats given 400 mg (8 g per kg body weight) adipic acid daily for 33 weeks in their diet were not adversely affected. Pregnant rats in this group were able to bear and nurse their young. Young rats (54 g initial weight) fed an inferior diet consisting of crushed wheat supplemented with cod liver oil showed substantial growth impairment when adipic acid at a level of 400 mg per animal per day was included in the diet.

In a 90-day feeding test, young male albino rats were given a laboratory meal diet supplemented with 0.1, 1.0 and 5.0 percent adipic acid and female rats were fed the laboratory meal supplemented with 1.0 percent adipic acid. No adverse effects were noted at the 0.1 and 1.0 percent levels (up to 1.7 g per kg of body weight) but marked retardation of growth resulted at the 5.0 percent level (up to 8 g per kg). Since there was no alteration of food intake and no marked gross pathology at sacrifice, it is assumed that the low pH and high acid consumption at the 5 percent adipic acid level might have influenced food digestion and utilization.

As compared to control animals, young rats given 243 mg adipic acid (up to 3.4 g per kg) daily for four weeks did not differ in growth rate or appearance. A comparable study on adult rats given 730 mg (2.4 g per kg) daily showed no effect on weight or health of the animals.

Young male rats of the Carworth Farm strain were placed on either a basal laboratory diet or on the basal diet supplemented with 0.1, 1, 3, or 5 percent (50, 500, 1500, or 2500 mg per kg) adipic acid or 3 or 5 percent citric acid for two years. Female rats received the diet supplemented with 1 percent adipic acid. During the first several weeks, but not subsequently, the weight gains for the groups given 3 to 5 percent adipic or citric acid were significantly less than those of the controls. After sacrifice, microscopic examination was made of the thyroid, lungs, heart, liver, spleen, kidneys, adrenals, stomach, small intestine, large intestine, pancreas, bone marrow, and testes or ovaries and uterus. There was no difference in organ weights as compared to controls and no significant pathology observed that could be related to ingestion of adipic acid.

In testing of adipic acid for teratogenic effects, pregnant female albino CD–1 outbred mice were given up to 263 mg of adipic acid per kg body weight by oral intubation on day 6 through day 15 of gestation. No discernible effects were observed on nidation or on maternal or fetal survival. The number of abnomalities in the soft and skeletal tissues of the test groups did not differ from the number occurring spontaneously in sham-treated controls. Similar negative results were reported in studies of pregnant female Wistar-derived albino rats given up to 288 mg adipic acid per kg body weight by oral intubation daily from the 6th through the 15th day of gestation, and on pregnant hamsters given daily oral administration of up to 205 mg adipic acid per kg body weight on day 6 through day 10 of gestation.

Adipic acid showed no teratogenic activity when injected into the developing chick embryo at 0 and 96 hours of incubation either via air cell or yolk at dosages up to 300 mg per kg of egg.

Mutagenicity studies on adipic acid were conducted utilizing three mammalian test systems: (1) host-mediated assay in mice with *Salmonella typhimurium* TA–1530 and G–46 and *Saccharomyces cerevisiae* D–3 as test organisms; (2) cytogenic studies in rats; and (3) dominant lethal assay in rats. Adipic acid was administered by oral intubation at dosage levels of 3.75, 37.5 and 375 mg per kg body weight in the *in vivo* tests for both the acute (1 dose) and subacute studies (1 dose per day for five days). Mutagenic tests also were conducted *in vitro* using *S. typhimurium* TA–1530 and G–46, and *S. cerevisiae* D–3 as test organisms; *in vitro* cytogenetic studies using human embryonic lung cultures were performed at 2.0, 20.0, and 200.0 mcg adipic acid per ml. Adipic acid exhibited no mutagenic activity in any of the tests except for tests at acute levels with *S. cerevisiae* D–3 in which a weak positive response was observed.

All of the available safety information on adipic acid has been carefully evaluated by qualified scientists of the Select Committee. It is the opinion of the Select Committee that:

Investigations on animals and humans show that adipic acid is readily absorbed from the alimentary tract. Much of the absorbed compound is rapidly excreted in the urine but a substantial portion is oxidized to carbon dioxide. The intermediate products formed indicate that it is metabolized by the same route as the fatty acids.

The tolerance of animals to adipic acid is comparable to that of certain normal metabolites such as citric acid. Adipic acid caused no harmful effects in animals in long-term tests in which it was added to the diet in amounts up to at least 1 percent (500 mg per kg body weight per day). This is over 500 times the daily per capita intake estimated from the poundage reported to be used in food in 1970. The available evidence suggests that the metabolism of adipic acid in man is comparable to that of laboratory animals.

It is the conclusion of the Select Committee that there is no evidence in the available information on adipic acid that demonstrates, or suggests reasonable grounds to suspect, a hazard to the public when it is used at levels that are now current or that might reasonably be expected in the future. Based upon his own evaluation of all available information on adipic acid, the Commissioner concurs with this conclusion. The Commissioner therefore concludes that no change in the current GRAS status of adipic acid is justified.

The Commissioner also concludes that the information generated for this safety review forms a sound scientific basis for affirming the GRAS status of adipic acid as a synthetic flavoring agent and adjuvant. Authority for this use now appears in § 172.515. Therefore, the Commissioner proposes to delete the entry for this substance from that section, as it would be superfluous. He also proposes to delete the entry (21 CFR 182.1009) for adipic acid as a multiple purpose food substance, as this section would also be superfluous.

Copies of the scientific literature review on adipic acid, and the report of the Select Committee are available for review at the office of the Hearing Clerk (HFA–305), Rm. 4–65, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, and may be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22151, as follows:

Title	Order No.	Price Code	Price*
Adipic acid (Scientific literature review)	PB–230–305/AS	A03	$4.50
Adipic acid (Select Committee report)	PB–266–279/AS	A02	4.00
Adipic acid (Mutagenic evaluation)	PB–248–466/AS	A07	7.25

Adipic acid (Teratogenic evaluation, rabbit)	PB–267–202/AS	A02	4.00

*Price subject to change.

This proposed action does not affect the present use of adipic acid for pet food or animal feed.

After careful consideration of the specifications for adipic acid in the Food Chemical Codex, the Commissioner concludes that they need improvement relative to current standards. Specifically, the Commissioner proposes the adoption of two identity tests and a narrower melting point range for food-grade adipic acid. These changes are specified in the proposed rule. In addition, the Commissioner concludes that the assay test for adipic acid can be significantly improved, and he requests comments from interested persons on improved assay tests that are more specific for adipic acid.

The GRAS status of sodium adipate as a buffer and neutralizing agent was recognized in an FDA opinion letter issued in 1964. However, the Commissioner is unaware of certain information which, in accordance with § 170.35, is required in order to affirm the GRAS status of sodium adipate. In particular, the Commissioner is unaware of the manufacturing methods and food-grade specifications for sodium adipate, the food categories in which it is used, and the usual and maximum use levels in each food category. Because the absence of this information precludes the definition of conditions of safe use, this proposal does not affirm the GRAS status of sodium adipate. Interested persons may include the information described above in any comments submitted in response to this proposal. The Commissioner does not consider himself bound by the 1964 opinion letter. Therefore, if the Commissioner does not receive the information required to affirm the GRAS status of sodium adipate, he may, upon the effective date of the proposed regulation, consider sodium adipate to be a food additive within the meaning of section 201(s) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(s)).

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409(d), 701(a), 52 Stat. 1055, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348(d), 371(a))), and under authority delegated to him (21 CFR 5.1), the Commissioner proposes that Parts 172, 182, and 184 be amended as follows:

PART 172—FOOD ADDITIVES PERMITTED FOR DIRECT ADDITION TO FOOD FOR HUMAN CONSUMPTION

§ 172.515 [Amended]

1. In § 172.515 *Synthetic flavoring substances and adjuvants*, by deleting the entry for "Adipic acid; 1, 4-butanedicarboxylic acid" from the list of substances in paragraph (b).

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

§ 182.1009 [Deleted]

2. By deleting § 182.1009 *Adipic acid.*

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

3. By adding new § 184.1009 to read as follows:

§ 184.1009 Adipic acid.

(a) Adipic acid ($C_6H_{10}O_4$, CAS Reg. No. 000124–04–9) is also known as 1, 4-butanedicarboxylic acid or hexanedioic acid. It is prepared by nitric acid oxidation of cyclohexanol or cyclohexanone or a mixture of the two.

(b) The ingredient meets the specifications of the Food Chemicals Codex, 2d Ed. (1972),[1] as amended as follows:

[1] Copies may be obtained from: National Academy of Sciences, 2101 Constitution Ave. NW., Washington, DC 20037.

(1) The melting range of the ingredient is 151° to 153° C.

(2) The test substance is derivatized to its corresponding amide. The amide is purified by recrystallization from water or aqueous ethanol. The melting range of this substance is 219° to 220° C.

(3) The test substance is derivatized to its corresponding *p* bromophenacyl ester. The ester is purified by recrystallization from ethanol. The melting range of this substance is 153° to 154° C.

(c) The ingredient is used as a flavoring agent as defined in § 170.3(o)(12) of this chapter, leavening agent as defined in § 170.3(o)(17) of this chapter, and pH control agent as defined in § 170.3(o)(23) of this chapter.

(d) The ingredient is used in foods at levels not to exceed good manufacturing practice in accordance with § 184.1(b)(1). Current good manufacturing practice results in maximum levels, as served, of 0.05 percent for baked goods as defined in § 170.3(n)(1) of this chapter, 0.005 percent for nonalcoholic beverages as defined in § 170.3(n)(3) of this chapter, 5.0 percent for condiments and relishes as defined in § 170.3(n)(8) of this chapter, 0.43 percent for dairy product analogs as defined in § 170.3(n)(10) of this chapter, 0.3 percent for fats and oils as defined in § 170.3(n)(12) of this chapter, 0.0004 percent for frozen dairy desserts as defined in § 170.(n)(20) of this chapter, 0.55 percent for gelatin and puddings as defined in § 170.3(n)(22) of this chapter, 0.1 percent for gravies as defined in § 170.3(n)(24) of this chapter, 0.27 percent for meat products as defined in § 170.3(n)(29) of this chapter, 1.3 percent for snack foods as defined in § 170.3(n)(37) of this chapter, and 0.02 percent or less for all other food categories.

The Commissioner hereby gives notice that he is unaware of any prior sanction for the use of this ingredient in foods under conditions different from those proposed herein. Any person who intends to assert or rely on such a sanction shall submit proof of its existence in reponse to this proposal. The regulation proposed above will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the act (21 U.S.C. 342), and the failure of any person to come forward with proof of such an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on such sanction at any later time. This notice also constitutes a proposal to establish a regulation under Part 181 (21 CFR Part 181), incorporating the same provisions, in the event that such a regulation is determined to be appropriate as a result of submission of proof of such an applicable prior sanction in response to this proposal.

Interested persons may, on or before March 27, 1979, submit to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order.

NOTE.—Incorporation by reference approved by the Director of the Office of the Federal Register on July 10, 1973. Reference material is on file at the Federal Register Library.

Dated: January 22, 1979.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N–0255]

SODIUM OLEATE AND SODIUM PALMITATE

Proposed Affirmation of GRAS Status as Indirect Human Food Ingredients

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Commissioner of Food and Drugs proposes to affirm sodium oleate and sodium palmitate as generally recognized as safe (GRAS) when used as indirect human food ingredients. The safety of these ingredients has been evaluated in a comprehensive safety review being conducted by the agency. The proposal would list sodium oleate and sodium palmitate as indirect human food substances affirmed as GRAS.

DATE: Comments by April 2, 1979.

ADDRESS: Written comments to the Hearing Clerk (HFA–305), Food and

JA 30 79 UMI

Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration (FDA) is conducting a comprehensive safety review of human food ingredients classified as generally recognized as safe (GRAS) or subject to a prior sanction. The Commissioner has issued several notices and proposals (see the FEDERAL REGISTER of July 26, 1973 (38 FR 20040)) initiating this review. Under this review, the agency has evaluated the safety of sodium oleate and sodium palmitate. In accordance with the provisions of § 170.35 (21 CFR 170.35), the Commissioner proposes to affirm the GRAS status of these ingredients for indirect human food use.

Oleic acid (an 18-carbon mono-unsaturated fatty acid) and palmitic acid (a 16-carbon saturated fatty acid) occur as triglyceride esters of natural fats and oils. In some fats and oils oleic acid is present at levels greater than 30 percent. In most animal fats, however, palmitric acid is the principal saturated fatty acid.

Sodium oleate is the sodium salt of oleic acid and exists as a white to yellowish powder with a slight tallow-like odor. Sodium palmitate is the sodium salt of palmitic acid and exists as a white to yellow powder. The sodium salts of oleic and palmitic acids (commonly referred to as soaps) are the products of alkaline hydrolysis of animal and vegetable fats and oils. However, sodium oleate and sodium palmitate are prepared commercially by mixing and heating food grade oleic or palmitic acid with flaked sodium hydroxide.

Under § 182.90 (21 CFR 182.90) soap (sodium oleate and sodium palmitate) is a GRAS substance migrating to food from paper and paperboard products (see regulations published in the FEDERAL REGISTER of June 17, 1961 (26 FR 5421)). FDA has also issued an opinion indicating that sodium oleate is GRAS when used as a component of lubricants with incidental food contact complying with § 178.3570 (21 CFR 178.3570). The sodium salts of fatty acids complying with § 172.860 (21 CFR 172.860) and/or oleic acid derived from tall oil fatty acids complying with § 172.862 (21 CFR 172.862) are also approved under § 172.863 (21 CFR 172.863) for use in food as binders, emulsifiers, and anticaking agents.

Sodium salts of fatty acids are also approved for use in various food-packaging materials. They are listed in § 175.105 (21 CFR 175.105) as components of adhesives, in § 176.170 (21 CFR 176.170) as components of paper and paperboard in contact with aqueous and fatty foods, in § 177.1200 (21 CFR 177.1200) as components of cellophane, in § 177.2260 (21 CFR 177.2260) as components of resin-bonded filters, in § 177.2600 (21 CFR 177.2600) as components of rubber articles intended for repeated use, and in § 178.3910 (21 CFR 178.3910) as components of surface lubricants used in the manufacture of metallic articles. Sodium oleate is listed in § 175.300 (21 CFR 175.300) as a component of resinous and polymeric coatings.

Other GRAS fatty acid salts are not addressed in this proposal. They will be considered in GRAS proposals on tallow, vegetable oils, and vitamin D, and on specifications such as aluminum, magnesium, and zinc.

No data on possible intakes of sodium oleate or sodium palmitate resulting from their use in food-packaging materials have been found. However, FDA concludes that only minute amounts of these ingredients might enter the human food supply as migrants from paper and paperboard packaging materials, and that the amounts would be extremely small in comparison with the substantial quantities of oleic and palmitic acids and sodium that are ingested daily as natural components of food.

Sodium salts of fatty acids have been the subject of a search of the scientific literature from 1920 to the present. The criteria used in the search were chosen to discover any articles that considered (1) chemical toxicity, (2) occupational hazards, (3) metabolism, (4) reaction products, (5) degradation products, (6) any reported carcinogenicity, teratogenicity, or mutagenicity, (7) dose response, (8) reproductive effects, (9) histology, (10) embryology, (11) behavioral effects, (12) detection, and (13) processing. A total of 148 abstracts was reviewed and 32 particularly pertinent reports from the literature survey have been summarized in a scientific literature review.

The scientific literature review shows, among other studies, the following information as summarized in the report of the Select Committee on GRAS Substances (the Select Committee), chosen by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology:

No information directly concerned with the absorption, metabolism, excretion, or acute toxicity of sodium oleate and sodium palmitate as such was found by the Select Committee. However, the following three studies are relevant:

Carroll and Richards fed rats for 16 days on diets containing various sources of fat and found that oleic acid was less well absorbed (73 percent) than triolein (99 percent); 40 percent of fed palmitic acid was absorbed while only 22 percent of fed tripalmitin was absorbed. These percentages were based on analyses of feces for unabsorbed lipids. Dietary doses of the fats were approximately 1.2 to 1.4 g per rat per day (about 7 to 8 g per kg per day).

Bergstrom *et al.* administered by gastric intubation 0.5 ml of 1-^{14}C oleic acid (about 1.8 g per kg) to 250 g male rats with cannulated thoracic ducts. After 24 hours, an average of 78 percent of the labeled oleic acid had been absorbed. Of the absorbed oleic acid recovered in lymph from the thoracic duct, about 2 percent was in the form of phospholipids. About 16 percent of the carbon-14 label was recovered as expired $^{14}CO_2$ in 24 hours.

Similar experiments were conducted by Bloom *et al.* who administered ^{14}C-palmitic acid in corn oil enterally. Thoracic duct cannulations were performed on ten male rats, six received the free fatty acid and four received tripalmitin. In 19 to 24 hours, 81 to 95 percent of the labeled palmitic acid was recovered from the thoracic duct lymph. An additional four rats were prepared by cannulation of their larger mesenteric lymph ducts; 69 to 84 percent of the labeled palmitic acid was recovered from the fatty acid fraction of the intestinal lymph.

Oleic and palmitic acids are components of many foods and GRAS food ingredients. Their sodium salts dissociate in the gastrointestinal tract and the fatty acid moieties are transported into the mucosal cells, where they are esterified into triglycerides. A small amount of the free fatty acids is dispersed in the chylomicrons and transported into the general circulation.

Few studies have been reported concerning the sodium salts of oleic or palmitic acids as such, and these, as well as relevant studies on the feeding of the corresponding fatty acids, have usually employed dosage levels that are orders of magnitude higher than would be expected in food due to migration of these salts from packaging materials.

Chauchard *et al.* reported that feeding sodium oleate to rats daily at 22 percent of their diet (about 22 g per kg per day) increased the excitability of the neuromuscular system, shortened nerve chronaxia, and increased muscle chronaxia. The effect was observed within 48 hours after starting the diet. The authors ascribed the effect to a dietary lipid imbalance and found it to be neutralized by addition of B vitamins. Lecoq *et al.*, in continuance of this work, observed similar effects after subcutaneous injection of sodium oleate (dose not indicated) and found that they could be reversed or prevented by daily oral administration of 100 to 200 μg doses of nicotinamide, pyridoxine or pantothenic acid. In neither study was the no-effect level of sodium oleate on neuromuscular excitability determined.

Sunde reported that chicks receiving 5 percent oleic acid in their diet (about 6 g per kg per day) for four weeks showed improved feed utilization and no adverse effects.

Flesch found that the administration of 10 ml of oleic acid (about 2.5 g per kg body weight) by stomach tube every other day for four days to four albino rabbits resulted

J A 3 0 7 9 UMI

in hair loss, scaling seborrheic lesions on the ears and one death. Doses of 2.5 ml of oleic acid (about 0.6 g per kg) were without adverse effects.

Herting *et al.* fed weanling Holtzman rats a diet containing palmitic acid as 50.4 percent of the ration (about 50 g per kg body weight per day). The palmitic acid was 58 to 60 percent absorbed. Lipogranulomas were produced in adipose tissue within eight weeks. The occurrence of lipogranulomas was greater in the fat associated with the testis or ovary than in that of other tissues. Foreign body-type reactions in perigonadal fat were noted in four of five animals observed for 24 weeks. Simular results were obtained with other saturated fats (stearic acid, ethyl stearate and hydrogenated lard) when fed at about the same levels. When the saturated fat in the diet was replaced with 20 percent corn oil, prompt diminution and eventual disappearance of the lipogranulomas were observed. The investigators ascribed the effect to dietary imbalance produced by a high lipid diet of saturated fatty acids. Experiments at lower dietary levels were not conducted.

Renaud gave seven rats a hyperlipemic diet (32 percent butter; 5 percent cholesterol) supplemented by 5 percent palmitic acid (about 4.6 g per kg body weight per day of palmitic acid) for a six-week period. To initiate thrombosis, a *Salmonella typhosa* endotoxin was injected at the end of the feeding period. Palmitic acid was the most hyperlipemic of the common fatty acids used in these experiments which also included caprylic, lauric, myristic, and stearic acids. Stearic acid was the most thrombogenic, followed by palmitic acid. Robertson *et al.* injected five week-old male and female albino mice subcutaneously with a 5 percent emulsion of oleic acid in 0.25 and 0.5 ml volumes weekly (about 12 to 15 g per kg body weight) for 60 weeks. The growth rate of the animals was normal.

Carroll and Noble fed Sprague-Dawley and Wistar rats a diet supplemented with 15 percent oleic acid (initially about 15 g per kg body weight). They appeared to develop normally and their general health appeared good after five months. Progressive reduction in spermatogenesis, and prolonged estrous cycles occurred but most females bore living young. In general, the animals resembled those subjected to diets deficient in essential fatty acids.

No studies of the carcinogenicity, mutagenicity, or teratogenicity of sodium oleate or sodium palmitate have come to the attention of the Select Committee. It is noted, however, that Nakahara found an intraperitoneal injection of 0.5 ml of a 1 percent solution of sodium oleate in mice (about 0.25 g per kg body weight) to increase their resistance to growth of subsequently transplanted Bashford adenocarcinoma 63. Sodium oleate produced no significant increase in the resistance to cancer already *In situ*. Sodium palmitate at about the same dosage was without effect in these experiments.

Qualified scientists of the Select Committee have carefully evaluated all of the available safety information on sodium oleate and sodium palmitate. The Select Committee believes that:

Although there are no data available to the Select Committee on the amounts of sodium oleate and sodium palmitate used in fabricating food containers or the amounts that might migrate to food therefrom, it is evident that the amount of these compounds that could transfer to foodstuffs in the package would be many orders of magnitude below the quantities of the respective fatty acids normally present as triglycerides in many foods. The sodium salts of the fatty acids are toxicologically indistinguishable from the latter when consumed in small amoupts. The Select Committee recognizes that large amounts of the free fatty acids can distort the physiological processes in a system that is organized to absorb and utilize the triglycerides, but such excesses would not be expected from the use of sodium oleate and sodium palmitate as food packaging material ingredients.

The Select Committee concludes that no evidence in the available information on sodium oleate and sodium palmitate demonstrates, or suggest ressonable grounds to suspect, a hazard to the public when those substances are used as ingredients of paper and paperboard used for food packaging in the manner now practiced or as they might be expected to be used for such purposes in the future. Based upon his own evaluation of all available information on these salts, the Commissioner agrees with this conclusion and therefore finds that no change in the current GRAS status of these salts is justified. Additionally, although the use of sodium oleate as a component of lubricants with incidental food contact was not addressed explicitly in the Select Committee report, the Commissioner concludes that the information developed during the Select Committee safety review also forms a sound basis for affirming this use of sodium oleate as GRAS.

Copies of the scientific literature review on sodium salts of fatty acids and the report of the Select Committee are available for review at the Office of the Hearing Clerk (HFA-305), Rm. 4-65, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, and may be purchased from the National Technical Information Service, 5285 Port Royal Rd., Springfield, VA 22161, as follows:

Title	Order No.	Price code	Price *
Sodium Salts of Fatty Acids (scientific literature review)	PB-241-068/AS	A05	$6.00
Sodium Oleate and Sodium Palmitate (Select Committee report).	PB-276-414/AS	A02	$4.00

* Price subject to change.

This proposed action does not affect the present use of sodium oleate and sodium palmitate in pet food or animal feed.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Parts 182 and 186 be amended as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

§ 182.90 [Amended].

1. In § 182.90 *Substances migrating to food from paper and paperboard products* by deleting the entry for "Soap (sodium oleate, sodium palmitate)".

PART 186—INDIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

2. In Part 186, by adding new §§ 186.1770 and 186.1771, to read as follows:

§ 186.1770 Sodium oleate.

(a) Sodium oleate ($C_{18}H_{33}O_2Na$, CAS Reg. No. 143-19-1) is the sodium salt of oleic acid (*cis*-9-octadecenoic-acid). It exists as a white to yellowish powder with a slight tallow-like odor. Commercially, sodium oleate is made by mixing and heating flaked sodium hydroxide and oleic acid.

(b) Sodium oleate shall meet the requirements of § 172.863 of this chapter.

(c) The ingredient is used as a constituent of paper and paperboard used for food packaging, and as a component of lubricants with incidental food contact in accordance with § 178.3570 of this chapter.

(d) The ingredient is used at levels not to exceed good manufacturing practice in accordance with § 186.1(b)(1).

§ 186.1771 Sodium palmitate.

(a) Sodium palmitate ($C_{16}H_{31}O_2Na$, CAS Reg. No. 408-35-5) is the sodium salt of palmitic acid (hexadecanoic acid). It exists as a white to yellow powder. Commercially, sodium palmitate is made by mixing and heating flaked sodium hydroxide and palmitic acid.

(b) Sodium palmitate shall meet the requirements of § 172.863 of this chapter.

(c) The ingredient is used as a constituent of paper and paperboard used for food packaging.

V 4 4 / 2 1

(d) The ingredient is used at levels not to exceed good manufacturing practice in accordance with § 186.1(b)(1).

The Commissioner hereby gives notice that he is unaware of any prior sanction for the use of these ingredients in food under conditions different from those proposed herein. Any person who intends to assert or rely on such a sanction shall submit proof of its existence in response to this proposal. The regulation proposed above will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the act (21 U.S.C. 342), and the failure of any person to come forward with proof of such an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on such sanction at any later time. This notice also contitutes a proposal to establish a regulation under Part 181 (21 CFR Part 181), incorporating the same provisions, in the event that such a regulation is determined to be appropriate as a result of submission of proof of such an applicable prior sanction in response to this proposal.

Interested persons may, on or before April 2, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order.

Dated: January 22, 1979.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[21 CFR Part 1020]

[Docket No. 75N-0046]

DIAGNOSTIC X-RAY SYSTEMS AND THEIR MAJOR COMPONENTS

Proposed Amendment to Performance Standard

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend the performance standard for diagnostic x-ray systems to modify the beam quality (half-value layer) provision of the standard for dental x-ray systems designed for use with intraoral image receptors. The purpose of this amendment is to reduce unnecessary x-radiation exposure to the patient that can result from low voltage, low filtration dental x-ray systems.

DATES: Comments by April 30, 1979, the Food and Drug Administration proposes that the final amendment become effective 1 year after date of publication of the final rule in the FEDERAL REGISTER.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

John C. Taschner, Bureau of Radiological Health (HFX-460), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3426.

SUPPLEMENTARY INFORMATION: Many investigators have measured the x-ray exposure to patients or phantoms exposed to dental radiographs to determine those refinements of technique that would result in minimum patient exposure while yielding maximum diagnostic information. The influence of beam quality (waveform, peak accelerating potential, and filtration) on patient exposures and image characteristics has been the focus of numerous investigations, summarized in a literature review by Saulnier and Barr (Ref. 1). A study by Lee (Ref. 2) showed marked increases in the entrance skin, mandibular bone marrow, thyroid, eye, and integral doses as the peak tube potential was decreased from 72 to 44 kilovolts peak (kVp). The entrance skin dose, for example, is approximately 7 times higher for the low-kilovoltage technique, although the amount of exposure at the film for both cases is about the same. There was little apparent difference in the doses as the tube potential was raised from 72 kVp to 91 kVp. The results of this study are in good agreement with those reported by Alcox and Jameson (Ref. 3) in a study conducted under clinical conditions. These studies show that among today's acceptable dental radiographic practices, those employing the lowest peak tube potentials and the least filtration will deliver the greatest radiation doses per film to the dental patient. These high-dose techniques are permitted by current voluntary standards (Refs. 4 and 5) and § 1020.30(m)(1) (21 CFR 1020.30(m)(1)) of the diagnostic x-ray system performance standard.

The higher entrance skin doses result from the fact that more than half of the photons in the spectrum of a low kilovoltage beam are below 27 kiloelectron volts (keV). These photons are readily absorbed by the intervening tissues between the skin and film, contributing heavily to patient dose, but are relatively inefficient in producing a radiographic image. For example, 20 and 40 keV photons have approximately the same mass absorption coefficient in silver, yet the absorption coefficient of the 20 keV photon is 8 times higher in soft tissue and 12 times higher in bone than that of the 40 keV photon, even though the amount of exposure required at the x-ray film to produce a satisfactory dental radiograph is about the same (Ref. 2).

The FDA proposes to amend § 1020.30(m)(1) to require that the half-value layer (HVL) of the useful beam of all dental x-ray systems operating at 70 kVp and below be equivalent to at least 1.5 millimeters (mm) of aluminum Al). Dental x-ray systems operating above 70 kVp would continue to meet the requirements of Table I of § 1020.30(m)(1). The current provisions of the standard require a minimum HVL of 1.2 mm Al at 50 kVp and 1.5 mm Al at 70 kVp. The 50 kVp systems currently produce a normalized entrance skin-to-film exposure ratio of about 18 to 1, a greater ratio than the FDA believes should be tolerated. (Even higher entrance skin-to-film ratios may occur at kilovoltages lower than 50 kVp.) By establishing 1.5 mm Al as the lower HVL limit, the entrance skin-to-film ratio can be reduced to about 13 to 1, closer to the 10 to 1 ratio proposed as the maximum in a draft amendment distributed by the Bureau of Radiological Health (BRH) in October 1975. To achieve an HVL of 1.5 mm Al at 50 kVp, the total filtration in the primary x-ray beam would be about 2.5 mm Al equivalent.

The FDA has taken several actions allowing interested persons to participate in the development of the proposed amendment. The basic concept was presented by BRH on September 19, 1974 at the 12th meeting of the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC). A notice of intent to amend the beam quality provision of the standard with respect to dental x-ray systems, published in the FEDERAL REGISTER of June 19, 1975 (40 FR 25830), invited the public to participate in the development of the proposed amendment by submitting written comments concerning the amendment. A draft of the proposal and supporting rationale was reviewed on September 18, 1975 at the 13th meeting of TEPRSSC. This draft was subsequently distributed on October 1, 1975 to manufacturers, professional associations, State radiation control agencies, and other interested persons on the Bureau's mailing list, inviting comment on the proposal. The draft, the comments received, and the summary of advisory committee meetings are on file with the Hearing Clerk, FDA. In developing this proposal, FDA has considered all comments received on the notice of intent and the October 1, 1975 draft amendment and rationale document. A summary of the comments and the FDA's responses follows:

1. Several comments recommended establishing a minimum peak tube potential (kVp) provision for dental x-ray machines rather than changing the HVL requirements of § 1020,30(m). Suggested minimum values ranged from 50 to 65 kVp.

The purpose of establishing HVL requirements specifically for dental x-ray systems designed for use with intraoral image receptors is to provide x-ray beam qualities that would yield the maximum diagnostic information with the minimum dose to the patient. The FDA believes that to adopt the suggestions would simply cause the elimination of low kilovoltage dental x-ray machines.

2. Several comments disagreed with establishing minimum HVL requirements based on an arbitrary set entrace skin-to-film exposure ratio of 10. They argued that this approach, while eliminating low kilovoltage, low filtration techniques that are responsible for high patient exposure, would permit the use of high kilovoltage, low filtration techniques that would result in patient exposures greater than those presently allowed. These comments, in general, disagreed with the proposal to lower the current minimum HVL requirements at the high kilovoltages but supported increasing the minimum HVL requirements at the lower kilovoltages to upgrade the beam quality of these dental x-ray systems.

The FDA agrees with these comments and has modified the proposed amendment accordingly.

3. Two comments from State radiation control agencies expressed concern that their regulations, which require 2.5 mm Al filtration at 70 kVp and above and 1.5 mm Al filtration below 70 kVp, would be in conflict with the proposed amendment. One comment also stated that dental x-ray equipment meeting the current beam quality standard would become substandard after the effective date of the final amendment and questioned whether the States should allow continued use of such equipment.

The revised x-ray beam quality amendment would apply only to dental x-ray systems manufactured on or after the effective date of the amendment and that operate at about 70 kVp and below. According to section 360F of the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 263n), State regulations would have to be identical if they apply to newly manufactured x-ray systems and address the same aspect of performance.

Manufacturers' and assemblers' reports filed at BRH from August 1974 through June 1976 indicate that only about 10 percent of the dental x-ray systems currently in use or in the "used" equipment market would not meet the proposed amendment, if the amendment were to be applied by States to equipment purchased before the effective date of the amendment. Because these x-ray systems have been shown to contribute unnecessary x-ray exposure, the FDA encourages State regulatory agencies to consider actions that would require these x-ray systems either to be modified to meet the new proposed provisions or to be phased out of use.

4. One comment asked whether manufacturers would be permitted to comply with the amendment before the effective date.

It is FDA's policy to permit manufacturers to comply with a performance standard for electronic products or an amendment to a standard after its publication as a final rule in the FEDERAL REGISTER but before the effective date if the manufacturers have filed appropriate amendments to their reports under Part 1002 (21 CFR Part 1002). In this case, compliance with the amendment would also be compatible with compliance with existing regulations. Therefore, although the FDA proposes that the amendment will not become effective until 1 year after it is published, manufacturers could adopt performance requirements compatible with the amendment at any time, and the FDA encourages early compliance.

5. One comment stated that establishing different HVL requirements for dental x-ray systems designed for intraoral and extraoral film radiography would prevent a practitioner from using a dental x-ray system for both techniques.

Generally, x-ray systems not capable of operating at 70 kVp and above are unsuitable for extraoral film radiography. For those dental x-ray systems that are designed for the higher kVp range (70 kVp and above), the current minimum beam quality requirements in the standard would be met.

6. One comment stated that the proposed HVL requirements may create difficulties in taking certain intraoral radiographs, namely (a) sialography, (b) detection of low-contrast foreign bodies, (c) fluid study of sinus examination, and (d) soft tissue examinations in general. These examinations all require low tube potentials (40 to 50 kVp) with very little filtration (0.5 to 1 mm Al). If these examinations are made with heavily filtered x-rays at 50 kvp, the exposure times must be increased substantially due to the low tube current of most dental x-ray machines, resulting in unacceptable motion unsharpness in the radiographs.

Little evidence was presented in the written comments received by BRH in regard to the need, based on imaging demands, for the continued allowance for low kilovoltage, low filtration dental x-ray systems. Radiographic practice using these units has repeatedly been shown to result in considerably greater radiation doses to the dental patient. According to assemblers' reports filed at BRH, the low kilovoltage, low filtration dental x-ray systems constituted only about 10 percent of total market from August 1974 through June 1976. The need for such systems is, therefore, not significant, and most dental radiographers do without such equipment. In exceptional cases in which there is a need for equipment that deviates from the standard, a manufacturer could apply for a variance under § 1010.4 (21 CFR 1010.4).

Accompanying the October 1, 1975 draft beam quality amendment was a proposal that would establish a minimum x-radiation exposure rate requirement for dental x-ray systems designed for use with intraoral image receptors. The specific value of 300 milliroentgens (mR) in 2 seconds or less was chosen to provide the capability of making a bitewing radiograph of an adult patient using dental radiographic film of American National Standards Institute Speed Group D in not more than about 3 seconds with dental x-ray equipment that would meet the draft beam quality requirement. Comments received in response to the draft proposal indicated that the minimum exposure rate of 600 mR in 2 seconds or less would seem to be more suitable.

JAN 30 79 UMI

V 4 4 / 2 1

The FDA is withdrawing the proposed exposure rate requirement because there seems to be no need for it at this time. At present there are no dental x-ray machines being manufactured or imported into the United States that are limited to 50 kVp or less. Therefore, it would appear that certified x-ray systems now being marketed in the United States would meet the minimum exposure rate value of 600 mR in 2 seconds or less while, at the same time, complying with the new beam quality requirement.

The FDA carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file in Docket No. 75N-0046 with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Public Health Service Act as amended by the Radiation Control for Health and Safety Act of 1968 (sec. 358, 82 Stat. 1177-1179 as amended (42 U.S.C. 263f)) and under authority delegated to the Commissioner (21 CFR 5.1(a)(3)), it is proposed that Part 1020 be amended in § 1020.30 by revising paragraph (m)(1) to read as follows:

§ 1020.30 Diagnostic x-ray systems and their major components.

. . . . . .

(m) • • •

(1) *Half-value layer.* (i) Except for any dental x-ray system designed for use with intraoral image receptors and manufactured on or after (a date 1 year after publication of the final regulation in the FEDERAL REGISTER), the half-value layer (HVL) of the useful beam for a given x-ray tube potential shall not be less than the values shown in Table I.

(ii) For any dental x-ray system designed for use with intraoral image receptors and manufactured on or after (a date 1 year after publication of the final regulation in the FEDERAL REGISTER), the half-value layer (HVL) of the useful beam shall not be less than 1.5 millimeters of aluminum up to and including measured potentials of 70 kilovolts peak. Above 70 kilovolts peak, the half-value layer of the useful beam shall not be less than the value shown in Table I.

(iii) If it is necessary to determine a half-value layer at an x-ray tube potential which is not listed in Table I, linear interpolation or extrapolation may be made. Positive means [2] shall be provided to insure that at least the minimum filtration needed to achieve the above beam quality requirements is in the useful beam during each exposure.

TABLE I

Design operating range (Kilovolts peak)	Measured potential (Kilovolts peak)	Half-value layer (Millimeters of aluminum)

Interested persons may, on or before April 30, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: January 22, 1979.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-2899 Filed 1-29-79; 8:45 am]

[2] In the case of a system which is to be operated with more than one thickness of filtration, this requirement can be met by a filter interlock with the kilovoltage selector which will prevent x-ray emission if the minimum required filtration is not in place.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Part 1]

[LR-73-75]

INVESTMENT CREDIT—QUALIFIED PROGRESS EXPENDITURES

Proposed Rulemaking

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to qualified progress expenditures for the investment credit. Changes in the applicable tax law were made by sections 301 and 302 of the Tax Reduction Act of 1975 (Pub. L. 94-12, 89 Stat. 26), sections 1701(b) and 1703 of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1520), and section 311(a) of the Revenue Act of 1978. These regulations provide the public with the guidance needed to comply with the law.

DATES: Written comments and requests for a public hearing must be delivered or mailed by April 2, 1979.

The amendments under the Tax Reduction Act of 1975 are proposed to be effective for taxable years ending after December 31, 1974. The amendments under the Tax Reform Act of 1976 are proposed to be effective for taxable years ending after December 31, 1976.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-73-75) Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Richard L. Mull of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, Attention: CC:LR:T (202-566-4454, not a toll-free number).

J A 3 0 7 9 UMI

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 46 and 47 of the Internal Revenue Code of 1954. These amendments are proposed to conform the regulations to certain changes made by sections 301 and 302 of the Tax Reduction Act of 1975 (89 Stat. 26), sections 1701(b) and 1603 of the Tax Reform Act of 1976 (90 Stat. 1520), and section 311(a) of the Revenue Act of 1978. The proposed regulations are to be issued under the authority contained in section 7805 of the Code (68A Stat. 917, 26 U.S.C. 7805), section 38(b) of the Code (76 Stat. 962, 26 U.S.C. 38), section 46(d)(6) of the Code (89 Stat. 42, 26 U.S.C. 46), and section 47(a)(3)(C) of the Code (89 Stat. 43, 44, 26 U.S.C. 46).

Prior to the Tax Reduction Act of 1975 (1975 Act), a taxpayer could claim the investment credit for qualified property only when the property was placed in service. This rule delayed the benefits of the investment credit for property that took a number of years to construct well beyond the time payments for construction were actually made by the taxpayer. Section 302 of the 1975 Act adds a new section 46(d) to the Code to resolve this problem.

Under section 46(d), a taxpayer may elect to claim the investment credit prior to the time the property is place in service for qualified progress expenditures made by the taxpayer for construction (either by the taxpayer or by another person for the taxpayer) of progress expenditure property. Progress expenditure property is property that has a normal construction period of 2 years or more and that will be new section 38 property having at least a 7-year useful life in the hands of the taxpayer when it is placed in service.

In general, if the taxpayer constructs property himself, qualified progress expenditures are amounts properly chargeable to capital account each year for construction. If another person constructs property for the taxpayer, qualified progress expenditures include amounts paid each year to the other person to the extent they represent construction completed by the other person during the year. Cost accounting records may be evidence of progress made in construction by the other person. However, the taxpayer may not have access to the manufacturer's cost accounting records. Thus, architectural or engineering estimates will also be evidence of progress.

The election to claim the investment credit for qualified progress expenditures may be made for taxable years ending after December 31, 1974, and applies only to progress expenditures made after Januare 21, 1975. The election applies to all progress expenditure property and, in general, cannot be revoked.

Section 1.46-5 (relating to limitation in case of certain regulated companies under section 46(f)), as proposed February 2, 1972, will be redesignated as § 1.46-6 when published as a Treasury decision. The proposed regulations add a new § 1.46-5 to provide rules for claiming the investment credit under section 46(d) for qualified progress expenditures. Under these rules, qualified progress expenditures made during a taxable year are added to the taxpayer's qualified investment otherwise determined under § 1.46-3 for that year. However, qualified progress expenditures made in taxable years beginning before 1980 are not allowed in full in computing the credit in the year they are made, but are phased-in over a 5-year period.

The proposed regulations amend §§ 1.47-1 and 1.47-3 to provide rules for recapturing investment credit for progress expenditure property. In general, those rules are similar to the rules for recapture for other section 38 property. However, a special rule is provided for recapture for certain sale-leaseback transactions.

The proposed regulations contained in this document also reflect certain amendments made by section 301 of the 1975 Act, sections 1701(b) and 1703 of the Tax Reform Act of 1976 (1976 Act), and section 311(a) of the Revenue Act of 1978. Section 301 of the 1975 Act provides an alternative limitation on the amount of tax liability that may be offset by investment credit for public utility property. Sections 701(b) and 1703 of the 1976 Act provide a similar limitation for railroad and airline property. Under the proposed regulations, the alternative limitation is applied to progress expenditure property that is public utility, railroad, or airline property. Section 301 or the 1975 Act also provides that the 10-percent credit applies to qualified progress expenditures. Section 311(a) of the Revenue Act of 1978 extends the 10-percent credit permanently.

COMMENTS AND REQUESTS FOR A PUBLIC HEARING

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place with be published in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal author of these proposed regulations is Richard L. Mull of the legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

PROPOSED AMENDMENTS TO THE REGULATIONS

The proposed amendments to 26 CFR Part 1 are as follows:

Paragraph 1. Section 1.46-3 is amended by adding a new sentence at the end of paragraph (a)(1) to read as follows:

§ 1.46-3 Qualified investment.

. . . . . .

(a) *In general.* • • •

(1) • • • See § 1.46-5 for special rules for progress expenditure property.

. . . . . .

Par. 2. A new § 1.46-5 is added immediately after § 1.46-4 to read as follows:

§ 1.46-5 Qualified progress expenditures.

(a) *In general.* (1) This section applies to taxable years ending after December 31, 1974.

(2) Under section 46(d), a taxpayer may elect to take the investment credit for qualified progress expenditures (as defined in paragraph (d) of this section). In general, qualified progress expenditures are amounts paid for construction of progress expenditure property. The taxpayer must reasonably estimate that the property will take at least 2 years to construct and that the useful life of the property will be 7 years or more. Qualified progress expenditures may not be taken into account if made before the later of (i) January 22, 1975, or (ii) the first taxable year to which an election under section 46(d) applies. In general, qualified progress expenditures are not allowed for the year property is placed in service, nor for the first year or any subsequent year recapture is required under section 47(a)(3). However, a transferee of the taxpayer is entitled to qualified progress expenditures in the year recapture is required and in subsequent years, if the transferee would otherwise be entitled to qualified progress expenditures. There is a percentage limitation on qualified progress expenditures for taxable years beginning before January 1, 1980.

V 4 4 / 2 1

(b) *Reduction of qualified investment.* Under section 46(c)(4), a taxpayer must reduce qualified investment for the year property is placed in service by qualified progress expenditures taken into account by that person or a predecessor. A "predecessor" of a taxpayer is a person whose election under section 46(d) carries over to the taxpayer under paragraph (g)(3) of this section.

(c) *Definition of progress expenditure property*—(1) *In general.* The term "progress expenditure property" means property constructed by or for the taxpayer, with a normal construction period (as defined in paragraph (c)(2) of this section) of 2 years or more. The taxpayer must reasonably believe that the property will be new section 38 property with a useful life of 7 years or more when placed in service.

(2) *Normal construction period*—(i) The term "normal construction period" means the period the taxpayer reasonably expects will be required to construct the property. The 2-year period begins on the date physical work on construction of the property commences and ends on the date the property is available to be placed in service. The normal construction period does not include, however, construction before January 22, 1975, nor construction before the first day of the taxable year for which an election under section 46(d) is in effect. Physical work on construction of property does not include preliminary activities such as planning or designing, securing financing, exploring, researching, or developing.

(ii) For purposes of section 46(d), the term "construction" means building or manufacturing property from materials and component parts. "Construction" does not include activities such as cultivating orchards, raising livestock, or creating a motion picture film or video tape. Thus, no qualified progress expenditures are allowed for those activities.

(iii) In general, taxpayers should refer to normal industry practice in estimating the normal construction period of particular items. A different period may be used if special circumstances exist making it impractical to make the estimate on the basis of normal industry practice. The estimate must be based on information available at the close of the taxable year in which physical work on the property began, or at the close of the first taxable year for which an election under section 46(d) is in effect, whichever is later. If the estimate is reasonable when made, the actual time it takes to complete the work is, in general, irrelevant in determining whether property is progress expenditure property. However, if there is a significant error in estimating the normal construction period, it may be evidence that the estimate was unreasonable when made. The taxpayer must attach to its tax return a statement of the basis relied upon in estimating the normal construction period.

(iv) The normal construction period of property ends on the date it is expected the property will be available to be placed in service. Property is considered available to be placed in service when construction is completed and the property is available for its assigned function or available for delivery to the site of its assigned function. It is not necessary that property be in a state of readiness for a specifically assigned function. Nor is it necessary that it actually be delivered to the site of its assigned function.

(v) In determining whether property has a normal construction period of 2 years or more, property that will be placed in service separately is to be considered separately. For example, if two ships are contracted for at the same time, each ship is considered separately under this paragraph. However, for property that will be placed in service as an integrated unit, the taxpayer must determine the normal construction period of the integrated unit. If the normal construction period of the integrated unit is 2 years or more, the normal construction period of each item of new section 38 property that is a part of the integrated unit is considered to be 2 years or more. Property is part of an integrated unit only if the operation of that item is essential to performance of the function to which the unit is assigned. The normal construction period for an integrated unit begins on the date the normal construction period of the first item of new section 38 property that is part of the unit begins. The period ends on the date the last item of new section 38 property that is part of that unit is available to be placed in service. The normal construction period of a unit, thus, may be 2 years or more, even if no part of the unit has a normal construction period of 2 years or more.

(3) *Examples.* Paragraph (c)(2) of this section may be illustrated by the following examples:

Example (1). On July 1, 1974, corporation X begins physical work on construction of a machine with an estimated useful life when placed in service of more than 7 years. For its taxable year ending June 30, 1975, X makes an election under section 46(d). For purposes of determining on June 30, 1975, whether the machine is "progress expenditure property", the normal construction period is treated as having begun on January 22, 1975. Thus, the machine will be considered to be progress expenditure property on June 30, 1975, only if the estimated time required to complete construction after June 30 is at least 18 months and 22 days (i.e., 2 years less the period January 22, 1975, through June 30, 1975).

Example (2). (i) On January 1, 1976, corporation X begins construction of a pipeline. The pipeline is in 2 sections. One section extends from city M to city N. The other extends from city N to city O. Oil will be transferred to storage tanks at both city N and city O. Corporation X also begins construction on January 1, 1976, of a pumping station necessary to operation of the pipeline from city M to city N. Construction of a pumping station necessary to operation of the pipeline from city N to city O begins on June 30, 1977. For 1976, corporation X makes an election under section 46(d).

(ii) The section of pipeline from city M to city N and the associated pumping station will be available to be placed in service on January 1, 1977. Construction of the section of the pipeline from city N to city O will be completed on June 30, 1977. However, that section of the pipeline will not be available to be placed in service until completion of the associated pumping station on January 1, 1978.

(iii) The section of pipeline from city M to city N and the section from city N to city O must be considered separately in determining the normal construction period of the property. Each section will be placed in service separately. However, each section of the pipeline and the associated pumping station may be considered an integrated unit. The pumping stations are essential to operation of each section of pipeline. Each section of pipeline and the associated pumping station is placed in service at the same time.

(iv) The section of pipeline from city M to city N is not progress expenditure property, because the normal construction period of that unit is only 1 year (January 1, 1976, to January 1, 1977).

(v) The section of pipeline from city N to city O and the associated pumping station is progress expenditure property, because the normal construction of that integrated unit is 2 years (January 1, 1976, to January 1, 1978). It is immaterial that neither the construction period of that section of pipeline (January 1, 1976 to June 30, 1977) nor the construction period of the associated pumping station (June 30, 1977 to January 1, 1978) is 2 years.

(4) *New section 38 property with a 7-year useful life*—(i) The taxpayer must determine if property will be new section 38 property with a useful life of 7 years or more when placed in service. The determination must be made at the close of the taxable year in which construction begins or at the close of the first taxable year to which an election under section 46(d) applies, whichever is later.

(ii) The determination of whether property will be "new section 38 property" (within the meaning of §§ 1.48-1 and 1.48-2) must be based on the reasonably expected use of the property by the taxpayer. There is a presumption that property will be new section 38 property if it would be new section 38 property if placed in service by the taxpayer when the determination is made. For example, in determining if property is an integral part of manufacturing under section 48(a)(1)(B)(i), it will be presumed property will be new section 38 property if the taxpayer is engaged in manufacturing when the determination is made. Also, significant steps taken to establish a trade or business will be evidence the taxpayer will be engaged in that trade or business when the property is placed in service.

(iii) The determination of whether property will have an estimated useful life of 7 years or more when placed in service must be made by applying the principles of § 1.46-3(e). If the estimated useful life is less than 7 years when the property is actually placed in service, the credit previously allowed under section 46(d) must be recomputed under section 47(a)(3)(B).

(d) *Definition of qualified progress expenditures*—(1) *In general.* A taxpayer's qualified progress expenditures are the sum of (i) qualified progress expenditures for self-constructed property (determined under paragraph (d)(2) of this section), plus (ii) qualified progress expenditures for nonself-constructed property (determined under paragraph (d)(3) of this section). Only amounts includible under § 1.46-3(c) in the basis of new section 38 property may be considered as qualified progress expenditures.

(2) *Self-constructed property*—(i) "Qualified progress expenditures" for self-constructed property (as defined in paragraph (d)(5) of this section) are amounts properly chargeable to capital account in connection with that property. In general, amounts paid or incurred are chargeable to capital account if under the taxpayer's method of accounting they are properly includible in computing basis under § 1.46-3. Amounts treated as an expense and deducted in the year they are paid or incurred are not chargeable to capital account.

(ii) In general, expenditures for materials or other property to be used in construction of self-constructed property are not properly chargeable to capital account until consumed or physically attached in the construction process. Materials that have neither become a part of nor been delivered to the site of the property, but which have been irrevocably allocated to construction of that property are properly chargeable to capital account. Materials are not to be considered irrevocably allocated to use in self-constructed property until physical work has begun on construction of that property. Mere bookkeeping notations are not sufficient evidence that the necessary allocation has been made. Once physical work has begun, materials or other property designed specifically for the self-constructed property may be considered irrevocably allocated to construction of that property at the time of manufacture. In addition, an item delivered to the site of construction may be considered irrevocably allocated if it would be economically impractical to remove the item to another project. For example, assume pumps are delivered to locations on a tundra pipeline. If it costs $1,500 to manufacture the pumps, but it costs $2,500 to remove them to a Seattle construction site, the pumps would be treated as irrevocably allocated to construction of the pipeline. A taxpayer's procedure for determining the time when an item is properly chargeable to capital account for self-constructed property is a method of accounting. Under section 446(e), the method of accounting, once adopted, may not be changed without consent of the Secretary.

(iii) The taxpayer shall maintain detailed records which permit specific identification of the amounts properly chargeable by the taxpayer during each taxable year to capital account for each item of self-constructed property.

(3) *Nonself-constructed property*—(i) In general, "qualified progress expenditures" for nonself-constructed property (as defined in paragraph (d)(6) of this section) are amounts paid by the taxpayer to the manufacturer, but only to the extent progress is made in construction. If the taxpayer pays his own employees to do some of the work, those expenditures are also considered qualified progress expenditures for nonself-constructed property. Qualified progress expenditures for nonself-constructed property do not include amounts paid to another person for construction if those amounts are treated as an expense and deducted in the year in which they are paid.

(ii) If several manufacturers or contractors do work in connection with the same property, section 46(d)(3)(B) must be applied separately to amounts paid to each person. For example, assume the taxpayer contracts with 3 persons to build an item of equipment. The taxpayer contracts with A to build the frame, B to build the motor, and C to assemble the frame and motor. Section 46(d)(3)(B) must be applied separately to amounts paid to A, B, and C.

(iii) For purposes of section 46(d)(3)(B)(i), amounts paid during the taxable year to another person for construction of nonself-constructed property may be in the form of money or property. However, property given as payment may be considered only to the extent it will be includible under paragraph (c) of § 1.46-3 in the basis of the nonself-constructed property when it is placed in service. Qualified progress expenditures under section 46(d)(3)(B)(i) do not include amounts that are merely incurred; they must actually be paid.

(iv) Qualified progress expenditures do not include any amount paid to another person (the "payee") for construction if the amount is paid out of funds borrowed directly or indirectly from the payee. Amounts borrowed directly or indirectly from the payee by any perosn that is related to the taxpayer (within the meaning of section 267) or that is a member of the same controlled group of corporations (as defined in section 1563(a)) will be considered borrowed indirectly from the payee. Similarly, amounts borrowed under any financing arrangement that has the effect of making the payee a surety will be considered amounts borrowed indirectly by the taxpayer from the payee.

(v) Under section 46(d)(3)(B)(ii), payments made in any taxable year may be considered qualified progress expenditures for nonself-constructed property only to the extent they are attributable to progress made in construction (percentage of completion limitation). Architectural or engineering estimates will be evidence of progress made in construction. Cost accounting records also will be evidence of progress. Progress will be presumed to occur not more rapidly than ratably over the normal construction period. However, the taxpayer may rebut the presumption by clear and convincing evidence to the contrary.

(vi) If, after the first year of construction, there is a change in either the total cost to the taxpayer or the total cost of construction by another person, the taxpayer must recompute the percentage of completion limitation on the basis of revised cost. However, the recomputation will affect subsequent taxable years only. The recomputation remains subject to the presumption of pro rata completion.

(vii) If for any taxable year, the amount paid to another person for construction of an item of property under section 46(d)(3)(B)(i) exceeds the percentage of completion limitation in section 46(d)(3)(B)(ii), the excess is treated as an amount paid to the other person for construction for the succeeding taxable year. If for any taxable year the percentage of completion limitation for an item of property exceeds the amount paid to another during the taxable year for construction, the excess is added to the percentage of completion limitation for that property for the succeeding taxable year.

(viii) The taxpayer must maintain detailed records which permit specific identification of the amounts paid to each person for construction of each item of property and the percentage of construction completed by each person for each taxable year.

JAN 30 1979 UMI

V 4 4 / 2 1 J A 3 0 7 9 UMI

(4) *Example.* Paragraph (d)(3) of this section may be illustrated by the following example.

Example. (i) Corporation X, a calendar year taxpayer, agrees to build an airplane for corporation Y to be delivered on December 31, 1984. The airplane is nonself-constructed progress expenditure property. Physical work on construction begins on January 1, 1980.

(ii) The cost of construction to corporation X is $500,000. The contract price is $55,000. Corporation Y makes a $110,000 payment in each of the years 1980 and 1981, and $85,000 payment in 1982, and $135,000 payment in 1983, and a $110,000 payment is 1984.

(iii) For 1980, corporation Y makes an election under section 46(d). Progress is presumed to occur ratably over the 5-year construction period, which is 20 percent in each year. Twenty percent of the contract price is $110,000. The percentage of completion limitation for each year, thus, is $110,000.

(iii) For each of the years 1980 and 1981, the $110,000 payments may be treated as qualified progress expenditures. The payments equal the percentage of completion limitation.

(iv) For 1982, the $85,000 payment may be treated as a qualified progress expenditure, because it is less than the percentage of completion limitation. The excess of the percentage completion limitation ($110,000) over the 1982 payment ($85,000) is added to the percentage of completion limitation for 1983. One hundred and ten thousand dollars minus $85,000 equals $25,000. Twenty-five thousand dollars plus $110,000 equals $135,000, which is the percentage of completion limitation for 1983.

(v) For 1983, the entire $135,000 payment may be treated as a qualified progress expenditure. The payment equals the percentage of completion limitation for 1983.

(vi) For 1984, no qualified progress expenditures may be taken into account, because the airplane is placed in service in that year.

(5) *Definition of self-constructed property*—(i) Property is "self-constructed property" if it is reasonable to believe that more than half of the construction expenditures for the property will be made directly by the taxpayer. Construction expenditures will be considered made "directly" by the taxpayer only if the taxpayer uses his own employees to construct the property. Construction expenditures made directly by the taxpayer include wages and overhead attributable to construction of that property. Construction expenditures made by the taxpayer to a contractor or manufacturer, in general, will not be considered made directly by the taxpayer. Thus, the cost of component parts, such as boilers and turbines, which are purchased and merely installed or assembled by the taxpayer, will not be considered expenditures made directly by the taxpayer for construction. However, expenditures for basic construction materials, such as sheet metal, lumber, glass, and nails, which are used by employees of the taxpayer to construct progress expenditure property, will be considered made directly by the taxpayer.

(ii) The determination of whether property is self-constructed or nonself-constructed property is to be made at the close of the taxable year in which physical work on construction of the property begins, or the close of the first taxable year to which an election under this section applies, whichever is later. Once it is reasonably estimated that more than half of construction expenditures will be made directly by the taxpayer, the fact the taxpayer actually makes half, or less than half, of the expenditures directly will not affect classification of the property as self-constructed property. Similarly, once a determination has been made, classification of property as self-constructed property is not affected by a change in circumstances in a later taxable year. However, a significant error unrelated to a change in circumstances may be evidence that the estimate was unreasonable when made.

(iii) For purposes of determining whether more than half of construction expenditures of an item of property will be made directly by the taxpayer, the taxpayer may take into account only expenditures properly includable by the taxpayer in the basis of the property under the provisions of § 1.46-3(c). Thus, property is self-constructed property only if more than half of the estimated basis of the property to be used for purposes of determining the credit allowed by section 38 is attributable to expenditures made directly by the taxpayer.

(6) *Nonself-constructed property defined.* For purposes of this section, the term "nonself-constructed property" means property that is not self-constructed property. Thus, property is nonself-constructed property if it is reasonable to believe that only half, or less than half, of the expenditures for construction will be made directly by the taxpayer.

(e) *Alternative limitations for public utility, railroad, or airline property.* The alternative limitations on qualified investment under sections 46(a)(7), (8), and (9) for public utility, railroad, or airline property (whichever applies), apply in determining the credit for qualified progress expenditures. The determination of whether progress expenditure property will be public utility, railroad, of airline property (whichever applies) when placed in service must be made at the close of the taxable year in which physical work on construction begins or at the close of the first taxable year for which an election under section 46(d) is in effect, whichever is later. If the taxpayer is in a trade or business described in section 46(c)(3)(B), section 46(a)(8), or section 46(a)(9) (whichever applies) at that time, it is evidence the property will be public utility, railroad, or airline property when placed in service.

(f) *Leased property.* A lessor of progress expenditure property may not elect under section 48(d) to treat a lessee (or a person who will be a lessee) as having made qualified progress expenditures.

(g) *Election*—(1) *In general.* The election under section 46(d)(6) to increase qualified investment by qualified progress expenditures may be made for any taxable year ending after December 31, 1974. Except as provided in paragraph (g)(2) of this section, the election is effective for the first taxable year for which it is made and for all taxable years thereafter unless it is revoked with the consent of the Commissioner. Except as provided in paragraphs (g) (2) and (3) of this section, the election applies to all qualified progress expenditures made by the taxpayer during the taxable year for construction of any progress expenditure property. Thus, the taxpayer may not make the election for one item of progress expenditure property and not for other items. If progress expenditure property is being constructed by or for a partnership, electing small business corporation (as defined in section 1371(b)), trust, or estate, an election under section 46(d)(6) must be made separately by each beneficiary, partner, or shareholder, respectively. The election may not be made by a partnership or electing small business corporation, and may be made by a trust or estate only if the trust or estate in determining its tax liability would be allowed investment credit under section 38 for property subject to the election. The election of any partner, shareholder, beneficiary, trust, or estate will be effective, even if a related partner, shareholder, beneficiary, trust, or estate does not make the election.

(2) *Time and manner for making election.* An election under section 46(d)(6) must be made by filing a written statement with the original return for the first taxable year ending after December 31, 1974 to which the election will apply. In general, the election may not be made on an amended return filed after the time prescribed for filing the original return (including extensions) for that taxable year. However, an election under this section may be made or revoked by filing a statement with an amended return filed on or before [90 days from the date of publication of the Treasury decision] if the due date for filing a return for a taxable year ending after December 31, 1974, is before [90 days from the date of publication of the Treasury decision]. The written statement filed with the tax return (or amended return) must be signed and contain the following information:

(i) The taxpayer name and taxpayer identification number (under section 6109 of the Code),

(ii) A statement that the taxpayer is making the election under section 46(d)(6), and

(iii) A list of all progress expenditure property, indicating whether the property is self-constructed property (as defined in paragraph (d)(5) of this section) or nonself-constructed property (as defined in paragraph (d)(6) of this section).

(3) *Carryover of election in certain transactions.* In general, an election under section 46(d)(6) does not carry over to the transferee of progress expenditure property. However, if under section 47(b) the property does not cease to be progress expenditure property because of the transfer, the election will carry over to the transferee. If so, the election will apply only to the property transferred.

(h) *Partnership, electing small business corporation, and trusts or estates*—(1) *In general.* Each partner, shareholder, trust, estate, or beneficiary of a trust or estate that makes an election under section 46(d) may take into account its share of qualified progress expenditures (determined under paragraph (h)(2) of this section) made by the partnership, electing small business corporation, trust, or estate. In determining qualified investment for the year the property is placed in service, the basis of the property is apportioned as provided in §§ 1.46-3(f), 1.48-6, or 1.48-5 (whichever applies). Each partner, shareholder, trust, estate, or beneficiary that made the election must reduce qualified investment under section 46(c)(4) for the year the property is placed in service by qualified progress expenditures taken into account by that person.

(2) *Determination of share of qualified progress expenditures.* The share of qualified progress expenditures of each partner, shareholder, trust, estate, or beneficiary that makes an election under section 46(d) must be determined in accordance with the same ratio used under §§ 1.46-3(f)(2), 1.48-5(a)(1) or 1.48-6(a)(1) (whichever applies) to determine its share of basis (or cost). The last sentence of § 1.46-3(f)(2)(i) must be applied by referring to the date on which qualified progress expenditures are paid or chargeable to capital account (whichever is applicable).

(3) *Examples.* Paragraph (h) may be illustrated by the following examples.

Example (1). (i) Corporation X contracts to build a ship for partnership AB that qualifies as progress expenditure property. The contract price is $100,000. Physical work on construction of the ship begins on January 1, 1980. The ship is placed in service on December 31, 1983.

(ii) The AB partnership reports income on the calendar year basis. Partners A and B share profits equally. For A's taxable year ending December 31, 1980, A makes an election under section 46(d). B does not make the election.

(iii) For each of the years 1980, 1981, 1982, and 1983, the AB partnership makes $25,000 payments to corporation X. The payments made in 1980, 1981, and 1982 are qualified progress expenditures. The 1983 payment is not a qualified progress expenditure, because the ship is placed in service in that year.

(iv) For each of the years 1980, 1981, and 1982, A may take into account qualified progress expenditures of $12,500. A had a 50 percent partnership interest in each of those years.

(v) For 1983, A and B's share of qualified investment is $50,000 each. Qualified investment for the ships is $100,000. A and B's shares are $50.000 each, because each had a 50 percent partnership interest in 1983. However, A must reduce its $50,000 share for 1983 by $37,500, which is qualified progress expenditures taken into account by A. B's share is not reduced, because B did not take into account qualified progress expenditures.

Example (2). (i) The facts are the same as in example (1) except that on June 30, 1983, the partnership agreement is amended to allow a new partner, C. The partners agree to share profits equally. The partners' interest in the ship is the same as their interest in profits.

(ii) For each of the years 1980, 1981, and 1982, A may take into account qualified progress expenditures of $12,500 because A has a 50 percent partnership interest in those years.

(iii) For 1983, A, B, and C's share of qualified investment is $33,333 each, because each had a 33⅓ percent partnership interest in that year. A must reduce its share to zero, because it took $37,500 into account as qualified progress expenditures. In addition, the excess of the $37,500 over the $33,333 applied as a reduction is subject to recapture under section 47(a)(3)(B). B and C's shares are not reduced, because neither taxpayer took into account qualified progress expenditures.

(i) [Reserved]

(j) *Limitation on qualified progress expenditures for taxable years beginning before 1980*—(1) *In general.* (i) Under section 46(d)(7), qualified progress expenditures for any taxable year beginning before January 1, 1980, are limited. The taxpayer must apply the limitation under section 46(d)(7) on an item by item basis. In general, the taxpayer may take into account the applicable percentage (as determined under the table in section 46(d)(7)(A)) of qualified progress expenditures for each of those years. In addition, the taxpayer may take into account for each of those years 20 percent of qualified investment for each of the preceding taxable years determined without applying the limitations of sections 46(d)(7).

(k) The applicable percentage under section 46(d)(7)(A) may be applied only for one taxable year that ends within a calendar year in determining qualified investment for an item of progress expenditure property. For example, calendar year partners of a calendar year partnership may increase qualified investment for 1976 by 30 percent of qualified progress expenditures made in 1975 for an item of property. If the partnership incorporates in 1976 and the taxable year of the corporation begins on July 1, 1976, and ends on June 30, 1977, qualified investment of the corporation for its taxable year beginning on July 1, 1976, cannot be increased by 20 percent of the 1975 expenditure.

(2) *Example.* Paragraph (j) may be illustrated by the following example:

Example. (i) Corporation X contracts with A on January 1, 1976, to build an electric generator that qualifies as nonself-constructed progress expenditure property. A will build the generator at a cost of $125,000. Corporation X agrees to pay A $150,000. Corporation X reports income on the calendar year basis. Corporation X makes an election under section 46(d) for 1976. Physical work on construction begins on January 1, 1976. Corporation X makes payments of $30,000 to A for construction of the generator in each of the years 1976, 1977, 1978, 1979, and 1980. A incurs a cost of $25,000 in each of those years for construction of the property. The property is placed in service in 1980.

(ii) For 1976, qualified investment for corporation X in the generator is $12,000, which is 40 percent of the payment made in 1976.

(iii) For 1977, corporation X may increase qualified investment by $24,000. Eighteen thousand dollars of that amount is 60 percent of the 1977 payment. The remaining $6,000 is 20 percent of the $30,000 payment made in 1976.

(iv) For 1978, corporation X may increase qualified investment by $36,000. Twenty-four thousand dollars of that amount is 80 percent of the 1978 payment. The remaining $12,000 is 20 percent of the $30,000 payment made in 1976, plus 20 percent of the $30,000 payment made in 1977.

(v) For 1979, corporation X may increase qualified investment by $48,000. Thirty thousand dollars of that amount is 100 percent of the 1979 payment. The remaining $18,000 of that amount is 20 percent of the $30,000 payments made in each of the years 1976, 1977, and 1978.

(vi) Qualified investment for corporation X for 1980 is $30,000. The $30,000 is the basis (or cost) of the generator ($150,000), reduced by qualified progress expenditures allowed with respect to that property ($120,000).

(k) *Ten percent credit*—(1) *In general.* The 10-percent credit applies to qualified progress expenditures made after January 21, 1975. For self-constructed progress expenditure property, the 10-percent credit applies in the year the property is placed in service to a portion of the qualified investment that remains after reduction for qualified progress expenditures under section 46(c)(4). The 10 percent ap-

V 4 4 / 2 1

plies only to the portion of the remaining qualified investment in the self-constructed property that is attributable to construction after January 21, 1975. For nonself-constructed progress expenditure property, the 10-percent credit applies in the year the property is placed in service to the entire portion of qualified investment that remains after the reduction for qualified progress expenditures. However, the 10-percent credit applies to nonself-constructed property only if the property is acquired and placed in service after January 21, 1975.

(2) *Example.* Paragraph (k) may be illustrated by the following example:

Example. (i) Corporation X agrees to build a ship for corporation Y. The ship is nonself-constructed property and corporation Y makes an election under section 48(d). Construction begins in 1973. The ship is acquired and placed in service in 1980. The contract price is $400,000.

(ii) For 1975, 1976, 1978, and 1979, qualified progress expenditures total $250,000. The 10-percent credit applies to those expenditures.

(iii) For 1980, qualified investment for the ship is $400,000, which is the contract price. Corporation Y must reduce qualified investment by $250,000, which is the amount of qualified progress expenditures. The 10-percent credit applies to the $150,000 of qualified investment that remains after the reduction for qualified progress expenditures.

Par. 3. Section 1.47-1 is amended by adding a new sentence at the end of paragraph (a)(1)(i) and by adding a new paragraph (g) to read as follows:

§ 1.47-1 Recomputation of credit allowed by section 38.

(a) *General rule*—(1) *In general.* (i) * * * For special rules relating to recomputation of credit allowed by section 38 if progress expenditure property (as defined in § 1.46-5(c)) ceases to be progress expenditure property with respect to the taxpayer, see paragraph (g) of this section.

* * * * *

(g) *Special rules for progress expenditure property.* Under section 47(a)(3), a recapture determination is required if property ceases to be progress expenditure property (as defined in § 1.46-5(c)). Property ceases to be progress expenditure property if it is sold or otherwise disposed of before or after it is placed in service. For example, cancallation of the contract for progress expenditure property or abandonment of the project by the taxpayer will be considered a "disposition" within the meaning of § 1.47-2. A cessation occurs if progress expenditure property ceases to be property that will be section 38 property with a useful life of 7 years or more when placed in service. In general, a sale and leaseback is treated as a cessation. However, see paragraph (g)(2) of § 1.47-3 for special rules for certain sale and leaseback transactions. Recapture determinations for progress expenditure property are to be made in a way similar to that provided under §§ 1.47-1 through 1.47-6. Reduction of qualified investment must begin with the most recent credit year (*i.e.*, the most recent taxable year the property is taken into account in computing qualified investment under § 1.46-3 or 1.46-5).

Par. 4. Section 1.47-3 is amended by redesignating paragraph (g) as paragraph (g)(1) and adding a new paragraph (g)(2) to read as follows:

§ 1.47-3 Exceptions to the application of § 1.47-1.

* * * * *

(g) *Sale-and-leaseback transactions*—(1) *In general.* * * *

(2) *Special rule for progress expenditure property.* The sale and leaseback (or agreement or contract to leaseback) of progress expenditure property (including any contract rights to the property), in general, will be treated as a cessation described in section 47(a)(3)(A) with respect to the seller-lessee. However, a sale and leaseback (or agreement or contract to leaseback) will not be treated as a cessation to the extent qualified investment passed through to the lessee under section 48(d) in the year the property is placed in service equals or exceeds qualified progress expenditures for the property taken into account by the lessee. If a sale-leaseback transaction is treated as a cessation, qualified investment must be reduced and the credit recomputed, beginning with the most recent credit year (*i.e.*, the most recent year property is taken into account in computing qualified investment under § 1.46-3 or 1.46-5). The amount of the reduction is the amount, if any, by which qualified progress expenditures taken into account by the lessee in all prior years exceeds qualified investment passed through to the lessee under section 48(d).

JEROME KURTZ,
Commissioner of Internal revenue.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 230]

WHALING

Taking of Bowhead Whales by Indians, Aleuts, or Eskimos for Subsistence Purposes

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Proposed Rulemaking.

SUMMARY: At its 30th Annual Meeting held in London on June 26-30, 1978, the International Whaling Commission (the "IWC") adopted an amendment to the Schedule of the International Convention for the Regulation of Whaling, 1946 (the "Convention") which established a quota for the taking of the Bering Sea stock of bowhead whales for calendar year 1979 of 18 landed or 27 struck, whichever occurs first. Under the rules of procedure of the IWC, the Schedule to the Convention containing the 1979 quota became effective, on October 19, 1978.

On April 3, 1978, the National Oceanic and Atmospheric Administration "NOAA" promulgated regulations under the Whaling Convention Act of 1949, 16 U.S.C. 916 et seq. (the "Act"), which allocated the then available 1978 quota among the nine Alaskan villages which engage in subsistence whaling (43 FR 13883, amended May 24, 1978, 43 FR 22213, further amended on August 29, 1978, 43 FR 38609. Those regulations expired December 31, 1978. These proposed rules are to implement the 1979 management program.

DATE: Comments may be submitted on or before March 1, 1979.

ADDRESSES: Assistant Administrator for Fisheries, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street, N.W., Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Marine Mammal Program Manager, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C. 20235, Telephone: (202) 634-7461.

SUPPLEMENTARY INFORMATION: Prior to 1977, the IWC Schedule exempted the Native subsistence harvest of bowhead whales from its otherwise total prohibition on the hunting of bowheads. In 1977, the IWC removed that exemption and established a 1978 quota of 12 landed or 18 struck, whichever occurred first. In response to the action of the IWC, the United States, in cooperation with Alaskan Eskimos and other interested groups, mounted research, management and weapons improvement programs. The results of those programs are set forth in extensive detail in a publication entitled *A Special Report to the International Whaling Commission: Bowhead Whales* (U.S. Department of Commerce, NOAA, June 1978) (the "Report").

The Report concluded that, based upon observation made in Spring, 1978, the population of the stock of bowhead whales which migrates past Alaskan Eskimo whaling villages is in the range of 1,763-2,865 whales, with 2,264 bowheads considered the best available estimate. These figures were considerably higher than the population estimate of approximately 1,300 which was used by the IWC in establishing the 1978 quota.

At the 30th Annual Meeting of the IWC, the U.S. Commissioner, on the basis of the results of the population figures appearing in the Report, requested an increase in the bowhead quota for the 1979 calendar year, and the IWC agreed.

Regulations in effect during 1978 allocated the available quotas to the whaling villages. Reassignments were made in the course of the whaling season to distribute equitably the available quotas to the villages. A similar allocation system is proposed herein for the 1979 season based upon the harvest statistics for 1978.

Regulations in effect in 1978 contemplated formal application and issuance of licenses to Eskimo whalers under the provisions of the Act. It was recognized that geographic and cultural factors dictated that normal licensing procedures be modified. In spite of accommodations made to facilitate implementation of a licensing system, time and geographic difficulties prevented issuance of formal licenses during 1978. Consequently, in 1979 NOAA is proposing to confer a license to whale upon each whaling captain through the promulgation of these regulations.

Representatives of the Assistant Administrator will contact native whaling captains before and during the whaling season to obtain the information necessary to complete the reports described in § 230.76.

The regulations proposed for 1979 have been streamlined and simplified to facilitate understanding and compliances in accordance with Executive Order 12044. NOAA will continue to seek the cooperation of the Alaska Eskimo whaling community to implement those regulations. NOAA considers the fee for a whaling license set forth in the Act inappropriate for subsistence whaling under a quota and therefore proposed that it be waived.

In order to assure participation from those members of the public sector affected by the proposed regulations, NOAA will issue a press release announcing the publication of the proposed regulations and will also send copies of the proposed regulations directly to the Alaska Eskimo Whaling Commission, the village councils of Savoonga, Gambell, Wales, Kivalina, Point Hope, Wainwright, Barrow, Kaktovik, and Nuigsut, and to U.S. conservation organizations. In addition, meetings with those interested will be held in Washington, D.C. and Alaska.

In order to assure that final regulations are published in time to allow field personnel an opportunity to implement the regulations before the beginning of the spring bowhead hunt, it will not be possible to provide the 60 day comment period for significant regulations proposed by Executive Order 12044. The Administrator of NOAA has approved reducing this comment period to 45 days. A Draft Supplemental Environmental Impact Statement has been prepared with respect to these amendments.

1. 50 CFR Part 230 is proposed to be amended by revising § 230.10(b) to read as follows:

§ 230.10 Licenses and scientific permits.

* * * * *

(b) No permit or license shall be issued except as provided in § 230.13 and §§ 230.70 through 230.77. Licenses issued under § 230.73 shall be governed solely by the requirements of §§ 230.70 through 230.77.

2. 50 CFR Part 230 is proposed to be amended by revising § 270.70—270.77 and the undesignated center heading to read as follows:

SUBSISTENCE

Sec.
230.70 General.
230.71 Definitions.
230.72 Prohibited acts.
230.73 Licenses.
230.74 Quotas.
230.75 Salvage of Stinkers.
230.76 Reporting by Whaling Captains.
230.77 Penalties.

AUTHORITY: Whaling Convention Act (WCA 16 U.S.C. 916a-1).

SUBSISTENCE

§ 230.70 General.

The provisions of §§ 230.70 through 230.77, which govern subsistence whaling for bowhead whales, shall expire on December 31, 1979.

§ 230.71 Definitions.

(a) As used in §§230.70 through 230.77 of this Part 230:

(1) "Assistant Administrator" means the Assistant Administrator for Fisheries of the National Oceanic and Atmospheric Administration;

(2) "Bowhead" means a whale of the Bering Sea stock of bowhead whales, *Balaena mysticetus;*

(3) "Calf" means any bowhead which is less than 21 feet in length as measured from the point of the upper jaw and the notch between the tail flukes;

(4) "Landing" means bringing a bowhead or any parts thereof onto the ice or land in the course of whaling operations;

(5) "Whaling captain" or "captain" means any Indian, Aleut, or Eskimo domiciled in a whaling village who is in charge of a vessel and a whaling crew;

(6) "Stinker" means a dead unclaimed bowhead found upon a beach, stranded in shallow water, or floating at sea;

(7) "Strike" means hitting a bowhead with a harpoon, lance, or explosive dart;

(8) "Whaling" means the hunting, striking, harassing, killing, or landing of bowheads, but does not include the salvage or processing of any stinker;

(9) "Whaling crew" means those persons under the control of a captain, who collectively participate as a unit in whaling;

(10) "Whaling village" means any of the villages of Gambell, Savoonga, Wales, Kivalina, Point Hope, Wainwright, Barrow, Nuigsut, and Kaktovik in the State of Alaska; and

(11) "Wasteful manner" means a method of whaling which is not likely to result in the landing of a struck bowhead or which does not include all reasonable efforts to retrieve the bowhead.

§ 230.72 Prohibited acts.

(a) No person shall engage in whaling except a whaling captain licensed pursuant to § 230.73 or a member of a whaling crew under the control of a captain.

(b) No whaling captain shall engage in whaling for any calf or any bowhead whale accompanied by a calf.

(c) No whaling captain shall engage in whaling in a wasteful manner.

(d) No whaling captain shall engage in whaling without an adequate crew or without adequate supplies and equipment.

(e) No person may receive money for participation in native subsistence whaling.

(f) No whaling captain shall continue to whale after, (1) the quota set forth in § 230.74 for his village of domicile is reached, or (2) the license under which he is whaling is suspended as provided in § 230.73(b).

(g) No whaling captain shall claim domicile in more than one whaling village.

(h) No person may salvage a stinker without complying with the provisions of § 230.75.

(i) No whaling captain shall engage in whaling with a harpoon, lance, or explosive dart which does not bear a permanent distinctive mark identifying the captain as the owner thereof.

JAN 30 1979 UMI

V 4 4 / 2 1

§ 230.73 Licenses.

(a) A license is hereby issued to a whaling captain.

(b) The Assistant Administrator may suspend the license of any whaling captain who fails to comply with these regulations.

§ 230.74 Quotas.

(a) During the calendar year 1979, the quota for bowheads is allocated among whaling villages as follows:

(1) Savoonga—2 whales landed or 3 struck, whichever occurs first;

(2) Gambell—2 whales landed or 3 struck, whichever occurs first;

(3) Wales—1 whale landed or 1 struck, whichever occurs first;

(4) Kivalina—1 whale landed or 2 struck, whichever occurs first;

(5) Pt. Hope—2 whales landed or 3 struck, whichever occurs first;

(6) Wainwright—2 whales landed or 3 struck, whichever occurs first;

(7) Barrow—5 whales landed or 7 struck, whichever occurs first;

(8) Kaktovik—2 whales landed or 3 struck, whichever occurs first;

(9) Nuigsut—1 whale landed or 2 struck, which ever occurs first.

(b) When the number of bowheads struck or landed by whaling captains domiciled in a whaling village equals the quota for such whaling village as set forth in paragraph (a) of this section, whaling by all captains domiciled in that whaling village shall cease. All license holders shall be notified promptly by the Assistant Administrator for Fisheries using all reasonable means of communication. Licenses held by whaling captains domiciled in a whaling village which has reached its quota shall not be valid after the quota for that whaling village has been reached.

(c) If for any reason the landing or struck quota for whaling villages is not reached, the part of the quota which remains may be reassigned by the Assistant Administrator to a second whaling village: *Provided*, that if any other whaling village has exceeded its quota, the Assistant Administrator shall not reassign the quota if he determines that it is likely to result in the total number of whales landed or struck exceeding the bowhead quota then in effect under the Schedule to the International Convention for the Regulation of Whaling. In making such reassignment, the Assistant Administrator shall consult with representatives of as many whaling villages as time reasonably permits.

§ 230.75 Salvage of stinkers.

(a) Any person salvaging a stinker shall submit to the Assistant Administrator or his representative an oral or written report describing the circumstances of the salvage within 12 hours of such salvage. He shall provide promptly to the Assistant Administrator or his representative each harpoon, lance, or explosive dart found in or attached to the stinker. The device shall be returned to the owner thereof promptly unless it is retained as evidence of a possible violation.

(b) There shall be a rebuttable presumption that a stinker has been struck by the captain whose mark appears on the harpoon, lance, or explosive dart found in or attached thereto, and, if no strike has been reported by such captain, such strike shall be deemed to have occurred at the time of recovery of the device.

§ 230.76 Reporting by whaling captains.

(a) A representative of the Assistant Administrator may request each whaling captain licensed pursuant to § 230.73 to provide a written statement of his name and village of domicile and a description of the distinctive marking to be placed on each harpoon, lance and explosive dart. Representatives of the Assistant Administrator may provide each captain a form approved by the Assistant Administrator to facilitate reporting under this paragraph.

(b) Each whaling captain shall provide to appropriate representatives, on request, an oral or written report of whaling activities including but not limited to the striking, attempted striking, or landing of a bowhead whale and where possible, specimens from landed whales. The Assistant Administrator is authorized to provide technological assistance to facilitate prompt reporting and collection of specimens from landed whales, including but not limited to ovaries, ear plugs, and baleen plates. The report shall include at least the following information.

(1) The number, dates, and locations of each strike, attempted strike, or landing;

(2) The length (as measured from the point of the upper jaw and the notch between the tail flukes), the extreme width of the flukes, and the sex of the bowhead(s) landed;

(3) The length and sex of a fetus, if present in a landed bowhead whale;

(4) An explanation of circumstances associated with the striking or attempted striking of any bowhead whale not landed; and

(5) The number of bowhead whales sighted by the whaling captain or any member of the whaling crew.

§ 230.77 Penalties.

Any person who whales in contravention of these regulations, or violates any other provision of the Whaling Convention Act shall be subject to the penalties set forth in 16 U.S.C. 916e and 916f, and any other penalties provided by law.

Dated: January 24, 1979.

JACK W. GEHRINGER,
Deputy Assistant Administrator, National Marine Fisheries Service.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

[6050-01-M]

ACTION

COMPETITIVE DEMONSTRATION GRANTS

Availability of Funds

The Office of Policy and Planning of ACTION announces the availability of funds for fiscal year 1979 for demonstration grants under the Special Volunteer Programs authorized by the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93-113, Title I, Part C, 42 U.S.C. 4992).

Applications are due by 5 p.m. on April 30, 1979. All applications received by that time and date, or postmarked five (5) days before that date by the U.S. Postal Service, will be considered. Applications received by the closing date which are complete and conform to the requirements of this program announcement, will be competitively reviewed for the award of approximately twenty (20) grants. The purpose of the competitive process is to identify and support innovative volunteer service projects which have potential for widespread use.

Only applications from private nonprofit incorporated organizations and public agencies will be considered.

A. OBJECTIVES OF THESE SPECIAL VOLUNTEER PROGRAMS

To strengthen and supplement efforts to meet a broad range of human, social, and environmental needs, particularly those related to poverty, by encouraging and enabling persons from all walks of life and from all age groups to perform constructive volunteer service; to test or demonstrate new or improved volunteer delivery systems or methods; to encourage wider volunteer participation, particularly on a short-term basis, and to identify particular segments of the poverty community which could benefit from volunteer efforts.

Priority consideration will be given to demonstration projects emphasizing the needs of displaced spouses and victims of family violence; deinstitutionalization of the elderly, mentally retarded, mentally ill, imprisoned, and terminally ill; economic development through the use of rural credit unions, cooperative farms, and better methods of food and energy production; and rural energy needs, especially modification of low-income persons' energy consumption habits, helping poor people gain access to weatherization assistance, reduction of utility rates through citizen action, and acquiring alternative energy sources.

Projects emphasizing activities other than those set forth above will be considered for award if they meet the described objectives of the Special Volunteer Programs, but will not receive priority consideration.

B. ELIGIBLE APPLICANTS

State and local government agencies and private non-profit incorporated organizations.

C. AVAILABLE FUNDS AND SCOPE OF GRANTS

Subject to the availability of fiscal year 1979 funding, approximately $750,000 will be available for approximately twenty (20) grants ranging in size from approximately $15,000 to $200,000. They will be awarded for periods of not more than twelve (12) months. Subject to the availability of funds and if warrented by the nature of the project additional 12-month continuation grants may be awarded after competitive review.

Publication of this announcement does not obligate ACTION to award any specific number of grants, or to obligate the entire amount of funds available, or any part thereof, for demonstration grants under the Special Volunteer Programs.

D. GENERAL CRITERIA FOR GRANT SELECTION

Grant applications will be reviewed and evaluated against the general criteria outlined below, as well as more specific evaluation criteria which are included in the application kit (see section E below).

—Promise of developing innovations or knowledge in areas of priority, and of significance to national program development.

—Carefully formulated measurable time phased objectives and feasibility of methods for meeting those objectives.

—Capability of proposed staff.

—Likelihood of completion of project within proposed timetable.

—Feasibility of proposed budget.

—Potential for replication of the project model; plans for implementation and dissemination of results of project, including any products for use by others.

—Commitment from collaborating agencies and organizations where such could be expected to contribute to the value or success of the project.

—Adequacy of plans for data gathering and evaluation.

—While applicants are not required to contribute a specific portion of project costs, they are encouraged to do so. Applicants capable of such contributions should specify the sources and amounts of non-federal contributions, and the sources and nature of in-kind non-federal contributions.

E. AVAILABILITY OF FORMS

To be eligible for consideration, an application must be prepared and submitted in accordance with this announcement and the forms, instructions and program guidelines contained in the grant application kit. The kit may be obtained on or after January 31, 1979, by written request, from the Chief, Grants Branch, Room P-200, ACTION, 806 Connecticut Avenue, N.W., Washington, D.C. 20525. To expedite requests, please furnish a self-addressed gummed label, including "RGA No. 79-02," on the label. Telephone requests will not be honored. Kits will be sent only to private non-profit organizations and public agencies.

Requests for copies of the application kit will be honored if received within twenty (20) calendar days after date of availability referenced above. Requests received after this date will be filled on a first-come, first-served basis until the supply is exhausted.

F. APPLICATION REVIEW PROCESS

All eligible applications which have been submitted by the deadline date (see section G below) will be reviewed and rated by an ACTION headquarters rating panel composed of a minimum of three (3) ACTION and/or other Federal agency staff members with expertise in special volunteer programs. The highest rated applications will be submitted to the ACTION Assistant Director for Policy and Planning for final selection. The grant awards will be made by the Chief, Grants Branch, ACTION.

Prior to making final selections, the Assistant Director for Policy and Planning will transmit to the appropriate ACTION Regional and State Directors

V 4 4 / 2 1 J A 3 0 7 9 UMI

copies of the best qualified grant applications along with the panel's evaluation criteria, for their review and comment. Their comments will be used by the Assistant Director in making the final selections.

G. APPLICATION SUBMISSION AND DEADLINE

One signed original and two (2) copies of all completed applications must be submitted to the Chief, Grants Branch, at the above address. Applications are due not later than 5 p.m. EDST, April 30, 1979. All applications received by that date, or postmarked on or before April 25 by the U.S. Postal Service, will be considered.

Applications which do not conform to this announcement, or are received late, or are incomplete, will not be accepted for review.

Date of Signature: January 24, 1979.

SAM BROWN,
Director.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

INTERIM DESIGNATION

Designation on an Interim Basis of the Eastern Iowa Grain Inspection & Weighing Service, Inc.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces the designation on an interim basis of the Eastern Iowa grain Inspection & Weighing Service, Inc., as an official agency to provide grain inspection services under the U.S. Grain Standards Act, as amended, for the area normally serviced by the Kankakee Grain Inspection Bureau, Inc., effective January 15 through midnight, February 13, 1979.

DATE: Interim Designation Effective January 15 through February 13, 1979.

FOR ADDITIONAL INFORMATION CONTACT:

Edith A. Christensen, Federal Grain Inspection Service, Compliance Division, Delegation and Designation Branch, 14th & Independence Avenue, S.W., Room 2405, Auditors Building, Washington, D.C. 20250, (202) 447-8525.

SUPPLEMENTARY INFORMATION: As a result of administrative action resulting in a consent order, the designation of the Kankakee Grain Inspection Bureau is suspended effective January 15 through midnight February 13, 1979.

In order to provide an orderly continuation of needed official grain inspection services, the Eastern Iowa Grain Inspection & Weighing Service, Inc., Blue Grass, Iowa, has been granted a designation on an interim basis to provide official grain inspection services effective January 15 through midnight February 13, 1979, for the area normally serviced by the Kankakee Grain Inspection Bureau, Inc. Requests for service during this time period from applicants normally serviced by the Kankakee agency should be directed to Eastern Iowa Grain Inspection & Weighing Service, who will be operating out of the Kankakee Grain Inspection Bureau's office at 550 North Fifth Avenue, P.O. Box 102, Kankakee, Illinois 60901, (815) 932-2851, or at Eastern Iowa's office at R.R. #1, Box 588, Blue Grass, Iowa 52726, (319) 322-7149.

On February 14, 1979, the interim designation will terminate and the Kankakee Grain Inspection Bureau, Inc., will resume providing official inspection services in its area.

(Sec. 8, Pub. L. 94-582, 90 Stat. 2870 (7 U.S.C. 79); 7 CFR 26.99; 7 CFR 26.101)

Done in Washington, D.C. on: January 24, 1979.

D. R. GALLIART,
Acting Administrator.

OFFICIAL AGENCY DESIGNATION

Cancellation of Designation of the Plainview Grain Inspection and Weighing Service, Inc.—Official Designation of Plainview Grain Inspection & Weighing Service, Inc.—Proposal of Geographic Area

AGENCY: Federal Grain Inspection Service.

ACTION: Notice and Request for Comments.

SUMMARY: This notice announces the cancellation of designation of the Plainview Grain Inspection and Weighing Service, Inc., the official agency owned by a grain exchange at Plainview, Texas, and the designation of a new official agency which is owned by Robert W. Davis, Edna H. Davis, and A. W. DeBerry, which will retain the name of Plainview Grain Inspection & Weighing Service, Inc., to perform grain inspection services under the U.S. Grain Standards Act, as amended, effective October 25, 1978. This notice also proposes a geographic area within which the agency will operate.

DATE: Comments by March 16, 1979.

FOR ADDITIONAL INFORMATION CONTACT:

Edith A. Christensen, Federal Grain Inspection Service, Compliance Division, 14th & Independence Avenue, S.W., Room 2405, Auditors Building, Washington, D.C. 20250, (202) 447-8525.

SUPPLEMENTARY INFORMATION: The United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (hereinafter the "Act"), has been amended to extensively modify the official grain inspection system. Pursuant to Sections 7 and 7A of the Act (7 U.S.C. 79 and 79a), the Administrator of the Federal Grain Inspection Service (FGIS) has the authority to designate any State or local governmental agency, or any person, as an official agency for the conduct of all or specified functions involved in official inspection (other than appeal inspection), weighing, and supervision of weighing of grain at locations where the Administrator determines there is a need for such services. Such designation shall terminate triennially (7 U.S.C. 79(g)(1) and 79a(c)).

On August 18, 1978, a notice was published in the FEDERAL REGISTER (43 FR 27574) announcing that (1) the Plainview Grain Inspection and Weighing Service, Inc., Plainview, Texas, requested that its designation as an official inspection agency be transferred to Robert W. Davis, Chief Inspector of the agency, Edna H. Davis, and A. W. DeBerry, licensed inspectors with the agency; and (2) Mr. Davis et al have applied for designation in accordance with Section 7(f)(1) of the Act (7 U.S.C. 79(f)(1)) to operate as an official agency which will retain the name of the Plainview Grain Inspection & Weighing Service, Inc.

Interested persons were given until September 18, 1978, to submit written views and comments with respect to the requested transfer of designation and/or to apply for designation to operate as an official agency at Plainview, Texas. No comments were received regarding the August 18, 1978, notice. No additional applications were received, other than the application from Mr. Davis et al.

The FGIS has conducted the required investigation of the Plainview Grain Inspection & Weighing Service, Inc., which included onsite reviews of their inspection points (specified service points).

NOTE: Section 7(f)(2) of the Act (7 U.S.C. 79(f)(2)) generally provides that not more than one official agency shall be operative at one time for any geographic area as determined by the Administrator.

As a result of this investigation and after due consideration of the request for transfer, the Plainview Grain Inspection & Weighing Service, Inc., owned by Mr. Davis et al was selected for designation under the Act to perform official inspection functions (other than appeal inspection), not including official weighing, and the designation of the Plainview Grain Inspection and Weighing Service, Inc., was canceled, effective October 25, 1978.

A document designating the Plainview Grain Inspection & Weighing Service, Inc., as an official agency was signed on October 25, 1978. Said designation also includes an interim assignment of geographic area within which the official agency shall officially inspect grain. The geographic area assigned to the Plainview Grain Inspection & Weighing Service, Inc., on an interim basis pending final determination in this matter is:

Bounded on the North by: The northern Deaf Smith County line from State Route 214 east to U.S. Route 385; U.S. Route 385 south to Farm to Market Road (FM) 1062; FM 1062 east to State Route 217; State Route 217 east to the Prairie Dog Town Fork of the Red River; Prairie Dog Town Fork of the Red River southeast to the northern Briscoe County line; the Briscoe County line east; the northern Hall County line east to U.S. Route 287;

Bounded on the East by: U.S. Route 287 southeast to the eastern Hall County line; the Hall County line south; the southern Hall County line west to the eastern Motley County line; the Motley County line south;

Bounded on the South by: The southern Floyd County line west; the southern Motley County line west; the western Floyd County line north to FM 37; FM 37 west to FM 400; FM 400 north to FM 1914; FM 1914 west, including Hale Center, Texas, to FM 179; FM 179 south to FM 37; FM 37 west to U.S. Route 84; U.S. Route 84 northwest to FM 303; and

Bounded on the West by: FM 303 not including Sudan, Texas, north to U.S. Route 70; U.S. Route 70 west to the western Lamb County line the Lamb County line north; the northern Lamb County line east to the western Castro County line; the Castro County line north to the southern Deaf Smith County line; the Deaf Smith county line west to State Route 214; State Route 214 north to the northern Deaf Smith County line.

Interested persons may obtain maps of the proposed geographic area from the Compliance Division, Delegation and Designation Branch.

The specified service points of the Plainview Grain Inspection & Weighing Service, Inc., are 1100 North Broadway Street, P.O. box 717, Plainview, Texas 79072; and Progressive Road (1 block west of Highway 60), Hereford, Texas 79045. These service points are located within the agency's proposed geographic area. a specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of all or specified official inspection functions and where the agency or one or more of its licensed inspectors is located. A service location for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspection functions other than official grading where no licensed inspector is located. The designation document provides for the inclusion of service points which may be established in the future within the agency's assigned geographic area.

Publication of this notice does not preclude future amendment of this designation, consistent with the provisions and objectives of the Act.

Interested persons are hereby given opportunity to submit written views or comments with respect to the geographic area proposed for assignment to the Plainview Grain Inspection & Weighing Service, Inc. All views or comments should be submitted in writing to the Office of the Director, Compliance Division, Federal Grain Inspection Service, 14th & Independence Avenue, S.W., Room 2405, Auditors Building, Washington, D.C. 20250. All materials submitted should be mailed to the Director not later than March 16, 1979. All materials submitted pursuant to this notice will be made available for public inspection at the Office of the Director during regular business hours (7 CFR 1.27(b)). Consideration will be given to the views and comments so filed with the Director and to all other information available to the U.S. Department of Agriculture before final determination of the assignment of geographic area is made with respect to this matter.

(Sec. 4, Pub. L. 94-582, 90 Stat. 2868 (7 U.S.C. 75a); sec. 8, Pub. L. 94-582, 90 Stat. 2870 (7 U.S.C. 79); sec. 9, Pub. L. 94-582, 90 Stat. 2875 (7 U.S.C. 79a); sec. 27, Pub. L. 94-582, 90 Stat. 2889 (7 U.S.C. 74 note))

Done in Washington, D.C. on: January 24, 1979.

D. R. GALLIART,
Acting Administrator.

CIVIL AERONAUTICS BOARD

CHALLENGE AIR TRANSPORT, INC.

Application for an All-Cargo Air Service Certificate

JANUARY 24, 1979.

In accordance with Part 291 (14 CFR 291) of the Board's Economic Regulations (effective November 9, 1978), notice is hereby given that the Civil Aeronautics Board has received an application, Docket 34327, from Challenge Air Transport, Inc. of Miami, Florida for an all-cargo air service certificate to provide domestic cargo transportation.

Under the provisions of § 291.12(c) of Part 291, interested persons may file an answer in opposition to this application on or before February 20, 1979. An executed original and six copies of such answer shall be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. It

V 4 4 / 2 1 J A 3 0 7 9 UMI

shall set forth in detail the reasons for the position taken and must relate to the fitness, willingness, or ability of the applicant to provide all-cargo air service or to comply with the Act or the Board's orders and regulations. The answer shall be served upon the applicant and state the date of such service.

KODIAK—WESTERN ALASKA AIRLINES

Final Subsidy Mail Rate

This is an order tentatively proposing a final subsidy mail rate for Kodiak-Western Alaska Airlines, Inc., for annual periods beginning July 1, 1978, and thereafter.

AGENCY: Civil Aeronautics Board.

ACTION: Summary of Order (79-1-156 establishing a final subsidy mail rate for Kodiak-Western Alaska Airlines, Inc., for annual periods beginning July 1, 1978, and thereafter.

SUMMARY: The Board adopted an order directing Kodiak-Western Alaska Airlines, Inc., (KWA) to show cause why an annual subsidy mail rate of $411,283 should not be established for that carrier for annual periods beginning July 1, 1978, and thereafter. The order also proposes a new payment formula which is designed to distribute the subsidies in amounts roughly proportional to the carrier's seasonal needs for subsidy support.

DATES: Parties must file notices of objection by February 5, 1979 and must file objections by February 26, 1979.

FOR FURTHER INFORMATION CONTACT:

John R. Hokanson or James Craun, Bureau of Pricing and Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, 202-673-5132.

SUPPLEMENTARY INFORMATION: A final subsidy mail rate for KWA for the period December 16, 1976, through June 30, 1978, will be proposed in a separate order to be issued later.

The complete text of Order 79-1-156 is available from our Distribution Section, Room 516, 1825 Connecticut Avenue, N.W., Washington, D.C. Persons outside the metropolitan area may send a postcard request for Order 79-1-156 to the Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

PHYLLIS T. KAYLOR,
Secretary.

[Docket 33115, et al.; Order 79-1-68]

BRANIFF AIRWAYS, INC. ET AL.

Applications for Amendments to Certificates of Public Convenience and Necessity; Order to Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 11th day of January 1979.

In the matter of applications of Braniff Airways, Inc., Hughes Airwest, American Airlines, Inc., Western Air Lines, Inc., Trans World Airlines, Inc., Continental Air Lines, Inc., Northwest Airlines, Inc., Allegheny Airlines, Inc., Ozark Airlines, Inc. (Dockets 33115, 33298, 33202, 33315, 33524, 33543, 33607, 33674, 33671, 33996, 34067) for amendment of their certificates of public convenience and necessity pursuant to section 401 of the Federal Aviation Act of 1958, as amended.

Beginning on July 31, 1978, with an application from Braniff Airways for authority to provide nonstop service between Salt Lake City, on the one hand, and Denver and Dallas/Fort Worth, on the other (Docket 33115), we have received numerous applications requesting authority to serve Salt Lake City markets. In all, we have received applications from eleven carriers for authority to serve Salt Lake City and twenty-six points in the continental United States. The markets requested by each applicant are contained in appendix A.*

The Utah Air Travel Commission (UATC) has demonstrated great interest in the requests for new Salt Lake City authority and has on several occasions informed us of its position on the matters raised. Essentially, it opposes an all-points Salt Lake City service investigation because of the delay that it would cause in securing air service to its top priority markets, and reserves the right to seek expedited treatment for those priority markets.[1] It sees an immediate need for service to St. Louis, Atlanta, Dallas/Fort Worth, Boise, Albuquerque, and Eugene,[2] and has also specifically requested expedited treatment for the salt Lake City-Albuquerque-San Antonio market.[3]

We tentatively conclude, on the basis of the tentative findings below, that it is consistent with the public convenience and necessity to award multiple permissive authority on a Category II subsidy-ineligible basis in the Salt Lake City-Albuquerque/Atlanta/Boise/Dallas/Fort Worth/San Antonio markets and to grant the applications of Allegheny, American, Braniff, Continental, Airwest, Northwest, Ozark, Western, TWA, to the extent that they request authority in these markets, and any other fit, willing and able applicants, whose fitness, willingness and ability can be established by officially noticeable data.[4] Further, we tentatively conclude that no oral evidentiary hearing is needed here since there are no material determinative issues of fact requiring such a hearing for their resolution.

These markets are those for which the community is most interested in having new authority now. Therefore, in the interest of expedition, this order will be limited to these markets.[5][6] We will deal with the remaining requests for Salt Lake City authority in subsequent proceedings.

Under the Airline Deregulation Act of 1978, we must approve an application for certificate authority unless we find, by a preponderance of the evidence, that approval would not be consistent with the public convenience and necessity (Pub. L. No. 95-504, section 14). The new Act creates a presumption that the grant of all applications is consistent with the public convenience and necessity. It places on any opponents of these applications the burden of proving them inconsistent with the public convenience and necessity (Pub. L. No. 95-504, section 14). To give such opponents a reasonable opportunity to meet an admittedly heavy burden of proof, it is our view that applicants must indicate what type of service they would provide if they served the markets at issue. This does not mean that an applicant must show that it will provide service if it receives authority, but rather what the nature of its service would be if it decided to serve. We will give all existing and would-be applicants 15 days from the date of service of this order to supply data,[7] in order to give interested persons sufficient information on the nature of the applicant's proposal to assess consistency with the public convenience and necessity. Our tentative findings concerning all applicants that have not filed illustrative service proposals are contingent on such filings.

Upon review of all the facts and pleadings in this case, we have tentatively determined that there is no reason why we should not grant multiple awards. Our tentative conclusions comport with the letter and spirit of the Airline Deregulation Act of 1978, particularly the declaration of policy set forth in Section 102 which instructs us to rely, to the maximum extent possible, on competitive forces, including potential competition.[8] See our general conclusions about the benefits of multiple permissive authority in *Improved Service to Wichita Case, et al.*, Order 78-12-108, December 14, 1978. Accordingly, we conclude that it is desirable to award the additional authority sought by the applicants, whether or not services are in fact operated. The existence of additional operating rights in markets now being served by incumbent carriers or authorized to be served will best effect the statute's policy objectives of placing maximum reliance on the decisions of the marketplace. This will occur because newly authorized carriers may actually enter the market in order to satisfy unmet demand, both in terms of price and service, or because incumbents will be encouraged by the realistic threat of entry to meet that demand. Because demand is dynamic in character and therefore constantly changing, the most effective means to assure that competitive forces will operate quickly and efficiently is to award multiple operating authority to carriers that are fit, willing and able to provide service.[9]

Notwithstanding the foregoing tentative conclusions in support of multiple permissive authority in this proceeding, we wish to make clear that we in no way desire to deter objections that might be asserted under the 1978 Act by air carriers, civic interests or other interested persons. The new statute contains a completely revised declaration of policy in section 102, as well as numerous additional and modified substantive provisions. Some of these statutory changes relate to considerations not expressly covered in the preceding statute. For example, while diversion from existing carriers will not be given decisive weight in rejecting applications for new authority except upon an extraordinary showing of financial jeopardy on the part of one or more existing air carriers, with the consequent loss of air service which cannot be immediately replaced, other provisions suggest that the Congress desires us to take into account other factors. These include, but are not limited to, satellite airport questions and the degree of concentration within the industry and safety. Any party in this proceeding may explain in full why the authority that we propose to grant should not issue. Such explanations should apply specifically to the applications in issue, and should be sufficiently detailed to overcome the statutory presumption of favorable treatment that the Act bestows on applications.

Finally, upon review of the environmental evaluations submitted by Braniff, Airwest, Western, Northwest and Continental in their applications, to which no answers have been filed, we find that our decision to award them authority does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, or a major regulatory action under the Energy Policy and Conservation Act of 1975. We reserve judgment on the environmental consequences of other applications, pending submission of environmental data.

We will give interested persons 30 days following the service date of this order to show cause why the tentative findings and conclusions set forth here should not be made final; replies will be due within 10 days thereafter. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a proceeding that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections. We remind objectors that under the 1978 Act they have the burden of proving why the awards proposed here will not be consistent with the public convenience and necessity.

Accordingly, 1. We direct all interested persons to show cause why we should not issue an order making final the tentative findings and conclusions stated above and amending the certificates of public convenience and necessity of the following carriers so as to authorize them to provide nonstop operations between the points listed, as follows:

a. Allegheny Airlines for Route 97 between Salt Lake City, on the one hand, and Albuquerque, Atlanta and Dallas/Fort Worth, on the other;

b. American Airlines for Route 4 between Salt Lake City, on the one hand, and Albuquerque, Dallas/Fort Worth and San Antonio, on the other;

c. Braniff Airways for Route 9 between Salt Lake City, on the one hand, and Dallas/Fort Worth, on the other;

d. Continental Air Lines for Route 29 between Salt Lake City, on the one hand, and Albuquerque and San Antonio on the other;

e. Hughes Airwest for Route 76 between Salt Lake City, on the one hand, and Albuquerque, Dallas/Fort Worth and San Antonio, on the other;

f. Northwest Airlines for Route 3 between Salt Lake City, on the one hand, and Albuquerque, Atlanta, Boise, Dallas/Fort Worth and San Antonio, on the other;

g. Ozark Air Lines for Route 107 between Salt Lake City, on the one hand, and Albuquerque, Atlanta, Boise, Dallas/Fort Worth and San Antonio, on the other;

h. Trans World Airlines for Route 2 between Salt Lake City, on the one hand, and Albuquerque, on the other;

i. Western Air Lines for Route 19 between Salt Lake City, on the one hand, and Albuquerque, Atlanta, Boise, Dallas/Fort Worth and San Antonio, on the other;

and amending, to grant any of the authority in issue, the certificates of any

---

[1] *See* Answer of the UATC to Western's motion to consolidate, October 6, 1978, Docket 33524.

[2] *See* Answer of the UATC to American's motion to consolidate, October 13, 1978, Docket 33315.

[3] *See* Answer of the UATC to Airwest's petition for show cause order, October 16, 1978, Docket 33202.

[4] Officially noticeable data consist of information filed with us under section 302.24(m) of our Rules of Practice. Applicants whose cannot be so established must make a showing of fitness, as well as dealing with any questions under sections 408 and 409 of the Act. Should such applications be filed, we will then consider how to deal with them procedurally.

On the basis of officially noticeable data, we find that Allegheny, American, Braniff, Continental, Airwest, Northwest, Ozark, Western, and TWA are citizens of the United States and are fit, willing and able to perform the air services proposed and to conform to the provisions of the Act and our rules, regulations and requirements.

[5] The Salt Lake City-St. Louis market has already received consideration in Order 78-10-98, Oct. 10, 1978 and the Salt Lake City-Eugene exemption application of Frontier Airlines (Docket 33608) was granted in Order 78-12-71, December 11, 1978.

[6] The carriers requesting authority in each of these markets appear in Appendix B. A summary of the pleadings filed by each of the carriers relating to the above five markets is found in Appendix C.

[7] They should submit an illustrative schedule of service in the markets at issue, which shows all points that they might choose to serve, the type and capacity of the equipment they would likely use and the elapsed trip time of flights in block hours over the segments. For the markets at issue only, they should also provide an environmental evaluation as required by Part 312 of our Regulations, and an estimate of the gallons of fuel to be consumed in the first year of operations in the markets if they instituted the proposed service, as well as a statement on the availability of the required fuel.

[8] Section 102(a) specifies as being in the public interest, among other things: "The placement of maximum reliance on competitive market forces and on actual and potential competition (a) to provide the needed air transportation system, and (b) to encourage efficient and well-managed carriers to earn adequate profits and to attract capital" and "The encouragement, development, and maintenance of an air transportation system relying on actual and potential competition to provide efficiency, innovation, and low prices, and to determine the variety, quality, and price of air transportation services."

[9] In the Boise-Denver case, Docket 32115, the issue arose as to how many more carriers the Boise airport can now accommodate. An initial decision was served on December 28, 1978. Interested persons may comment on the Boise airport issue as it concerns this case.

V 4 4 / 2 1

other fit, willing and able applicants the fitness of which can be established by officially noticeable material;

2. We direct any interested persons having objections to the issuance of an order making final any of the proposed findings and conclusions, or certificate amendments set forth here, to file and serve upon all persons listed in paragraph 9, no later than February 26, 1979, a statement of objections, together with a summary of testimony, statistical data and other material expected to be relied upon to support the stated objections; answers shall be due no later than March 8, 1979;

3. If timely and properly supported objections are filed, we will accord full consideration to the matters and issues raised by the objections before we take further action; [10]

4. In the event no objections are filed, we will deem all further procedural steps to have been waived and we may proceed to enter an order in accordance with the tentative findings and conclusions set forth here;

5. We grant the motions of Braniff, Airwest, American, Western, TWA, Continental, Northwest, Allegheny and Ozark to consolidate their applications to the extent that they request authority in the markets at issue here;

6. We grant TWA's motion to sever its Salt Lake City-St. Louis and Salt Lake City-Denver applications from its Salt Lake City-Albuquerque/St. Louis/Denver application in Docket 33543;

7. We direct American, TWA, Continental, Northwest, Allegheny, Ozark and any other applicant for the authority in issue to file the data set forth in footnote 7 no later than February 9, 1979; and

8. We will serve a copy of this order upon all persons named in the service lists of Dockets 33115, 33298, 33202, 33315, 33524, 33543, 33674, 33607, 33671, 33996, and 34067.

We will publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[11]

PHYLLIS T. KAYLOR,
Secretary.

[Docket 32774; Order 79-1-99]

NORFOLK-VIRGINIA BEACH-PORTSMOUTH-CHESAPEAKE-SUFFOLK PARTIES

Petition for Investigation Into Service Cuts Proposed by United Air Lines, Inc.; Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 18th day of January, 1979

On May 31, 1978, the Norfolk Parties[1] filed a petition, under sections 404(a) and (b) of the Federal Aviation Act, for an investigation into the service cuts proposed by United Air Lines in the Norfolk-Washington (National Airport) market. Petitioners request a hearing on their complaint or, in the alternative, an order to show cause directing United to give up five of its slots at Washington National Airport to another carrier willing to supply replacement services.

In support of their petition, the Norfolk Parties contend that the elimination of United's flights between Norfolk and Washington National Airport effective June 9, 1978, would leave the market with grossly inadequate service;[2] that neither Baltimore-Washington International Airport nor Dulles International Airport meets the needs of the market; that United is the largest carrier of passengers in the Norfolk-Washington National Airport market;[3] the schedule pattern in the market was already deficient before United proposed to cut its service and will be seriously inadequate after the cutbacks;[4] that while the decrease in frequencies amounts to only 35.7 percent, the reduction in capacity amounts to nearly 40 percent because three of the remaining flights are operated with YS-11 aircraft with a seating capacity of only 58; that the cutbacks are planned during a period of peak demand; that the need for service to National Airport is based in part on the fact that Norfolk is the headquarters for the United States Atlantic Fleet and for NATO Supreme Allied Command Atlantic Operations; that Norfolk is also dependent on National Airport as a connecting hub and gateway to other cities; that the use of other airports would greatly inconvenience Norfolk passengers since such travel would involve a backhaul; and that Norfolk's efforts to obtain replacement service have been hampered by the combination of the lack of available slots at the National Airport and the price ceilings imposed by the Board in the *Domestic Passenger-Fare Investigation*. Norfolk attached to its petition numerous letters opposing the cutback in service by United.

Answers to the petition were filed by the Department of Defense and by United. DOD supports the petition, stating that over 13,000 official DOD travelers per year use Norfolk-Washington air service, with the greatest damand for reservatons in the early morning and evening hours; that curtailment of the current service will be detrimental to many DOD passengers in the performance of essential military travel; that serious disruption to casual travel of Navy, Marine Corps, and civilian workers and their dependents, who make up over 30 percent of the Tidwater population, is probable, particularly during peak holiday periods; and that neither Baltimore-Washington International Airport nor Dulles International Airport is as convenient for such travel, given that the vast majority of official travel of the DOD between Norfolk and Washington s for business at the Pentagon or in downtown Washington, D.C.

United contends that it is not the major participant in the Norfolk-Washington National market;[5] that is fulfilling its certificate requirements by serving the Washington area through Baltimore and Dulles International Airports;[6] that it is United's intent to deemphasize local schedules in the market whild placing more emphasis on service between Norfolk and more distant destinations; that the service cutbacks it has made are not a violation of the Act; that the alternative request of the Norfolk Parties for an order to show cause why it should not give up five of its slots at National Airport is without merit; and that the petititon should be dismissed.

The Norfolk Parties filed a motion for leave to file an otherwise unauthorized document,[7] to which was attached a reply to United's answer. They contend that the data used to support the argument that United is not participating in a large percentage of Norfolk-Washington, traffic are misleading and were taken from an unrepresentative year; [8] and that the unwillingness of United to give up some of its slot allocations at National Airport to a replacement carrier should not be countenanced by the Board.

On July 24, 1978, the Norfolk Parties filed a petition in Docket 21866 (*Domestic Passenger-Fare Investigation*) for a waiver from our rate-making policies to the extent necessary to allow them to bid at higher than Phase 9 prescribed fares for carrier services in the Norfolk-Washington market. Specifically, they propose to seek contract arrangements with a willing carrier or carriers to replace the loss of United's service in that market. They contend that they need relief from DPFI fare ceilings in order to attract service, and that even under our proposed rule-making (EDR-353, PDR-52, and PSDR-51),[9] only a modest increase above DPFI levels would be permissible in a market of this nature. They seek permission to bid much higher for the services (or particular flights such as peak period movements) of a willing carrier or carriers in the Norfolk-Washington National market.[10] Finally, they filed a motion to consolidate the waiver request with their petition in Docket 32774.

We have decided to dismiss Norfolk's petition. After is was filed, Congress passed the Airline Deregulation Act of 1978. Under the new Act, maximum reliance is placed on competitive market forces and actual and potential competition to provide needed service (section 102(a) (4) and (9)). Further, a new comprehensive program has been created, in section 419, to guarantee that essential air services are provided to smaller communities, where necessary with direct subsidy. In this more competitive climate carriers have the freedom to reduce or eliminate service at points or in markets except where "essential air transportation" would be impaired. Under these circumstances, the adequacy of service provision can no longer be used to fix a carrier's frequencies above the "essential" level.[11]

We recognize, however, that Washington is a major destination for Norfolk travelers, and by this order we are inviting applications for authority in the Norfolk-Washington (National Airport) market.[12] Such applications may be in the form of certificate amendment or exemption requests. We intend to process certificate applications by show-cause procedures if circumstances permit.[13] With a total of 199,130 O&D plus connecting passengers in 1977, or 545 passengers per day, the market might very well be attractive to potential new entrants. Such service may be more feasible for a carrier other than United with a different route structure or aircraft fleet mix. We will act upon any applications filed in response to this order as expeditiously as possible.

In addition to their petition, the Norfolk Parties filed a waiver request which would permit a higher-than-normal fare in the Norfolk-Washington market. As indicated in footnote 9, *supra*, we have adopted a new policy for domestic fares designed to permit maximum flexibility according to the needs of particular markets. The new section dealing with upward fare flexibility, 399.33(a), is purposely broad: "coach fare proposals priced above this ceiling or the upper limits specified under section 399.31(h) should be suspended *unless otherwise justified*" (emphasis added).[14] This new fare policy establishes a suspend-free ceiling, but it does not preclude just and reasonable and otherwise lawful increases above the ceiling. Thus, any carrier is free to file for an increased fare in the Norfolk-Washington market. Whether the characteristics of this market could justify higher prices cannot, of course, be determined on this record. Norfolk's petition for a waiver is therefore moot and will be dismissed.[15]

ACCORDINGLY,

1. We dismiss the petition filed by the Norfolk Parties in Docket 32774;

2. We dismiss the petition filed by the Norfolk Parties in Docket 21866 for a waiver of the rate making policies and the motion to consolidate the petition with the petition in Docket 32774;

3. We grant the motion of the Norfolk Parties for leave to file an otherwise unauthorized document; and

4. We will serve this order on United Air Lines; National Airlines; Piedmont Aviation; all other certificated carriers; the Norfolk Parties; the Department of Defense; and the Postmaster General.

We will publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board: [16]

PHYLLIS T. KAYLOR,
Secretary.

DEPARTMENT OF COMMERCE

Industry and Trade Administration

ELECTRONIC INSTRUMENTATION TECHNICAL ADVISORY COMMITTEE

Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Electronic Instrumentation Technical Advisory Committee will be held on Wednesday, February 14, 1979, at 9:30 a.m. in Room 4833, Main Commerce Building, 14th Street and Constitution Avenue, NW., Washington, D.C.

The Electronic Instrumentation Technical Advisory Committee was initially established on October 23, 1973. On October 7, 1975, October 21, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Section 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which may affect the level of export controls applicable to electronic instrumentation, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee will meet only in Executive Session to discuss matters

[10] Since provision is made for the filing objections to this order, we will not entertain petitions for reconsideration.

[11] All Members concurred.

[1] The Norfolk Port and Industrial Authority, the City of Norfolk, City of Suffolk, City of Virginia Beach, Chesapeake Chamber of Commerce, Norfolk Chamber of Commerce, Portsmouth Chamber of Commerce, Suffolk Chamber of Commerce, and Virginia Beach Chamber of Commerce.

[2] The remaining service would be two daily round trips by National Airlines and two and one-half round trips daily by Piedmont Aviation.

[3] The Parties indicate that during 1977 United enplaned and transported about 36 percent of the traffic carried by the three certificated carriers on nonstop flights in the market.

[4] The petition refers to gaps in departures from Norfolk between 10:45 a.m. and 9:50 p.m., and to Norfolk between 9:25 a.m. and 1:45 p.m. and between 5:45 p.m. and 9:45 p.m.

[5] United states that during 1976 it carried only 19 percent of the local and connecting passengers between Norfolk and Washington according to O&D survey data, and that for the same year, its on-board traffic consisted of only 22 percent local passengers with the balance of 78 percent consisting of through or beyond passengers.

[6] United plans to move its flights from Naltonal Airport to Balitmore, adding its service to four daily round trips by Allegheny Airlines in the Norfolk-Baltimore market.

[7] We will grant the motion.

[8] Norfolk states that 1976 represented a low point for United in terms of both traffic and service in the Norfolk-Washington market.

[9] On August 25, we adopted as a final rule, PS-80, effective September 5, 1978, which amends Part 399 regarding domestic passenger fare levels and structures and discount fares.

[10] They state that they request waiver authority to permit the approval of any fare proposal in this market agreed to by them in a contract with the carrier or carriers involved. They propose to negotiate with interested carriers (including United) and enter into an appropriate agreement or agreements which would specify both an agreed fare level and an agreed service level.

[11] We note that historically, before the passage of the 1978 Act, we relied primarily on competition to assure adequacy of service.

[12] We are aware of the views expressed by Norfolk that the slot allocation situation at National Airport will prevent replacement service. The whole matter of allocation of slots at congested airports is under review by the FAA and our staff, and Norfolk will be free to participate in any proceeding which may be undertaken to deal with this question. It is a complex problem that cannot be considered on an *ad hoc* basis, and we will not here require United to give up any of its slots at National Airport.

[13] In the case of carriers or applicants not holding combination certificates, we will make a preliminary investigation to determine whether we should proceed, in the first instance, by show-cause procedures, or whether we should set such applications before an Administrative Law Judge for full hearing.

[14] Justifications could relate to particular operating factors, special market needs, higher cost service, etc.

[15] Consideration will, of course, be given to the views of Norfolk and DOD filed in connection with any subsequent tariff proposal to establish fares above the ceiling.

[16] All Members concurred.

JAN 30 1979 UMI

V 4 4 / 2 1

properly classified under Executive Order 11652 or 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under Executive Order 11652 or 12065. All Committee members have appropriate security clearances.

For further information, contact Mr. Richard J. Isadore, Acting Director, Operations Division, Office of Export Administration, Industry and Trade Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4738.

The complete Notice of Determination to close meetings or portions thereof of the series of meetings of the Electronic Instrumentation Technical Advisory Committee and of any subcommittees thereof was published in the FEDERAL REGISTER on December 27, 1978 (43 FR 60328).

Dated: January 25, 1979.

LAWRENCE J. BRADEY,
Acting Director, Office of Export Administration, Bureau of Trade Regulation, Department of Commerce.

[3510-25-M]

HARDWARE SUBCOMMITTEE OF THE COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Hardware Subcommittee of the Computer Systems Technical Advisory Committee will be held on Wednesday, February 14, 1979, at 9:00 a.m. in Room 4833, Main Commerce Building, 14th Street and Constitution Avenue, NW., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, January 13, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Hardware subcommittee of the Computer Systems Technical Advisory Committee was established on July 8, 1975, with the approval of the Director, Office of Export Administration, pursuant to the Charter of the Committee. And, on October 16, 1978, the Assistant Secretary for Industry and Trade approved the continuation of the Subcommittee pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to computer systems, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls. The Hardware Subcommittee was formed to continue the work of the Performance Characteristics and Performance Measurements Subcommittee, pertaining to (1) Maintenance of the processor performance tables and further investigation of total systems performane; and (2) Investigation of array processors in terms of establishing the significance of these devices and determining the differences in characteristics of various types of these devices.

The Subcommittee meeting agenda has four parts:

GENERAL SESSION

1. Opening remarks by the Chairman.
2. Presentation of papers or comments by the public.
3. Discussion of work program for the current year.

EXECUTIVE SESSION

4. Discussion of matters properly classified under Executive Order 11652 or 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (4), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government in the Sunshine Act. Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy. All materials to be reviewed and discussed by the Subcommittee during the Executive Session of the meeting have been properly classified under Executive Order 11652 or 12065. All Subcommittee members have appropriate security clearances.

The complete Notice of Determination to close meetings or portions thereof of the series of meetings of the Computer Systems Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on September 14, 1978 (43 FR 41073).

For further information, contact Mr. Richard J. Isadore, Acting Director, Operations Division, Office of Export Administration, Industry and Trade Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4738.

Copies of the minutes of the open portion of the meeting can be obtained by calling Mrs. Margaret Cornejo, Operations Division, Office of Export Administration (202) 377-2583.

Dated: January 25, 1979.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of Trade Regulation, Department of Commerce.

[3510-25-M]

TECHNOLOGY TRANSFER SUBCOMMITTEE OF THE COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Technology Transfer Subcommittee of the Computer Systems Technical Advisory Committee will be held on Wednesday, February 14, 1979, at 1:00 p.m. in Room 4833, Main Commerce Building, 14th Street and Constitution Avenue, N.W., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, January 13, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Technology Transfer Subcommittee of the Computer Systems Technical Advisory Committee was initially established on April 10, 1974. On July 8, 1975, the Director, Office of Export Administration, approved the reestablishment of this Subcommittee, pursuant to the charter of the Committee. And, on October 16, 1978, the Assistant Secretary for Industry and Trade approved the continuation of the Subcommittee pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) world wide availability and actual utilizaton of production technology, (C) licensing procedures which affect the level of export controls applicable to computer systems, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls. The Technology Transfer Subcommittee was formed to examine the impact of transferring Automatic Data Processing technology to Communist destinations.

The Subcommittee meeting agenda has four parts:

GENERAL SESSION

(1) Opening remarks by the Chairman.
(2) Presentation of papers or comments by the public.
(3) Review of possible future activities for the Subcommittee for 1979.
(4) Discussion of matters properly classified under Executive Order 11652 or 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (4) the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended, by Section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy. All materials to be reviewed and discussed by the Subcommittee during the Executive Session of the meeting have been properly classified under Executive Order 11652 or 12065. All Subcommittee members have appropriate security clearances.

The complete Notice of Determinations to close meetings or portions thereof of the series of meetings of the Computer Systems Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on September 14, 1978 (43 FR 41072).

For further information, contact Mr. Richard J. Isadore, Acting Director, Operations Division, Office of Export Administration, Industry and Trade Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4738.

Copies of the minutes of the open portion of the meeting can be obtained by calling Mrs. Margaret Cornejo, Operations Division, Office of Export Administration (202) 377-2583.

Dated: January 25, 1979.

LAWRENCE J. BRADY,

National Oceanic and Atmospheric Administration

PROPOSED ALASKA COASTAL MANAGEMENT PROGRAM

Public Hearings on Draft Environmental Impact Statement

Notice is hereby given that the Office of Coastal Zone Management, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, will hold public hearings for the purpose of receiving comments on the Draft Environmental Impact Statement (DEIS) Prepared on the Proposed Alaska Coastal Management Program.

The hearing schedule is:

Tuesday, February 27, 1979, 2:00 p.m. and 7:00 p.m., Alaska Court & Office Building, Supreme Court Room A, Juneau, Alaska.
Wednesday, February 28, 1979, 2:00 p.m. and 7:00 p.m., Anchorage Historical & Fine Arts Museum, 121 West 7th Avenue, Anchorage, Alaska.

The views of interested persons and organizations on the adequacy of the impact statement and/or the Proposed Alaska Coastal Management Program are solicited, and may be expressed orally or in written statements. Persons or organizations wishing to be heard on this matter should contact the Office of Coastal Zone Management (OCZM), National Oceanic and Atmospheric Administration, 3300 Whitehaven Street, N.W., Washington, D.C. 20235 (phone: 202/634-4253), so that an appearance schedule may be prepared. In addition, requests for presentations will be accepted immediately prior to the hearing. Presentations are scheduled on a first-come, first-served basis, and should be limited to ten minutes in order to assure that all views can be heard. Office of Coastal Zone Management staff may wish to question speakers following the conclusion of his/her statement. If time permits, additional statements (and general discussion) may be scheduled at the conclusion of presentations. No verbatim transcript of the hearing will be maintained; but staff present will record the general thrust of the remarks.

As part of his review of the Alaska Coastal Management Program, the Assistant Administrator for Coastal Zone Management will consider fully all comments received at these hearings, as well as written statements submitted to, and received by OCZM on or before March 5, 1979. As part of the procedures leading toward approval of this program, a Final Environmental Impact Statement will be prepared pursuant to the National Environmental Policy Act of 1969 and its implementing guidelines which reflect his consideration of these comments. All written comments received by OCZM prior to the deadline will be included in the FEIS.

Dated: January 24, 1979.

R. L. CARNAHAN,
Acting Assistant Administrator for Administration.

National Telecommunications and Information Administration

FREQUENCY MANAGEMENT ADVISORY COUNCIL

Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that the Frequency Management Advisory Council (FMAC) will meet from 9:30 a.m. to 3:30 p.m. on February 15, 1979, in the Aspen Room at the National Telecommunications and Information Administration, 1325 "G" Street, N.W., Washington, D.C. (Public entrance to the building is on "G" Street, between 13th Street and 14th Street, N.W.)

The Council was established on July 19, 1965. The objective of the Council is to advise the Secretary of Commerce on radio frequency spectrum allocation matters and means by which the effectiveness of Federal Government frequency management may be enhanced. The Council consists of 11 members whose knowledge of telecommunications is balanced in the functional areas of manufacturing, analysis and planning, operations, research, academia and international negotiations.

The agenda items for the meeting will be:

(1) Approval of the Draft Record of the January 10, 1979 meeting.

(2) FMAC study of the proposed Communications Act of 1978—progress report, review and discussions.

(3) Any other business of the Council.

(4) Scheduling of the next meeting.

The meeting will be open to public observation; and a period will be set aside for oral comments or questions by the public. Each person will be limited to 10 minutes. More extensive questions or comments should be submitted in writing before February 14th. Other public statements regarding Council affairs may be submitted at any time before or after the meeting. Approximately 15 seats will be available for the public on a first-come first-served basis.

Copies of the minutes will be available on request.

Inquiries may be addressed to the Council Contral Officer, Mr. Charles L. Hutchison, National Telecommunications and Information Administration, Room 268, 1325 "G" Street, N.W., Washington, D.C. 20005, telephone 202-724-3301.

Dated: January 25, 1979.

LLOYD C. DOBSON,
Committee Liaison Officer, National Telecommunications and Information Administration.

DEPARTMENT OF DEFENSE

Department of the Army

HISTORICAL ADVISORY COMMITTEE

Open Meeting

1. In accordance with Section 10(A)(2) of the Federal Advisory Committee Act (Pub. L. 92-463) announcement is made of the following committee meeting:

Name of Committee: Department of the Army Historical Advisory Committee.
Date: 6 April 1979.
Place: Conference Room, 6A-092, Forrestal Building, Washington, DC 20314.
Time: 1000-1140; 1345-1515.
Proposed Agenda: 1000-1140—Review of historical activities. 1345-1515—Discussion of activities and executive session of the committee.
Purpose of meeting: The committee will review the past year's historical activities based on reports and manuscripts received throughout the year and formulate recommendations through the Chief of Military History to the Chief of Staff, US Army and the Secretary of the Army for advancing the purposes of the Army Historical Program.

2. Meetings of the Advisory Committee are open to the public. Due to space limitations, attendance may be limited to those persons who have notified the Advisory Committee Management Office in writing, at least five days prior to the meeting of their intentions to attend the April 6 meeting.

3. Any members of the public may file a written statement with the Committee before, during or after the meeting. To the extent that time permits the Committee Chairman may allow public presentations of oral statements at the meeting.

4. All communications regarding this Advisory Committee should be addressed to LTC J. H. Ferguson, Advisory Committee Management Officer for the Chief of Military History, Room 6B-018, Forrestal Building, Washington, DC 20314.

Dated: January 17, 1979.

JAMES H. FERGUSON,
LTC, IN, Executive Officer

DEFENSE SCIENCE BOARD TASK FORCE ON ENDURING STRATEGIC COMMUNICATIONS, COMMAND AND CONTROL AND INTELLIGENCE

Advisory Committee Meeting

The Defense Science Board Task Force on Enduring Strategic Communications, Command and Control and Intelligence will meet in closed session on 23 February, 1979 in Colorado Springs, Colorado.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

A meeting of the Task Force on Enduring Strategic Communications, Command and Control and Intelligence has been scheduled for 23 February 1979 to review Aerospace Defense Command command and control systems and related plan and studies. The Task Force is focusing on the long term problems in strategic communications, command and control and intelligence and will complement concurrent studies being performed by Strategic Air Command and the United States Navy.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Defense Science Board Task Force meeting concerns matters listed in Section 552(c) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, DOD/WHS.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM78-12; Order No. 17-A]

ALASKA NATURAL GAS TRANSPORTATION SYSTEM

Order Confirming the Incentive Rate of Return Mechanism and Denying Petition for Reconsideration and Clarification

JANUARY 17, 1979.

I. BACKGROUND

On December 1, 1978, in Order No. 17 (in the above-referenced docket), the Federal Energy Regulatory Commission (Commission) appended certain Incentive Rate of Return (IROR) terms and conditions to the conditional certificates of public convenience and necessity for the Alaska Natural Gas Transportation System (ANGTS). These conditions were developed pursuant to a rulemaking. An original notice (May 8, 1978) and a revised notice (September 15, 1978) of proposed rulemaking were issued soliciting comments on the IROR mechanism. The Commission in Order No. 17 solicited further comments and scheduled an oral argument before the Commission on the sole issue of the inclusion of an allowance for funds used during construction (AFUDC) in the Cost Performance Ratio of the IROR mechanism. Written comments were received on December 19, 1978, from three interested parties: (1) the Alaskan Northwest Natural Gas Transportation Company, a Partnership; (2) the Northern Border Pipeline Company, and (3) the Office of Regulatory Analysis, Federal Energy Regulatory Commission. Representative of these same parties presented oral arguments to the Commission on December 21, 1978. Members of the Commission attending were Don S. Smith (presiding), Charles B. Curtis, Georgiana Sheldon, and Matthew Holden, Jr. This order affirms the terms and conditions in Order No. 17 and provides additional information concerning future proceedings to implement the IROR mechanism.

II. AFUDC IN THE COST PERFORMANCE RATIO

In their comments on the revised notice of September 15, the project sponsors (Alaskan Northwest and Northern Border) stated that the IROR mechanism as proposed in the revised notice was unacceptable to the sponsors and would result in the sponsors seeking Federal financial assistance. The major area of concern to the sponsors was the inclusion of AFUDC in the Cost Performance Ratio and a consequent reduction in the IROR if there are delays in construction. In response to valid criticisms and in order to make AFUDC consistent with other cost components in the Cost Performance Ratio, the Commission in Order No. 17 made four changes to or clarifications of the IROR mechanism. These are:

1. AFUDC will be calculated from a Real Rate of Return on equity and debt, after removing the effects of inflationary expectations, instead of the nominal or current dollar rates.

2. The IROR will not be reduced for delays occurring prior to the granting of a final certificate of public convenience and necessity by the Commission.

3. The Change in Scope procedure, to be the subject of a separate rulemaking, ". . . will absolve the project sponsors of responsibility for delays which are clearly the fault of the government."[1]

4. The rulemaking on Change in Scope will also address the issue of ". . . what other delays and cost increases are truly beyond the project sponsors' control."[2]

The net effect of these adjustments to the IROR mechanism is to greatly reduce the penalty for delay. However, because of the importance given to the AFUDC issue by the sponsors, the Commission concluded that submittal of additional written comments and presentation of oral arguments were appropriate before a final ruling on this matter.

[1] Order No. 17, *op. cit.* mimeo p. 6.
[2] *Ibid.*

III. RESOLUTION OF THE AFUDC ISSUE

Upon consideration of the written and oral views and comments received on the AFUDC issue, it is this Commission's judgment that AFUDC should remain in the Cost Performance Ratio as provided by the Commission in Order No. 17. In reaching this judgment the Commission is appreciative of the incentive effects discussed by the Commission's Office of Regulatory Analysis (ORA) but is at least equally influenced by a factor discussed during the oral argument by both the Office of Regulatory Analysis [3] and Alaskan Northwest,[4] sponsor of the Alaskan segment of the ANGTS: namely, the relationship of the Commission's decision to the Canadian IROR mechanism.

The filed capital costs which are to form the basis for the Canadian IROR mechanism are specified in Annex III to the "Agreement between the United States of America and Canada on Principles Applicable to a Northern Natural Gas Pipeline." [5] These filed costs, which are to be in the denominator of the Canadian IROR mechanism's Cost Performance Ratio,[6] contain an allowance for AFUDC. Similar treatment for the sponsors of the U.S. segments requires inclusion of AFUDC in the IROR Cost Performance Ratio for the U.S. companies.

While deciding that AFUDC should be included in the Cost Performance Ratio, the Commission, as previously stated,[7] is sympathetic to the project sponsors' concerns about delays caused by the government. As specified in Order No. 17, it is the Commission's intention that the Change in Scope procedure will hold the project sponsors harmless for delays caused by the government.

In proceeding to resolve the remaining issues, the Commission observes that the consumer of gas delivered by the ANGTS shares with the project sponsors an interest in a regulatory environment that provides a fair distribution of the risks and benefits associated with the ANGTS, because of the potential impact of that environment on consumer costs. Both the project sponsors and gas consumers

[3] Oral Argument held December 21, 1978, in Docket No. RM78-12, Tr. 21.
[4] *Ibid.*, Tr. 40.
[5] This Agreement was made a part of the Decision and Report to Congress on the Alaska Natual Gas Transportation System; Executive Office of the President, Energy Policy and Planning; transmitted to the Congress under the provisions of the Alaska Natural Gas Transportation Act, September 22, 1977. The Agreement is pp. 47-83 of the *Decision*.

V 4 4 / 2 1

have a legitimate right to identify which delays and cost increases are the fault of the government and which are the fault of the project sponsors, and to hold each accountable for its actions. Thus, providing a credible, fair regulatory environment is an important to gas consumers as it is to the project sponsors. The Commission's complete IROR mechanism will contribute to such an environment.

CERTIFICATION PROCEDURES AND SCHEDULES

The Commission notes the view, expressed by counsel for the Alaskan Northwest Natural Gas Transportation Company, that

> [n]o assessment of the [impact on private financing] of the December 1 order [Order No. 17] is possible until the related issues which have been carved out for later resolution have been answered.[8]

The Commission shares this view and recognizes its role in resolving the remaining issues. Indeed, the discussion presented herein regarding certification procedures and schedule is an expression of the Commission's intention to expedite resolution of the remaining issues.

The Commission understands that putting the various pieces of the IROR mechanism in place one at a time, by means of Order No. 17, the Change in Scope procedure, and so forth, makes it somewhat difficult for the project sponsors to evaluate the overall impact of the IROR mechanism on the project as an investment proposition. In this regard, the Commission takes note of the sponsors' Joint Petition for Reconsideration and Clarification,[9] which in effect requests deferral of final Commission action on the matters addressed in Order No. 17 until more of the IROR pieces are in place.[10]

Against this request the Commission must balance Northwest Alaskan's concerns about "• • • delay and its Siamese twin, uncertainty." [11] The Commission does not anticipate that its resolution of any of the matters addressed by Order No. 17 (or by this Order) will change. Therefore, in the interest of providing some certainty about the matters which the Commission has previously addressed, and in the interest of focussing the efforts of both the Commission and other interested parties on the matters which remain to be resolved, the Commission denies the sponsors' request for reconsideration.

The Commission also understands the project sponsors' concerns that the equity support for expenditures required to develop the project to the point of filing for final certification is difficult to generate if "[t]he equity sponsors must invest their equity to find out if their equity investment is sound." [12] The Commission is willing to do what it properly can to expedite the certification process or to modify it so as to reduce risk to investors in a manner consistent with the Commission's general mandate to protect the public interest. With regard to the procedure and timetable for determining the various rates of return and the overall IROR schedule, the Commission offers the following elaboration upon its comments on this subject in Order No. 17:

1. Project company tariff/Operation Phase Rate determination: The Commission expects a report by the end of January 1979 from the Alaskan Delegate on tariff issues in the context of the risk allocation framework during the operation phase. That report should provide sufficient discussion to serve as framework for setting the Operation Phase Rate, as well as for acting on the project sponsors' proposed tariff.

Upon completion of the report, the Commission will order filing of tariff applications by a date certain for each segment of ANGTS. The Commission expects to circulate concurrently to interested parties for comment the tariff filings and the Delegate's report, then to act on the tariff filings according to an expedited schedule to be specified in the Commission's Order.

Upon approval of the project company tariff, the Commission will immediately begin a rulemaking for setting the Operation Phase Rate. The Commission will order that the filing from the project sponsors contain enough information about their intended financing plan to allow an evaluation of financial risks along with all operation phase risks.

2. Non-incentive Rate determination: The Alaskan Delegate should also report to the Commission within 30 days of issuance of this order regarding project risks during construction other than those associated with the IROR mechanism. The Commission intends to utilize this report as the basis for a rulemaking to determine the Project Risk Premium.

The Project Risk Premium added to the Operation Phase Rate comprises the Non-Incentive Rate. As the Non-Incentive Rate is used to compute AFUDC during the pre-construction period, establishing this rate should allow the project sponsors to evaluate the potential return on project development expenditures.

3. Change in Scope Procedure/Center Point/IROR Risk Premium/Marginal Rate: the Alaskan Delegate advises that these issues are strongly interrelated, and there is no obvious procedural route other than sequentially resolving them. The Commission restates its request that the Alaska Delegate work with the project sponsors to develop a schedule and procedure to resolve these matters and to report to the Commission. The Commission will then order a schedule and procedure to provide guidance to the applicants, the Commission staff, and other interested parties.

4. Certification Cost and Schedule Estimates: The Commission recognizes that certain key considerations in establishing the Certification Cost and Schedule Estimates have not yet been determined. For the Alaska segment, the principal outstanding issues are the proximity of the gas pipeline to the oil pipeline, the maximum allowable operating pressure, and application of the environmental and other technical stipulations; for Northern Border, the stipulations are the principal problem. The Alaskan Delegate advises that these matters are approaching resolution, as is the question of cost estimate formats for their submission.

The Commission also recognizes that some aspects of the cost estimates will not be known with any degree of precision prior to completion of the sponsors' project development program, some months hence. The Commission expects, however, that the changing reliability of the Certification Cost and Schedule Estimates can best be handled through the Change in Scope procedure and establishment of the Center Points for Northern Border and the Alaska segment. Accordingly, the Commission plans to order filing of the Certification Cost and Schedule Estimates no later than 60 days after resolution of the principal issues enumerated in the previous paragraph.

V. FINDINGS

(1) After reviewing the written comments and oral arguments submitted pursuant to Commission Order No. 17, the Commission finds that modification of the terms and conditions set forth in Order No. 17, which are appended to the conditional certificates of public convenience and necessity for the Alaska Natural Gas Transportation System issued by order on December 16, 1977 (Docket Nos. CP78-123, *et al.*), is not warranted.

[8] Oral Argument, Tr. 9.

[9] Joint Petition of Northern Border Pipeline Company and Alaskan Northwest Natural Gas Transportation Company for Reconsideration and Clarification, filed December 29, 1978, in Docket No. RM78-12.

[10] The present petition is being reviewed by the Commission in its discretion, since Section 10 of the Alaska Natual Gas Transportation Act (15 U.S.C. section 719(h)) makes no provision for rehearing. Our actions herein should not be construed as indicating that the standards and procedures of judicial review under the Natural Gas Act are in any way applicable to Order No. 17.

[11] Oral Argument, Tr. 7.

[12] Oral Argument, Tr. 10.

[Docket No. RP72-134]

EASTERN SHORE NATURAL GAS CO.

Adjustment to Rates and Charges

JANUARY 23, 1979.

Take notice that Eastern Shore Natural Gas Company (Eastern Shore) on January 15, 1979, tendered for filing the following revised tariff sheets:

To be Effective February 1, 1979
Ninth Revised Sheets No. 5 and No. 6
Superseding Eighth Revised Sheets No. 5 and No. 6
Ninth Revised Sheets No. 10, No. 11 and No. 12

The revised tariff sheets track a similar filing by Eastern Shore's supplier Transcontinental Gas Pipe Line Corporation (Transco).

Copies of this filing have been mailed to each of the Company's jurisdictional customers and to interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 30, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. ES78-23]

EDISON SAULT ELECTRIC CO.

Application

JANUARY 23, 1979.

Take notice that on January 15, 1979, Edison Sault Electric Company, a Michigan corporation qualified to do business in that State, with its principal business office in Sault Ste. Marie, Michigan, filed an application pursuant to Section 204 of the Federal Power Act, seeking authority to issue up to $1,300,000 of short-term notes to be issued from time to time on or before December 31, 1979, with a final maturity date not later than December 31, 1980.

The short-term debt will be used to provide interim financing for Company's construction program.

Any person desiring to be heard or to make any protests with reference to said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Washington, D. C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before February 5, 1979. The application is on file and available for public inspection.

KENNETH F. PLUMB,
Secretary.

GULF STATES UTILITIES CO.

Application

JANUARY 23, 1979.

Take notice that on January 15, 1979, Gulf States Utilities Company (Applicant) filed an application seeking an order pursuant to Section 204 of the Federal Power Act authorizing the issuance of $75,000,000 principal amount of First Mortgage Bonds, via competitive bidding. Applicant is incorporated under the laws of Texas with its principal business office at Beaumont, Texas, and is engaged in the electric utility business in portions of Louisiana and Texas. Natural gas is purchased at wholesale and distributed at retail in the City of Baton Rouge and vicinity.

The proceeds from the sale of the new securities will be used to pay off the Company's outstanding commercial paper and short-term notes previously authorized by the Commission.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 5, 1979, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N. E., Washington, D. C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). The application is on file and available for public inspection.

[Docket No. RA79-10]

MILLTOWN SKELGAS, INC.

Filing of Petition for Review Under 42 U.S.C. 7194

JANUARY 23, 1979.

Take notice that Milltown Shelgas, Inc. on December 21, 1978 filed a Petition for Review under 42 U.S.C. section 7194(b) (1977 Supp.) from an order of the Secretary of Energy, issued on November 24, 1978, denying in part, exception relief from the Mandatory Petroleum Price Regulations.

Copies of the petition for review have been served on the Secretary, Department of Energy, and all participants in prior proceedings before the Secretary.

Any person desiring to be heard with reference to such filing should on or before February 12, 1979 file a petition to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8). Any person wishing to become a party or to participate as a party must file a petition to intervene. Such petition must also be served on the parties of record in this proceeding and the Secretary of Energy through Gaynell C. Methvin, Deputy General Counsel for Enforcement, Department of Energy, 12th and Pennsylvania Ave., N.W., Washington, D.C. 20461. Copies of the petition for review are on file with the Commission and are available for public inspection at Room 1000, 825 North Capitol St., N.E., Washington, D.C. 20426.

[Docket No. RA79-5]

SABRE REFINING, INC.

Filing of Petition for Review Under 42 U.S.C. 7194

JANUARY 23, 1979.

Take notice that Sabre Refining, Inc., on January 8, 1979 filed a Petition for Review under 42 U.S.C. Section 7194(b) (1977 Supp.) from an order of the Secretary of Energy issued on November 3, 1978, denying in part, exception relief from the Mandatory Petroleum Allocation Regulations.

Copies of the petition for review have been served on the Secretary, Department of Energy.

Any person desiring to be heard with reference to such filing should on or before February 12, 1979 file a petition to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8). Any person wishing to become a party or to participate as a party must file a petition to intervene. Such petition must also be served on the parties of record in this proceeding and the Secretary of Energy through Gaynell C. Methvin, Deputy General Counsel for Enforcement, Department of Energy, 12th and Pennsylvania Ave., N.W., Washington, D.C. 20461. Copies of the petition for review are on file with the Commission and are available for public inspection at Room 1000, North Capitol St., N.E., Washington, D.C. 20426.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER 78-76]

SOUTHERN CO. SERVICES

Filing of Proposed Settlement Agreement

JANUARY 23, 1979.

Take notice that on January 11, 1979, the Southern Company Services, Inc. filed a proposed Settlement Agreement concerning settlement of the issues raised in its newly filed Amendment No. 1 to the Southern Company System Procedures Under the Intercompany Interchange Contract. Also filed were new computational and support schedules attendant to the Amendment No. 1, all for calendar year 1978. The proposed amendment was filed with the Commission on November 30, 1977.

The proposed settlement was filed with the Presiding Administrative Law Judge.

On January 12, 1979, the Presiding Administrative Law Judge certified the proposed Settlement Agreement to the Commission for its consideration and determination.

The proposed Settlement Agreement would have Southern Company Services, Inc. (SCSI) and Mississippi Power Company, Gulf Power Company, Georgia Power Company, and Alabama Power Company (Operating Companies of the Southern Company and signatories to the Intercompany Interchange Contract (IIC)) file computational and support schedules in order to incorporate in the determination of the monthly capacity rates, a rate of return on common equity of 13.25 percent for Alabama, Georgia, and Gulf Power Companies and 13.50 percent for Mississippi Power Company. Furthermore, the Operating Companies will amend the filed computational and support schedules to incorporate in the determination of the monthly capacity rates a change in the treatment of Account 281 which concerns Accelerated Amortization. This change is in accordance with the Commission's Opinion No. 12, *Minnesota Power and Light Company* (1978), and the Order Approving the Settlement Agreement in Docket No. ER77-86 (1978).

The Operating Companies will calculate the capacity payments between themselves and the Pool for 1978 at the revised monthly capacity rates shown in Exhibit No. 1 to the Settlement Agreement. All refunds will be made with interest at 9 percent per annum from the date of each monthly payment.

Any person wishing to do so may submit comments in writing concerning the proposed Settlement Agreement to the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 on or before February 12, 1979. The proposed Settlement Agreement is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-99]

TRANSCONTINENTAL GAS PIPE LINE CO.

Order Approving and Adopting Settlement

JANUARY 19, 1979.

I. SUMMARY

We here adopt the settlement resulting from an offer by Transcontinental Gas Pipe Line Company (Transco) which has been accepted by most of the parties to this proceeding. We have considered the points raised by those who object and have determined, over those objections, that the curtailment plan embodied in the settlement is equitable. We have evaluated the alternatives to the settlement and conclude that acceptance of the settlement is the course of action that most advances the public interest.

The matter is before us because of the Court's remand in *State of North Carolina* v. *FERC*, Nos. 76-2102, *et al.* (D.C. Cir. July 13, 1978) [1] of a permanent curtailment plan promulgated in October 1976 by the Federal Power Commission (FPC) for the Transco system. The Court in *State of North Carolina* directed that the actual current impact on end-use at the burner-tip be considered in the "implementation of a curtailment plan for the Transco system" [2] and required that the issuance of compensation be considered on its merits based on an adequate record. [3] Except for the compensation issue (which will be the subject of further proceedings), acceptance of the settlement ends further consideration of this remand.

The present order is the second one in this docket in as many weeks. Our order of January 4, 1979 [4] expressed the Commission's interpretation of the settlement offer with particular emphasis on the relationship of the settlement to Title IV of the Natural Gas Policy Act of 1978 (NGPA) relating to curtailment priorities. We sought the parties' further comments on the settlement as construed in the January 4, 1979 order. We required the submittal of affidavits by Transco's customers indicating the end-use impact of the proposed settlement plan. Oral argument on the settlement and the order was set for January 12. The January 4 order expressed the hope that the parties would give serious consideration to the settlement offer as a long-term resolution of the controversies over a curtailment plan for Transco's system. The comments, affidavits and oral presentation of the parties all indicate that they have done so.

The proposal we accept today was formulated by Transco, its customers, and other parties to the proceeding before us. Our acceptance is of the settlement as a whole. Except to the extent our January 4, 1979 order interpreting various provisions of the settlement may have done so, we have not modified, varied or deleted any of the terms of that proposal. Of course, as clearly stated in the January 4 order, the Commission cannot be bound by the settlement, if and to the extent, it may in the future be found to conflict with our statutory duties. We believe on the basis of the submissions and the oral argument that the Commission's interpretation of the settlement is understood and accepted by the parties.

The Commission has evaluated the settlement initiated by Transco and its customers in accordance with Section 4 of the Natural Gas Act. We have obtained considerable information about Transco's curtailment situation in the seven years that this proceeding has been ongoing before this Commission and the FPC. The settlement must be evaluated in light of the complex and unsuccessful search during that period for a resolution of the disputes among the components of the Transco system.

We have also been provided with a thorough picture of the Transco system's current gas supply and demand status. We have examined the proposed settlement, the two rounds of comments submitted by the parties in November 1978, the comments and affidavits of customers and parties submitted January 11, 1979, and the oral presentations of January 12, 1979 which provided yet further information about the proposed settlement. Our examination of these materials, consideration of the Court remand and the extensive record developed in this docket over the last seven years, leads us to conclude that the settlement constitutes a reasonable means of resolving the curtailment controversies on the Transco system.

It is in the public interest to end this long-running litigation that extends back to 1972 and our evaluation has lead us to conclude that accepting the proffered settlement is the most feasible method to achieve this result. Moreover, we think that the settlement holds the promise, together with Transco's improved supply situation, of bringing stability and certainty to Transco's curtailment situation for some time into the future.

II. SCOPE OF THIS ORDER

This order encompasses all pending curtailment matters on the Transco system with only two exceptions. [5] Included are the remand in *State of North Carolina*, the Settlement Agreement, Motions filed on August 11 and October 18, 1978 [6] and matters not finally resolved by the FPC at the time of adoption of the current plan. [7]

[1] All references herein are to the Court's July 13 slip opinion without renumbering of footnotes to reflect the one added (footnote 20, p. 21) by the *per curiam* order issued August 29, 1978. The opinion is reported in advance sheet form at 584 F.2d 1003 (December 18, 1978). The advance sheets do not reflect the August 29, 1978 amendment.

[2] *Id.* at 26.

[3] *Id.* at 31.

[4] *Transcontinental Gas Pipe Line Corporation*, Docket No. RP72-99, Order Interpreting Proposed Settlement, Requesting Comments and Setting Oral Argument (issued January 4, 1979).

[5] The first is the pending appeal in *Transcontinental Gas Pipe Line Corporation, et al., v. FERC* No. 74-2036 (D.C. Circuit). *See*, Article VIII of Settlement Agreement. The second is Docket No. RP75-51 (Investigation of Revised Curtailment Level on the System of Transcontinental Gas Pipeline Corporation). *See*, Initial Decision, June 21, 1977.

[6] The North Carolina Group (State of North Carolina and North Carolina Utilities Commission, Piedmont Natural Gas Company, Inc., Public Service Company of North Carolina, Inc., and North Carolina Natural Gas Corporation) filed with the Commission on August 11, 1978, a motion to modify Transco's curtailment plan. Numerous answers were filed in response to this motion, most of them in opposition thereto. On October 18, 1978, two members of the North Carolina Group, the State of North Carolina and North Carolina Utilities Commission, filed two motions seeking action on the remand. The first of these two motions requested that we set the second one (seeking immediate imposition of revised interim plan of curtailment) for consideration the week of October 23. We denied the first motion by order issued October 27, 1978. We now deny the remaining motions. In general, the motions argue that *State of North Carolina* mandates revision of the Opinion No. 778 plan in advance of hearing. Various candidate plans were proposed. We do not agree that change in advance of hearing is required by the Court's decision. Opinion No. 778 was remanded, not reversed. Also, one of the options urged upon us by the North Carolina Group and apparently assumed as the norm by the Court in *State of North Carolina*—pro rata or proportionate curtailment—has been affected by the passage in the interim of the NGPA. However, it is unnecessary for us to here guage the full extent of the NGPA's impact on that option. The substantial opposition registered to such a plan, particularly when contrasted with the support for the proposed settlement, indicates it is not a viable alternative in this case.

[7] The permanent curtailment plan established by the FPC in Opinion No. 778 (October 8, 1976) and Opinion No. 778-A (December 8, 1976) was based upon end-use principles and was implemented on a fixed-base period; however, since the hearing record did not reflect the same end-use profiles as ultimately selected, the FPC instituted a data verification committee (DVC) to assist in preparing a revised fixed end-use base period. A number of issues were returned to the DVC for initial examination (and were not therefore encompassed by the Court's July 13, 1978 decision). An extensive series of DVC reports and FPC and Commission orders have ensued, as well as several petitions for appellate review. The current status of these matters are as follows: Three

III. Summary of Settlement

Our January 4, 1979 order contained a detailed summary of the settlement. Accordingly, we limit our discussion here to the main features of the proposal.

The settlement contains a simple and certain method for allocating supplies. It specifies the allocation for each customer at varying supply levels. The plan will continue in effect so long as annual supplies available to the so-called large volume customers remain above 636,440 Mdt. (Article II).[8] Transco has indicated that this level will be exceeded for 1978–1979 and that it expects to stay at or above 636,440 Mdt for three to four years thereafter.[9]

The settlement proposal is designed to achieve several objectives. Transco summarized these in its November 22, 1978 submittal.

> "The 'Offer of Settlement * * * was developed as a means of allocating the available supplies on the Transco system for the next several years in a manner which protects actual high priority markets on the system without the necessity of a lenghty data collection and hearing process. One indication that the settlement will actually protect the high priority markets on the system is the fact that, as a result of a recent survey of its customers, Transco has determined that, barring some unforeseen extraordinary circumstance, the allocation procedures set forth in the settlement will enable all of its distribution customers to serve their high priority markets without the necessity of those customers acquiring emergency supplies for this coming winter. The responses of the customers in this regard have been specifically conditioned upon approval of the settlement * * *." [10]

The settlement is comprehensive. It will clear the Commission's and the D.C. Circuit's docket of matters relating to the Opinion No. 778 plan and is also designed to minimize future litigation over the effects of the NGPA by anticipating, through revised allocations, the requirements under that Act as best they can be foreseen at this time.[11] Our January 4 order endorsed this approach and provided our views thereon. No one has objected to that order.[12] We incorporate Section III of that order herein. That material is attached hereto as Appendix "A".

IV. Commission Acceptance of Settlement

A. Background

Establishment of pipeline curtailment plans has been a regulatory responsibility most of this decade. Early on, the Supreme Court in *FPC* v. *Louisiana Power & Light Co.*, 406 U.S. 621, 643 (1972) recognized the necessity for the Commission to have the latitude to make pragmatic judgments reflecting the needs arising in particular curtailment situations. The Court stated:

> "Since curtailment programs fall within the FPC's responsibilities under the head of its 'transportation' jurisdiction, the Commission must possess broad power to devise effective means to meet these responsibilities. FPC and other agencies created to protect the public interest must be free, 'within the ambit of their statutory authority, to make the pragmatic adjustments which may be called for by particular circumstances.'" (citing *FPC* v. *Natural Gas Pipe Line Co.*, 315 U.S. 575 (1942)).

Louisiana Power & Light's emphasis on pragmatism, applicable originally to selection of procedures for use in processing curtailmants, has equal application to the substantive formulation of such plans.[13] Moreover, it has been widely recognized that the Commission must be permitted some latitude to experiment in evolving just and reasonable curtailment plans, particularly when it is called upon to approve a settlement which is the product of extensive negotiations among the parties.[14] Transco is a case study in that experimentation. A number of interim plans formulated by the pipeline and its distributors on a year-to-year basis and submitted as settlements, were approved by the FPC. The exception to this process—the rejection by the FPC of a proposed interim settlement with a compensation feature—was ultimately overturned by the Court.[15] The FPC's quest for an acceptable curtailment plan for the Transco system ended in October 1976 when it promulgated the Opinion No. 778 plan as a permanent plan.

This Commission has now been advised in the *State of North Carolina* case that the Opinion No. 778 plan could not stand as a *permanent* plan unless reaffirmed, based on required end-use impact assessments and after full consideration of the compensation issue. Thus, the matter of Transco's curtailment plan was to some extent reopened on July 13, 1978 by virtue of the Court's decision. The actions which this Commission would have taken in compliance with that directive at the time of its issuance are relatively clear. In order to provide full record support for an Opinion No. 778 type end-use plan, we would have referred the matter to an Administrative Law Judge for compilation of a record to compare, based on 1977–1978 end-use data, the impacts of the Opinion 778 plan with a pro rata plan. In addition, that comparison would have included an assessment of the impacts of both types of plans assuming their operation in 1972–1973 base period. Moreover, an examination of the reasons why market profiles had changed from 1973 to 1978 would have been required. Data on changes in supplies occurring since the base period would also have been required in order to provide the Commission with all the information needed to make a current determination on the issue of treatment of full versus partial requirements customers.

State of North Carolina, alone, requires consideration of these matters. *But*, the *State of North Carolina* decision is not the only consideration that we now have before us when considering probable revisions to the Transco curtailment plan. The NGPA will affect such a plan and should be considered at this time.

We have recently considered the effects of the *State of North Carolina* decison and the NGPA in another curtailment case which, like this one, has had a long history. In *United Gas Pipe Line Company* (Opinion 32 and Opinion 32-A),[16] we determined that we had to return that case to the Judge and directed a conference of the parties in order to determine how best to proceed in light of these new judicial and statutory requirements.

We took our action in *United* reluctantly: "To continue a case that has been in process so long and so extensively is an exceedingly difficult and unhappy decision. The Commission has searched long and hard but unsuccessfully for an alternative to this decision . . ." [17] The proposed settlement now before us was developed based on Transco's and the parties' consideration of the Court's decision and the NGPA. It must therefore receive our most serious consideration as an alternative to the course we were required to follow in *United*. Our purpose is to determine whether the proposed settlement "promises to fulfill the Commission's announced objectives." [18] In the curtailment area, as highlighted by *States of North Carolina* and the NGPA, these objectives focus principally on protection of high priority end-uses. We evaluate the settlement and the limited opposition to it with special attention to this consideration.

B. Analysis

The principal opponent of the settlement as interpreted and construed by our January 4, 1979 order is Philadelphia Gas Works (PGW). It is the only party at this point to argue that continuation of the Opinion No. 778 plan with its concomitant requirement for hearings to consider the impact assessments required by the *State of North Carolina* is a superior alternative to the settlement. We have previously outlined what continuation of the Opinion No. 778 plan would involve.[19] We turn now to a consideration of the proposed settlement to see whether the basic objective of protection for high priority end-users is secured by that plan.

PGW urges that the impact assessment requirement of *State of North Carolina* [20] is applicable to the proposed settlement. We agree, but, unlike PGW, believe that the information supplied in the course of this proceeding provides a basis for making the requisite assessment. We do not contend that the impact assessment information provided by Transco's customers is necessarily of such detail as to support promulgation by this agency of a detailed end-use plan such as that represented by Opinion No. 778. However, in the context of the settlement proposal which enjoys the overwhelming support of Transco's customers, the assessment is adequate. It indicates no unacceptable impacts to any party will accrue under the proposed settlement. Moreover, it will mitigate some of the impacts urged as accruing under the existing Opinion No. 778 plan. For example, industrial plants that would cease to receive gas this winter with continuation of the Opinion No. 778 plan will now receive gas by virtue of the settlement allocations.[21]

Our assessment is tailored to the "particular circumstances" [22] of this case. The parties were in negotiations on the settlement in September–October, 1978. Transco filed its offer of settlement October 31. Because of operational concerns relating to changing Transco's curtailment plan after the winter season had commenced, Commission action was requested by November 30.[23] Our January 4, 1979 order sought to balance the need for expedition caused by these operational concerns with our perceived need for an additional round of comments by the parties on the settlement as construed and interpreted in that order.[24]

As to the impact assessment requirement, our January 4 order stated:

> "Considerable information has been submitted which addresses this concern (*e.g.*, EIA Form 50 material provided by the staff and the comments of the parties on the proposed settlement). However, additional information as to the impact of the proposed plan on end-use is desirable. *Accordingly, we are directing that each of Transco's customers file an affidavit with the Commission on this subject by January 11, 1979.* What we desire, given the brief time period allowed, is each customer's best available assessment of the plan's impact. We do not specify a rigid format. However, each affidavit must include a discussion of the distributor's ability to serve its residential, commercial and industrial customers as a result of deliveries contemplated under the settlement through October 31, 1979. Impacts such as potential shut-down of industrial facilities should also be noted." (p. 18).

Assessment affidavits were required of all Transco customers. We first consider those of the small volume customers. The affidavit registering support for the settlement submitted by the Northeast Georgia Gas Section of the Georgia Municipal Association on behalf of approximately one-half [25] of all Transco's small volume customers is representative of comments of the whole group:

> "Terms of the original settlement [in 1973] provide base date figures for the G/OG customers of TRANSCO in amounts necessary to serve their high priority customers at that time. These provisions have been extended without increase from year to year through annual settlements (and were perpetuated by Opinion No. 778). These entitlements have been adequate to serve our high priority markets in most cases with the supplement of 268 gas in some cases.
>
> This year's settlement provides relief in the exchange of entitlements between G/OG customers and provides for increases in high priority loads beyond 1979/80 provided TRANSCO's supply remains at or above 680 BCF.
>
> Lacking a settlement, all of these cities would be locked in on entitlements established in 1973 and would not permit the cities to continue fully serving existing high priority markets, nor attach any future high priority markets. Some high priority industries served would have to resort to higher priced alternate fuels or 268 gas. With the uncertainty of inflation, this could result in economic dislocations." (Affidavit, January 8, 1979.)

As stated earlier, this affidavit is representative of the view of the other members of the small volume class of customers. Accordingly, we conclude as to them that the impacts accruing under the plan are acceptable.

Similarly, none of the affidavits submitted by the large volume customers indicate that the settlement plan will jeopardize the ability of these customers to provide service to high priority needs. The only possible adverse impact noted—including that by PGW—will be the increased use of supplemental supplies by those distributors who will receive less gas under the settlement plan than under the Opinion No. 778 plan, if it were continued in effect. These impacts are offset by the statement of a number of distributors that acceptance of the settlement plan will permit them to reduce or eliminate purchases which would otherwise be required in order to continue service to high priority requirements.[26]

In terms of the impact assessment process employed in this case, the Public Service Commission of the State of New York stated:

Footnotes continued from last page

issues are in hearing: (1) Ceiling on Lost and Unaccounted for Gas, (2) Farmers Chemical Base Period Use of Gas and (3) Classification of Make-up Air Heaters. A fourth issue dealing with "intercompany transfers" was returned to us by Court order, September 22, 1978 for further examination by the DVC. A fifth category involving similar questions is the DVC report of January 30, 1978 (submitted per our Order of November 17, 1977). Some of these items (*e.g.*, items 2 and 3) may be affected by the new legislation. All five items deal with the remanded interim plan which will be superseded by the settlement plan. Acceptance of the settlement ends Commission consideration of these items. Article IX of the settlement stipulates that related Court appeals will be withdrawn.

[8] Article VI of the settlement governs allocation to small volume customers. While entitlements for this class of customers are the same for the first year as Opinion No. 778, the flexibility provisions incorporated in Article VI make the settlement attractive for members of this group. *See*, p. 6, *infra*.

[9] Transco statement filed January 9, 1979.

[10] Miller affidavit attached to Transco Answer, November 22, 1978, at p. 1. The affidavits filed on January 11, 1979 support this view.

[11] January 4, order at 13.

[12] This not to say, however, that there is no opposition to the settlement. Philadelphia Gas Works has opposed it. We deal with its objection, *infra*.

[13] The Supreme Court in *Louisiana Power & Light* emphasized the importance of the Commission utilizing: * * * each pipeline's unique knowledge of its customer's needs, ability to substitute other fuel sources, and other relevant considerations. (406 U.S. at 645).

[14] *See, e.g., Philadelphia Gas Works* v. *FPC*, 557 F.2d 840 (D.C. Cir. 1977).

[15] *Consolidated Edison* v. *FPC*, 511 F.2d 372, 381 (D.C. Cir. 1974).

[16] Docket Nos. RP71-29 *et al.* (Phase II) issued October 31, 1978, and November 2, 1978.

[17] *United*, Opinion 32, (slip opinion, p. 27).

[19] *Supra*, pp. 11–12.

[20] The Opinion 778 plan was remanded in *State of North Carolina* for the Commission to "first, *determine* and second, *consider* the impact of the opinion on ultimate users in the implementation of the curtailment plan for the Transco system." *State of North Carolina* at 26.

[21] *See*, Comments and affidavits of the Commission of Public Works of The City of Laurens, Fort Hill Natural Gas Authority, and the City of Union, South Carolina, filed January 11, 1979.

[22] *Louisiana Power & Light Co.*, *supra*, p. 10.

[23] Transco as well as the parties, by comments submitted November 13 and November 22, emphasized the necessity for prompt action if the settlement was to be viable.

[24] January 4, 1979 Order at 2.

[25] Seventeen member cities are included in the affidavit. Two of the cities are in Alabama.

[26] *See, e.g.*, City of Shelby, North Carolina (affidavit, January 8, 1979); Consolidated Edison (affidavit, January 10, 1979); Public Works of City of Laurens, South Carolina, Fort Hill Natural Gas Authority, and the City of Union, South Carolina (affidavits submitted January 11, 1979); Eastern Shore Natural Gas Company (affidavit, January 11, 1979); Lynchburg Gas Company (affidavit, January 10, 1979); City of Danville, Virginia (affidavits January 8, 1979 and October 27, 1978); Public Service Company of North Carolina, Inc. (affidavit, January 9, 1979); South Jersey Gas Company (affidavit, January 10, 1979) and Southwestern Virginia Gas Co. (affidavit, January 9, 1979). Transco's sole direct served industrial customer will also be able to reduce its emergency purchases. *See* affidavit of Owens-Corning Fiberglass Corporation dated January 11, 1979.

V 4 4 / 2 1 J A 3 0 7 9 UMI

"[T]he statements already made by Transco's customers coupled with the additional data to be provided by them and Transco pursuant to the Commission's order, constitutes in our view appropriate pragmatic compliance with the Court mandate in [*State of North Carolina*] that the Commission revaluate the current impact of any Transco curtailment plan." [37]

We agree. The process used in compiling the material for our assessment of the effects of the plan is a "pragmatic" one "called for by [the] particular circumstances" of this case, *Louisiana Power & Light*.[38] Moreover, the settlement and the result it produces are clearly consistent with the spirit of the *State of North Carolina* decision.

As to the impact of the settlement on PGW, it is true that the company will receive less gas under the settlement than it would under the Opinion No. 778 plan in its present form. However, a substantial question exists as to whether, assuming a hearing, the Opinion No. 778 plan would not be revised along the lines of the settlement.

We here quote from our January 4, 1979, order on this point (pp. 16-19):

"The Court observed that in accordance with the October 1976 tariff filing, PGW was a 'favored' customer who also has access to other pipelines supplies (besides Transco's). (footnote omitted) The Court's remand, of course, would require that we consider whether adjustments should be made in that circumstance based on an examination to determine whether

'• • • without the shift effected in the name of end use by the 778 plan, any of the five favored customers would have insufficient *pipeline* gas to serve high-priority uses which could be served by the disfavored customers absent the transfer.' (Slip Op. 24, emphasis added).

Transco, in its reply comments, provides the following information which would appear to effectively negate PGW's opposition to the settlement.

'With respect to Philadelphia Gas Works, staunch and consistent advocate of the Opinion No. 778 plan despite the fact that it has been remanded by the Court of Appeals, (footnote omitted) no contention is made by PGW that the basic allocations provided by the settlements will not permit PGW to serve fully its markets without resort to emergency gas. Indeed, as shown by the attached statement by Mr. Miller, PGW would be receiving this winter from its *pipeline* sources substantially more gas than it received last year and it is Mr. Miller's opinion that PGW will be able to serve its markets under the offer of settlement without acquiring emergency gas.' (footnote omitted) (Transco Answer at page 2, emphasis ours)."

In sum, Transco's November 22, 1978 analysis indicated PGW would be in an improved situation this winter as compared with last year, taking into account pipeline supplies currently available from both Transco and Texas Eastern. While the precise figures as to PGW's total *pipeline* supply are in conflict,[39] we find, based on our knowledge of the supply situation of Transco, Texas Eastern and PGW (as indicated in its oral presentation and affidavit) that the variance in the figures is not significant. Even assuming PGW's figures, the impact on PGW of the revised allocations incorporated in the settlement plan when compared with those under the Opinion No. 778 plan would not be material.[40] It is evident, as PGW's affidavit states, that as between the two plans, PGW will use more supplemental supplies under the settlement than it would otherwise. This impact is not unique to PGW.[41] However, other customers similarly situated to PGW now desire to have this settlement approved. We believe that their decisions, based on impacts similar to those of PGW, deserve considerable weight.[42]

We therefore accept the settlement over PGW's objection.[43] However, it should be clearly understood that we do not suggest that PGW's position is wholly without merit.[44] Rather, PGW's views must in this instance give way in order to permit adoption of an equitable alternative superior to the course PGW would have us follow.[45]

We now turn to the question of whether the settlement should be made binding on all parties to the proceeding. The settlement and our order of January 4, 1979 shall be construed as binding on all parties. In this regard, State of North Carolina and the North Carolina Utilities Commission suggested at oral argument [46] that they might have statutory duties under North Carolina statutes [47] which could come into conflict with Article VIII of the settlement, if they were bound by it. We gather, however, that such conflict does not presently exist.[48] If such a conflict should arise in the future, we request that North Carolina immediately bring the matter to our attention so that it may then be evaluated in accordance with our January 4, 1979 order which recognizes that future adjustments may be appropriate where based on "unforeseen circumstances." [49] Accordingly, the State of North Carolina and the North Carolina Utilities Commission will be bound by the settlement and the January 4, 1979 order.

As a concluding matter, we address a concern raised by some of the parties in their January 11, 1979 comments (*e.g.*, Brooklyn Union and Long Island Lighting Company) or in oral argument (Penn Gas & Water, Tr. 7009-7010). This item also deals with treatment of future requests for adjustment of the curtailment plan based on "unforeseen circumstances." [50] Brooklyn Union, for example, asks us in accepting the settlement, to clarify our January 4 order to the extent of indicating that "changes result[ing] from the voluntary relinquishment of supply by Transco customers, unjustified failure to maintain or secure non-Transco supplies or voluntary attachment of new or additional loads" [51] will not constitute an "unforseen circumstance" as that term is used in the January 4 order.

We agree the foregoing factors identified by Brooklyn Union should not serve as a basis for future adjustment of the settlement plan. Certainly, they were not within our contemplation when we issued the January 4, 1979 order indicating that requests based on "unforseen circumstances" would be considered. Rather, our concern was principally as to the scope of NGPA as ultimately determined through implementing regulations.[52]

V. Compensation

State of North Carolina remanded the matter of compensation to us for further consideration.[53] However, since we have not decided whether to examine the compensation issue through a general rulemaking [54] or by individual proceedings, we defer setting the compensation issue for hearing at this time. In this regard we would expect to rule shortly upon the appropriate procedural course to be followed.

The Commission finds and orders: The settlement offer filed by Transco October 31, 1978, as construed and interpreted by the Commission's order of January 4, 1979 in this docket, is hereby approved and adopted by the Commission in accordance with this order as a just and reasonable curtailment plan. The Commission will require that tariff sheets implementing the Settlement be filed within 10 days of the date of this order. The Commission also finds it appropriate to waive its regulations to the extent necessary to permit the tariff sheets to become effective as of November 1, 1978.

By the Commission.

Kenneth F. Plumb,
Secretary.

Appendix "A" to "Order Approving and Adopting Settlement" Issued January 19, 1979

This Appendix A is the attachment referred to at page 9 of the January 19, 1979 order and consists of a quotation from the Commission's "Order Interpreting Proposal Settlement, Requesting Comments and Setting Oral Argument" issued in this docket January 4, 1979. The part of the January 4, 1979 order here quoted is Section III dealing with Article VIII of the Settlement. That Section is as follows:

III. Article VIII of Settlement

A. Background

Brooklyn Union Gas Company (Brooklyn Union) stated in its initial comments that it considered Article VIII to be of vital importance in achieving stability for all customers on the Transco system. The Company emphasized the necessity for agreement by all *the parties* to this provision. Article VIII distinguishes between the obligations of *parties* and representations made by *customers* of Transco. As will be made clear, we believe Brooklyn Union's principal concerns should be over the representation of the customers. Because of the importance of this Article, we set it out in full.

"Article VIII

Resolution of Pending Issues and Satisfaction of High Priority Requirements

The *parties* hereto agree that, except for the compensation questions reserved in Article VII hereof and in the pending appeal in *Transcontinental Gas Pipe Line Corporation, et al.* v. *F.E.R.C.*, No. 742036 in the United States Court of Appeals for the District of Columbia Circuit, all pending curtailment issues on Transco's system in Docket No. RP7299, whether related to the court remand referred to in Article I hereof or related to outstanding Commission orders concerning issues not resolved by Opinion Nos. 778 and 778-A, shall be deemed to be resolved by this Agreement in a manner consistent with the Natural Gas Act and the Natural Gas Policy Act of 1978. In addition, all *customers* presently expect that, during the effectiveness of this Agreement, adequate supplies from Transco and other sources, including but not limited to emergency gas supplies, will permit service to all high priority consumers. Therefore, while this Agreement remains in effect under the terms of Article II hereof, the *parties* agree that no modifications of the curtailment plan embodied in this Agreement and, except for emergency relief as defined in Section 13.3 of the General Terms and Conditions of Transco's FERC Gas Tariff, no relief from the effect of the curtailment plan embodied in this Agreement shall be sought either under 2.78(b) of the Commission's General Policy and Interpretations promulgated under the Natural Gas Act or under Title IV of the Natural Gas Policy Act of 1978." (Emphasis Ours).

In sum, this provision has two components. It is intended to wipe the slate clean of all pending curtailment matters except those identified pertaining to compensation. The matters resolved by this part of Article VIII basically pertain to the Opinion 778 plan. The second aspect of this Article relates to the proposed plan and future conduct relating to it. In this latter area, the comments indicate that at least one basic purpose of the provision is to assure that the distribution companies who have received substantial additional gas under the settlement would not be able at a later date to submit requests for allocations under the NGPA which were intended to be covered by the settlement. Avoidance of a double recovery is Article VIII's aim.

The distinction made in Article VIII between parties and customers takes on significance when assessing the comments received on the proposed settlement. It appears to us that the customers about which Brooklyn Union is perhaps rightly concerned have responded in a manner consistent with the provision which states that to the extent dependent on the settlement, supplies received would be adequate to serve all high priority requirements—including those recognized under the NGPA. For example, North Carolina Natural indicated in its initial comments that the volumes allocated under the settlement agreement would be sufficient and that by utilizing its full storage capacity, it "should be able to serve under normal weather conditions its essential firm markets for both the winter periods and the annual periods, including the Farmers Chemical Association nitrogen fertilizer facility at Tunis, North Carolina." [55] On the other hand, Farmers Chemical, a party to the curtailment proceeding but not a directly-served customer of Transco, states that while it has no objection to the allocations, it is not waiving rights under the NGPA, including the right to have Trans-

---

[37] Comments of the Public Service Commission of the State of New York upon Commission Order Interpreting Proposed Settlement, dated January 10, 1979 at pp. 1-2.

[38] *Supra*, pp. 9-10.

[39] Our comparison is of volumetric information listed at Tr. 6973, 7038-39, 7060-61. A good part of this conflict dealt with Texas Eastern's supply situation. In that regard, we take official notice of the telegram sent to this Commission November 1, 1978 by Texas Eastern: "This is to advise that commencing approximately 8:00 a.m. (E.S.T.) November 2, 1978, the curtailment on Texas Eastern's system will be temporarily discontinued. The curtailment will be reinstated as circumstances require". It seems reasonably clear to us that since both Texas Eastern and Transco are enjoying improved supply situations, PGW will have more gas made available to it this year than last, notwithstanding a minor reduction to it of Transco volumes under the settlement (as compared to Opinion No. 778).

[40] *See, Pennsylvania Gas & Water Co.* v. *FPC*, 463 F. 2d 1242, 1246 (D.C. Cir. 1972).

[41] *See*, for example, affidavits of Public Service Electric and Gas Company, January 10, 1979 and Brooklyn Union, January 11, 1979.

[42] PGW has also argued that the settlement plan can not be adopted unless the existing Opinion No. 778 plan is determined to be unjust and unreasonable based on an assessment of the impacts of that plan. We disagree. The proposed plan was formulated by Transco and its customers and proposed to us for our examination to determine whether the plan is in the public interest as constituting a just and reasonable plan. The submittal is plainly in the nature of a section 4 filing. Thus the requirement for deciding whether the existing plan is unjust and unreasonable does not apply. *See, Southern Natural Gas Company* v. *FPC*, 557 F.2d 1122 (5th Cir. 1977).

[43] We are empowered to do so where we determine, based on substantial record evidence, that the settlement is just and reasonable. *Placid Oil Co.* v. *FPC*, 483 F.2d 880 (5th Cir. 1973) *Aff'd sub nom. Mobil Oil Co.* v. *FPC*, 417 U.S. 283, 313 (1974). The material recently provided by the parties to this proceeding, alone, supports the conclusion that the settlement and the curtailment plan embodied therein constitutes a reasonable means of resolving the long-standing controversies relating to curtailment on the Transco system. We also apply our experience and expertise, a significant part of which has been gained in dealing with Transco's situation, in confirming this result.

[44] This statement also applies to the earlier opposition expressed by Elizabethtown Gas Company. We do not minimize their concern nor contribution to this proceeding. Again, however, their proposal is a less attractive one than the settlement.

[45] PGW also argues that Section 605, "Conserved Natural Gas" of the Public Utility Regulatory Policies Act of 1978 operates to prevent our acceptance of the settlement. This section provides that in the event of curtailment plan revision and update based on current use, the original base period volumes will be maintained (subject to emergency allocation) where reductions in current actual use are demonstrated by the distributor to be attributable to conservation measures implemented by the distributor. Other than argue the applicability of this provision, PGW has made no attempt to show how (or to what extent) the provision would inure to its benefit. Under these circumstances and in the context of an otherwise unanimous settlement, we cannot agree that the section precludes our acceptance of the settlement.

[46] Tr. 6990.

[47] We know of no statutory responsibilities placed on North Carolina by the NGPA which would be affected by the settlement. Since we are not ourselves waiving any statutory obligations under the NGPA, we would accord similar treatment to North Carolina should it prove appropriate.

[48] The Initial Comments of State of North Carolina and North Carolina Utilities Commission filed November 13, 1978 indicate (p. 3) that their principal problem with the waiver of rights provision is its "permanent" nature. They indicate an inability to waive such rights as they may have under the NGPA "for the indefinite future."

[49] The January 11, 1979 comments of PGW (p. 2) express a reservation by PGW of its rights under the NGPA. We have made the settlement binding on all parties and thus cannot recognize this reservation. However, We do not now foreclose the possibility that PGW's present position may be one factor to be considered in the future should PGW file for adjustment under the NGPA. As stated in our January 4, 1979 Order, we would expected to do that which is "reasonable under the circumstances" (p. 12).

[50] January 4 order p. 6-13 (attached). *See* particularly, pp. 8-9, 11-13.

[51] Tr. 6969.

[52] Several of these have since been published in draft form. *See*, Notice of Proposed Rulemaking on "Interim Regulations for the Implementation of Section 401 of the Natural Gas Policy Act of 1978", Docket No. RM79-13; issued January 10, 1979; and "Proposed Regulation for the Implementation of Section 401 of the NGPA of 1978", Docket No. RM79-15. issued January 12, 1979.

[53] PGW has raised an objection to that portion of the settlement largely excluding compensation from its operation (Initial Comments, p. 6) on grounds that this issue should not be severed from consideration of volumetric allocations. However, as in the case of other PGW objections, we feel that the benefits of the alternative presented by the settlement proposal outweigh the detriment PGW outlines.

[54] *See*, Preliminary Notice of Proposed Rulemaking, Docket No. RM78-4, issued November 20, 1977. *See also, El Paso Natural Gas Company*, Order Denying In Part And Granting In Part Application For Rehearing, January 13, 1978 at p. 6.

[55] Initial Comments, North Carolina Natural Corporation, November 13, 1978, at 1.

V 4 4 / 2 1

co's allocations to conform with the new law.[16] But Farmers Chemical's assertion as to reservation of right under the NGPA is immaterial since its supplier, North Carolina Natural, has indicated that it will have adequate supplies to meet Farmers Chemical's requirements.

North Carolina Natural, Public Service Company of North Carolina and Piedmont, however, do express a reservation about one aspect of Article VIII. Fundamentally, they note that the proposed plan could become a *de facto* permanent plan if Transco's future supplies continue as projected. They urge a limit on the time during which the plan would be impervious to change based on the NGPA. In addition, they suggest that it should not serve as a bar if circumstances arise which were not reasonably foreseeable. But all state, in essence, that it is not their desire that Article VIII be abolished or that its basic intent be distorted. Piedmont, for example, states that it "agrees that the allocations in the settlement Agreement should be considered permanent except in the event of circumstances not presently reasonably foreseeable."[18] We think that these are reasonable, responsible requests. We believe our interpretation of Article VIII and its relation to the NGPA adequately recognizes these concerns without sacrificing the benefits of certainty and stability which would otherwise accrue under the settlement.

One party who is not a customer—the State of North Carolina and the North Carolina Utilities Commission (filing jointly)—takes exception to Article VIII. This exception is mitigated somewhat by the statement that North Carolina is unable to waive for the *indefinite future*, whatever rights may be granted to it by the new statutes (referring to NGPA). We respect North Carolina's views as a representative of the ultimate consumer in the State of North Carolina. We are not certain, however, that North Carolina's reservation is material in a light of the comments by distributors in the State of North Carolina who, as customers of Transco, offer representations more nearly in compliance with the spirit of Article VIII."

The views of another party—also not a customer—are pertinent. The New York Public Service Commission, by reply comments supporting the settlement, states:

"We recognize that a number of parties otherwise supporting or not objecting to the Transco proposal have raised questions or caveats with respect to Article VIII. Since New York supports the Article as a necessary and integral part of any settlement, we wish to set forth our views thereon. We do not read Article VIII as binding upon the Commission in the event it determines that regulations adopted pursuant to Section 401-403 of the NGPA require modifications to an effective curtailment plan. We do understand Article VIII to reflect the understanding of the parties that the Transco plan was drafted in the light of the provisions of the NGPA and that accordingly they will not initiate action to upset the plan on grounds that they might be entitled to additional gas from Transco under such general regulations as may be prescribed under the new Act. We can understand that, as indicated in the Piedmont comments, circumstances not presently reasonably foreseeable might arise during the period in which the settlement is in operation which might justify a petition to reopen the proceeding. But there obviously is no settlement if those parties securing significant immediate benefits in terms of additional gas could within a year or so demand more on the basis of the regulations adopted pursuant to the NGPA." (Comments p. 2-3)

We believe the standards set forth below for dealing with NGPA requests post-settlement are generally consistent with the views expressed by the New York Public Service Commission.

B. Article VIII and NGPA

We start with the fundamental assumption that, as between the parties, the waiver of rights provision of Article VIII may be given effect.[19] As to its application to this agency, we make clear at this point that we would not be bound by Article VIII, if (and to the extent) we are in the future presented with the situation where performance of our statutory duties (under either the Natural Gas Act or the National Energy Act) is found to conflict with this provision. Most, if not all the parties, appear to recognize that this must be the case.

The NGPA and other legislative initiatives constituting the National Energy Act are newly enacted and their full effect cannot be reasonably foreseen at this time. In the curtailment area, the relevant provisions of the NGPA are contained in Sections 401 and 402. Implementation of Section 402 (industrial process gas) will require substantial end use information which is not now uniformly available on an updated basis. It thus is not of immediate concern.

Implementation of Section 401, however, must be accomplished to the maximum extent practicable not later than 120 days [19] after the date of enactment of the NGPA. At that time, it will be necessary to consider whether the then existing curtailment plans of interstate pipelines can adequately protect essential agricultural users from curtailment. Under these circumstances, we cannot now say whether the deliveries under the subject settlement would meet all the ultimate requirements of Section 401. However, it would be the Commission's intent to fully consider the impact on this settlement in implementing Section 401 for Transco's customers. In other words, we would attempt to maintain the integrity of the settlement to the extent reasonable under the circumstances.[20]

For example, in the case of a customer [21] who indicated acquiescence in Article VIII but later sought modification based on the NGPA, such a request would be examined, assuming it complied with the basic provisions of the NGPA such as Title IV, to determine whether a double recovery was being sought by the customer.[22] In this instance, a customer's representation by comments submitted in this proceeding would be measured against those contained in the application. A full explanation of any discrepancies would be required.

We believe the views we have expressed are consistent with NGPA requirements. That Act will, of course, affect curtailment plans. However, it does not require that adjustments be blindly made, but rather "to the maximum extent practicable." [23] The settlement proposal is consistent with this concept to the extent it anticipates requirements under the NGPA (as best they can be foreseen at this time) and provides for modification of the existing Opinion No. 778 plan at this time.

[FR Doc. 79-3019 Filed 1-29-79; 8:45 am]

---

[16] Comments of Farmers Chemical Association, Inc., November 13, 1978, at 1.

[17] Initial Comments of Piedmont Natural Gas Company, Inc., November 13, 1978, at 1.

[18] There *may* be an exception. The sole entity, who is both a customer and a party, to register unqualified opposition to Article is the City of Danville, Virginia. Danville in *its initial comments* stated: "Danville supports the settlement plan with the following qualifications. The allocated volumes are not sufficient to serve the City's high priority markets, but at least the allocations are better than under the Opinion 778 plan. We cannot possibly agree, as Article VIII requires, to waive any right of the City has under law, i.e., the Natural Gas Policy Act of 1978." (Comments of the City of Danville, Virginia, filed November 14, 1978, at p. 4.) Transco, by reply, states that "The winter and annual allocations to the City of Danville in the first year, when combined with the available supplies of gas under FPC Order No. 533 and FERC Order No. 2 will provide more than enough gas for Danville to serve its residential and commercial customers and industrial customers utilizing natural gas for feedstock, process and plant protection purposes." Transco, (Miller Affidavit at p. 3.) Danville received 2697 Mdt in 1977-1978. Under Opinion 778, in 1978-1979, they would receive 3179 Mdt; under the settlement they will receive 4167 Mdt. It is thus clear Danville will receive a significant increase under the settlement relative to its size. The question of possible additional allocations may be moot since Danville in Reply Comments filed November 24, 1978 states:

"Apparently some parties were concerned that Danville's reservation about Article VIII indicated acceptance of the curtailment plan's volumes, along with an intent to see additional volumes because of rights under the [NGPA]. In clarification, Danville's reservation on Article VIII simply means that the Commission cannot be prohibited by a settlement agreement among Transco's customers from carrying out its responsibilities under the Natural Gas Act, the [NGPA] or any other law.

"* * * Danville continues to support the settlement agreement as a long-term plan * * *" (Reply Comments, pp. 1-2)

[19] Some elements of Article VIII are analogous to provisions which have previously been approved by this Commission. For example, the settlement in *Southern Natural*, Opinion No. 5, Opinion And Order Approving Settlement Describing Permanent Curtailment Plan, Docket No. RP 74-6 *et al.* (November 17, 1977) approved a provision which provides that plan may not be contested for a period of two years. (Slip Op. at 22).

[19] Proposed regulations dealing with § 401 will issue very shortly.

[20] At the same time, proponents of Article VIII must recognize that the settlement would not be considered to be inviolate. In the past, the FPC and this Commission have attempted to recognize unique load characteristics, customer blend and operating requirements of individual pipelines in the formulation of curtailment plans. In promulgating rules for the implementation of Title IV of the NGPA, the Commission will continue to adhere to that policy. Indeed, Section 502(c) of the NGPA contemplates such exceptions to our rules "as may be necessary to prevent special hardship, inequity, or on an unfair distribution of burdens."

[21] We assume ultimate consumers who are neither parties nor customers would not be directly affected by the provision. It does not bar such rights as they may have under the NGPA, but rather appears to re-direct them, at least in the first instance, to the distributor-customer.

[22] Transco's Answer also includes this pertinent statement: "If the Commission should approve the settlement embodied in the offer, it would be the intent of Transco to strive to protect the integrity of this settlement, including the provisions of Article VIII, based upon circumstances existing at the present time and reasonably foreseeable for the future. While we would not expect the Commission to attempt to waive any of

Footnotes continued on next page

Footnotes continued from last page

its statutory responsibilities and while it is always possible that unforeseen changed circumstances could intervene Transco would expect that any private party and any state and local governmental body would have an extremely heavy burden of persuasion if such party accepts the present fruits of the settlement and later attempts to overcome any essential feature of the settlement." (*Id.* p. 3-4) The standard announced above in the text of this order should not necessarily be equated with that of "an extremely heavy burden of persuasion." However, the Commission would accommodate the settlement solution where possible.

[23] NGPA sections 401-402. *See also*, H. R. Rep. No. 95-1752, 95th Cong., 2d Sess. 112-115 (October 19, 1978).

Economic Regulatory Administration

[Docket Nos. ERA-R-77-3 and ERA-R-77-7]

FINAL ENVIRONMENTAL IMPACT STATEMENT CONCERNING MOTOR GASOLINE DEREGULATION AND AN AMENDMENT TO THE MANDATORY PETROLEUM PRICE REGULATIONS ALLOWING REFINERS TO ALLOCATE INCREASED COSTS TO GASOLINE (THE GASOLINE "TILT").

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Availability of Final Environmental Impact Statement.

SUMMARY: The Economic Regulatory Administration of the Department of Energy announces the availability of a final environmental impact statement (EIS) on the pending proposals to deregulate motor gasoline and to amend the Mandatory Petroleum Price Regulations to allow refiners to allocate increased costs to gasoline (the gasoline "tilt").

FOR FURTHER INFORMATION CONTACT:

William E. Caldwell (Economic Regulatory Administration), Department of Energy, 2000 M Street, Room 2304, Washington, D.C. 20461, (202) 254-8034.

William L. Webb (Media Relations), Department of Energy, 2000 M Street, N.W., Room B-110, Washington, D.C. 20461, (202) 634-2170.

Robert J. Stern, NEPA Affairs Division, Department of Energy, 20 Massachusetts Avenue, Washington, D.C. 20545, (202) 376-5998.

J. Thomas Wolfe (Office of General Counsel), Department of Energy, 20 Massachusetts Avenue, Room 8217, Washington, D.C. 20545.

SUPPLEMENTARY INFORMATION

I. Background

On November 17, 1978, DOE issued a notice of availability of a "Draft Environmental Impact Statement: Motor Gasoline Deregulation" (43 F.R. 54125, November 20, 1978). On December 5, 1978, DOE issued a notice of availability of a draft environmental impact statement on an amendment to the Mandatory Petroleum Price Regulations allowing refiners to allocate increased costs to gasoline (the gasoline "tilt") (43 F.R. 57609, December 8, 1978). Each of these two notices referred to the same EIS, which considers both the gasoline tilt and deregulation proposals. DOE held a public hearing on this draft EIS on December 19, 1978, and received written comments thereafter. In accordance with the provisions of the National Environmental Policy Act, DOE has considered all the comments received on the draft EIS, and has prepared a final EIS which addresses the environmental consequences that may result from the gasoline tilt and motor gasoline deregulation, and their reasonably available alternatives.

II. Availability of Final EIS

Copies of the final environmental impact statement can be obtained from ERA's Office of Public Information, Room B-110, 2000 M Street, N.W., Washington, D.C. 20461, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. In addition, copies are available for public review in the DOE Freedom of Information Reading Room, GA-152, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585. Copies have been provided to the Environmental Protection Agency, other interested Federal agencies, State Clearinghouses, persons who commented on the draft EIS, and others known to be interested in the final EIS.

Issued in Washington, D.C. January 29, 1979.

David J. Bardin,
Administrator,
Economic Regulatory Administration.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1048-1]

ADMINISTRATOR'S TOXIC SUBSTANCES ADVISORY COMMITTEE

Meeting

AGENCY: Environmental Protection Agency.

ACTION: Notice of Open Meeting.

SUMMARY: There will be a meeting of the Administrator's Toxic Substances Advisory Committee from 9:00 a.m. to 5:00 p.m. on Friday, February 16, 1979. The meeting will be held in Room 3906, Waterside Mall, EPA, 401 M Street, SW., Washington, D.C. and will be open to the public.

FOR FURTHER INFORMATION CONTACT:

Ms. Susan Vogt, Executive Secretary Administrator's Toxic Substances Advisory Committee, Office of Toxic Substances (TS-793), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Telephone: (202) 426-7861.

SUPPLEMENTAL INFORMATION: The purpose of this meeting is to discuss matters related to EPA's implementation of the Toxic Substances Control Act (Pub. L. 94-469). The agenda includes:

1. EPA procedures concerning risk assessment
2. Proposed Section 5 Premanufacture Notification rules
3. Draft EPA Guidance for Premanufacture Testing
4. Other matters concerning the implementation of the Toxic Substances Control Act

The meeting will be open to the public and time will be set aside for public comments. Any member of the public wishing to present an oral or written statement should contact Ms. Susan Vogt at the address or phone number listed above.

Dated: January 24, 1979.

Steven D. Jellinek,
Assistant Administrator for Toxic Substances.

FEDERAL COMMUNICATIONS COMMISSION

RADIO TECHNICAL COMMISSION FOR MARINE SERVICES

Meetings

In accordance with Pub. L. 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

EXECUTIVE COMMITTEE MEETING

The next Executive Committee Meeting will be on Thursday, February 15, 1979, 9:30 a.m. in Conference Room 7200, Nassif Building, 400 Seventh Street, S.W. (at D Street), Washington, D.C.

AGENDA

1. Call to Order.
2. Administrative Matters.
3. Acceptance of FY-79 First Quarter Financial Statement.
4. New business.

SPECIAL COMMITTEE No. 73

"Minimum Performance Standards (MPS) Marine Omega Receiving Equipment"

Notice of 5th Meeting, Thursday, February 22, 1979—9:30 a.m., Conference Room 7200, Nassif (DOT) Building, 400 Seventh St., S.W. (at D Street), Washington, D.C.

AGENDA

1. Call to Order; Chairman's Report.
2. Administrative Matters.
3. Reports of Working Groups.
4. Reviews of draft MPS

M. H. Carpenter, Co-Chairman, CDR T. P. Nolan, Co-Chairman, Maritime Institute of Technology & Graduate Studies, Linthicum Heights, Maryland 21090, Phone: (301) 636-5700.

SPECIAL COMMITTEE No. 71

"VHF Automated Radiotelephone Systems"

Notice of 15th Meeting, Tuesday, February 27, 1979—10:00 a.m. (Full day meeting), Conference Room A-110, F.C.C. Annex, 1229-20th Street, N.W., Washington, D.C.

AGENDA

1. Call to Order.
2. Administrative Matters.
3. Review of Digital Selcall Functions and Formats.
4. Discussions of cost elements for Selcall base Automated Radiotelephone Systems.
5. U.S. Coast Guard presentation of safety-related requirements to be served in an automated VHF/UHF system.

John J. Renner, Chairman SC-71, Advanced Technology Systems, Inc., 3426 N. Washington Blvd., Arlington, VA. 22201, Phone: (703) 525-2664.

SPECIAL COMMITTEE No. 74

"Digital Selective Calling"

Notice of 2nd Meeting, Wednesday, February 28, 1979—9:30 a.m., Conference Room 7200, Nassif (DOT) Building, 400 Seventh St., S.W. (at D Street), Washington, D.C.

AGENDA

1. Committee organization.
2. Establishment of Working Group goals.
3. Review of timetable.

Captain B. F. Hollingsworth, Chairman, SC—74, U.S. Coast Guard Headquarters, Washington, D.C., Phone: (202) 426-1345.

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. All RTCM meetings are open to the public. Written statements are perferred, but by previous arrangement, oral presentations will be permitted within time and space limitations.

Those desiring additional information concerning the above meeting(s) may contact either the designated chairman or the RTCM Secretariat (phone: (202) 632-6490).

FEDERAL COMMUNICATIONS COMMISSION,

FEDERAL HOME LOAN BANK BOARD

[No. 79-60]

FEDERAL SAVINGS AND LOAN ADVISORY COUNCIL

Renewal of Charter

Pursuant to the provisions of Section 8a of the Federal Home Loan Bank Act, as amended (12 U.S.C. 1428a), the following notice has been adopted by the Federal Home Loan Bank Board for publication in the FEDERAL REGISTER:

Pursuant to the provisions of Section 9 of the Federal Advisory Committee Act (5 U.S.C. App. I), and the implementing regulations issued by the Office of Management and Budget, the Federal Home Loan Bank Board, having determined, that the continuation of the Federal Savings and Loan Advisory Council is in the public interest in connection with the performance of the duties imposed on it by law, hereby renews the existence of the Federal Savings and Loan Advisory Council for two years to January 31, 1981, and in connection therewith reissues the following charter (which appears as Section 8a of the Federal Home Loan Bank Act, as amended (12 U.S.C. 1428a)) to the said Council:

FEDERAL SAVINGS AND LOAN ADVISORY COUNCIL

CHARTER

There is hereby created a Federal Savings and Loan Advisory Council, which shall continue to exist as long as the Bank Board biannually determines, as a matter of formal record, with timely notice in the FEDERAL REGISTER, to be in the public interest in connection with the performance of duties imposed on the Council by law. The Council shall, in all other respects, be subject to the provisions of the Federal Advisory Committee Act. The Council shall consist of one member for each Federal Home Loan Bank district to be elected annually by the Board of directors of the Federal Home Loan Bank in such district and twelve members to be appointed annually by the Bank Board to represent the public interest. Each such elected member shall be a resident of the district for which he is elected. All members of the Council shall serve without compensation, but shall be entitled to reimbursement from the Bank Board for actual subsistence expenses, not to exceed $50.00 per day and transportation and other incidental travel expenses in accordance with the Federal Travel Regulation, as amended. The Council shall meet in Washington, District of Columbia, at least twice a year and oftener if requested by the Bank Board. The Council may select its chairman, vice chairman, and secretary, and adopt methods of procedure, and shall have power—

(1) To confer with the Bank Board on general business conditions, and on special conditions affecting the Federal Home Loan Banks and their members and the Federal Savings and Loan Insurance Corporation.

(2) To request information, and to make recommendations, with respect to matters within the jurisdiction of the Bank Board and the Federal Savings and Loan Insurance Corporation.

The Federal Home Loan Bank Board also has directed, in connection with the foregoing, that—

1. The Federal Savings and Loan Advisory Council's estimated budget of $46,000 shall be paid for by the self-supporting Federal Home Loan Bank System, and none of its annual operating costs shall be charged to or paid by the United States;

2. The said Charter of the Federal Advisory Council shall not be amended, altered, or repealed except by Congress or by the Federal Home Loan Bank Board; and

3. The said Charter shall terminate on January 31, 1981, unless reissued prior to that date by the Federal Home Loan Bank Board.

THE SAVINGS AND LOAN ADVISORY COUNCIL,
J. J. FINN,
Executive Secretary.
THE FEDERAL HOME LOAN BANK BOARD,
RONALD A. SNIDER,
Assistant Secretary.

FEDERAL MARITIME COMMISSION

PRIVACY ACT OF 1974

System of Records

Notice is hereby given that the Federal Maritime Commission pursuant to 5 U.S.C. 552a(e)(4) and (11) of the Privacy Act of 1974 (Pub. L. 93-579), proposes to adopt the following additional notice of system of records.

Interested parties may participate in this proceeding by filing with the Secretary, Federal Maritime Commission, 1100 L Street, N.W., Washington, D.C. 20573 on or before February 19, 1979 an original and 15 copies of their views and comments pertaining to the routine use portion of the notice. All suggestions for changes in the text should be accompanied by drafts of the language thought necessary to accomplish the desired changes and should be accompanied by supportive statements and arguments. If no comments are received on or before March 1, 1979, the routine uses described herein will be adopted as proposed by the Commission.

FRANCIS C. HURNEY,
Secretary.

FMC-22

System name:

Investigatory Files—FMC.

System location:

Bureau of Enforcement, FMC, 1100 L Street, N.W., Washington, D.C. 20573. Records may also be located at the FMC District Offices listed in the Appendix.

Categories of individuals covered by the system:

Records may be maintained on individuals involved in investigations and enforcement actions instituted by the Federal Maritime Commission. These individuals could include employees, owners, officers and directors of steamship companies, ocean freight forwarders, shippers, consignees, brokers and other entities associated with ocean transportation. Included would be individuals alleged to have violated the Shipping Act, 1916; the Intercoastal Shipping Act, 1933; the Federal Water Pollution Control Act, 1972; the Trans-Alaska Pipeline Authorization Act, 1973; and Public Law 89-777, insofar as they relate to certification; and regulations and/or orders of the Commission. Also included would be individual applicants routinely investigated in connection with licenses and certificates issued by the FMC pursuant to its statutory authority.

Categories of records in the system:

Reports from law enforcement or investigative agencies, investigators, or sources of information; investigative and intelligence data; documented violations; warning letters and information regarding applications for certification and licensing, if appropriate. Includes any information on alleged or proven violators of the statutes or parts thereof over which the FMC has jurisdiction.

Routine uses of records maintained in the system, including categories of users and purposes of such uses:

1. In the event that a system of records maintained by the FMC to carry out its functions indicates a violation or potential violation of law or contract, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by rule, regulation, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

2. A record from this system of records may be disclosed, as a routine use, to a Federal, State or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to an FMC decision concerning the assignment, hiring or retention of an individual, the issuance of a security clearance, or the issuance of a license, grant or other benefit.

3. A record from this system of records may be disclosed, as a routine use, to a Federal, State, local or international agency, in response to its request, in connection with the assignment, hiring or retention of an individual, the issuance of a security clearance, the reporting of an investigation of an individual, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

4. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court magistrate or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.

5. A record in this system of records may be disclosed, as a routine use to either House of Congress, or, to the extent of matter within its jurisdiction, any committee or subcommittee thereof, any joint committee of Congress or subcommittee of such joint committee.

6. A record in this system of records may be disclosed, as a routine use, to the Department of Justice in connection with determining whether disclosure thereof is required by the Freedom of Information Act (5 U.S.C. 552).

7. A record in this system may be transferred, as a routine use, to the Civil Service Commission: for personnel research purposes; as a data source for management information; for the production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained; or for related manpower studies.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are maintained in paper form in filing cabinets.

Retrievability:

Information filed by case of subject file. Records pertaining to individuals are accessed by reference to the Bureau of Enforcement's name—relationship index system.

Safeguards:

Records are located in locked metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access. Files are maintained in buildings that have 24 hour security guards.

Retention and disposal:

Retained for a reasonable period of time. Disposition is recorded.

System manager and address:

Director, Bureau of Enforcement, Federal Maritime Commission, 1100 L Street, N.W., Washington, D.C. 20573.

Record access procedures:

Persons wishing to obtain information on the procedures for gaining access to records, contesting the contents of these records, or appealing initial determinations, may contact or address their inquiries to: Privacy Act Officer, Federal Maritime Commission, 1100 L Street, N.W., Washington, D.C. 20573.

Contesting record procedures:

See record access procedures above.

Record source categories:

Individual shippers, carriers, freight forwarders, those authorized by the individual to furnish information, trade sources, investigative agencies,

V 4 4 / 2 1 J A 3 0 7 9 UMI

investigative personnel of the Bureau of Enforcement and other sources of information.

APPENDIX

Atlantic District, Federal Maritime Commission, 6 World Trade Center, Suite 614, New York, New York 10048.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 78N-0339; DESI 50205]

DRUG AND HUMAN USE: DRUG EFFICACY STUDY IMPLEMENTATION

Otic Preparation Containing Chloramphenicol

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: This notice announces that chloramphenicol otic solution is effective for the indication described below.

EFFECTIVE DATE: January 30, 1979.

ADDRESS: Communications forwarded in response to this notice should be identified with the reference number DESI 50205, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville MD 20857.

Amendments (identify with NDA number): Division of Anti-Infective Drug Products (HFD-140), Rm. 12B-45, Bureau of Drugs.

Requests for opinion regarding the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD-501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

William R. Durbin, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice (DESI 50205) published in the FEDERAL REGISTER of August 19, 1971 (36 FR 16130), the Commissioner of Food and Drugs announced his conclusions pursuant to evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drug:

NDA 50-205; Chloromycetin Otic containing chloramphenicol and benzocaine; Parke, Davis & Co., Joseph Campau at the River, Detroit, MI 48232.

The notice stated that the drug was possibly effective for the treatment of superficial bacterial infections of the external ear. Parke Davis later amended its new drug application to provide for a reformulated single-ingredient product containing chloramphenicol. The amendment was approved on May 16, 1975.

Based upon a review of all available evidence, the Director of the Bureau of Drugs concludes that this drug is safe and effective for the indications set forth below. Elsewhere in this issue of the FEDERAL REGISTER the agency is amending 21 CFR 455.410 to provide for the reformulated product. Batches of drugs for which certification is requested should provide for labeling containing the following Indications section:

Chloramphenicol otic is indicated for the treatment of superficial infections of the external auditory canal caused by susceptible strains of various gram-positive and gram-negative organisms including:

Staphylococcus aureus, Escherichia coli, Haemophilus influenzae, Pseudomonas aeruginosa, Aerobacter aerogenes, Klebsiella pneumoniae and Proteus speices.

Deeper infections should be treated with appropriate systemic antibiotics.

Batches of such drugs with labeling bearing indications other than those published in this announcement are no longer acceptable for certification or release.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 507, 52 Stat. 1050-1051 as amended, 59 Stat. 463 as amended (21 U.S.C. 352, 357)) and under authority delegated to the Director of the Bureau of Drugs (21 CFR 5.70)

Dated: November 10, 1978.

J. RICHARD CROUT,
Director, Bureau of Drugs.

[FR Doc. 79-2894 Filed 1-29-79; 8:45 am]

[4110-03-M]

[Docket No. 78N-0340]

DRUGS FOR HUMAN USE; DRUG EFFICACY STUDY IMPLEMENTATION

Revocation of Exemption for Continued Marketing of Otic Combinations

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is revoking the temporary exemption under which certain combination otic solutions and suspensions have been allowed to remain on the market, labeled for their less-than-effective indications, beyond the time limit established for implementation of the Drug Efficacy Study. The exemptions are no longer needed as the effectiveness classifications of these products have now been resolved.

EFFECTIVE DATE: January 30, 1979.

FOR FURTHER INFORMATION CONTACT:

William R. Durbin, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a final rule, appearing elsewhere in this issue of the FEDERAL REGISTER, FDA is revoking provisions for the certification or release of certain combination otic solutions and suspensions. These drugs, described below, have been allowed to remain on the market beyond the time limit established for implementation of the Drug Efficacy Study on the condition that manufacturers undertake additional clinical studies to determine their effectiveness. The temporary exemption to permit continued marketing was announced in a notice published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623). One sponsor, Burroughs Wellcome, submitted numerous testimonial letters about its products. The submissions provided no evidence that adequate and well-controlled studies as described in 21 CFR 314.111(a)(5)(ii) and 21 CFR 300.50 had been conducted. Isolated case reports, random experience, and reports lacking the details that permit scientific evaluation cannot be considered (21 CFR 314.111(a)(5)(ii)(c)). The submissions therefore did not support the efficacy of the firm's products. Since no other person has submitted additional data, or conducted the necessary studies, the exemption granted by the December 14, 1972 notice is hereby revoked for the following combination otic solutions and suspensions in Category IV.

1. DESI 8426 published October 23, 1971 (36 FR 20546).

NDA 60-756; Aerosporin Otic Solution containing polymyxin B sulfate, acetic acid, and propylene glycol; Burroughs Wellcome & Co., Inc., 3030 Cornwallis Rd., Research Triangle Park, NC 27709.

2. DESI 8674 published June 29, 1972 (37 FR 12855).

NDA 50-208; Neomycin-Polymyxin Otic with Hydrocortisone and Diperodon containing neomycin sulfate, polymyxin B sulfate, hydrocortisone, and diperodon hydrochloride, Kasco Laboratories, Inc., Cantiague Rd., Hicksville, NY 11802.

NDA 50-224; Neo-Polycin Otic Suspension containing neomycin sulfate, polymyxin B sulfate and dyclonine hydrochloride; Dow Pharmaceuticals, Division Dow Chemical Co., P.O. Box 68511, Indianapolis, IN 46268.

NDA 50-225; Neo-Polycin HC Otic Suspension containing neomycin sulfate, polymyxin B sulfate, dyclonine hydrochloride and hydrocortisone acetate; Dow Pharmaceuticals.

NDA 60-080; Auracort Otic Solution containing neomycin sulfate, polymyxin B sulfate, pramoxine hydrochloride and hydrocortisone; Philips Roxane Laboratories, Division of Philips Roxane, Inc., 330 Oak St., P.O. Box 1738, Columbus, OH 43216.

NDA 60-787; 61-669; Bro-Parin Sterile Otic Suspension containing polymyxin B sulfate, neomycin sulfate, sodium heparin, and hydrocortisone; Riker Laboratories, Inc., Subsidiary 3M Co., 19901 Nordhoff St., Northridge, CA 91324.

NDA 60-927; Florotic Otic Suspension containing nystatin, neomycin sulfate, polymyxin B sulfate, and fluorocortisone acetate; E. R. Squibb, P.O. Box 400, Princeton, NJ 08540.

3. DESI 50171 published August 19, 1971 (36 FR 16129).

NDA 50-171; Lidosporin Otic Solution containing polymyxin B sulfate, lidocaine hydrochloride, and propylene glycol; Burroughs Wellcome & Co., Inc.

4. DESI 50205 published August 19, 1971 (36 FR 16130).

NDA 50-205; that part pertaining to Chloromycetin Otic containing chloramphenicol and benzocaine; Parke, Davis & Co., GPO Box 118, Joseph Campau at the River, Detroit, MI 48232.

In addition to the drugs named above, some of the DESI notices referred to other products in this exempt category that have been either reclassified as effective or withdrawn from the market as follows: VoSol Otic Solution (NDA 12-179) and VoSol *HC* Otic Solution (NDA 12-770) were reclassified as effective for certain indications in a notice (DESI 12179) published in the FEDERAL REGISTER of July 19, 1974 (39 FR 26462). Coly-Mycin S Otic (NDA 50-356), Cor-Otic PN Ear Drops (NDA 90-263), Cortisporin Otic Drops (NDA 60-613), Pyocidin Otic Drops (NDA 61-606) and Cortomixin Sterile Ear Drops (NDA 60-719) were reclassified as effective for certain indications in a notice (DESI 8674) published in the FEDERAL REGISTER of August 9, 1973 (38 FR 21513). Revocation of provisions for certification or release of Achromycin Ear Solution (NDA 50-275) and Terramycin-Polymyxin Otic Powder (NDA 61-087) was published in the FEDERAL REGISTER of September 19, 1974 (39 FR 33665). The combination of neomycin-polymyxin (neomycin sulfate and polymyxin B sulfate) has never been approved for marketing. Reformulated Chloromycetin Otic (NDA 50-205) is classified as effective in a notice appearing elsewhere in this issue of the FEDERAL REGISTER.

Inasmuch as the temporary exemption for the products is no longer relevant, it is hereby revoked. Accordingly, the December 14, 1972 notice is amended by deleting the following section:

IV. COMBINATION OTIC SOLUTIONS OR SUSPENSIONS

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 505, 701, 52 Stat. 1052-1053 as amended, 1055-1056 as amended (21 U.S.C. 355, 371)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1).

Dated: January 23, 1979.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-2893 Filed 1-29-79; 8:45 am]

[4110-03-M]

[Docket No. 78N-0382]

ETHICON, INC.

Premarket Approval of Ethilon/Nurolone Nylon (Nonabsorbable) Surgical Sutures

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces its approval of the application for premarket approval under the Medical Device amendments of 1976 of Ethilon/Nurolone Nylon (Nonabsorbable) Surgical Sutures sponsored by Ethicon, Inc., Somerville, NJ. After reviewing the General and Plastic Surgery Device Classification Panel's recommendation, FDA notified the sponsor that the application was approved because the device had been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by March 1, 1979.

ADDRESS: Requests for copies of the summary of safety and effectiveness data and petitions for administrative review may be addressed to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Keith Lusted, Bureau of Medical Devices (HFK-402), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7550.

SUPPLEMENTARY INFORMATION: The sponsor, Ethicon, Inc., Somerville, NJ submitted an abbreviated new drug application (ANDA) for premarket approval of Ethilon/Nurolone Nylon (Nonabsorbable) Surgical Sutures to FDA on August 19, 1976. The application was reviewed by the General and Plastic Surgery Device Classification Panel, an FDA advisory committee, which recommended approval of the application. On July 10, 1978, FDA approved the application by a letter to the sponsor from the Director of the Bureau of Medical Devices.

Before enactment of the Medical Device Amendments of 1976 (the amendments) (Pub. L. 94-295, 90 Stat. 540-574), nonabsorbable surgical sutures (nylon) were regulated as new drugs. Because the amendments broadened the definition of the term "device" in section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h)), nonabsorbable surgical sutures (nylon) are now regulated as class III devices (premarket approval). As FDA explained in a notice published in the FEDERAL REGISTER of December 16, 1977 (42 FR 63472), the amendments provide transitional provisions to ensure continuation of premarket approval requirements for class III devices formerly regarded as new drugs.

A summary of the information on which FDA's approval is based is available upon request from the Hearing Clerk (address above).

OPPORTUNITY FOR ADMINISTRATIVE REVIEW

Section 515(g) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360e(g)) authorizes any interested person to petition for administrative review of FDA's decision to approve

V 4 4 / 2 1

this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of the FDA administrative practices and procedures regulations or a review of the application and FDA's action by an independent advisory committee of experts. A petition must be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petition must designate the form of review that the petitioner requests (hearing or independent advisory committee) and must be accompanied by supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing any petition, FDA will decide whether to grant or deny the petition by notice published in the FEDERAL REGISTER. If FDA grants the petition, the notice will state the issues to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may at any time on or before March 1, 1979, file with the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, four copies of each petition and supporting data and information, identified with the name of the device and the Hearing Clerk docket number found in brackets in the heading of this document. Received petitions may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: January 23, 1979.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

Health Care Financing Administration

MEDICARE AND MEDICAID HOSPICE PROJECTS

Extension of Closing Dates for Hospice Project Applications

On October 27, 1978, we announced our intention to conduct demonstration projects with organizations providing hospice services. (See 43 FR 50376) Closing dates for project applications were January 15, 1979, for applications from hospice programs, and January 29, 1979, for applications from Medicaid State agencies.

We are extending the closing date and time for such applications. In order to be considered for selection under the invitation for participation in the demonstration project, applications must be received by the Project Grants Branch at the address shown below not later than 4:30 p.m., Washington, D.C. time, Wednesday, February 28, 1979. No applications received after 4:30 p.m. on February 28, 1979, will be accepted with the exception of those sent by registered, certified, or express mail and postmarked at least 5 working days in advance of this closing date, The U.S. Postal Service postmark on the package will establish the date the application was mailed.

Please address or deliver applications to: Health Care Financing Administration, Project Grants Branch, Room 4200-C, Mary E. Switzer Building, 330 C Street, S.W., Washington, D.C. 20201.

On the outside of the envelope, clearly indicate "Hospice Project."

This address should not be altered. Additions of an employee's name or other designations can result in misrouting and delayed receipt, in which case the application will not be considered timely. Also, applicants planning to deliver applications by hand are reminded that the Project Grants Branch office will not accept any hospice project applications after 4:30 p.m. on February 28, 1979.

The original invitation and instructions for the project specified that separate applications are required for Medicare and Medicaid participation in the hospice projects. The hospice program must submit the application directly to HCFA for Medicare participation. *Only the Medicaid State agency* can legally apply to HCFA for Medicaid participation. The State agency will have to review each hospicer program application; therefore, hospice programs that have not already done so should contact the State Medicaid agency as soon as possible in order to give the State agency ample time to complete its application. Some State agencies may have already submitted their applications in accordance with the original closing date. In such cases, an amended Medicaid application may be submitted.

Dated: January 24, 1979.

LEONARD D. SCHAEFFER,
Administrator, Health Care Financing Administration.

Health Services Administration

PROJECT GRANTS FOR HOME HEALTH SERVICES

Announcement of Availability of Grants

The Health Services Administration announces that competitive applications are being accepted for home health services project grants and demonstration grants for the training of home health personnel under the authority of sections 339(a) and 339(b) of the Public Health Service Act (42 U.S.C. 255).

DEVELOPMENT AND EXPANSION OF SERVICES

Section 339(a) authorizes grants to public and private nonprofit entities for support of the development and expansion of home health services as defined in Section 1861(m) of the Social Security Act in areas in which such services are not otherwise available. A continuing resolution, H. J. Res. 1139, makes continuing appropriations for fiscal year 1979 of $5 million available for the award of grants under this section.

Regulations governing such grants, published in the FEDERAL REGISTER on June 3, 1977 (42 FR 28692), state that the Secretary of Health, Education, and Welfare will give preference to approvable applications for projects that will serve catchment areas in which a high percentage of the population is elderly, medically indigent, or both (referred to below as "preference areas") (*see*, 42 CFR 51e.107).

Applications which propose to serve preference areas, as defined in the regulations, will be considered for funding during the first of two funding cycles. Only those applications proposing to serve preference areas will be accepted for review during the first funding cycle. However, it is anticipated that during the second cycle funds will be available for both the funding of projects which propose to serve preference areas, and those which propose to serve non-preference areas. Completed applications must be received at the appropriate Regional Office by March 1, 1979. Applications must be received by the appropriate Health Systems Agency(s) (for both grant cycles) at least 60 days prior to the date applications are to be submitted to the Regional Office. Grant applications for the second funding cycle must be received at the Reginal Office by June 1, 1979.

TRAINING OF PERSONNEL

Section 339(b) of the Public Health Service Act authorizes the Secretary to make demonstration grants to public and nonprofit private entities to assist them in training professional and paraprofessional personnel to provide home health services. H. J. Res. 1139 makes a continuing appropriation of $1 million for fiscal year 1979 available for implementation of the Home Health Services Training Program. The Secretary has determined that this appropriation will be available for the award of grants to projects for training home health aides. Grant applications must be received at the Regional Office by may 1, 1979. Applications must be received by the appropriate Health Systems Agency(s) at least 60 days prior to the date applications are to be submitted to the Regional Office.

Instructions and related information may be obtained from the representatives of the Home Health Services Program at the appropriate Department of Health, Education, and Welfare Regional Office (as set forth below). Representatives may be contacted for consultation and technical assistance relative to the development of an application for each of the home health services grant authorties. Regulations which will, among other things, establish procedures for the approval of applications for training grants will be forthcoming. Until regulations are issued, all information and guidance provided is subject to the qualification that it reflects preliminary policies only; subsequent policies reflected in the regulations may require revisions in applications.

Dated: January 22, 1979.

FEDERAL COUNCIL ON THE AGING, LONG TERM CARE COMMITTEE

Meeting

The Federal Council on the Aging was established by the 1973 amendments to the Older Americans Act of 1965 (Pub. L. 93-29, 42 U.S.C. 3015) for the purpose of advising the President, the Secretary of Health, Education, and Welfare, the Commissioner on Aging, and the Congress on matters relating to the special needs of older Americans.

Notice is hereby given pursuant to the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C. app. 1, sec. 10, 1976) that the Long Term Care Committee of the Council will hold a meeting on Tuesday, February 20, 1979 from 9:30 a.m. to 12:30 pm., Room 339A, Hubert H. Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C. 20201.

The agenda will consist of a discussion of issues in long term care with representatives of Federal Departments.

Further information on the Council may be obtained from the FCA Secretariat, Federal Council on the Aging, Washington, D.C. 20201, telephone 202-245-0441. FCA meetings are open for public observation.

Dated: January 22, 1979.

NELSON H. CRUIKSHANK,
Chairman, Federal Council on the Aging.

REPORT ON BIOASSAY OF DIBUTYLTIN DIACETATE FOR POSSIBLE CARCINOGENICITY

Availability

Dibutyltin diacetate (CAS 1067-33-0) has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Testing Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay for the possible carcinogenicity of dibutyltin diacetate was conducted using Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use as a catalyst for polymerization reactions and as a stabilizer for chlorinated organic compounds. Dibutyltin diacetate was administered in the feed, at either of two concentrations, to groups of 50 male and 50 female animals of each species.

Under the conditions of this bioassay, there was no conclusive evidence for the carcinogenicity of dibutyltin diacetate in male Fischer 344 rats or B6C3F1 mice of either sex. The loss of tissues taken from high dose female rats in this bioassay precluded an evaluation of the carcinogenicity of dibutyltin diacetate to female Fischer 344 Rats.

Single copies of the report, Bioassay of Dibutyltin Diacetate for Possible Carcinogenicity (T.R. 183), are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Maryland 20014.

(Catalogue of Federal Domestic Assistance Program Number 13.393, Cancer Cause and Prevention Research.)

Dated: December 21, 1978.

[4110-08-M]

REPORT ON BIOASSAY OF P-NITROSODIPHENYLAMINE FOR POSSIBLE CARCINOGENICITY

Availability

p-Nitrosodiphenylamine (CAS 156-10-5) has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Testing Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay for the possible carcinogenicity of p-nitrosodiphenylamine was conducted using Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use as a rubber vulcanization accelerater and as an intermediate in the manufacture of other chemicals. p-Nitrosodiphenylamine was administered in the feed, at either of two concentrations to groups of 50 male and 50 female animals of each species.

Under the conditions of this bioassay, p-nitrosodiphenylamine was carcinogenic when administered in the diet to male B6C3F1 mice, causing hepatocellular carcinomas. The chemical was also carcinogenic in male Fischer 344 rats, causing liver neoplasms. No evidence was provided for the carcinogenicity of p-nitrosodiphenylamine in female B6C3F1 mice or in female Fischer 344 rats.

Single copies of the report, Bioassay of p-Nitrosodiphenylamine for Possible Carcinogenicity (T.R. 190), are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Maryland 20014.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

ILLINOIS

[Docket No. NFD-661; FDAA-3068-EM]

Emergency Declaration and Related Determinations

AGENCY: Federal Disaster Assistance Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of an emergency for the State of Illinois (FDAA-3068-EM), dated January 16, 1979, and related determinations.

DATED: January 16, 1979.

FOR FURTHER INFORMATION CONTACT:

A. C. Reid, Acting Chief, Program Support Staff, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410, (202) 634-7825.

NOTICE: Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department Housing and Urban Development Delegation of Authority, Docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974: (88 Stat. 143); notice is hereby given that on January 16, 1979, the President declared an emergency as follows:

I have determined that the impact of an abnormal accumulation of snow resulting from a series of blizzards and snowstorms in the State of Illinois is of sufficient severity and magnitude to warrant a declaration of an emergency under Public Law 93-288. I therefore declare that such an emergency exists in the State of Illinois.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285, I hereby appoint Mr. Robert E. Connor of the Federal Disaster Assistance Administration to act as the Federal Coordinating Officer for this declared emergency.

I do hereby determine the following areas of the State of Illinois to have been adversely affected by this declared emergency.

The Counties of:

Boone	Lake
Bureau	LaSalle
Carroll	Lee
Cook	McHenry
DeKalb	Ogle
DuPage	Peoria
Grundy	Putnam
Henry	Stephenson
JoDaviess	Whiteside
Kane	Will
Kendall	Winnebago

The period of emergency assistance is hereby limited to a maximum of five days, from 12:01 AM on the date of the President's declaration, January 16, 1979, except in those cases where unusual circumstances warrant extensions of time.

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

WILLIAM H. WILCOX

KENTUCKY

[Docket No. NFD-660 FDAA-568-DR]

Amendment to Notice of Major Disaster Declaration

AGENCY: Federal Disaster Assistance Administration.

ACTION: Notice.

SUMMARY: This notice amends the Notice of major disaster declaration for the Commonwealth of Kentucky (FDAA-568-DR), dated December 12, 1978.

DATED: January 11, 1979.

FOR FURTHER INFORMATION CONTACT:

A. C. Reid, Program Support Staff, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410 (202/634-7825).

NOTICE: The Notice of major disaster for the Commonwealth of Kentucky dated December 12, 1978, and amended on December 17, 20, and 31, 1978, is hereby amended to include the following area among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of December 12, 1978.

The County Of: Jefferson

Federal assistance extended under this designation will be for emergency chemical waste disposal assistance only.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Wyoming 65876]

WYOMING

Application

JANUARY 18, 1979.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Company of Colorado Springs, Colorado filed an application for a right-of-way to construct a 4½ inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 36 N., R. 93 W.,
Sec. 19, lot 2 and SW¼NE¼, SE¼NW¼.

The proposed pipeline will transport natural gas produced from the #7-19 Federal Fuller well, at a location in the SW¼NE¼ of section 19 into an existing Madden F26 natural gas pipeline located in lot 2 section 19, T. 36 N., R. 93 W., Fremont County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyoming 82301.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands
and Minerals Operations.

[4310-31-M]

Geological Survey

[General Mining Order No. 2]

Requirements for Exploration and Reclamation Plans On Federal and Indian Lands for All Minerals Except Oil and Gas, Geothermal Resources, and Coal

AGENCY: Department of the Interior, Geological Survey.

ACTION: Proposed Issuance of General Mining Order No. 2.

SUMMARY: In carrying out lease management responsibilities under provisions of the Mining Leasing Acts, the Conservation Division requires specific information in exploration and reclamation plans to assure protection of water resources, nonmineral resources, and the enyironment. Accordingly, this proposed General Mining Order establishes uniform exploration and reclamation plan requirements for operations on Federal and Indian lands for solid minerals except coal. Compliance with these requirements will be mandatory for all plans submitted on or after the effective date of this Order and will ensure that all plans are consistent with and responsive to existing regulations and terms of exploration permits for protection of water resources, other nonmineral resources, the environment, and reclamation of areas affected by operations.

DATES: In order to implement more fully the purposes and objectives of operating regulations for exploration and reclamation, all concerned parties representing the mining industry and the general public are invited and encourage to submit comments and suggested modification or amendments to the proposed General Mining Order No. 2. Written comments and suggested modifications or amendments must be received on or before April 2, 1979.

ADDRESSES: Comments should be sent to: Acting Chief, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 620, Reston, Virginia 22092.

FOR FURTHER INFORMATION CONTACT:

Mr. Andrew V. Bailey, Chief, Branch of Mining Operations, Conservation Division, U.S. Geological Survey, National Center, MS 620 Reston, Virginia 22092 (703) 860-7506.

DRAFTING INFORMATION: The primary author of this proposed Order is Mr. Brinton C. Brown, Chief, Orders Section, Conservation Division, U.S. Geological Survey, 12201 Sunrise Valley Drive, Reston, Virginia 22092, (703) 860-7506.

GENERAL MINING ORDER No. 2

Under the authority contained in 25 CFR Parts 171 and 177 and 30 CFR Part 231, operations other than casual use on Federal and Indian mining leases and permits issued under the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 et seq.); the Mineral Leasing Act for Acquired Lands of 1947 (30 U.S.C. 351 et seq.); Section 402, Reorganization Plan No. 3 of 1946 (60 Stat. 1099); and the various statutes relating to mining on Indian lands may be conducted only in accordance with a plan approved by the appropriate Mining Supervisor of the Geological Survey (GS). Casual use, as used in this Order, means activities which do not cause significant surface disturbance or damage to lands, water resources, other resources, and improvements. Such activities do not include the use of heavy equipment, explosives, or vehicular movement off established roads and trails.

Five copies of all plans shall be submitted to the appropriate Mining Supervisor showing in detail the proposed prospecting, exploration, testing, reclamation, and abandonment operation to be conducted. All plans shall be consistent with and responsive to the regulations and the requirements of the exploration permit or lease for the protection of mineral and nonmineral resources; for the proper filling, plugging, or sealing of drill holes; and for the reclamation of the surface of the lands affected by the

V 4 4 / 2 1

operation. Each plan will be evaluated on its individual merits, within the context of the provisions in the permit or lease.

If circumstances warrant or if development of an exploration and reclamation plan for the entire operation is dependent upon unknown factors which cannot, or will not, be determined except during the progress of the operation, a partial plan may be approved by the Mining Supervisor and supplemented and approved from time to time. A partial plan shall include all of the information in the outline which is available with an explanation of why the missing information is not available and when it will become available.

All data and plans submitted under this Order shall be available for inspection under the Freedom of Information Act, as amended, except geological and geophysical data and interpretations of such data, maps, trade secrets, financial information, and related files for which the permittee or lessee requests proprietary status, provided that such status is determined by the Mining Supervisor to be warranted and is approved by the Director, GS, Department of the Interior, or his designee. If any confidential information is included in the exploration plan and identified as such by the permittee or lessee, it shall be considered in accordance with provisions of 43 CFR Part 2. Proprietary information to be kept confidential shall be clearly identified by the permittee or lessee by marking the top of each page of the document with the words "CONFIDENTIAL INFORMATION." All pages so marked shall be physically separated from the other portions of the exploration and reclamation plan.

Before submitting an exploration and reclamation plan for approval, the permittee should have a brief informal meeting with the Mining Supervisor, appropriate State representative, if required, and a representative from the surface managing agency so that each can state their objectives, expectations, and answer questions that arise. After the meeting, the permittee or lessee should have a better idea of how much detail is required for each of the various parts of the plan outline.

Exploration plans may be required to be revised or supplemented at any time by the Mining Supervisor to adjust to changed conditions or to correct oversights. If the operator seeks to change an approved plan, he shall submit a written statement including appropriate maps and other information justifying the proposed revision to the Mining Supervisor for approval of the change. In a case where multiple use is involved, the appropriate Oil and Gas or Geothermal Supervisor will also participate in the approval process.

All plans submitted for approval shall show the following information as appropriate to the proposed or existing operation:

GENERAL

1. Names, addresses, and telephone numbers of persons responsible for operations under the plan to whom notices and orders are to be delivered.

2. Permit or lease identification numbers.

3. Location of operations by State, county, and either latitude and longitude to the nearest 10 seconds of the northeastern most part of the lease, or quarter-quarter section, township, and range of the northeasternmost point on the lease or permit area.

4. List MSHA, EPA, State, or other local permit numbers and any other documents necessary for operations with their status and approval dates, and a statement of other legal documents that are a basis for legal right to commence operations.

5. Identify contractors by name who will perform operations under this exploration plan.

6. Names and addresses of surface owners.

7. Status of surface use and access agreements from public right-of-ways to the lease or permit land.

EXPLORATION PLAN

A. DESCRIPTION OF THE AREA TO BE EXPLORED

(1) A brief description of topography, geology, soil characteristics, water, vegetation, fish, wildlife (particularly threatened and endangered species), and any other pertinent features that may be affected by the proposed exploration and the method for monitoring the effects.

(2) A description of the present land use within and adjacent to the area of exploration.

(3) Suitable maps and/or aerial photographs showing existing topographic, historical, cultural, and drainage features, the proposed location of drill holes, trenches, drifts or entries, access roads, and other items as required by the Mining Supervisor.

(4) Copy of archeological and cultural resource clearances, if required by the surface managing agency or other Government Agency.

B. PROPOSED EXPLORATION ACTIVITY

(1) A narrative description of the method of exploration; size, types and quantity of equipment to be used; methods of handling drilling fluids and muds, blowout preventers, character, amount and time of use of explosives or fire, including safety precautions which will be taken during their use.

(2) Estimated timetable for each phase of the work and final completion of the program.

(3) General description of the method of preparing the exploration site, e.g., excavation and stockpiling of topsoil. Include location and size of areas upon which vegetation will be removed or soil will be laid bare, grading and clearing of drill sites, excavation of reserve pits, dimensions of individual drill sites, access road building operations, and capacity, character, standards of construction and size of all structures, and facilities to be built.

(4) General description of the method of testing: metallurgical or solution mining testing (in situ), beneficiation testing or other testing.

C. ABANDONMENT AND RECLAMATION

(1) Method for plugging drill holes.

(2) Measures to be taken for surface reclamation which shall take into account the impact of the proposed operation on adjacent land uses and shall include, as appopriate:

(a) A reclamation schedule.

(b) Method of grading, backfilling, and contouring including road abandonment, cross-ditching, and access barricades, if appropriate.

(c) Method of soil preparation, fertilizer, and mulch application.

(d) Type and mixture of shrubs, trees, grasses, or legumes to be planted.

(e) Method of planting, including quantity and spacing.

D. MEASURES FOR PREVENTING POLLUTION

(1) *Surface Waters.* A description of the surface waters of the area and planned controls during construction and operation for compliance with all applicable Federal and State water quality standards to prevent degradation of streams, ponds, lakes, rivers, wetlands, or other surface waters, including:

(a) Avoidance of cuts or fills near or in streams or wetlands which will result in siltation or debris accumulation.

(b) Planned crossings of perennial streams, lakes, wetlands, and/or rivers, including crossing methods.

(c) Planned road surfacing material including status of roads, either permanent or temporary.

(d) A plan for prevention of siltation of surface waters by using water bars, catch-basins, plant cover, and other methods.

(2) *Groundwater.* An assessment of the probable impacts of the anticipated operation upon the groundwater quality and quantity of the area and plans to minimize the impacts.

(3) *Other.* Measures to be taken to prevent or control fire, soil erosion, pollution of air, damage to fish and wildlife or their habitat and other natural resources, hazards to public health and safety, damage to land improvements, and damage to scenic, historical cultural, and archeological values.

E. MAPS

All maps and aerial photos submitted in connection with exploration plans shall include the following information as appropriate to the proposed operation:

(1) Mine name, if applicable; permittee's or lessee's name; permit or lease number or numbers; county and either secton, township(s), and range(s), or latitude and longitude; and permit or lease boundary lines.

(2) Map scale, register of map extension dates, and true north designation.

(3) Legend describing all symbols on map.

(4) Public survey of land lines and corners. If the project includes an exploratory mine, show distance and bearing from mine opening to appropriate section corner. Also include location of pilot plant or testing sites, if any.

(5) Locations and surface elevations of drillholes.

(6) Identification number, symbol, or letter and location of each survey station.

(7) The mine workings (if applicable) and conceptual mine plans (if available).

(8) Topographic, historical, cultural, and natural drainage features; roads and vehicular trails; name of watershed and location of perennial and intermittent surface streams or tributaries.

(9) Location of all roads and surface structures to be built for exploration project. Show existing roads that will be used, proposed drill hole access roads that must be constructed, if any, and pipelines or other facilities.

W. A RADLINSKI.
Acting Director.

KNOWN RECOVERABLE COAL RESOURCE AREA

McCallum, Colo., Revision

Effective May 25, 1978, and pursuant to authority contained in the Act of March 3, 1879 (43 U.S.C. 31), as supplemented by Reorganization Plan No. 3 of 1950 (43 U.S.C. 1451, note), 220 Departmental Manual 2, Secretary's Order No. 2948, and section 8A of the Mineral Leasing Act of February 25, 1920, as added by section 7 of the Federal Coal Leasing Amendments Act of 1975 (P.L. 94-377, August 4, 1976), Federal Lands within the State of Colorado have been classified as subject to the coal leasing provisions of the Mineral Leasing Act of February 25, 1920, as amended (30 U.S.C. 201). The name of the area, effective date, and total acreage involved are as follows:

(6) COLORADO

Revised McCallum (Colorado) Known Recoverable Coal Resource Area (KRCRA); May 25, 1978, 179,242 acres were added within the KRCRA. Total area now classified for leasing is 226,015 acres.

A diagram showing the boundaries of the area classified has been filed with the appropriate land office of the Bureau of Land Management. Copies of the diagram and land description may be obtained from the Conservation Manager, Central Region, U.S. Geological Survey, Stop 609, Box 25046, Federal Center, Denver, Colorado 80225.

Dated: January 22, 1979.

Office of Surface Mining Reclamation and Enforcement

AVAILABILITY OF MINE PLAN

AGENCY: Office of Surface Mining Reclamation and Enforcement.

ACTION: Major Modification of Existing Coal Mining and Reclamation Plan.

SUMMARY: Pursuant to § 211.5(b) of Title 30, CFR, Notice is hereby given that the Office of Surface Mining has received the following mine plan for a coal mining and reclamation operation on Federal coal lands:

LOCATION OF LANDS

Applicant—Western Energy Company.
Mine Property Name—Colstrip Mine "Area B".
State—Montana.
County—Rosebud.
OSM Reference Number—MT 0002-6.
General Description of Affected Lands—853.4 Acres in Sec. 4, 9 & TIN in R41E of the Montana Principal Meridian.

This application is available for public review in the library of Region V Offices of the Office of Surface Mining, Room 270, Post Office Building, 1823 Stout Street, Denver, Colorado.

This Notice is issued at this time for the convenience of the public. The OSM has not yet determined whether the plan is adequate and may, during the course of its reviews, request additional information. Any additional information so obtained will also be available for public review. Prior to a final decision on this mine plan, the Office of Surface Mining will issue a Notice of Pending Decision pursuant to § 211.5(c)(2) of Title 30, Code of Federal Regulations. Copies of the mining plan are also being sent to the offices of the Bureau of Land Management and the Geological Survey in Billings, Montana.

DATES: Comments on or objections to the plan should be received by the Region V office on or before March 1, 1979.

ADDRESSES: Comments should be sent to the Regional Director, Office of Surface Mining and Reclamation and Enforcement, Region V, 1823 Stout Street, Denver, Colorado 80202.

PAUL L. REEVES,
Deputy Director.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural development Act, as amended, 7 USC 1924(b), 1932, or 1942(b).

The Act requires the secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice. Comments received after the two-week period may not be considered. Send comments to: Administrator, employment and Training Administration, 601 D Street, N.W., Washington, D.C. 20213.

Signed at Washington, D.C. this 29th day of January 1979.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

APPLICATIONS RECEIVED DURING THE WEEK ENDING JANUARY 23, 1979

Name of applicant and location of enterprise	Principal product or activity
The Eggink Company Greeley, Colorado.	Farm machinery and other metal products.

Mine Safety and Health Administration

[Docket No. M-78-131-C]

JEWELL RIDGE COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Jewell Ridge Coal Corporation, Lebanon, Virginia 24266 has filed a petition to modify the application of 30 CFR 75.1405 (automatic couplers) to its No. 11 mine in Buchanan County, Va. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

(1) Soon after the purchase of haulage cars for the petitioner's mine in 1964, safety problems with their automatic chains and handles occurred. For example, the chains would become inoperable because of stiff turning conditions.

(2) At that time, the handles and bars on the haulage cars were removed and replaced with a hand bar. A hand bar is on each piece of haulage equipment and at all loading points.

(3) The petitioner contends that the hand bars now in place are more effective and safer than automatic couplers. Automatic couplers are to prevent miners from going between haulage cars. But the structure of the mine, due to a number of sharp turns, would necessitate that miners place themselves between cars if automatic couplers are mandated. The hand bars prevent such occurrences.

(4) The petitioner concludes that their hand bars will achieve no less protection than that provided by the standard.

REQUEST FOR COMMENTS

Persons interested in this petition may furnish written comments on or before March 1, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: January 23, 1979.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

[FR Doc. 79-3125 Filed 1-29-79; 8:45 am]

[4510-43-M]

[Docket No. M-78-126-C]

WESTMORELAND COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Westmoreland Coal Company, P.O. Box 185, Quinwood, West Virginia, 25981, has filed a petition to modify the application of 30 CFR 75.1100 (fire fighting equipment) to its No. 7 Mine in Nicholas County, W. Va. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

(1) Due to sub-zero temperatures during the winter months, the water line provided for the No. 1 Belt at the petitioner's mine is subject to freezing from the drift inby for a distance of 4,100 feet.

(2) A freeze in the line would render the fire-fighting system ineffective and useless during an emergency and result in a diminution of safety.

(3) As an alternative, the petitioner proposes to keep this protion of the water line dry during the winter months.

(4) In an emergency, the miner stationed at the No. 2 Belt Head, a distance of 4,100 feet from the drift, would be told by the telephone to open a valve at that point to fully charge the system with water.

(5) The petitioner states that this alternative will achieve no less protection than that provided by the standard.

REQUESTS FOR COMMENTS

Persons interested in this petition may furnish written comments on or before March 1, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: January 23, 1979.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

[FR Doc. 79-3126 Filed 1-29-79; 8:45 am]

[4510-26-M]

Occupational Safety and Health Administration

UTAH STATE STANDARDS

Approval

1. *Background.* Part 1953 of title 29, Code of Federal Regulations, prescribes procedures under Section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State Plan which has been approved in accordance with Section 18(c) of the Act and 29 CFR Part 1902. On January 10, 1973, notice was published in the FEDERAL REGISTER (38 FR 1178) of the approval of the Utah Plan and the adoption of Subpart E to Part 1952 containing the decision.

The Utah Plan provides for the adoption of Federal Standards as State Standards by:

1. Advisory Committee recommendation.

V 4 4 / 2 1

2. Publication in newspapers of general/major circulation with a 30-day waiting period for public comment and hearing(s).

3. Commission order adopting the standards and designating an effective date.

4. Providing certified copies of Rules Regulations or Standards to the Office of the State Archivist.

Section 1952.113 of Subpart E sets forth the State's schedule for adoption of Federal Standards. By letter dated December 14, 1978, from Ronald L. Joseph, Administrator, Utah Occupational Safety and Health Division, to Curtis A. Foster, Regional Administrator, and incorporated as part of the Plan, the State submitted rules and regulations concerning 29 CFR 1910.1018 for Occupational Exposure to Inorganic Arsenic, 43 FR 19584, Friday, May 5, 1978 and 43 FR 28472, Friday, June 30, 1978. These standards, which are contained in the Utah Occupational Safety and Health Rules and Regulation for General Industry, were promulgated per the requirements of Utah Code annotated 1953, Title 63-46-1, and in addition, published in newspapers of general/major circulation throughout the State. No public comment was received and no hearings held. The Standard for Occupational Exposure to Inorganic Arsenic was adopted by the Industrial Commission of Utah, Archives File Number 2998 on October 27, 1978, pursuant to Title 35-9-6 Utah Code Annotated 1953.

2. *Decison.* The State submission having been reviewed in comparison with the Federal Standards, it has been determined that the State Standards are identical to the Federal Standards and accordingly should be approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Room 1554, Federal Office Building, 1961 Stout Street, Denver, Colorado, 80294; Utah State Industrial Commission, UOSHA Offices at 448 South 400 East, Salt Lake City, Utah, 84111; and the Technical Data Center, Room N2439R, 3rd Constitution Avenue, N.W., Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Utah State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

The Standards were adopted in accordance with the procedural requirements of State law which permitted public comments, and further public participation would be repetitious.

This decision is effective January 30, 1979.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at Denver, Colorado, this 4th day of January 1979.

CURTIS A. FOSTER,
Regional Administrator.

Office of the Secretary

APPLICATION FOR WORKER ADJUSTMENT ASSISTANCE

Investigations Regarding Certifications of Eligibility

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified as set forth below. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 12, 1979.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 12, 1979.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 24th day of January 1979.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-4377; TA-W-4377A]

BRENTWOOD SPORTSWEAR INC.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4377 and TA-W-4377A: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 14, 1978 in response to a worker petition received on November 9, 1978 which was filed by the Knitgoods Union, International Ladies' Garment Workers' Union on behalf of workers and former workers producing men's sweaters, knit shirts and bathing trunks at Brentwood Sportswear, Incorporated, Philadelphia, Pennsylvania. The investigation revealed that the plant primarily produces men's sweaters and knit shirts. The investigation was expanded to include the New York, New York sales office of Brentwood Sportswear, Incorporated.

The Notice of Investigation was published in the FEDERAL REGISTER on November 24, 1978 (43 FR 55013). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Brentwood Sportswear, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' sweaters, knit cardigans and pullovers increased from 20.4 million units in 1975 to 26.5 million units in 1976 and to 28.3 million units in 1977. Imports increased to 33.2 million units in the first three quarters of 1978 as compared to 22.6 million units in the first three quarters of 1977.

U.S. imports of men's and boys' knit sport and dress shirts, excluding T-shirts, increased from 66.2 million units in 1975 to 74.0 million units in 1976 and to 75.2 million units in 1977. U.S. imports increased to 82.5 million

V 4 4 / 2 1
JA 30 79
UMI

units in the first three quarters of 1978 as compared to 54.6 million units in the same period of 1977.

A Departmental survey conducted with customers of Brentwood Sportswear, Incorporated revealed that major customers reduced their purchases of men's sweaters and knit shirts from Brentwood and increased their purchases of imported sweaters and knit shirts in 1977 compared to 1976 and in the first eight months of 1978 compared to the like period of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's sweaters and knit shirts produced at the Philadelphia, Pennsylvania facility of Brentwood Sportswear, Incorporated contributed importantly to the decline in sales or production and to the total or partial separation of workers of that facility and of the New York, New York sales office of Brentwood Sportswear, Incorporated. In accordance with the provisions of the Act, I make the following certification:

All workers of the Philadelphia, Pennsylvania facility and the New York, New York sales office of Brentwood Sportswear, Incorporated who became totally or partially separated from employment on or after October 27, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

HARRY J. GILMAN,
Supervisory International Economist, Office of Foreign Economic Research.

[FR Doc. 79-3127 Filed 1-29-79; 8:45 am]

[4510-28-M]

[TA-W-4329]

BRODY INC. OF DEKALB

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4329: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 6, 1978 in response to a worker petition received on November 1, 1978 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing women's fall and spring coats at Brody Incorporated of Dekalb, Dekalb, Illinois.

The Notice of Investigation was published in the FEDERAL REGISTER on November 17, 1978 (43 FR 53851-52). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Brody Incorporated of Dekalb, its customers, the National Cotton Council of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses' and children's coats and jackets increased both absolutely and relative to domestic production in 1977 compared to 1976. Imports declined slightly, in absolute terms, in the first three quarters of 1978 compared to the same period in 1977.

The Department conducted a survey of a sample of Brody Incorporated of Dekalb's customers representing a significant proportion of sales in 1976 and in 1977. The survey revealed that some customers decreased their purchases from the subject firm while increasing purchases of imports in 1977 compared to 1976 and in the first three quarters of 1978 compared to the same period in 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the women's coats produced at Brody Incorporated of Dekalb, Dekalb, Illinois contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Brody Incorporated of Dekalb, Dekalb, Illinois engaged in employment related to the production of women's coats who became totally or partially separated from employment on or after October 30, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 22nd day of January 1979.

JAMES F. TAYLOR,
Director, Office of Management Administration and Planning.

[FR Doc. 79-3128 Filed 1-29-79; 8:45 am]

[4510-28-M]

[TA-W-4305]

CHICAGO RIVET AND MACHINE CO., COLD HEADING AND DRILLING DEPARTMENTS

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4305: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on October 30, 1978 in response to a worker petition received on October 25, 1978 which was filed by the International Association of Machinists and Aerospace Workers on behalf of workers and former workers producing rivets and automatic rivet setting equipment at the Bellwood, Illinois plant of Chicago Rivet and Machine Company. The investigation revealed that the petition was filed only on behalf of workers engaged in the production of rivets in the Drilling and Cold Heading Departments of the Bellwood plant.

The Notice of Investigation was published in the FEDERAL REGISTER on November 7, 1978 (43 FR 51866). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Chicago Rivet and Machine Company, its customers, (manufacturers), the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales and/or production.

None of the customers of Chicago Rivet who were surveyed purchased imported rivets in 1976, 1977 or the January-October 1978 period. Production performed at the Bellwood plant is being transferred to other domestic facilities of Chicago Rivet and Machine Company.

CONCLUSION

After careful review, I determine that all workers of the Chicago Rivet and Machine Company, Cold Heading and Drilling Departments, Bellwood, Illinois are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 25th day of January 1979.

C. MICHAEL AHO,
Director, Office of Foreign Economic Research.

[TA-W-4160]

CLINTON SHIRT CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the department of Labor herein presents the results of TA-W-4160: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 14, 1978 in response to a worker petition received on September 13, 1978 which was filed on behalf of workers and former workers producing shirts, skirts and sundresses for little girls at Clinton Shirt Corporation, Clinton, Kentucky. Clinton Shirt Corporation is a subsidiary of Garan, Incorporated.

The Notice of Investigation was published in the FEDERAL REGISTER on September 26, 1978 (43 FR 43587). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Clinton Shirt Corporation, Garan, Incorporated, their customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed in the course of the investigation indicated that declines in production at Clinton Shirt corporation resulted from production shifts among several plants of the parent firm, Garan, Incorporated. Production also changed from a relatively simple to a more complex garment.

The major product line of the Clinton Shirt Corporation plant consists of girls' knit shirts, sizes 4 to 14. Girls' shirts in infant and toddler sizes were also produced at the plant in 1976 and 1977. Production of shirts in infant and toddler sizes fell to insignificant levels at the Clinton Shirt Corporation plant during the first nine months of 1978. Girls' woven shirts and sundresses were also produced at the plant in 1978, at insignificant levels.

Clinton Shirt Corporation is part of the girls' Knit Shirt Division of Garan, Incorporated. This division expanded from two plants to three in 1978. In addition, two new plants were opened to produce infant and toddler shirts, the first late in 1976 and the second in October of 1977.

Garan, Incorporated's largest customer did not import girls' knit shirts.

CONCLUSION

After careful review, I determine that all workers of Clinton shirt corporation, Clinton, Kentucky, are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 22nd day of January 1979.

HARRY J. GILMAN,
Supervisory International Economist, Office of Foreign Economic Research.

[TA-W-4265]

COOL-RAY, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein , resents the results of TA-W-4265: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on October 17, 1978 in response to a worker petition received on October 13, 1978 which was filed on behalf of workers and former workers purchasing frames, shaping lenses and assembling sunglasses at Cool-Ray, Incorporated, Chelsea, Massachusetts.

The notice of Investigation was published in the FEDERAL REGISTER on October 27, 1978 (43 FR 50271). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Cool-Ray, Incorporated, its customers, the Optical Manufacturers Association, the Sunglass Association of America, the U.S. Department of Commerce, the U.S. International Trade Commision, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of sunglasses increased from 75.6 million pairs in 1976 to 86.8 million pairs in 1977, and increased from 65.8 million pairs in the first nine months of 1977 to 73.5 million pairs in the first nine months of 1978.

The Department conducted a survey of Cool-Ray, Incorporated's customers. The survey revealed that some customers increased purchases of imported sunglasses during the period January through September 1978 compared with the same period in 1977. Some customers who increased import purchases during that period, reduced purchases from Cool-Ray, Incorporated during the same period.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with sunglasses produced at Cool-Ray, Incorporated, Chelsea, Massachusetts contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Cool-Ray, Incorporated, Chelsea, Massachusetts engaged in employment related to the production of sunglasses who became totally or partially separated from employment on or after October 10, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of January 1979.

C. MICHAEL AHO,
Director, Office of Foreign Economic Research.

tions regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the act.

Investigations were initiated on November 13, 1978 and November 16, 1978 in response to worker petitions received on November 6, 1978 and November 14, 1978 which were filed by the Knitgoods Union, International Ladies' Garment Workers' Union on behalf of workers and former workers producing men's sweaters and men's knit shirts at Eastern Knitting Mills, Blenheim, New Jersey and producing men's sweaters and knit shirts at Somerset Knitting Mills, Incorporated, Philadelphia, Pennsylvania. The investigation revealed that Somerset produces only men's sweaters.

The Notices of Investigation were published in the FEDERAL REGISTER on November 24, 1978 (43 FR 55011, 55012-13). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Eastern Knitting Mills, Somerset Knitting Mills, Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That sales or production, or both, of the firm or subdivision have decreased absolutely.

Although Eastern Knitting Mills and Somerset Knitting Mills, Incorporated are two separate companies under common ownership, sales data is not kept by individual company. The combined sales of Eastern and Somerset increased from 1976 to 1977 and increased in the January through October period of 1978 compared to the same period of 1977.

Production of sweaters and knit shirts at Eastern Knitting Mills increased in quantity in 1977 compared to 1976 and in the first ten months of 1978 compared to the like period of 1977.

Production of sweaters at Somerset Knitting Mills increased in quantity in the January through November period of 1978 compared to the same period of 1977.

CONCLUSION

After careful review, I determined that all workers of Eastern Knitting Mills, Blenheim, New Jersey and Somerset Knitting Mills, Incorporated, Philadelphia, Pennsylvania are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 22nd day of January 1979.

[TA-W-3907]

EDMOS CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3907: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 26, 1978 in response to a worker petition received on June 22, 1978 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing double knit fabrics at Glen Cove, New York plant of Edmos Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on July 7, 1978 (43 FR 29364-5). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Edmos Corporation, its customers, the American Textile Manufacturers Institute, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Imports of finished fabric, including woven and knitted fabric of cotton, wool and man-mades increased in the first nine months of 1978 compared to the same period in 1977. However, the ratio of imports to domestic production has been below 2 percent for the last several years.

The Department of Labor conducted a survey of Edmos Corporation's customers. None of the customers surveyed decreased purchased of double knit fabrics from Edmos Corporation while increasing purchases of imported double knit fabrics. Most of the customers surveyed did not purchase any imported double knit fabrics.

CONCLUSION

After careful review, I determine that all workers of Edmos Corporation, Glen Cove, New York, are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 25th day of January 1979.

C. MICHAEL AHO,
Director, Office of Foreign Economic Research.

EDMOS CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4116: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on August 28, 1978 in response to a worker petition received on August 28, 1978 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing double knit fabrics at the Whitney, South Carolina plant of Edmos Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on September 8, 1978 (43 FR 40070). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Edmos Corporation, its customers, the American Textile Manufacturers Institute, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Imports of finished fabric, including woven and knitted fabric of cotton, wool and man-mades increased in the first nine months of 1978 compared to the same period in 1977. However, the ratio of imports to domestic production has been below 2 percent for the last several years.

The Department of Labor conducted a survey of Edmos Corporation's customers. None of the customers surveyed decreased purchases of double knit fabrics from Edmos Corporation while increasing purchases of imported double knit fabrics. Most of the customers surveyed did not purchase any imported double knit fabrics.

CONCLUSION

After careful review, I determine that all workers of Edmos Corporation, Whitney, South Carolina, are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 25th day of January 1979.

[TA-W-4479]

ERNST STRAUSS, INC.

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4479: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 6, 1978 in response to a worker petition received on November 27, 1978 which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing women's coats at Ernst Strauss, Los Angeles, California. The investigation revealed that the plant primarily produces women's sportswear.

The Notice of Investigation was published in the FEDERAL REGISTER on December 19, 1978 (43 FR 59165-66). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Ernst Strauss, Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certificate of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

The average number of workers increased in 1977 compared with 1976 and increased in the first eleven months of 1978 compared with the like period of 1977. Average quarterly employment increased in every quarter when compared with the same quarter of the previous year from the first quarter of 1977 through the third quarter of 1978. Production workers are paid on a piece-work basis. Payroll data indicates that the adjusted average monthly wages have not decreased significantly. There is no immediate threat of separation of workers at this plant.

CONCLUSION

After careful review, I determine that all workers of Ernst Strauss, Incorporated, Los Angeles, California are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

[TA-W-4026]

FARMLAND INDUSTRIES, INC.

Negative Determination Regarding Application for Reconsideration

By letters of November 20, 1978, and January 3, 1979, a union official of the Oil, Chemical and Atomic Workers International Union requested administrative reconsideration of the Department of Labor's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance in the case of workers and former workers of Farmland Industries, Inc., Fort Dodge, Iowa. The determination was published in the FEDERAL REGISTER on October 27, 1978, (43 FR 50263).

Pursuant to 29 CFR 90.18(c), reconsideration may be granted under the following circumstances:

(1) If it appears, on the basis of facts not previously considered, that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justifies reconsideration of the decision.

The union official cites that imports of anhydrous ammonia from Russia and Mexico have caused separations from employment at Farmland Industries, Inc. He further claims that the Department's denial notice did not take into account certain projections of data, namely, (1) had imports of anhydrous ammonia in the first six months of 1978 been extended to the full year then such imports would have increased by 102,000 tons over that in 1977, and (2) had the customer survey covered all of Farmland's customers the "contributed importantly" test would have been met.

The official asserts, through personal testimony, that imports of anhydrous ammonia from Russia and Mexico occurred in 1978. The findings of the investigation, nevertheless, indicated such imports are already included in the U.S. aggregate import statistics which declined absolutely and relatively in the first half of 1978 compared to the same period in 1977, from 614,000 tons to 590,000 tons and from 7.2 percent to 6.9 percent of production, respectively. Simply to extend the half-year industry and import data to the full year, as he suggests, would be a questionable procedure.

In the Department's survey of Farmland's customers, 40 customers reported representing 30 percent of Farmland's sales in 1977. Only one small customer switched to imports of anhydrous ammonia in 1977 and his decline in purchases from Farmland was by a de minimus amount. This customer represented only one percent of Farmland's sales in 1977 and in the first six months of 1978. Not one of the other customers surveyed imported in either 1977 or 1978.

CONCLUSION

After review of the application and the investigative file, I conclude that there has been no error or misinterpretation of fact or misinterpretation of the law which would justify reconsideration of the Department of Labor's prior decision. The application is, therefore, denied.

[TA-W-4421]

FAVORITE FOOTWEAR, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4421: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiation on November 27, 1978 in response to a worker petition received on November 20, 1978 which was filed by the United Shoe Workers of America, Local Council 13 on behalf of workers and former workers producing hard sole and soft sole men's slipper shoes at Favorite Footwear, Incorporated, Long Island City, New York. The investigation revealed that the plant also produces boys' children's and ladies' slippers.

The Notice of Investigation was published in the FEDERAL REGISTER on December 5, 1978 (43 FR 56952). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Favorite Footwear Incorporated, its customers, the American Footwear Industries Association, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of house slippers increased from 23.9 million pairs in 1975 to 28.0 million pairs in 1976, and decreased slightly to 27.8 million pairs in 1977 while remaining well above the 1973-1975 levels. The ratio of imports to domestic production increased from 33.9 percent in 1975 to 43.1 percent in 1976, and decreased slightly to 42.1 percent in 1977 while remaining well above the 1973-1975 levels.

The Department of Labor conducted a survey of Favorite Footwear's customers. In 1977 and 1978, many of the customers surveyed decreased purchases of slippers from Favorite Footwear and increased purchases of imported slippers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's, boys', ladies' and children's slippers produced at Favorite Footwear, Incorporated, Long Island City, New York contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Favorite Footwear, Incorporated, Long Island City, New York who became totally or partially separated from employment on or after October 14, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

JAMES F. TAYLOR,
Director, Office of Management Administration and Planning.

[4510-28-M]

[TA-W-4407]

FISHER CONTROLS CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4407: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 21, 1978 in response to a worker petition received on November 14, 1978 which was filed by the United Automobile, Aerospace, and Agricultural Implement Workers of America on behalf of workers and former workers producing control valves and electonic components at the Marshalltown, Iowa plant of Fisher Controls Company

The Notice of Investigation was published in the FEDERAL REGISTER on December 5, 1978 (43 FR 56951-56952). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Fisher Controls Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Fisher Controls consists of two operating subdivisions: E.P.C. and V.R.C. Total sales and production of Fisher Controls increased in 1977 compared to 1976. Sales and production of E.P.C. increased in 1977 compared to 1976 and in January-October 1978 compared to the same period of 1977. V.R.C. produces automatic control valves, field mounted instrumentation and pressure and gas regulators.

Only two of the surveyed customers of Fisher Controls purchase imported automatic control valves, instrumentation, or regulators and these involved very minor purchases. Customers indicated that their requirements for control valves were determined by the level of domestic and foreign capital investment, which had decreased in 1978 compared to 1977. The high technical standards and the requirement for a service network limits import competition in the domestic market.

CONCLUSION

After careful review, I determine that all workers of the Marshalltown, Iowa plant of Fisher Controls Company are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of January 1979.

C. MICHAEL AHO,
Director, Office of Foreign Economic Research.

[4510-28-M]

[TA-W-4371]

NEW YORK IMPERIAL FOUNDATIONS, INC.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4371: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 13, 1978 in response to a worker petition received on November 6, 1978 which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing brassieres and girdies.

The Notice of Investigation was published in the FEDERAL REGISTER on November 24, 1978 (43 FR 55012). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of New York Imperial Foundations, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. With respect to workers producing girdles and without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The ratio of imports to domestic production is small. In 1977 the ratio was 6.8 percent.

A survey of the major customers of New York Imperial Foundations, Incorporated revealed that none of the customers purchased imported girdles in 1977 and 1978.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. With respect to workers producing brassieres, it is concluded that all of the requirements have been met.

U.S. imports of brassieres, bralettes, and bandeaux increased from 8,751 thousand dozens in 1976 to 9,507 thousand dozens in 1977 and increased from 7,067 thousand dozens in the first three quarters of 1977 to 7,918 thousand dozens in the same period of 1978. The ratio of imports to domestic production increased from 51.7 percent in 1976 to 59.3 percent in 1977.

A survey of the major customers of New York Imperial Foundations, Incorporated revealed that some customers increased purchases of imported brassieres in the first eleven months of 1978 compared to the same period of 1977, while decreasing purchases from the subject firm.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with brassieres produced at New York Imperial Foundations, Incorporated, Brooklyn, New York contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act. I make the following certification.

All workers of New York Imperial Foundations, Incorporated, Brooklyn, New York engaged in employment related to the production of brassieres who became totally or partially separated from employment on or after December 31, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

HARRY J. GILMAN,
Supervisory International Economist, Office of Foreign Economic Research.

[TA-W-4388]

PHILIP LINGERIE, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4386: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 14, 1978 in response to a worker petition received on November 13, 1978 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' lingerie at Philip Lingerie, Incorporated, Paterson, New Jersey. The investigation revealed that the plant primarily produces women's sportswear, robes and swimwear.

The Notice of Investigation was published in the FEDERAL REGISTER on November 24, 1978 (43 FR 55013). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Philip Lingerie, Incorporated, its manufacturers, the National Cotton Council of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Manufacturers accounting for all of the production of Philip Lingerie, Incorporated did not import any finished garments and did not use foreign contractors to produce the garments in 1977 and 1978.

CONCLUSION

After careful review, I determine that all workers of Philip Lingerie, Incorporated, Paterson, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

HARRY J. GILMAN,
Supervisory International Economist, Office of Foreign Economic Research.

[TA-W-4460]

REVERE TEXTILE PRINTS, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4460: investigation regarding

V 4 4 / 2 1

certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 30, 1978 in response to a worker petition received on November 6, 1978 which was filed by the Amalgamated Clothing and Textile Workers' Union of America on behalf of workers and former workers producing printed fabric at Revere Textile Prints, Incorporated, Sterling, Connecticut.

The Notice of Investigation was published in the FEDERAL REGISTER on December 8, 1978 (43 FR 57692-3). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Revere Textile Prints, Incorporated, the U.S. Department of Commerce, the U.S. Iternational Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That sales or production, or both, of the firm or subdivision have decreased absolutely.

Since Revere Textile Prints, Incorporated operated as a commission printer and finisher of fabric, sales are equal to production. Sales, as recorded in quantity of square yards of finished fabric, increased during the period January through November 1978 as compared to the same period in 1977. In addition, sales increased quarterly as compared to each previous quarter during the period October 1, 1977 through September 30, 1978.

Concurrent with these increases of sales, employment at Revere increased during the period January through November 1978 as compared to the same period in 1977.

CONCLUSION

After careful review, I determine that all workers of Revere Textile Prints, Incorporated, Sterling, Connecticut are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

JAMES F. TAYLOR,
Director, Office of Management Administration and Planning.

[TA-W-4432]

SADDLEMAKERS MANUFACTURERS, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4432: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 27, 1978 in response to a worker petition received on November 20, 1978 which was filed on behalf of workers and former workers producing leather belts and leather and fabric combination handbags at Saddlemakers Manufacturers, Inc., Worcester, Massachusetts. The investigation revealed that the plant primarily produces handbags.

The Notice of Investigation was published in the FEDERAL REGISTER on December 5, 1978 (43 FR 56952-56953). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Saddlemakers Manufacturers, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of handbags increased in quantity from 1976 to 1977 and continued to increase during the first three quarters of 1978 compared to the same period of 1977. The ratio of imports to domestic handbag production increased from 111.1 percent in 1976 to 116.6 percent in 1977.

Customers of Saddlemakers who were surveyed reduced purchases of handbags from Saddlemakers while increasing purchases of handbags from foreign sources.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with handbags produced at Saddlemakers Manufacturers, Incorporated, Worcester, Massachusetts contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Saddlemakers Manufacturers, Incorporated, Worcester, Massachusetts who became totally or partially separated from employment on or after March 17, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

HARRY J. GILMAN,
Supervisory International Economist, Office of Foreign Economic Research.

[TA-W-4226]

STANDARD PATTERN CO., INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4226: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 29, 1978 in response to a worker petition received on September 29, 1978 which was filed on behalf of workers and former workers producing papers, junks, soles-cuts, woods, die tins, marker papers and fiber markers, (shoe patterns) at Standard Patent Company, Inc., Manchester, New Hampshire. The investigation revealed that the corporate name is Standard Pattern Company, Inc. The investigation further revealed that the firm produces an insignificant amount of bottomstock.

The Notice of Investigation was published in the FEDERAL REGISTER on October 17, 1978 (43 FR 44795-6). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Standard Pattern Company, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

J A 3 0 7 9 UMI

Standard Pattern Company, Inc., Manchester, New Hampshire primarily produces papers, junks, woods, die tins, marker papers, and fiber markers.

The petitioners allege that increased imports of non-rubber footwear contributed importantly to the decline in sales or production and to the separations of workers producing shoe patterns at Standard Pattern Company, Inc. Manchester, New Hampshire.

Imports of non-rubber footwear cannot be considered to be like or directly competitive with shoe patterns. Imports of shoe patterns must be considered in determining import injury to workers producing shoe patterns.

U.S. imports of shoe patterns were negligible in 1976, 1977, and during the first three quarters of 1978.

Customers of Standard Pattern Company, Inc. who were surveyed indicated that they did not import shoe patterns in 1976, 1977 or during the first three quarters of 1978.

CONCLUSION

After careful review, I detemine that all workers of Standard Pattern Company, Inc., Manchester, New Hampshire are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-4263]

TENNESSEE HANDBAGS, INC.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4263: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on October 16, 1978 in response to a worker petition received on October 11, 1978 which was filed on behalf of workers and former workers producing ladies' handbags at Tennessee Handbags, Incorporated.

The Notice of Investigation was published in the FEDERAL REGISTER on October 27, 1978 (43 FR 50269). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Tennessee Handbags, Incorporated, The National Handbag Association, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. The Department's investigation revealed that all of the requirements have been met.

Imports of ladies' handbags increased from 90.2 million units in 1976 to 92.8 million units in 1977. Imports increased from 67.2 million units in January through September of 1977 to 104.9 million units for the same period of 1978. The ratio of imports of domestic production increased from 111.1 percent in 1976 to 116.6 percent in 1977.

Tennessee Handbags, Incorporated began importing ladies' handbags in April 1977. Tennessee Handbags, Inc. increased imports in the second and third quarters of 1978 compared to the same quarters of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the ladies' handbags produced at Tennessee Handbags, Incorporated, Dandridge, Tennessee contributed importantly to the decline in production and to the separation of workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of Tennessee Handbags, Incorporated, Dandridge, Tennessee engaged related to the production of ladies' handbags who became totally or partially separated from employment on or after October 6, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

JAMES F. TAYLOR,
Director, Office of Management, Adminstration, and Planning.

[TA-W-4471]

W. F. HOFFORD, INC.

Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on December 6, 1978 in response to a worker petition received on November 20, 1978 which was filed on behalf of workers and former workers producing insulated underwear and full fashioned sweaters at W. F. Hofford, Inc., Weissport, Pennsylvania.

The investigation revealed that workers and former workers also produced leotards and bodysuits.

The Notice of Investigation was published in the FEDERAL REGISTER on December 19, 1978 (43 FR 59165-59166). No public hearing was requested and none was held.

W. F. Hofford, Incorporated, Weissport, Pennsylvania is a successor firm to Lafemme Knitting Mills, Incorporated, Weissport, Pennsylvania (TA-W-3157). All workers of Lafemme Knitting Mills, Incorporated were certified eligible to apply for adjustment assistance on August 11, 1978. Since the intent of the certification under TA-W-3157 is to cover workers separated from Lafemme Knitting Mills, Incorporated and its successor firm W. F. Hofford, Incorporated, this investigation would serve no purpose. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 23rd day of January, 1979.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-4216]

WALDON MANUFACTURING CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4216: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 26, 1978 in response to a worker petition received on September 22, 1978 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing men's trousers at Waldon Manufacturing Company in Walnut, Mississippi. The investigation revealed that the plant also produces men's walk shorts. Waldon Manufacturing Company is a subdivision of McGregor-Doniger, Incorporated.

The Notice of Investigation was published in the FEDERAL REGISTER on October 10, 1978 (43 FR 46591-46592). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officals of McGregor-Doniger, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

V 4 4 / 2 1

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' dress and sport trousers and shorts increased from 55,508 thousand units in 1975 to 73,209 thousand units in 1976 and to 76,419 thousand units in 1977. Imports increased to 48,690 thousand units in the first six months of 1978 compared to 33,860 thousand units in the same period of 1977. The ratio of imports to domestic production was 38.0 percent in 1977.

Customers of McGregor-Doniger, Incorporated have shown an increasing reliance on foreign sources to fulfill their demand for men's dress slacks and walking shorts during the first three quarters of 1978 compared to the same period of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's dress slacks and walking shorts produced at Waldon Manufacturing Company, in Walnut, Mississippi contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Waldon Manufacturing Company in Walnut, Mississippi who became totally or partially separated from employment on or after September 21, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[4510-28-M]

[TA-W-4358]

WILLOFORM MANUFACTURING CO., INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4358: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 7, 1978 in response to a worker petition received on November 6, 1978 which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers at Willoform Manufacturing Company, Incorporated, New York, New York. The investigation revealed that the plant primarily produces brassieres and girdles.

The Notice of Investigation was published in the FEDERAL REGISTER on November 17, 1978 (43 FR 53852). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Willoform Manufacturing Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of brassieres, bralettes, and bandeaux increased from 8,751 thousand dozen in 1976 to 9,507 thousand dozen in 1977 and increased from 7,067 thousand dozen in the first three quarters of 1977 to 7,918 thousand dozen in the first three quarters of 1978.

U.S. imports of corsets and girdles increased from 231 thousand dozen in 1976 to 269 thousand dozen in 1977 and increased from 188 thousand dozen in the first three quarters of 1977 to 294 thousand dozen in the first three quarters of 1978.

The Department conducted a survey of some of Willoform Manufacturing Company's customers and it was found that some of these customers had decreased purchases from Willoform and increased purchases of imports.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with brassieres and girdles produced at Willoform Manufacturing Company, Incorporated, New Yord, New York contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Willoform Manufacturing Company, Incorporated, New York, New York engaged in employment related to the production of brassieres and girdles who became totally or partially separated from employment on or after November 2, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of January 1979.

HARRY J. GILMAN,
Supervisory International Economist, Office of Foreign Economic Research.

[TA-W-4217]

WINDON MANUFACTURING CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4217: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 26, 1978 in response to a worker petition received on September 22, 1978 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing men's sport shirts at Windon Manufacturing Company in Winona, Mississippi. Windon Manufacturing Company is a subdivision of McGregor-Doniger, Incorporated.

The Notice of Investigation was published in the FEDERAL REGISTER on October 10, 1978 (43 FR 46591-46592). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of McGregor-Doninger, Incorporated, its customers, the U.D. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' woven dress, business, sport and uniform shirts increased from 65,004 thousand units in the first six months of 1977 to 76,216 thousand units in the first six months of 1978. The ratio of U.S. imports to domestic production increased from 36.8 percent in 1975 to 53.9 percent in 1976 and to 54.7 percent in 1977.

Windon Manufacturing Company was a wholly owned subsidiary of McGregor-Doniger, Incorporated producing men's sport shirts for sale by the parent firm. McGregor-Doniger, Incorporated increased its purchases of imported men's sport shirts 100 percent in 1977 as compared to 1976 and by 176.8 percent in the first eight months of 1978 over the same period of 1977. Company imports were an increasing proportion of total sales in the first six months of 1978 compared to the first six months of 1977.

A Departmental survey of the customers of McGregor-Doniger, Incorporated revealed that several customers increased their purchases of imported men's sport shirts and decreased purchases from McGregor-Doniger, Incorporated from 1976 to 1977 and during the first nine months of 1978 compared to the like period of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's sport shirts produced at Windon Manufacturing Company in Winona, Mississippi contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Windon Manufacturing Company in Winona, Mississippi who became totally or partially separated from employment on or after September 21, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22d day of January 1979.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[4510-29-M]

Pension and Welfare Benefit Programs

CLASS EXEMPTION FOR CERTAIN TRANSACTIONS INVOLVING EMPLOYEE BENEFIT PLANS AND BROKER-DEALERS (PROHIBITED TRANSACTION EXEMPTION 79-1)

AGENCY: Department of Labor.

ACTION: Grant of class exemption.

SUMMARY: This exemption allows persons who serve as fiduciaries for employee benefit plans to effect securities transactions for those plans under certain circumstances. In the absence of this exemption, the effecting of such transactions might be prohibited by the Employee Retirement Income Security Act of 1974 (hereinafter the Act or ERISA) and the Internal Revenue Code of 1954 (hereinafter the Code). The exemption will replace a temporary exemption which was granted in October, 1975 and which will expire on April 30, 1979 pursuant to an extension being granted herein. The permanent exemption contains a number of conditions not present in the temporary exemption now in effect.

EFFECTIVE DATES: January 30, 1979, as to the temporary exemption; May 1, 1979, as to the permanent exemption.

FOR FURTHER INFORMATION CONTACT:

Federic G. Burke, Office of Fiduciary Standards, Division of Exemptions, Pension and Welfare Benefit Programs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210, (202) 523-8195. This is not a toll free number.

SUPPLEMENTARY INFORMATION: On November 24, 1978 notice was published in the FEDERAL REGISTER (43 FR 55005) that the Department of Labor and the Internal Revenue Service (hereinafter collectively referred to as the Agencies) had under consideration a proposed class exemption from the restrictions of section 406 of the Act and from the taxes imposed by section 4975 (a) and (b) of the Code by reason of section 4975(c)(1) of the Code.[1] The proposed class exemption, requested in applications filed by the Securities Industry Association (SIA)[2] and by seven broker-dealer firms,[3] applies to certain securities transactions effected on behalf of employee benefit plans by persons who are fiduciaries for those plans. As further discussed below, a temporary class exemption which is now in effect and which permits such transactions is due to expire on February 1, 1979.[4]

Upon consideration of the comments and testimony received, the Department of Labor (the Department) is adopting the proposed exemption with certain modifications, including an extension of the existing temporary exemption. Discussed below are the exemption's provisions and the major public comments.

I. DESCRIPTION OF THE EXEMPTION

Until April 30, 1979, the effecting of securities transactions on behalf of employee benefit plans by persons who are fiduciaries with respect to those plans will be covered by paragraph I(a) of Prohibited Transaction Exemption 75-1. That exemption, as original adopted, was to expire on May 1, 1978[5], was extended by Prohibited Transaction Exemption 78-10 until February 1, 1979,[6] and is being further extended in the accompanying exemption. The existing temporary exemption authorizes persons who ordinarily effected brokerage and incidental clearance, stettlement or custodial services on May 1, 1975 to continue to furnish those services until April 30, 1979.

Unlike the temporary exemption contained in paragraph I(a) of Prohibited Transaction Exemption 75-1, the permanent class exemption being adopted herein generally conditions the effecting or executing[7] of securities transactions on behalf of a plan upon a person's complying with a number of specific requirements designed to protect the interests of plan participants and beneficiaries.[8] The exemption is available to fiduciaries except, generally, when a person is a fiduciary with respect to a plan by reason of being a plan trustee or plan administrator, or is an employer of any employees covered by the plan. To engage in brokerage transactions on

[1] The exemption was proposed, public comments were received and a public hearing was scheduled in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75-26, 1975-1 C.B. 722. However, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) as implemented by Executive Order 12108 (44 FR 1065, January 3, 1979) transferred the authority of the Secretary of the Treasurey to issue exemptions of the type requested to the Department of Labor. Thus, the Department of labor alone conducted the public hearing and is issuing this exemption.

[2] The SIA filed Exemption Application Nos. D-1026 and D-1114.

[3] Exemption Application No. D-1176.

[4] The Agencies in their notice published on November 24, 1978 allowed 30 days for written comments to be filed. The 30-day period, which is shorter than those the Agencies have provided in the past for some proposed exemptions, was deemed appropriate in view of the desirability of deciding whether any further relief should be granted in this area before the existing exemption expired.

[5] 40 FR 50845, October 31, 1975.

[6] 43 FR 32196, July 25, 1978. Although Prohibited Transaction Exemption 78-10 was adopted after May 1, 1978, it was made retroactive to that date.

[7] In most cases, a broker-dealer availing itself of the permanent class exemption will be required to comply with Rule 11a2-2(T) of the Securities and Exchange Commission (SEC) under the Securities Exchange Act of 1934. That rule permits a broker-dealer to effect, but not to execute, securities transactions for accounts which it manages. Although the Department has not distinguished between the broker-dealer services of effecting and executing securities transactions in its exemption, a broker-dealer acting pursuant to the exemption in many cases will be able only to effect, and not to execute, for a plan because of the limitation set out in Rule 11a2-2(T).

[8] As discussed below, the limitations in the exemption are not applicable with respect to certain individual retirement accounts ("IRAs") or plans in which the only participants are partners or sole proprietors, or the spouses of such persons (certain "Keogh" or "H.R. 10" plans). Furthermore, as also discussed below, certain of the limitations are not applicable when a fiduciary is acting to "recapture" brokerage commissions for the plan.

JA30 79 UMI

V 4 4 / 2 1

behalf of a plan, a broker must receive written authorization, expressly permitting such activities, from a plan fiduciary who is independent of the broker. In most cases, the written authorization cannot be effective for more than one year unless the independent fiduciary approves its continuance in writting at least annually. Where the authorization takes the form of a contract that is binding upon the plan, the plan is required to have the right to terminate the contract, without penalty, upon not more than 60 days' notice to the broker.

The exemption places on the broker a duty to provide any information which it reasonably believes to be necessary, and which is reasonably available, to enable the independent plan fiduciary to determine whether to grant or renew an authorization to provide both advisory and brokerage services. Moreover, the independent fiduciary has the right to request, and the broker has the obligation to supply, any additional information reasonably necessary and available to make this determination.

The exemption also requires a person effecting or executing securities transactions on behalf of a plan to disclose periodically certain additional information to the authorizing plan fiduciary. Specifically, the broker must supply the fiduciary with a report not less frequently than every three months disclosing the total of all transaction-related charges incurred by the plan in connection with transactions in which the broker performed any of the functions permitted by the exemption. That report must also indicate the portion of the total transaction related charges the broker has retained and the portion it has paid to other persons for execution or other services. The report must also contain a statement that makes clear that brokerage commissions in the United States are not fixed by any stock exchange or by any other authority and are subject to negotiation. In addition, the independent plan fiduciary must be furnished with information concerning transaction-related commission rates which the broker anticipates assessing in the coming three months for transactions of the type normally entered into by the plan.

II. Discussion of Comments Received

A. *Unconditional Exemption for Certain Individual Retirement Accounts and Certain Keogh Plans.* The Department's regulation 29 CFR § 2510.3-2(d)(1) provides that Title I of ERISA is inapplicable to individual retirement accounts ("IRAs") as defined in section 408(a) of the Code, so long as certain conditions are met.[9] Furthermore, under the Department's regulation 29 CFR § 2510.3-3(b), "Keogh" or "H.R. 10" plans which cover only partners or sole proprietors, or their spouses, are not considered employee benefit plans within the meaning of section 3(3) of Title I of ERISA. Therefore, the providing of brokerage services to such IRAs and Keogh plans is not subject to the prohibited transaction provisions of Title I of ERISA, even in the absence of an exemption. Such IRAs and Keogh plans, however, remain subject to the prohibited transaction provisions of Title II of ERISA. Thus, persons who are fiduciaries and who provide brokerage services to the above-described IRAs or Keogh plans would have to comply with the conditions of the exemption, notwithstanding the inapplicability of Title I, unless additional relief is granted.

Certain commentators suggested that, where a fiduciary is performing brokerage services for an IRA or Keogh plan which is not subject to Title I of ERISA, the conditions of the exemption are not necessary to protect plan participants, because the participants are directly exercising control over their accounts. It was also argued that to require that those conditions be met would result in unnecessary costs being incurred by these IRAs and Keogh plans for brokerage services.[10] The Department believes that these arguments have merit and is amending the exemption to provide that certain conditions need not be met when persons provide brokerage services to an IRA of the type described in 29 CFR § 2510.3-2(d)(1) or to a Keogh plan of the type described in 29 CFR § 2510.3-3(b). It should be noted, however, that the conditions of the exemption must be met where a fiduciary performs brokerage services for any other type of IRA or Keogh plan.

(B) *Recapture Exception.* As noted above, the relief provided in the exemption being adopted is generally not available where the person providing brokerage services is a fiduciary by reason of being a plan trustee or administrator or an employer of employees covered under the plan.[11]

In the preamble to the proposed exemption, the Agencies noted that restricting the exemption in this manner would have the effect of preventing a plan administrator, plan trustee or employer from using a related broker-dealer organization to "recapture" brokerage commissions for the plan; that is, to perform brokerage services for the plan and to return or credit to the plan all profit earned in connection with such services. In response to the Agencies' request for comment concerning the practice of recapture in situations covered by the proposed exemption, certain commentators indicated that some investment managers, who are plan administrators, plan trustees, or employers of employees covered by a plan currently attempt to recapture brokerage commissions for employee benefit plans by offsetting against management fees charged those plans any allocable profit earned by the investment manager (or its broker-dealer subsidiary) in connection with effecting or executing brokerage transactions for those plans. The Department has decided to modify the condition making the exemption inapplicable to such persons by providing that a person who is a fiduciary by reason of being a trustee or administrator of a plan or an employer of employees covered by the plan may effect and execute securities transactions for the plan so long as it is doing so for the purpose of recapturing brokerage commissions for the plan.[12] The Department is also modifying the exemption to provide that, to the extent a fiduciary is acting to recapture brokerage commissions it need receive only an initial, and not an annual, written authorization from an independent plan fiduciary to engage in such activity.[13] A person providing brokerage services pursuant to a recapture arrangement, however, must comply with the other conditions contained in this exemption.

C. *Broker-Dealer Sponsored Plans.* One commentator argued that a broker-dealer should not be prevented from effecting and executing securities transactions on behalf of a plan covering its employees. The commentator contended that an employer's inability under the exemption to provide services to a plan which it sponsors would lead to increased costs for such a plan since it would be forced to arrange for brokerage services with outside organizations. The Department is not persuaded that this argument has merit. Broker-dealers may perform brokerage services for plans which they sponsor when such services are undertaken to recapture commissions, when such services are provided in accordance with the provisions of section 408(b)(2) or when such services are performed at no charge to the plan. On the other hand, the Department has determined that permitting the plan sponsor to supply brokerage services to the plan at a profit is unjustifiable, since an employer of employees covered by a plan, like a plan trustee or plan administrator might have a relationship to, and influence over, a plan that would not be limited sufficiently by the presence of an independent plan fiduciary.

D. *Form Used For Written Authorization.* After noting some similarity between the written authorization required by the Department in this exemption and an authorization required by the Securities and Exchange Commission (SEC) under Rule 11a2-2(T), one commentator asked if one document may be employed to satisfy the requirements of both agencies. Such procedure would satisfy the applicable condition of the class exemption, so long as the document used contains all information required by the exemption.
